2. Project Approach: Describe your design concept, proposed timeline, and choice of materials. Maximum 800 words.

Design concept:

The design concept focuses on transforming ordinary storm drains into visually compelling public art pieces that raise awareness about ocean pollution. The artwork is intended to draw attention first through unexpected alert and beauty, then deliver a deeper environmental message. Inspired by the creeks of Malibu flowing into the Pacific Ocean, the design depicts a transition from natural, vibrant water ecosystems to polluted runoff carrying waste into the ocean.

By replicating the original sidewalk pattern on both sides of the storm drain, the design creates a seamless visual transition that suddenly shifts into an unexpected scene. What appears at first to be a continuation of the pavement transforms into a "drop" into Malibu's creeks, lagoons, and ocean. The interruption of the familiar sidewalk becomes intentional and symbolic. This illusion draws viewers in, using contrast and perspective to capture attention in an otherwise overlooked space. As the eye moves closer to the drain, the imagery reveals flowing water alongside waste floating debris, emphasizing the hidden journey of urban runoff.

The artistic style will balance realism and stylization. Fluid lines and color gradients will evoke the movement of water, while sharper, more defined shapes will represent trash to create contrast and tension within the composition. The goal is to create a piece that is visually engaging from a distance, but more impactful upon closer inspection.

Ultimately, the concept is both aesthetic and educational. Each drain tells one chapter of the same story. Viewed individually, each piece stands alone as a work of art. Viewed as a series, they form a complete portrait of what is at stake when we treat our streets as a dumping ground and what is possible when we choose to protect what we have.

I am committed to open communication with City staff throughout every phase and welcome collaboration on any design modifications that better serve the community and the city's vision for this project.

Timeline:

Despite the design elements and level of detail desired to properly depict the scenery, I am certain that the project can be within 120 days. This ensures sufficient opportunity for careful planning, precise execution, and high-quality finishing, while also allowing an extra 20% of the maximum allowable duration of 150 days for necessary considerations such as surface preparation, weather conditions, material curing times, and unexpected delays due to acts of nature or other uncontrollable circumstances.

Choice of materials:

Water-based exterior acrylic paint + UV-resistant sealer
Low/zero VOC formulas (like Sherwin-Williams or Golden OPEN Acrylics)
Cleans up with water only — no toxic solvents
Durable enough for pavement with a good sealer coat

Widely accepted for public art projects like this
Topped with: A water-based polyurethane or acrylic sealer (traffic-grade) to protect the art and lock in pigment so nothing leaches into runoff.

3. Project Proposal: Include visual representations of your storm drain designs. These should convey your intended vision for each piece (final designs will be approved by City staff in collaboration with the selected artist before installation).

The size and quality of the paper, as well as the mixed medium, are not intended to reflect the final level of detail or craftsmanship. Rather, these pieces serve to communicate the overall concept and visual direction. For a more accurate representation of the quality and scope of my work, please refer to my social media portfolio.

#1 Cross Creek Road (Bus Stop):

The visual representation of a hole in the paved sidewalk, bordered by caution-yellow tape, invites viewers to pause and take a closer look. This illusion creates a sense of depth, transforming the sidewalk into an unexpected window into a lagoon. Within this scene, creeks feed into the lagoon, illustrating the natural flow of water as it continues toward the ocean. A coyote is shown drinking at the water's edge, while an egret flies overhead, adding movement and emphasizing the presence of local fauna and flora.

Adjacent to this illusion, the street level transitions into a painted creek that appears to carry water from the lagoon toward the ocean. Along this path, an overturned bucket of trash sits near the flowing water, with debris on the verge of being swept away. The current visually suggests how easily waste is picked up and transported through the drainage system. As the viewer's eye follows the movement of the water, it leads toward the beach, where scattered plastic bottles have already accumulated. Together, these elements create a continuous visual narrative, connecting everyday urban spaces to coastal ecosystems. (This submission is a preliminary sketch developed using watercolor. The size and quality of the paper 18" x 24", 80 lb)
\

#2 Heathercliff Road (Point Dume Village):

The visual representation of a hole in the concrete sidewalk invites viewers to pause and look closer. This illusion creates a sense of depth, transforming an ordinary surface into an unexpected window into a coastal environment. Within this scene, a seal moves toward the open ocean, guiding the viewer's eye through the composition, while a dolphin roams the shallow coastal blues. Right next to the hole in the sidewalk, the street level is turned into a flood of water which carries visible waste—such as plastic bottles and waste into the drain. The movement of the water visually connects the street to the underwater coastal scene below, reinforcing the idea that anything entering the drain will ultimately end up in the ocean. This juxtaposition of polluted runoff at street level and thriving marine life below highlights the direct impact of human behavior on coastal ecosystems. (This submission is a preliminary sketch developed using watercolor. The size and quality of the paper 9" x 12", 50 lb)

#3 Morning View Drive and Philip Avenue:

The visual representation of a creek, featuring a Steelhead trout swimming through clear water, transforms the storm drain cover into a striking scene that serves as both a point of beauty and a reminder of endangered species impacted by human activity. The presence of the trout highlights the fragility of aquatic ecosystems and the consequences of pollution on their survival.

At street level, the surrounding surface is reimagined as a flowing flood of water carrying visible waste—such as plastic bottles and debris—directly into the drain and beyond. This contrast between the clean, thriving creek environment and the polluted urban runoff emphasizes the direct connection between human behavior and environmental degradation.

Further along the composition, the creek stream and the polluted street runoff visually converge, suggesting their shared path toward the ocean, even though the ocean itself is not depicted in the sketch, I'm considering to add it if the allowed space is adequate. This implied continuation reinforces the idea that what enters the storm drain does not disappear, but instead travels onward, ultimately impacting larger ecosystems. (This submission is a preliminary sketch developed using watercolor. The size and quality of the paper 9" x 12", 50 lb)

#4 Trancas Canyon Park (cul-de-sac):

The visual representation of a hole in the concrete sidewalk, bordered by an overturned bucket of trash on one side and a rattlesnake on the other, invites viewers to pause and look closer. This illusion creates a strong sense of depth, transforming the sidewalk into an unexpected window into a lagoon. Within this scene, creeks flow into the lagoon, illustrating the natural movement of water as it continues toward the ocean. A coyote drinks at the water's edge, while an egret flies overhead, adding motion and emphasizing the presence of local flora and fauna.

The juxtaposition of elements reinforces the message. The overturned bucket suggests how easily waste can enter the water system, while the rattlesnake introduces a sense of caution. Symbolically, the snake represents the hidden dangers of pollution —threats that may not be immediately visible but carry serious consequences for the environment. At the same time, it serves as a real-world reminder to park visitors of the shared habitat they are entering, where wildlife such as rattlesnakes naturally exist. (This submission is a preliminary sketch, initially developed using colored pencils and later layered with watercolor. Also note that the shape of the Trancas Canyon Park drain is not represented correctly on the rendering, however the idea and the design can be adjusted to fit within the shape of the drain. The size and quality of the paper 9" x 12", 50 lb)

4. Spill Response Plan: Explain how you will prevent paint or other materials from entering the storm drain in the event of a spill and describe your method for disposing of wastewater in an environmentally responsible manner. Maximum 300 words.

Environmentally responsible practices will be strictly followed throughout the project. All paints and materials will be contained within a 36-inch kiddie pool during application to prevent accidental spills and protect the surrounding area.

To manage wastewater, an environmentally safe disposal method will be used. This includes the use of the Golden Crash Paint Solids Waste Water Cleaning System Kit, which allows for effective separation of paint solids from water. The system facilitates both rapid settling and fine filtration using a specialized paper filter to capture remaining particles.

Collected paint solids and used filters will be disposed of in accordance with standard solid waste guidelines. The remaining filtered water will not be discharged into storm drains; instead, it will be poured onto a controlled, prepared surface and allowed to evaporate safely.

These measures ensure that no harmful materials enter the stormwater system, aligning the project's execution with its environmental message.

5. Resume and References: Provide a current resume and contact information for three (3) professional references.

Resume attached as a separate document.
References:
#1. Daniella Arnolds: [redacted]
#2. Anny Klymenko (Commission): [redacted]
#3. Margaret Oakley (Art Associate at Santa Monica College): [redacted]

6. Image References: Submit digital images of relevant artwork (minimum of 2, maximum of 5). Images must be labeled and not exceed 40 MB in total. Include an image list with the following information for each piece: image number, title, media, dimensions, date, location (if applicable), description, and any awards received.

Relevant artwork:
#1. "Ice Flower on Lechuza Beach", Acrylic on Canvas, 12" x 16", August 2025, Malibu CA.
#2. "Lechuza Beach", Watercolor and Gouache on Paper, 7 1/2" x 11", May 2025, Malibu CA.
#3. "Lechuza Beach", Ink on Paper, 18" x 24", January 2025, Malibu CA.
#4. "Lotus Flower and Dragonfly", Watercolor and Gouache on Paper, 15" x 20", March 2025, Malibu CA.
#5. "Sycamore Cove Beach (work in progress)", Oil on canvas, 30" x 40", unfinished (the closer rocks and the water is a work in progress), Malibu CA.

7. Artist Agreement: The selected artist must execute and comply with the City's standard Artist Agreement, provided as Attachment 1 of this Request for Qualifications.

Attached to email.

HELEN DEBOER

PHONE [redacted] CELL • E-MAIL [redacted] • LOS ANGELES, CA

OBJECTIVE

To obtain a public art commission where I can create visually compelling, site-specific work that engages the community, enhances public spaces, and raises environmental awareness through thoughtful design and storytelling.

EXPERIENCE

2017 – 2019 Fox, Digital Consumer Group Los Angeles, CA

Sr. Technical Lead

- Developed and maintained multiple micro-services for DCG-API platform to support Fox's various online video streaming platforms (VOD, Live, feeds).
- Lead migration and upgrade of NOSQL database system leveraging ElasticSearch.
- Architected and maintained feeds to distribute Fox content to various 3rd parties (Apple, Google, Amazon).
- Maintained and supported infrastructure including local, dev, QA, and test environments utilizing Docker, AWS Lambda, DynamoDB, Consul, Nginx, MongoDB, Terraform, and ElasticSearch.
- Performed code reviews and provided architectural analysis.
- Mentored and oversaw engineers on the team, were responsible to provide quarterly feedback about performance of developers.
- Responsible for uptime, live site issues, and bug maintenance on a variety of microservices.
- Provided architectural improvements to resolve performance issues.
- Developed and maintained scripts with bash, nodejs for continuous integration to run lint, flow, unit tests, end to end tests using Postman, and to generate coverage report with nyc, codecov, istanbul.
- Lead development of library to standardize and integrate unit tests to improve coverage using mocha, chai, mock, nock, sinon.

2016 - 2016 Bloomnation SantaMonica, CA

Sr. Software Engineer

- Lead development of Selenium test suite with Maven and Browserstack integration.
- Extended Magento grid and implemented new reporting application leveraging new Solr framework.
- Provided architectural improvements to resolve performance issues by creating proper MySQL indexes, solidifying Solr implementation and standardizing the Redis layer to use caching rules that worked with the business use cases.
- Responsible for resolution of day to day production issues and related Jiras.

ATTACHMENT 3

2007 – 2016 Disney ABC Television Group, ABC/ABCFamily Burbank, CA

Sr. Software Engineer

- Rearchitected ABC's voting application to support high traffic events including Dancing with the Stars and the Oscars utilizing MongoDB, Spring MVC, Spring Security, JMS and integration with Facebook and Disney ID authentication.
- Led team of vendors to build the Watch Disney app on Android platform. Provided architecture, support, and documentation to deliver the application on an extremely tight timeline.
- Led the Oscars development team - overseeing the web and facebook applications during implementation for the nominations and Oscar show events.

- Helped architect and implement a Watch SDK for streaming VOD and live video playback with analytic tracking, authentication and server side ad delivery on iOS and Android platforms.
- Instituted and designed automated testing for Android and iOS applications using appium, Junit, selenium and Java.
- Developed node.js system to provide real-time event notifications for Oscar.com live streaming app.
- Architected, designed and developed new products using a variety of technologies including: PHP, Java, JMS, Spring, JSP, Soap, and other RESTful technologies.
- Architected, designed and developed a scalable voting system for Dancing With The Stars using Amazon AWS (SimpleDB, SQS) services and PHP/MySQL.
- Designed and developed highly scalable real-time backend solution for bracket poll voting using PHP and DynamoDB.
- Designed and developed the backend voting system for high traffic Oscars game. Leveraged tomcat service with Spring/JMS/Memcached and Cassandra for storage using Hector/Thrift libraries.
- Developed site-wide search application leveraging solr backend
- Lead developer and architect in migrating ABC and ABC Family websites to AWS architecture. Migrated sites from legacy GoPublish CMS to Alfresco CMS.
- Led migration of ABCFamily sites from Drupal/MySql to ABC Zend Framework PHP platform.

2006 – 2007 Walt Disney Internet Group, WDPRO Glendale, CA

Software Engineer

- Maintained and supported Dev environment, setup GoPublish CMS sites for new projects, upgraded GoPublish and libraries to newer versions.
- Shared time as Operations Engineer (support and resolve live site issues).
- Supported and oversaw outsourced projects (setup vendors dev environment, manages daily builds to dev and qa).
- Worked on various applications for advanced projects (addig new and modifying existing functionality).
- Improved existing services and applications for multiple wdpro sites.

2004 – 2006 Walt Disney Internet Group, WDPRO North Hollywood, CA

Sr. QA Engineer

- Performed Shared WebOperations (editing properties and pushing templates, jars, properties, middleware and database from DEV to QA Environment).
- Worked with web developers, product managers, and producers to resolve issues.
- Tested client server and web applications.
- Tested Flash and Shokwave game applications.
- Worked with outsourced team of Finland developers in effort to complete a project.
- Web site and financial application such as booking clients testing.
- Developed and executed test scripts and test cases in compliance with requirements and wireframes.
- Lead multiple projects; attend project related and QA Stuff Meetings.
- Developed a tool for internal QA use.

2004 – 2004 United Online Canoga Park, CA

QA Engineer

- Tested client server application.
- Developed test scripts and test cases.
- Perform execution of automated scripts for regression testing
- Worked with development team members and product managers to resolve issues.

2004 – 2004 DHV Industries Bakersfield, CA

Network Engineer

- Established and maintained a TCP/IP LAN for a small business office (Windows 2003 Small Business Server with five 2000/XP clients star-configuration).
- Configuration DHCP, DNS, intranet.
- Firewall, load switches and shared T1 connection, printer, fax.
- Migrated and updated QuickBooks database (importing individual transactions).

EDUCATION

2023–2025 Santa Monica College Santa Monica, CA

- Art and Philosophy.

1999–2001 Santa Monica College Santa Monica, CA

- Computer Science.
- Java and Advanced Java, Oracle, Visual Basic, HTML

1999–1999 STS College Los Angeles, CA

- Courses for Mercury Interactive products.

1994–1998 Art School Ukraine

- Courses for Mercury Interactive products.

SKILLS

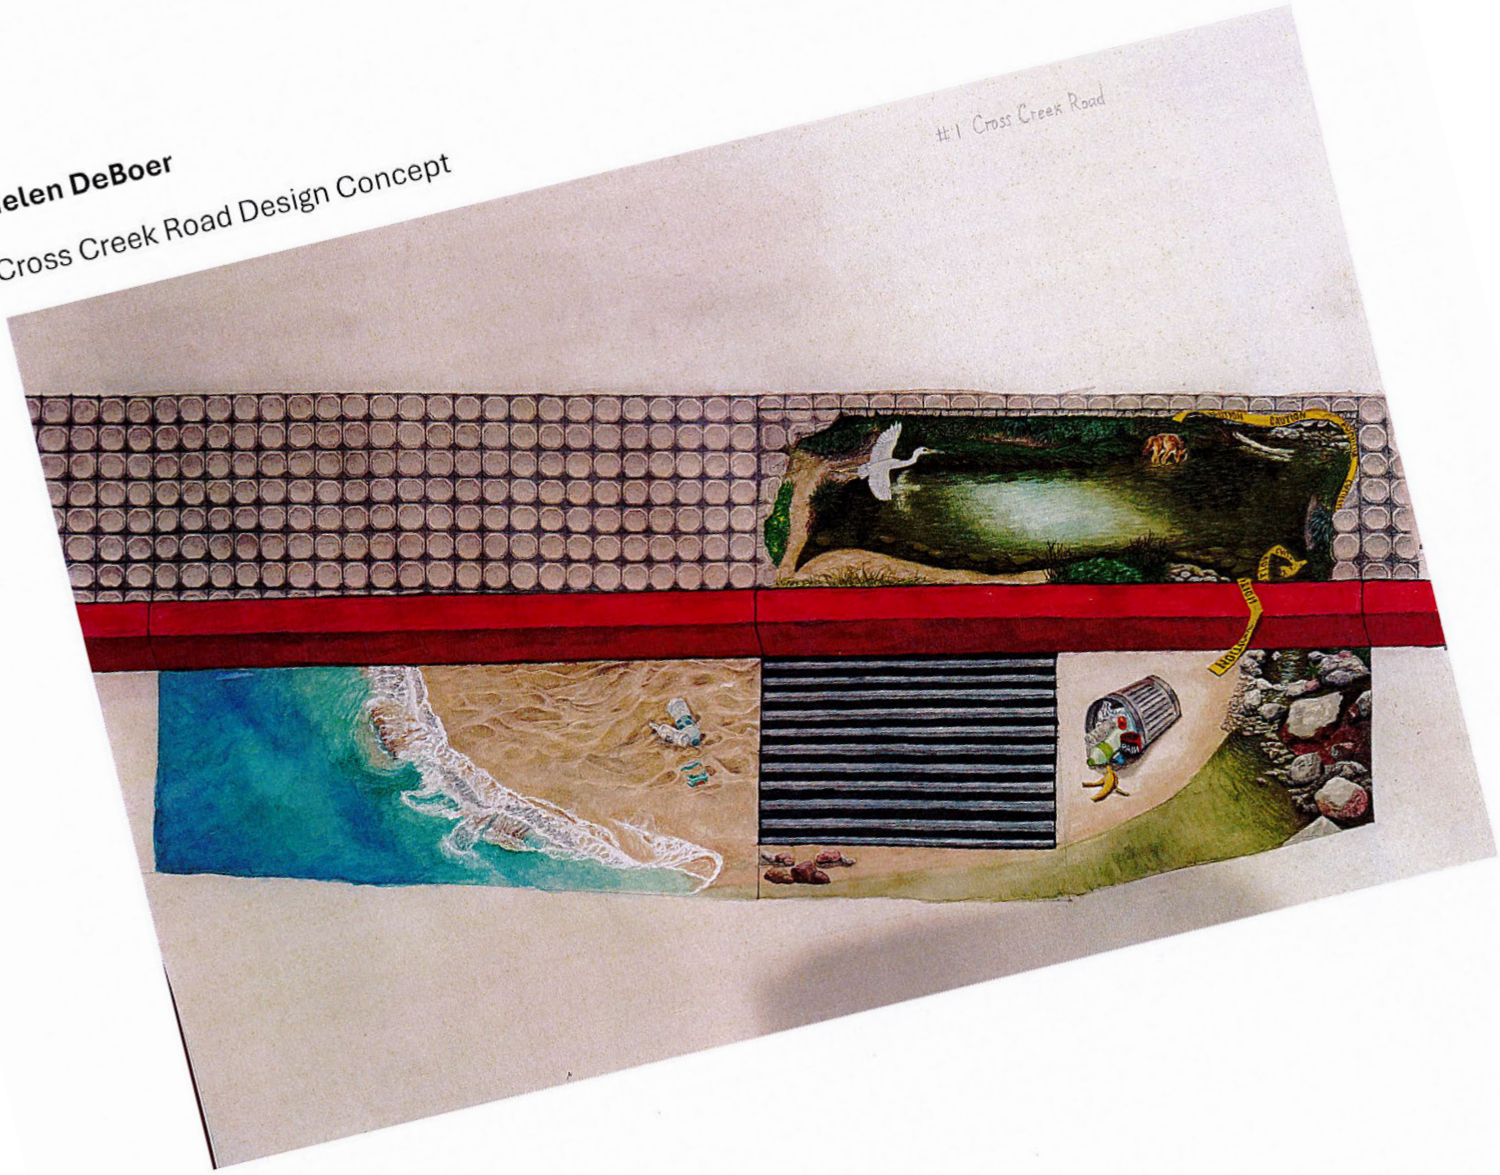

- JAVA, Objective C, PHP, node.js, HTML, XML, JavaScript, JQuery, Teaservlet
- DB: Mongo, SQL, MySql, Redis, Oracle, Cassandra, AWS DynamoDB, AWS SimpleDB.
- Apache, Spring, Hector/Thrift, RPC, Haproxy, Memcached, AWS (EC2, CloudFormation, ElastiCache, RDS, SimpleDB, S3, CloudWatch, SQS)
- CMS: Drupal, Magento, Alfresco, Gopublish
- OS: Mac, Unix/Linux, Solaris and Windows.
- P4, SVN, GitHub
- Shell/Bash

http://www.instagram.com/threelineart

Project Approach:

One of my first priorities in this design was to represent the many different biomes and creatures that exist within the ocean, not as a single, generalized idea of "the sea," but as a collection of different environments. I believe awareness is the first step toward change, and I wanted each section of the piece to hold its own identity while still feeling connected through style. By representing the individual delicate ecosystems, the work encourages viewers to learn more about the different biomes of the ocean, and recognize that the ocean is not one uniform space. Even a brief moment of recognition can influence stewardship in daily actions.

I am creating the illusion that the portals are constructed from layered paper, drawing from my experience building paper puppets and portaled backgrounds. That background allows me to translate the tactile illusion to a large painted form. It gives the impression that the ground itself is peeling back or opening, as if the viewer is standing at the edge of something deeper. Rather than feeling like a flat image placed onto the surface, the space works with each area, to bring the wonder of the deep ocean to someone's daily commute. The softly shadowed blocks of color reinforce this sense of depth while also serving a practical purpose. They avoid unnecessary detail that would degrade quickly, and it is a statement against plastic pollution and a reminder to use more sustainable options that

wouldn't hurt the ocean. The simplicity is deliberate to hold attention without being overwhelming.

The four biomes I chose to represent are the coral reef, the open ocean, the tide pools, and the estuaries. Each area carries its own ecosystem. From the intricate life of coral reefs to the vast expanse of the open water, the variety is palpable. Tide pools offer a closer, more intimate encounter, while estuaries exist in a state of transition, where freshwater and saltwater meet. My connection to these environments comes from years of traveling throughout the United States with my family, where I had the opportunity to experience a wide range of coastal landscapes. Those experiences shaped how I view natural spaces not as just scenery, but as places to protect and admire. This piece is a way of translating that perspective into something public and accessible.

Because the mural is located adjacent to a roadway, it will inevitably be exposed to dirt, loose debris, and the wear and tear that comes from constant use. With that in mind, I intentionally kept the forms bold and the composition clear. The design is meant to remain legible over time, even as it weathers. More intricate or muted imagery would risk blending into the ground too quickly, losing its impact within a short period. Instead, this approach allows the work to age in a way that still holds its structure and readability.

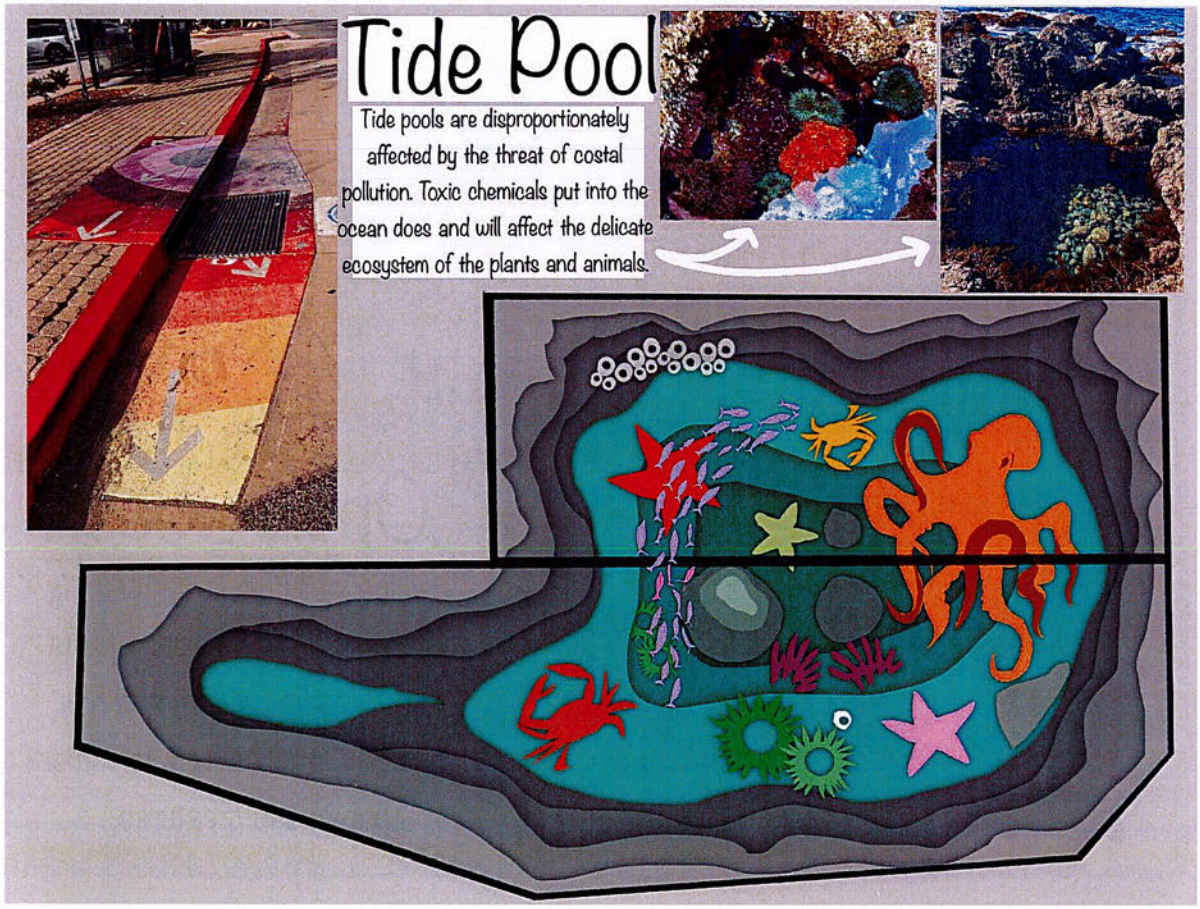

I anticipate the painting process taking approximately seven to eight days. I will be traveling through the Malibu area at the beginning of June, and I would plan to complete the work between June 1 and June 12 if scheduling allows. For materials, I use Sherwin Williams Latitude paints, which are designed specifically for exterior conditions and include strong UV protection. I have worked with this line on both concrete and asphalt surfaces, and it has consistently held up in both color retention and durability. In selecting the palette, I leaned into blues, greens, and pinks not only for their connection to the subject matter, but for their resistance to fading. Warmer tones tend to break down more quickly under prolonged sun exposure, while cooler tones maintain their integrity for longer periods. This choice supports both the conceptual and practical longevity of the piece.

Project Proposal:

ATTACHMENT 3

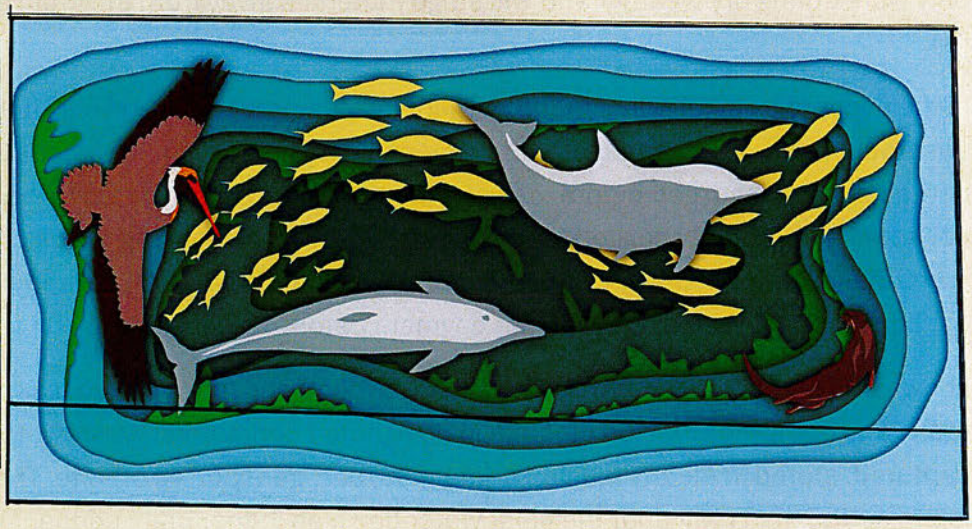

ATTACHMENT 3

Estuaries

Estuaries are the "nurseries" of the ocean, where the river meets the sea. Pollution damage in these areas is detrimental to all who inhabit it.

ATTACHMENT 3

Spill Response Plan:

I will implement a proactive spill prevention and response approach designed specifically for work adjacent and on active storm drains. Prior to painting, I will protect each drain opening using absorbent socks to create an absorbent and physical barrier that prevents any materials from entering the system. All opened paint cans will be placed in a plastic tray with raised edges to contain any spills within the tray. I also line my work area with drop cloths for all of my supplies. Paints will be kept in sealed containers when not in use. I will only work during dry weather and will stage materials away from the drain edge to reduce risk.

In the event of a spill, I will respond immediately using a prepared spill kit that includes absorbent pads, granular absorbents, and cleaning cloths. Liquid materials will be contained and absorbed before they can migrate, and contaminated materials will be collected and properly bagged for disposal. No rinsing or washing of spills into the gutter or surrounding area will occur under any circumstances. If paint has spilled, I would absorb the liquid and let the paint dry on the payment before painting over.

For wastewater management, I will use a controlled, closed-loop process. All brushes, tools, and equipment will be cleaned in designated containers. Wastewater will be captured, stored in clearly labeled containers, and transported off-site. The solids will be left to settle, then I will pour the clear water down an indoor drain connect to a municipal sewer. If committee prefers, I can utilize a product like *Golden Crash Paint Solids Waster Water Cleaning Solutions Kit*. This kit contains a filtering system that will render the water clear of paint before removal. The paint in the filter will then be thrown in the trash.

This approach ensures that all painting activities are conducted responsibly, with a strong emphasis on protecting stormwater systems and preserving the surrounding coastal environment.

Work Sample List

1MadelineDeitersCarbondaleLibrary.jpg
Carbondale Public Library
Carbondale, IL
Acrylic on brick
20ft x 75ft, 2024
Sole designer and lead artist

Description: With community input, the Carbondale Public Library curated a collection of books to be painted on their secondary building across from the library. Their goal was to bring attention to the library and encourage the community to utilized that library and feel connected to their community. They wanted a realistic mural, and I was given design control of how to display the books. It was important to me that each of the 31 books be represented accurately with cover colors and fonts. Please watch the youTube video for more images.
Commissioned mural by Carbondale Public Library
More Information: https://www.youtube.com/watch?v=90lqzaO-_b8&t=16s

2MadelineDeitersWildWestWallsFestival.jpg
I Wish I Could Fly
Billings, MT
Acrylic on tile
22ft x 85ft, 2024
Sole designer and artist

Description: This mural portrays a strong woman having a conversation with various birds, studying them, and wondering what sights they have seen on their journeys. She is highlighted with "liquid gold" to literally glow in the sunshine, but especially as the sun sets. With this design, I explored the ideas of freedom vs captivity.
Commissioned mural by Wild West Walls Mural Festival

3MadelineDeitersVeteransAirport.jpg
Southern Illinois Landmarks
Veterans Airport of Southern Illinois
Acrylic on drywall
18ft x 50ft, 2025
Sole designer and artist

Description: The Veterans Airport of Southern Illinois mural showcases many of the landmarks of Southern Illinois for the passengers in the holding room for their flight. This airport also does a Veterans Honor Flight twice a year shuttling Veterans to Washington, DC to visit many war memorials. Thousands of community members

applaud the Veterans as they exit the plane after the long day.
Commissioned mural by Veterans Airport of Southern Illinois

4MadelineDeiters_MarionKanieCulturalExchange.jpg
Marion/Kanie Cultural Exchange
Acrylic on brick
35ft x 35ft, 2023
Sole designer and artist

Description: Commissioned mural by the City of Marion, IL to celebrate the relationship and cultural exchanges between Kanie – Aichi, Japan and Marion, IL. I had the privilege to visit Kanie in spring 2023 to learn more about Japanese culture. I created origami paper in honor of the annual Sunari Festival in Kanie which starts with a boat covered in lanterns making its way down the Kanie River in the night. The boat then travels back in the morning carrying cherry blossoms. In order for their boat to travel, a red bridge must be raised. I have been a part of hosting exchange students from Kanie since 2011 and the students love to share their origami skills - especially the crane. Over the years, I have filled a box with them as precious keepsakes.

5MadelineDeitersKre8ive.jpg
#HappyPlace
Herrin, IL
Acrylic on concrete
45ft x 15ft, 2022
Sole Designer and artist

Description: Commissioned mural made possible through a grant from the Illinois Arts Council Association. The building was donated by a non-profit K-12 musical theatre production organization. The objective of the design was to create a "Happy Place" for kids to congregate and take pictures while also highlighting the goals of joy and inclusivity of the organization.

Social media handles: @ellettcheyne

2. Project Approach:
I'm currently envisioning large graphic overlapping "sticker" like designs that tie the concepts of the water's journey between the street, the storm water and it's connection to the ocean. I've done similar "sticker" system approaches with my portfolio's Lopez urban farm and clark county pieces, themed to their needs. For this piece particularly I'm thinking larger painted "sticker" sticker elements.

Materials/ Process wise: most likely using Sherwin Williams Pro Park Paint for ground use, but I am open to suggestions of any paint the city has had positive experiences with.
As for execution each location would be painted the day after power washing/prep by the city. (Clean surface adhesion/ washing would ideally be staggered)
To transfer my design I'd be using a meta quest 3 to apply a light chalk line of the artwork that is created at scale (essentially digital projection) then it's paint by numbers with asphalt paint. Most likely a limited 5-6 color palette.

3.Project Proposal:
As this is a Request for Qualifications, I am submitting my portfolio and process methodology as the primary representation of my design vision. My practice is rooted in site-specific discovery. Unlike documentary or naturalistic approaches, my sticker-system language is deliberately graphic, bold, and overlapping, it is designed to interrupt routine and demand attention. The visual system emerges directly from each location's ecology and community context, but rendered through a SoCal DIY/skate visual vocabulary that reads loud and immediate at street level.

The work I've done at Lopez Urban Farm and my Clark County pieces demonstrate how this approach translates across different environments and scales.
For Malibu's storm drains specifically, I'm envisioning layered graphic elements that trace the water's full journey, street to storm drain to ocean, rendered in a bold, limited palette that reads clearly at ground level and from passing foot traffic. Think overlapping coastal forms: wave motion, marine silhouettes, watershed flow, organized as a cohesive visual system across all four locations rather than four unrelated pieces.
If selected as a finalist, I will develop site-specific designs in direct collaboration with City staff, ensuring each installation responds to its immediate surroundings while maintaining coherence as a unified public education campaign. This approach, graphic rather than illustrative, sticker-collage rather than mural, serves Malibu's goal of sparking dialogue. The work creates visual friction: familiar infrastructure made unfamiliar, demanding second glances.

4. Spill Response Plan:
From last nov/through feb of this year I had been working with council district 11 of LA to create a project proposal for a 1400ft linear bike lane mural in the EPA protected Ballona wetlands, over the course of that development I created and included a full zero run off contingency plan that I can bring here at a much smaller scale. In this case it'd probably consist of sheeting and san bagging the drain entrances to block any spills and having a generator and wet vac on hand to capture any large spills that can't be immediately sopped up. I'll also have some solidification agents on hand but thats more to stabilize my waste water for disposal at a waste drop site.

PROJECT: K-Rails (The Living Loop)
Client:Council District 11 (Office of Traci Park) & Friends of Ballona Wetlands
Location: Jefferson Blvd, Ballona Wetlands, Playa Vista Date: Summer 2026
Scale: Seventy 20ft K-Rails | 1,400 Linear Feet | 7,476 Sq. Ft.

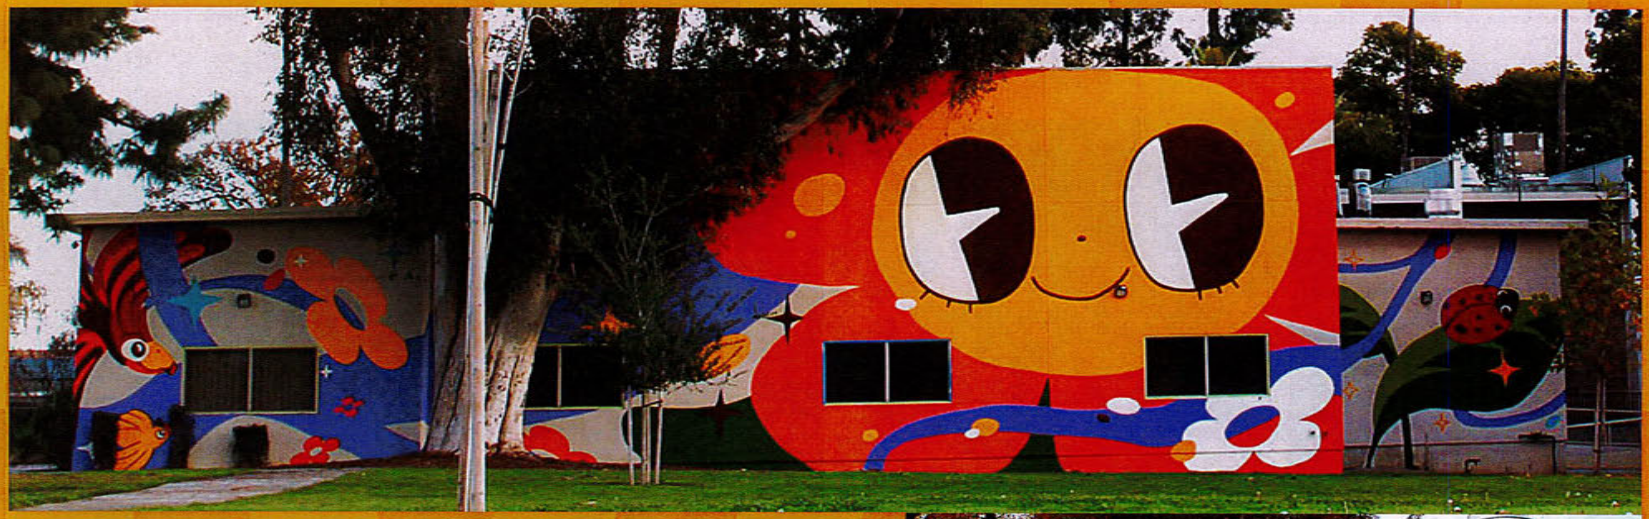

Budget:$305,819.3
Total Project Value: $430,000 – $450,00
Status: Legislatively Authorized; Pending Administrative Execution (CF 25-1493
Medium:Acrylic on Concret

The Project: This large-scale installation transforms 1,400 linear feet of industrial concrete into a continuous visual system celebrating the flora and fauna of the Ballona Wetlands. Designed as the final public-facing phase of a broader ecological restoration effo following the 2023 rehabilitation of Jefferson Blvd, the work functions as both protective infrastructure and cultural interpretation. The project invites the surrounding community to re-engage with a rare urban wetland shaped by cycles of tide, migration, and renewal.

The Approach: My research-driven process began with site immersion and guided ecological study alongside Friends of Ballona Wetlands, documenting native species and the area's layered environmental and social history. From this research, I developed a visual library of over 350 hand-drawn illustrations, later digitized into a modular composition system. To maintain cohesion across 70 discrete units, I engineered a 14-zone color framework that allows for variation while preserving rhythmic continuity across the full site.

Logistical & Environmental Stewardship: Operating within a protected habitat required 4 to 5 months of pre-production planning. To meet a strict Zero-Runoff Mandate, I developed an off-site k-rail washing workflow paired with an anti-graffiti paint water solidification system. Project management responsibilities include oversight of a full-time crew of eight, coordination of site infrastructure permitting, and the integration of community Paint Days that position the artwork's creation as a shared act of stewardship rather than a temporary

03.Seeds Of Change. Painted for Lopez Urban Farms Urban Arts festival May 24th, 2025. Large over sized painted stickers riffing off themes of community and imagery
inspired by my time at the farm. I started this wall a day early so i could finished in with hand prints of local members of the community. - Completed: May 2025, Budget: $5,000, Collaborators: N/A, Client: Lopez Urban Farm, Medium: Acrylic, Location: 1034 W Mission Blvd, Pomona, CA 91766 Pomona CA 91767

PROJECT:K-Rail (Neighborhood Party)
Location:Downtown Pomona,CA Date: Spring 2021
Client: City of Pomona

Budget:$800
Funding: Civic
Medium:Acrylic

The Project: This was my inaugural solo public art commission, located at a high-visibility transit hub in my hometown of Pomona. The project served as an opportunity to celebrate the vibrant local culture I grew up in, translating the energy of the streets into a permanent community asset.

The Approach: "Neighborhood Party" is a tribute to the people and places that shaped my practice. The composition features stylized figures engaged in skateboarding and cycling, a nod to my own history in these subcultures, alongside references to Pomona's landmark music venues like The Glass House where i spent much of my youth. The background utilizes a series of "flowing lines" dotted with residential motifs, representing the rhythmic interconnectedness of the neighborhood. By centering the narrative on local joy and shared experience, the work transforms a standard industrial safety barrier into a welcoming signpost for the city.

ALEXANDER GOLOB

ATTACHMENT 3

ALEXANDER GOLOB

[redacted]

https://www.alexandergolobart.com

[redacted]

PROJECT APPROACH

My design concept draws directly from Malibu's coastline: the churning rhythm of surf, the radiant coastal sun, undulating kelp, and the shells scattered along the tideline. Each storm drain becomes a small window onto the ocean it ultimately feeds. The visual language is intentionally organic and flowing, in contrast to the hard geometry of concrete infrastructure, so that passersby are drawn in and prompted to pause at places they might otherwise walk past without a thought.

MATERIALS: I will use StreetBond 120, the same coating system specified for painted bike lanes, crosswalks, and plazas by municipalities across North America. I chose it for three reasons: (1) it is a proven colorfast, exterior-grade system with a service life well beyond the required four years; (2) it is formulated for pedestrian and vehicular ground surfaces and contains pumice for non-slip traction, which matters at sidewalk-adjacent drains; and (3) it cures to an inert film, making it appropriate for environmentally sensitive locations. Final color and product specifications will be submitted to the City for approval before any paint is ordered.

PROCESS: Each site begins with a thorough surface clean to ensure adhesion, followed by establishment of a safe work zone using cones, delineators, and caution flags coordinated with City staff. Layout is chalked, base coats are applied, and detail work follows once base layers have cured. All painting occurs in dry weather only.

TIMELINE: The entire project will be completed within the 150-day window specified in the RFQ, measured from the date of first payment. I am targeting Summer 2026 for installation, with Fall 2026 available as an alternate window. I am open to shifting into late 2026 or 2027 if that better suits the City's schedule. Upon execution of the Artist Agreement, I will:

1. Incorporate any design modifications requested by the City;
2. Place order for StreetBond 120 product;
3. Coordinate scheduling and traffic-control logistics with City staff for each site; and
4. Complete painting on a rolling basis, with each site typically requiring several days of on-site work plus cure time.

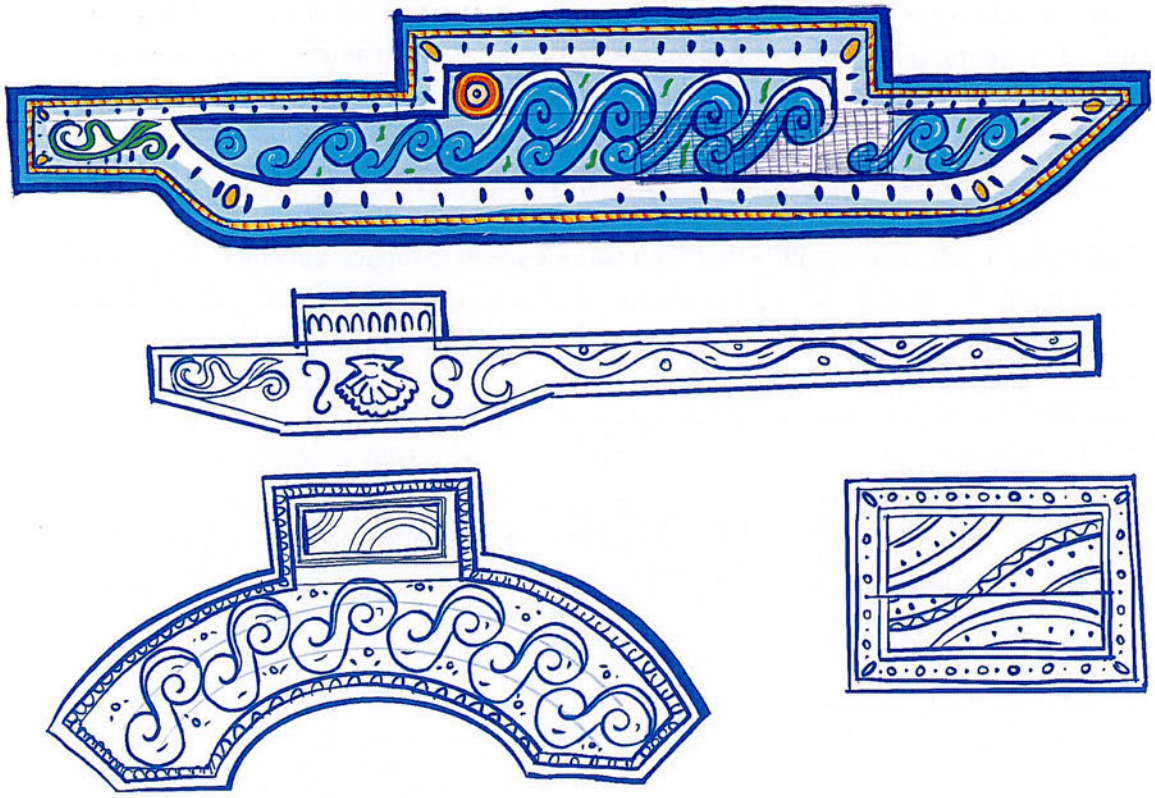

PROJECT PROPOSAL

I was inspired by Malibu's stunning natural beauty for these designs, incorporating motifs of churning ocean waves, a radiant sun, undulating seaweed, and elegant shells. Each of the four designs is tailored to a rough understanding of its proposed location, and each would be refined in dialogue with the City before installation.

The color palette will be consistent across all four designs: a range of blues accented by yellows and greens, chosen to create a cool serenity that echoes the feeling of walking along the beach. The palette is also designed to read clearly against weathered concrete and to coexist visually with adjacent red curb paint required to remain in place.

For the purposes of this proposal, I have prepared a full-color version of one storm drain design and line-art versions of the other three, which would be rendered in the same palette if selected. Final designs will be developed collaboratively with City staff.

PRELIMARY DESIGNS

Preliminary design concepts for the four storm drain locations. One design is rendered in the full proposed palette; the remaining three are shown in line art and would be developed in the same palette.

GOLOB ART
ART IS EVERYWHERE IS ART

SPILL RESPONSE PLAN

I have several years of experience painting ground murals in environmentally sensitive watershed and drainage areas. My spill-prevention approach rests on four practices:

1. **ZONED SITE SETUP:** A designated staging area is established away from the storm drain inlet, with a clear buffer zone around the drainage. Large paint containers remain in the staging area at all times; only small working containers are brought near the inlet. A cleaning station with absorbent pads, rags, a sealed waste container, and clean rinse water is set up before any paint is opened.
2. **MATERIAL CHOICE:** StreetBond 120 is a water-based, exterior-grade coating system designed for environmentally sensitive ground applications, which reduces risk in the event of a minor spill.
3. **WEATHER PROTOCOL:** No painting occurs if rain is forecast within the cure window, so there is never wet paint on the ground when precipitation arrives.
4. **IMMEDIATE SPILL RESPONSE:** Because large containers stay in the staging area, any spill near the drain is small in volume. Absorbent pads are applied immediately to contain the spill; soiled absorbents and contaminated rags are sealed in a labeled waste container for off-site disposal.

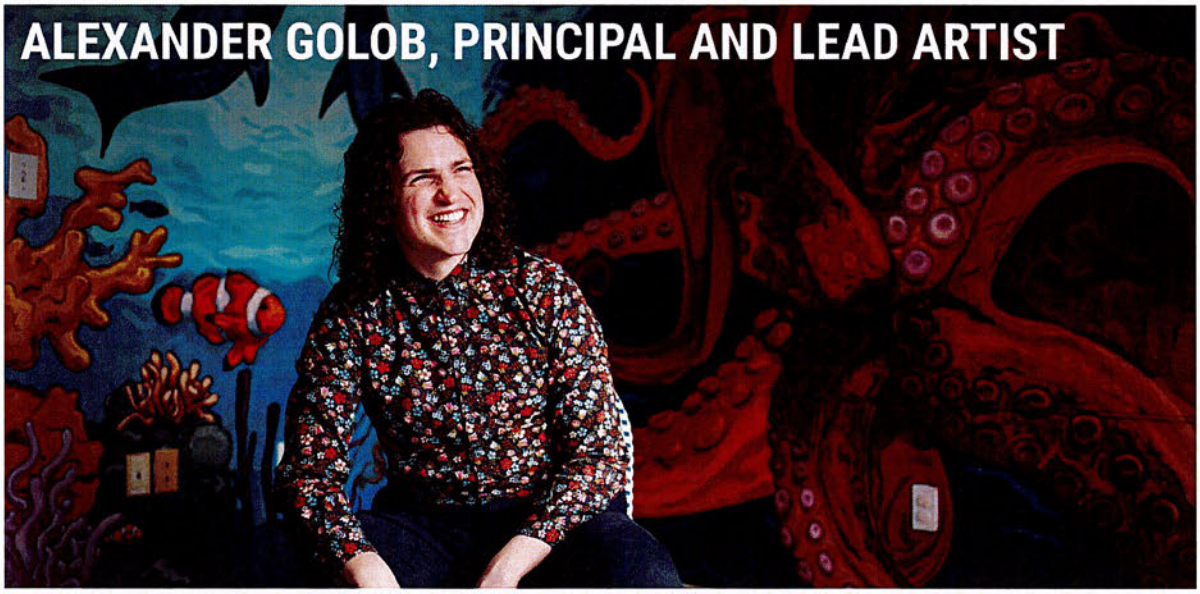

WASTEWATER DISPOSAL: A multi-bucket rinse system is used so clean water is always separated from dirty water. No rinse water, paint, or cleaning residue is ever discharged to gutters, storm drains, or soil. All wastewater is transported off-site in sealed containers and disposed of through in an appropriate manner.

Keeping the earth's water clean takes all of our efforts, and I will do my part to ensure this project contributes to that goal.

GOLOB ART

ART IS EVERYWHERE IS ART

ABOUT GOLOB ART

EDUCATION - Bachelor in Fine Art, Boston University (2012 - 2016)
AWARD - New England Creative Community Fellow, 2019

Since 2012, Golob Art has worked with municipalities, developers, non-profits, and community groups across the United States on community-centered public art projects, creative placemaking plans, and arts initiatives. These partnerships have resulted in projects deeply resonant with community members, with extensive engagement and research, and an attention to technical detail - focusing on transformative and empowering results, from concept development to execution.

Our studio is led by Alexander Golob, a well known public artist and creative placemaking consultant recognized for his work in diverse and multilingual communities across the country such as Orange County, CA, Boston, MA, Washington, DC, Providence, RI, and Portsmouth NH. With his studio, Golob Art, he works towards the mission of infusing art into every element of the individual and communal lived experience by provoking thought in the public, lifting people up, and transforming physical space.

Alexander Golob has 13 years of experience as a public artist and creative placemaking consultant. His practice specializes in site-responsive public artworks, community engagement, strategic cultural master planning, economic development, and sustainable creative programming. With a proven track record spanning diverse communities and complex public sector and private sector projects, Alexander leverages art as a powerful tool for transformation, economic development, community-building, and vibrant public spaces

ART IS EVERYWHERE IS ART

ALEXANDER GOLOB

PUBLIC ART AND PLACEMAKING HIGHLIGHTS

Woven Song — Jewish Street Art Festival, Irvine, CA (2025)

- Created a large-scale public mural for the Jewish Street Art Festival that explores themes of cultural identity, memory, and connection. The design uses interwoven forms and vibrant color to symbolize shared histories and the strength of community within a public gathering space.

Woven City — Hamilton Real Estate Company, Allston, MA (2024)

- Designed and implemented a large-scale public installation interpreting neighborhood transit systems, pedestrian movement, and the layered history of Allston through vibrant woven patterns. The artwork integrates with surrounding architecture and public walkways, creating a visually dynamic landmark that strengthens the identity of the redevelopment site while inviting public interaction.

Brick Market Public Art Installations — McNabb Properties, Portsmouth, NH (2021)

- Designed several site-specific public artworks for Brick Market development, including sculptural elements in aluminum, stone, and bronze (eg. *Lighthouse* and *Coastal Chimney*) that reflect Portsmouth's maritime history and activate the surrounding public space.

Miles to Go Before We Sleep – An Immigrant and Origin Story Mural — Haverhill, MA (2018)

- Directed a collaborative mural project celebrating immigrant narratives and local history. Through community storytelling and participatory engagement, the artwork translates shared experiences of migration, resilience, and cultural diversity into a layered visual composition reflecting the identity of the city.

Lead Artist and Creative Placemaking Consultant — The Michaels Organization (2018–Present)

- Leads public art and creative placemaking initiatives with developers, planners, and community stakeholders. Notable projects include Dorchester Soaring, created with the Massachusetts Department of Conservation and Recreation and The Michaels Organization, integrating art into a civic landscape and gathering space. The collaboration also includes an upcoming integrated light-based public art installation scheduled for 2027.

Public Art Project Management Consultant — Providence Percent for Public Art Program (2021–Present)

- Supports the planning and implementation of municipal public art initiatives, including Sidewalk Tattoos, by coordinating artists, project partners, and city agencies to deliver successful civic art projects from concept through installation.

Public Arts and Cultural Master Plan Contributor — Charles County, MD (2025)

- Collaborated with planners, cultural leaders, and residents to develop long-term strategies for integrating arts, cultural programming, and creative placemaking into regional policy and community and economic development initiatives.

ART IS EVERYWHERE IS ART

Rolling Dream 2

GOLOB ART

ART IS EVERYWHERE IS ART

2. **Where the Buffalo Roam,** acrylic paint, 6' x 80', 2023, Washington, DC. DC DOT.
   - Drawing from site-specific indigenous histories of bison-made paths and recent pasture-lands, this ground mural creates a joyous ode to nature and play.

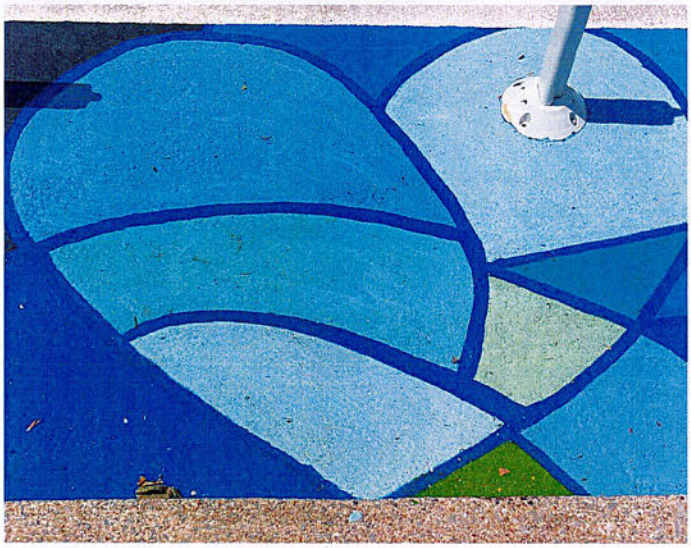

3. **Miles to Go Before We Sleep – Haverhill Immigrant and Origin Story Mural,** acrylic paint, 19' x 70', 2018. Haverhill, MA. City of Haverhill and Garibaldi Club.
   - Led a major creative placemaking project celebrating the immigrant and origin stories of Haverhill's diverse population. Oversaw 18-month implementation with 20+ municipal, non-profit, and private sector partners; 3 supporting artists; 4 installation crew members; 40 english and/or spanish speaking volunteers; and 250+ community members to create a 1,300 square foot paneled mural consisting of 148 portraits; hosted a plethora of community engagement events.

4. **Peace and Love,** pavement mural paint, 6' x 220', 2023, Washington, DC. DC DOT.
   - Selected by a competitive jury to create ground murals for the DC Department of Transportation. This series of community-informed ground murals draws inspiration from joy, compassion, and nature.

5. **Homeward Bound,** acrylic paint, 2'6" x 1'8" x 4', 2022. Boston, MA. City of Boston.
   - A warm embrace homeward, no matter the direction. Competitively commissioned by the City of Boston, this electric box, hand-painted in an Italian maiolica-inspired style, is a utilitarian way-finding beacon, a window into sweeping city vistas, and a home to a zesty pigeon.

AVA HAAS

ATTACHMENT 3

Storm Drain Artwork Application

1. **Artist Contact Information**: My name is Ava Haas, I live at [redacted] my email is [redacted] and my phone number is [redacted]
2. **Project Approach**: My design concept for this project is to take four different approaches that all focus on the near mythical beauty of Malibu's beaches and wildlife that have inspired and moved me over my hundreds of visits to the beach throughout my life. My first design idea is about the connection between the sea and sky, as represented by a sandpiper wing that transitions into strands of giant kelp, emphasizing that to protect the creatures and plantlife of the ocean is also to protect those of the sky. My second design idea is a fantastical chimera of some of the most iconic wildlife of California's coast, such as the sea lion, blue-banded goby, and the ever present seagulls. This is meant to be eye-catching and inspire curiosity about each of the parts of the chimera, as well as celebrate the diversity of animal life in the waves of Malibu. My third design is a closeup of the stunning scale coloration of the juvenile garibaldi fish. The garibaldi is iconic and beloved as California's state fish, but most people do not see them outside of very specific conditions. I wanted to honor this fish by providing the public with a reminder of the beauty that exists beneath the waves and that it is just as important to protect the animals that are out of sight for most of our lives as it is to protect those we see every day. My final design idea is a look down into a tidepool featuring creatures such as sea anemone, the California two-spot octopus, and starfish. This design would serve as a very direct reminder to the public about the lives that are affected by the quality of water that runs into the storm drains, as well as the wonders of ocean life.

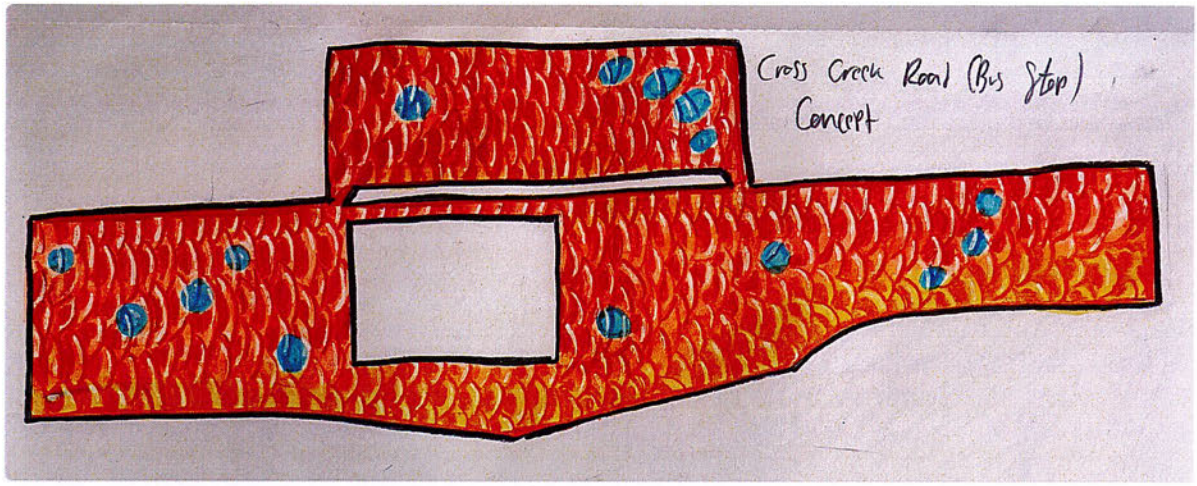

My proposed timeline would be to complete the murals well within the 150 day limit. At my current job, I have weekends free, so I would go down and work on the murals every weekend I have available in multiple hour sessions. I have completed large scale projects in the past and estimate that each painting would take me around a month to complete. I would work hard to finish these murals within four months, the additional month within the allowed time period would be used as a buffer in case any of the paintings took longer than initially expected, or if there were unforeseen scheduling conflicts. My ideal supplies would be Chroma Acrylic Mural Paint as well as the supplies needed to prevent hazardous waste spills, which I will describe in my Spill Response Plan.

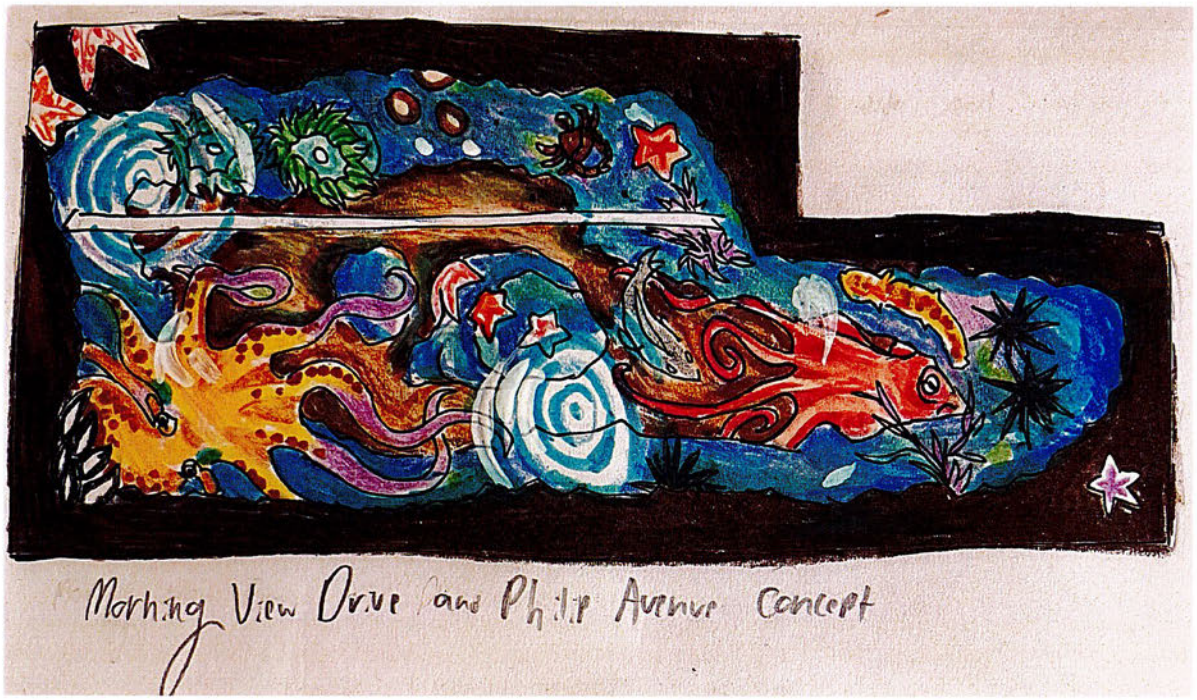

3. **Project Proposal**: (The white lines are to represent where the water would drain.)

ATTACHMENT 3

4. **Spill Response Plan**: In order to prevent any kind of hazardous material from getting into the storm drain and causing harm to the very environments I would be representing, I would cover the drains with a sheet of flexible, but durable, plastic drop cloth and seal the edges with a strong sealant tape. I would also place paper towels outside the border of the tape near areas I was actively working on to absorb any runoff as an extra line of defense. I am very aware of the danger that wastewater from painting projects poses to the

environment, and to dispose of it safely, I would use the classic method of pouring the excess water into a bucket containing cat litter. The cat litter would then absorb the liquid and eventually dry, becoming safe to dispose of as garbage without the risk of anything contaminating the water. Additionally, I would be sure that any paint palettes or cups used to mix paint and wash brushes were thoroughly wiped down with rags or paper towels so paint scraps would also be accounted for. Preventing the drainage of hazardous materials such as paint and paint wastewater is the most important factor to me because painting a mural to call attention to the importance of ocean protection while allowing for dangerous material spills would be the ultimate hypocrisy.

5. **Resume and References**:

AVA HAAS

[redacted]

Passionate and hard-working Interdisciplinary Visual Art and English student with a wide range of experience in art mediums and a focus on creature design and material exploration. Interested in bringing creative skills and collaboration to larger projects.

EDUCATION

September 2021 - August 2025

University of Washington, Seattle, WA
Interdisciplinary Visual Arts Major - English Minor

- Worked with many different mediums to continue to expand my own skillset and material understanding
- Developed grit to succeed in a rigorous academic environment
- Ability to manage time and balance multiple projects effectively

Art Departmental Honors - *University of Washington*

- Participated in highly selective program with a cohort of 16 individually selected students
- Required an honors level portfolio and a wide range of skills
- End of year professional gallery showing to showcase work

EXPERIENCE

June through August 2021 - 2024

Camp Kinneret Summer Day Camp, Agoura Hills, CA - *Camp Counselor*

- Maintained the safety and fun for a group of 12-15 children ages 5-8 while working collaboratively with a co-counselor.
- Emphasized the importance of play and creativity in the learning process by providing original artwork for an in-depth group theme and to create a more personalized experience.
- Responsible for daily scheduling and activity plans, strengthened quick problem solving skills and the ability to adapt to changing circumstances in a fast paced environment.

October 2025 - Present

Growing Outdoors, Agoura Hills, CA - *Exploratory Leader*

- Led and assisted with children's art classes involving a variety of creative projects and technical skills such as watercolor, papercrafts and the use of sewing machines.

SKILLS

Digital: Adobe Creative Cloud applications, Photoshop, Word, Excel, Powerpoint, Google Workspace, iMovie, Stop Motion Animation, Pixel Art, Game design experience

Traditional Art: Illustration, concept and character design, oil and acrylic painting, costume making, ceramic handbuilding, needle felting, embroidery, sewing, wood cut printmaking, light woodworking

AWARDS

Dean's List - *University of Washington* - 2021 through 2025

- Consistent high academic achievement maintained through a love of learning and a dedication to reaching my full potential in each class

Ryan Rosen: [redacted]

Lissa White: [redacted]

Joey Hernandez: [redacted]

6. **Image References and Image List:**

Image References

Image 1 - *Carousel Voyager (Basement Beast)*

Image 2 - *Chlorine Fever Dream*

Image 3 -*Flash Of Light*

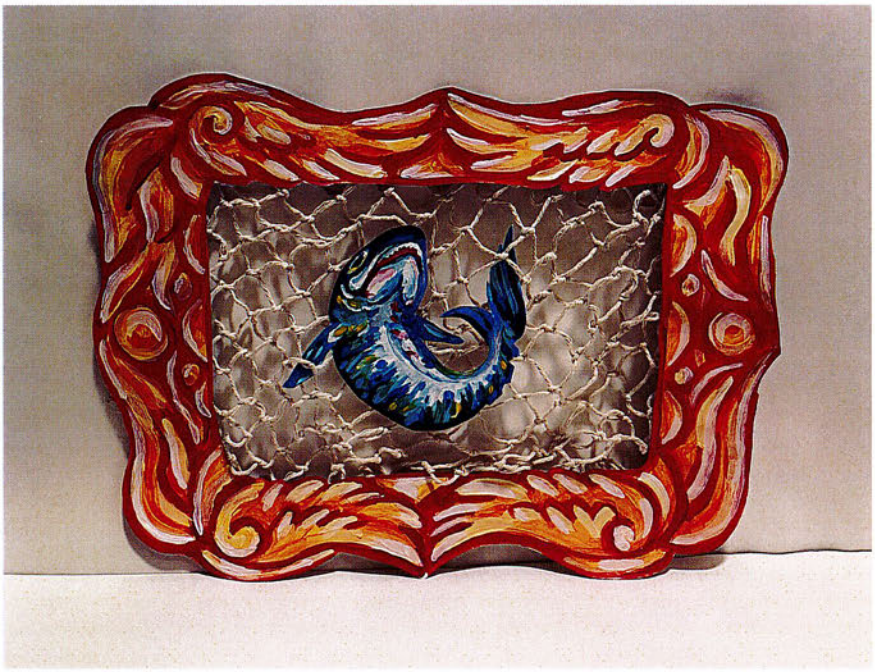

Image 4 - *Invasive Mustard Flowers Found in the Far Reaches of The Infinite Staircase (Gold and Blue)*

Image 5 - *Fanatical !*

Image 1 - *Carousel Voyager (Basement Beast),* 2025, approximately 5'x3.5'x5', construction paper, cardboard, hot glue, paint, air dry clay

This piece was my love letter to the basement of the art building at my university. I was deeply inspired by all of the vibrant and exciting people and artwork that passed through the space and I wanted to create something that would give a viewer that same impression of surprise and wonder. This is a picture of the piece on display in the Jacob Lawrence Gallery at the University of Washington.

Image 2 - *Chlorine Fever Dream,* 2025, approximately 5'x3.3', canvas, acrylic paint, fishing wire

A piece made for public display in the Odegaard Undergraduate Library at the University of Washington. It was meant to bring color and interest to the library during finals week. I wanted to convey a message of learning and growth through perseverance during a four year college journey as well as the promise of summer and rest once the grueling work of finishing final exams was over.

Image 3 - *Flash Of Light*, 2024, 13"x10", acrylic paint, hot glue, paper, twine,

A fish struggles in a net, surrounded by a gilded, winged frame. I wanted to bridge the separation between food and living creatures and display a caught fish as an individual in a beautiful, tragic, and significant scene.

Image 4 - *Invasive Mustard Flowers Found in the Far Reaches of The Infinite Staircase (Gold and Blue),* 2024, 8.5"x10.5" three layer reduction woodblock print on bunkoshi paper

A winged tiger descends a staircase to investigate a mustard flower blooming in the desert while an ouroboros wraps the scene. These prints were made as a way to document the way I felt during the strangest summer of my life.

Image 5 - *Fanatical !*, 2024 , 32"x57", paper, masking tape, charcoal, conté crayon, graphite,

Half human and half wolf, a beast with a fish in a bag, fancy shoes, and acne scars prances across a framed and darkening stage. This is a large scale self portrait.

7. **Artist Agreement**: This is attached to the email separately.

SUBMITTED 4/17/26 11:45

APPLICATION FOR MALIBU STORM DRAIN ART PROJECT 2026

SUBMITTED BY:

Eamon Harrington
[redacted]
eamonharringtonpaintings.com

PROJECT APPROACH

I've owned and operated 3 pop up art galleries in Cross Creek since 2018, all under the name Red Ladder Gallery, where I have exhibited my work exclusively. My work also hangs in Ollo Restaurant since 2020. My style is a hybrid of folk art, pop art and abstract expressionism. If selected, I will bring that same hybrid style to my approach to this project. My work is rich with color and energy. It's joyous and often playful, and I believe that combination of elements can really help to brighten up the sidewalk and curbing surrounding the drains. I often incorporate text into my work, and I am open to discussing appropriate words or phrases on top of the underpinnings if that's something that is attractive to the Arts Commission. But my initial vision is for something colorful, abstract and happy without any text.

I think it might be fun to establish a seasonal palette for each drain: browns, tans and maroons for winter, bright yellows, blues and greens for summer, deep oranges and reds for autumn, and lavenders and pinks for spring. I'm attaching a few pictures as references to the look I'm imagining.

I work quickly, so I'm confident I can have all 4 drains spruced up within a 2-3 week period. I work with water-based acrylic paints, manufactured by Golden and Liquitex. As a result, prep and clean up is simple and fast.

I have paintings hanging in hundreds of homes throughout the country, including the state house in Sacramento, but I've never done a project like this before, and I love these kinds of new challenges. I'd be honored to collaborate with the Commission to bring my kind of artistic style to the streets of our city!

PROJECT PROPOSAL / VISUAL REPRESENTATION

See attached

SPILL RESPONSE PLAN

I will take a multi-facet approach to insure a clean and spill free work site. I'll keep all of my materials on a heavy-duty drop cloth. On top of the drop cloth I will use metal pans to hold any open paint containers, so that in the unlikely event there is a spill, any paint or splatter will fall into the pan. My paints will be water based acrylics, and I will have ample jugs of water with me to immediately address any splatter that might occur (although I can assure you this is highly unlikely. I will take all paint containers and dirty

brushed home with me to clean at my studio on Point Dume. No cleaning of brushes, pans, etc. will happen on site.

EAMON HARRINGTON
[redacted]
eamonharringtonpaintings.com

RESUME

Eamon Harrington is a Malibu-based painter who has hundreds of paintings hanging throughout the US and around the world. His collectors include actors, writers, musicians, athletes, models, corporate executives and elected officials, along with teachers, firemen, farmers, truck drivers and factory workers. His work bridges all socio-economic boundaries as well as age and gender differences.

Eamon is a self-taught Outsider artist, who began painting after a long career as a television and documentary director. He co-owned planet Grande Pictures, a Malibu-based production company, from 1993-2023. Planet Grande won numerous industry honors for its films over the years including 7 Emmys.

Eamon's work is an amalgam of several artistic movements, most notably Pop, Folk and Abstract Expressionism. Beginning in 2018, Eamon owned and operated 3 pop up galleries in Cross Creek Malibu, all under the banner of Red Ladder Gallery. He approached the gallery as a local gathering spot, often hosting musical performances, readings, political debates, and interview salons - all free to the community.

His 'All Welcome' painting hangs in many of the Malibu schools as well as the statehouse in Sacramento.

CITY OF MALIBU
ARTIST AGREEMENT
STORM DRAIN ARTWORK MURALS

This agreement ("Agreement") is made this 15 day of APRIL, 2026, by and between The City of Malibu, hereafter referred to as "the City" and EAMON HARRINGTON hereafter referred to as "The Artist." Artist will be completing visual artwork on the City's Storm Drains at four (4) predetermined locations in Malibu, California.

The City and the Artist acknowledge and agree that this Agreement constitutes the full and final expression of their mutual understanding. The Artist represents that they have read this Agreement in its entirety, have had the opportunity to request clarification of any provision, and have had the opportunity to request changes to its terms and conditions prior to execution. The Artist further acknowledges that they enter into this Agreement knowingly and voluntarily, and that no representations or promises have been made other than those expressly set forth herein. This Agreement shall be governed by and construed in accordance with the laws of the State of California, and any action arising out of or related to this Agreement shall be brought in the County of Los Angeles.

1.0 Terms:

A. The Artist has experience creating public art and will perform to the best of the Artist's ability in accordance with the highest standards.

B. The Artist will paint four (4) original murals located at Cross Creek Road, Heathercliff Road (in front of the Point Dume Plaza), Philip Avenue and Morning View Drive and Trancas Canyon Park.

C. The Artist will replicate the City's approved mural designs and adjust the design, if required by the City.

D. The Artist will use high-quality colorfast paint that has been proven to last four (4) years. The Artist must submit the paint selection to the City for approval before starting the project.

E. The Artist will paint the murals within the designated sidewalk, inlet lid, and gutter as outlined by the City.

F. The Artist will respond to spills immediately and follow the City's spill response plan.

G. The Artist will make every effort to follow environmentally sound practices, including properly disposing of dirty water and paint.

H. The Artist will communicate with City staff to safely secure painting locations, which may include the use of traffic safety cones, delineators, caution flags, cones, etc.

I. The Artist will paint the murals during dry weather.

J. The Artist will attend meetings with the City as scheduled, which may include meetings with staff or public meetings.

K. Photography and recording is permitted for archival, promotional, and limited screening use.

. Force Majeure.

. The Artist shall not be responsible for her/his failure to perform hereunder as a result of unavoidable accident, acts of God, public enemies, riots, strikes, civil commotion, or any other act reasonably beyond the control of the Artist.

The City shall not be responsible for non-occurrence of the engagement as a result of unavoidable accident, act of God, public enemies, riots, strikes, civil commotion, or any other act reasonably beyond the control of the City.

15.0 Time is of the Essence. Time is of the essence for each and every provision of this Agreement.

16.0 Notice. All Notices permitted or required under this Agreement shall be in writing and shall be deemed made when delivered to the applicable party's representative as provided in this Agreement. Such notices shall be deemed made when personally delivered.

17.0 Warranty of Authorized Signatories and Acceptance of Facsimile or Electronic Signatures. Each of the signatories hereto warrants and represents that he or she is competent and authorized to enter into this Agreement on behalf of the party for whom he or she purports to sign. The Parties agree that this Contract, agreements ancillary to this Contract, and related documents to be entered into in connection with this Contract will be considered signed when the signature of a party is delivered physically or by facsimile transmission or scanned and delivered via electronic mail. Such facsimile or electronic mail copies will be treated in all respects as having the same effect as an original signature.

IN WITNESS WHEREOF, the parties have agreed to and executed this Agreement the _____ day of _____, 2026.

@aaronkkai

2. Project Approach:
As a native Hawaiian, I've always had a connection to the land and ocean, so this project really speaks to me. I also surf at Malibu (Zeros, Dume, Westward, Zuma, etc.), so the locations really align with me. I work with brush and paint (acrylic), and my signature motif is "waves". I'll use my signature wave design, mixed with cute sea creatures and beach themes, to create a collage-style art piece. The timeline for the entire project is 2-3 weeks.

3. Project Proposal:
See examples of work in attachments

4. Spill Response Plan:
I will prevent spillage by keeping all paint materials covered and away from the drain. In the event the paint should spill, I will keep towels nearby to immediately stop the paint.

I will keep (2) 5-Gallon buckets with water on site to keep my brushes in when not in use, and to dispose of the dirty water, I will flush it down the nearest toilet so it will get processed through the DWP facilities.

COLLABORATIVE PROJECTS

2024 **MicroBar**, Create a pattered design and series graphics to be used on retail merchandise and multifaceted packaging, Seattle, WA

2023 **LEVI'S**, Create a series graphics to be used on retail merchandise, live paint on denim for customers, Honolulu, HI

2023 **CASETiFY**, Create 10-12 graphics to be used on retail merchandise, Global release

2022 **BE@RBRICK**, Design and render graphics and artwork to be used on retail merchandise and intricate packaging, Japan

2022 **Heineken**, Design a graphic to be used on advertisements and commercials worldwide

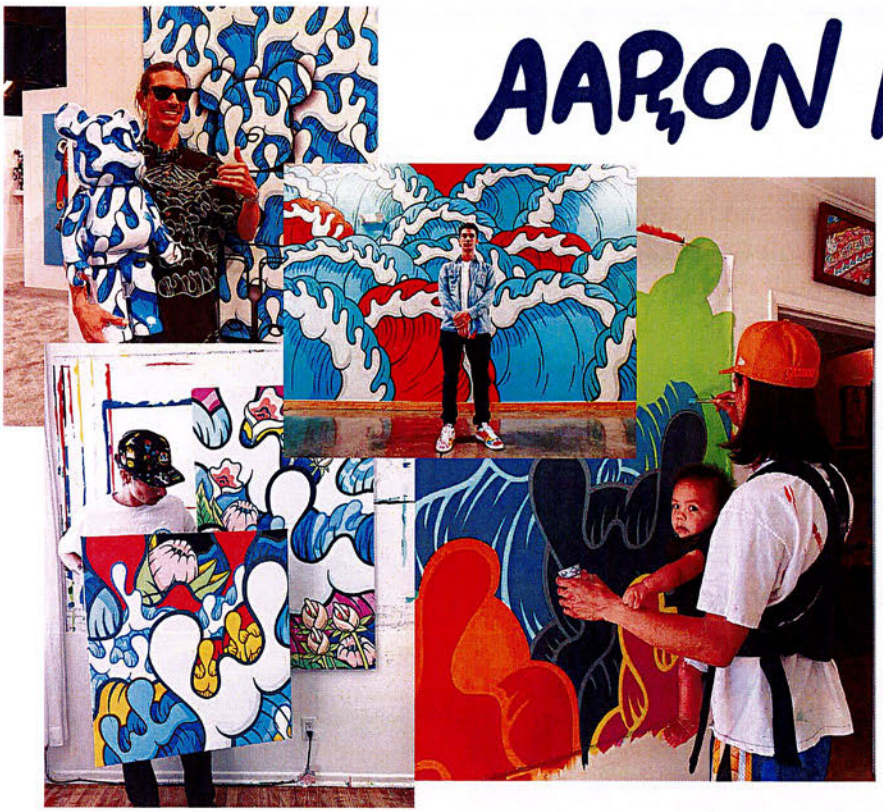

2021 **Adidas**, Design a kids collection to be released worldwide, in-store and online

PROFESSIONAL EXPERIENCE

Freelance Designer & Artist December 2013 - Present
Self-Employed

- Create a variety of works for collaborations including murals, graphics, and paintings.
- Continue to grow a social media following & network of clients resulting in over 50 collaborative design projects & over 50 murals

AARON KAI™

Hailing from the Big Island of Hawai'i, Aaron Kai's artistic creations are rooted in Hilo Hamakua surf culture - as well as his fascination with Hawaiian tradition and the rich history of his ancestors. His iconic "wavy" art, first doodled between school classes, has been featured in murals and exhibitions around the world.

Kai's signature "wave design" is representative of the flow of nature and family, intertwining together in perfect harmony.

With notable collaborations with Heineken, adidas, Samsung, Taco Bell, L.A. RAMS and MEDICOM to name a few, Aaron Kai remains true to his signature style of vivid color combos

AARON KAI™ BY AARON KAI

PARTNERSHIPS + PROJECTS 1

Adidas + Adidas Kids
In 2021, Aaron Kai got an opportunity to create a global children's line that ranged from sneakers to clothing - reaching **all global markets** in the Adidas distribution channels.

MEDICOM BE@RBRICK
Collaboration with iconic Japanese toy maker - Medicom. **Sold out of soft launch** in November of 2021 in 2-days. Aaron Kai was the hallmark artist for Designercon 2022 with a larger 1000% collaboration BE@RBRICK which also sold-out.

Heineken Dry-0
Created an original can design and packaging for 550 units of an exclusive giveaway via Heineken's online site. The units sold out within the first hour of them being available to the public. **Artwork was created within 1-week of them having to take the product from concept to manufacturer.** Packages were sent out the following week with ample time to run a successful promotional campaign

COMMUNITY + EVENTS

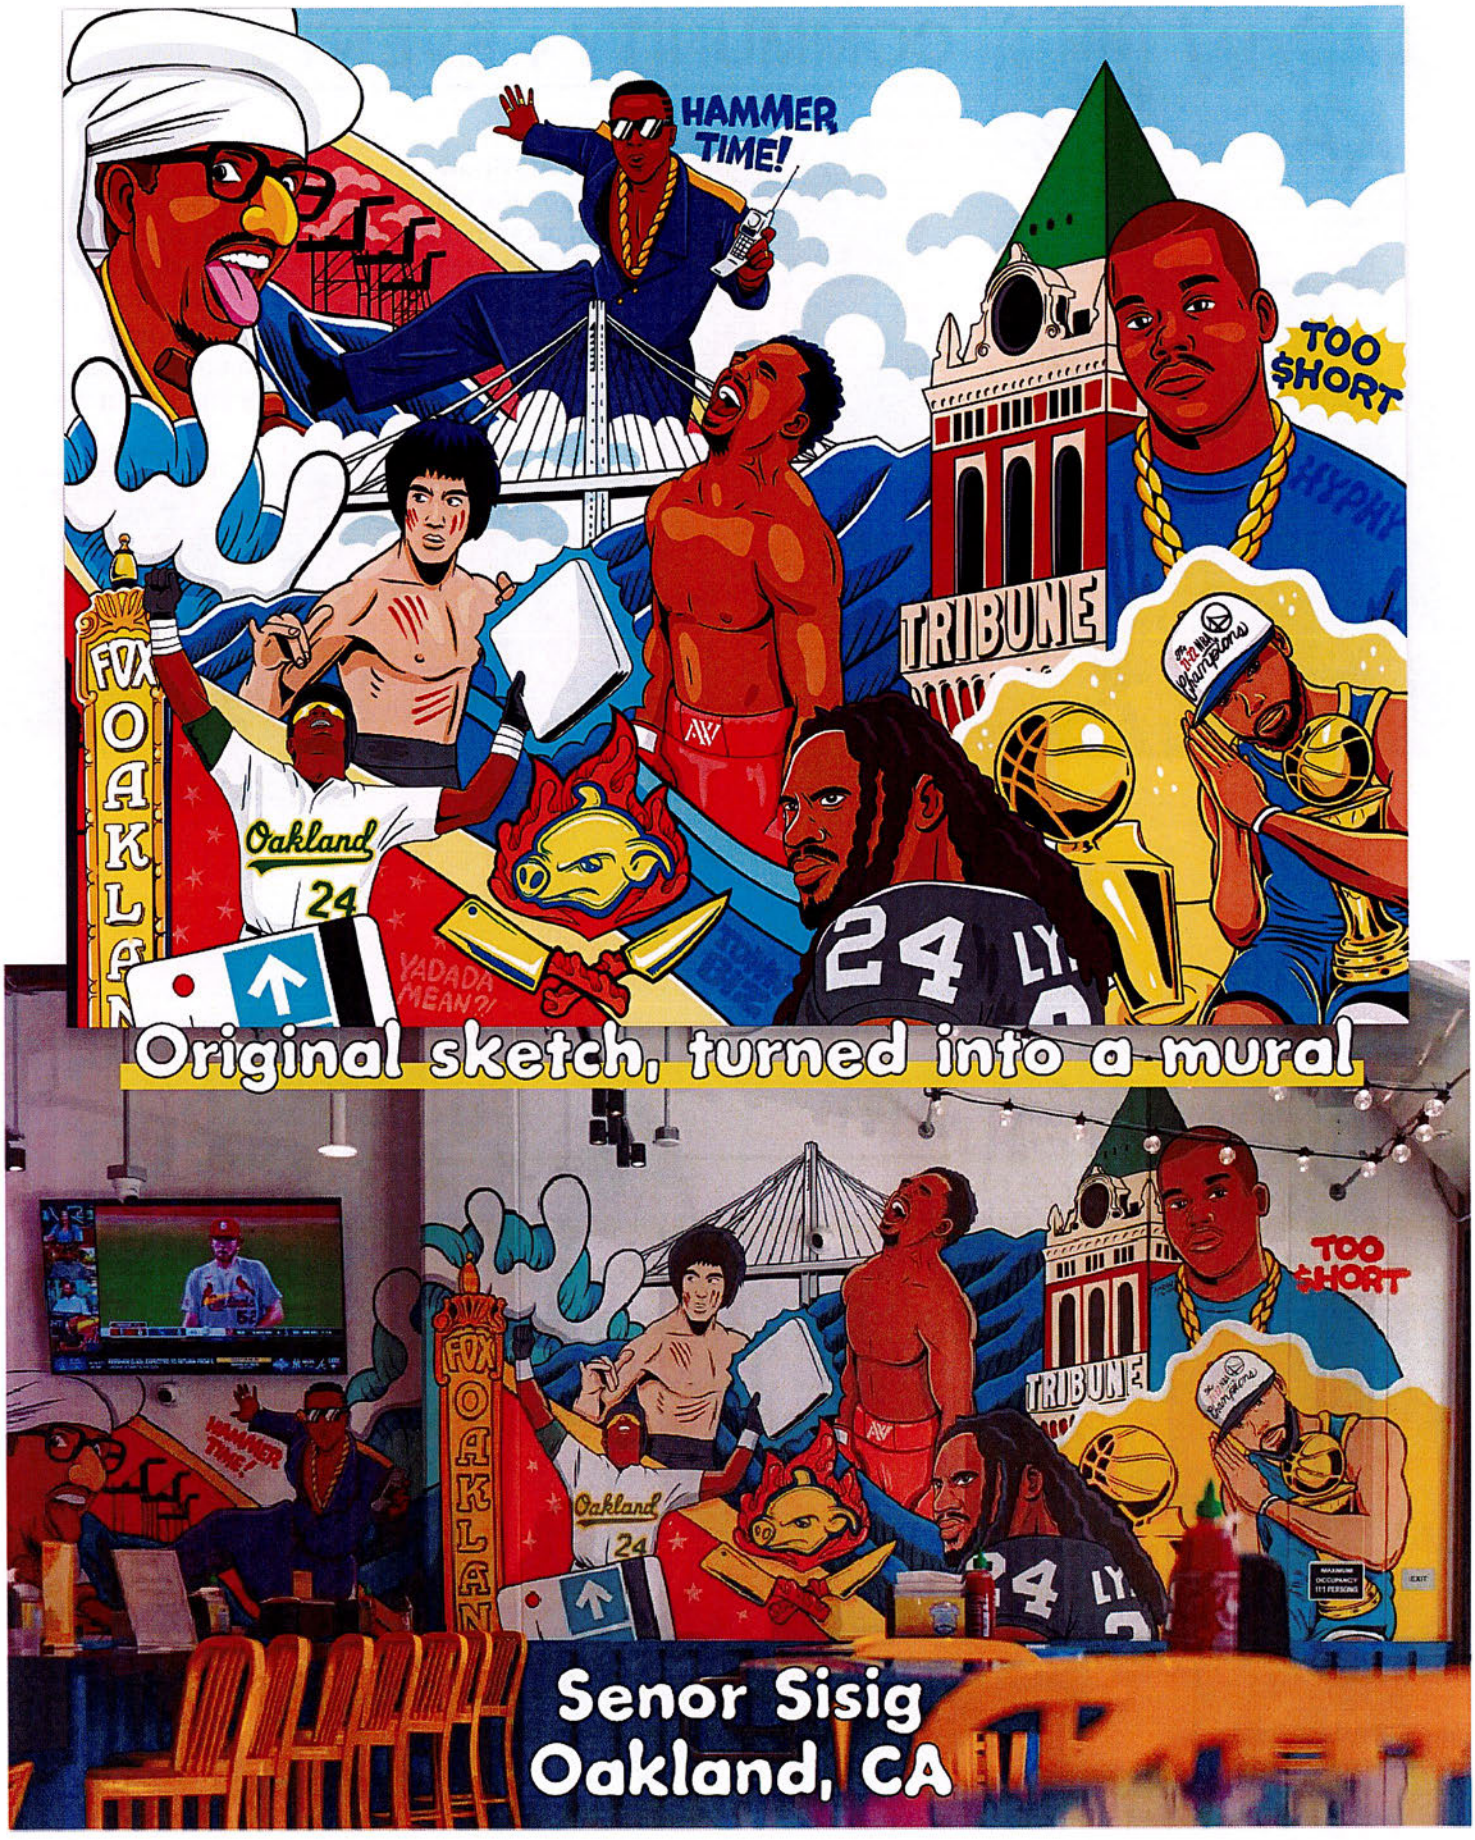

LA Art Show

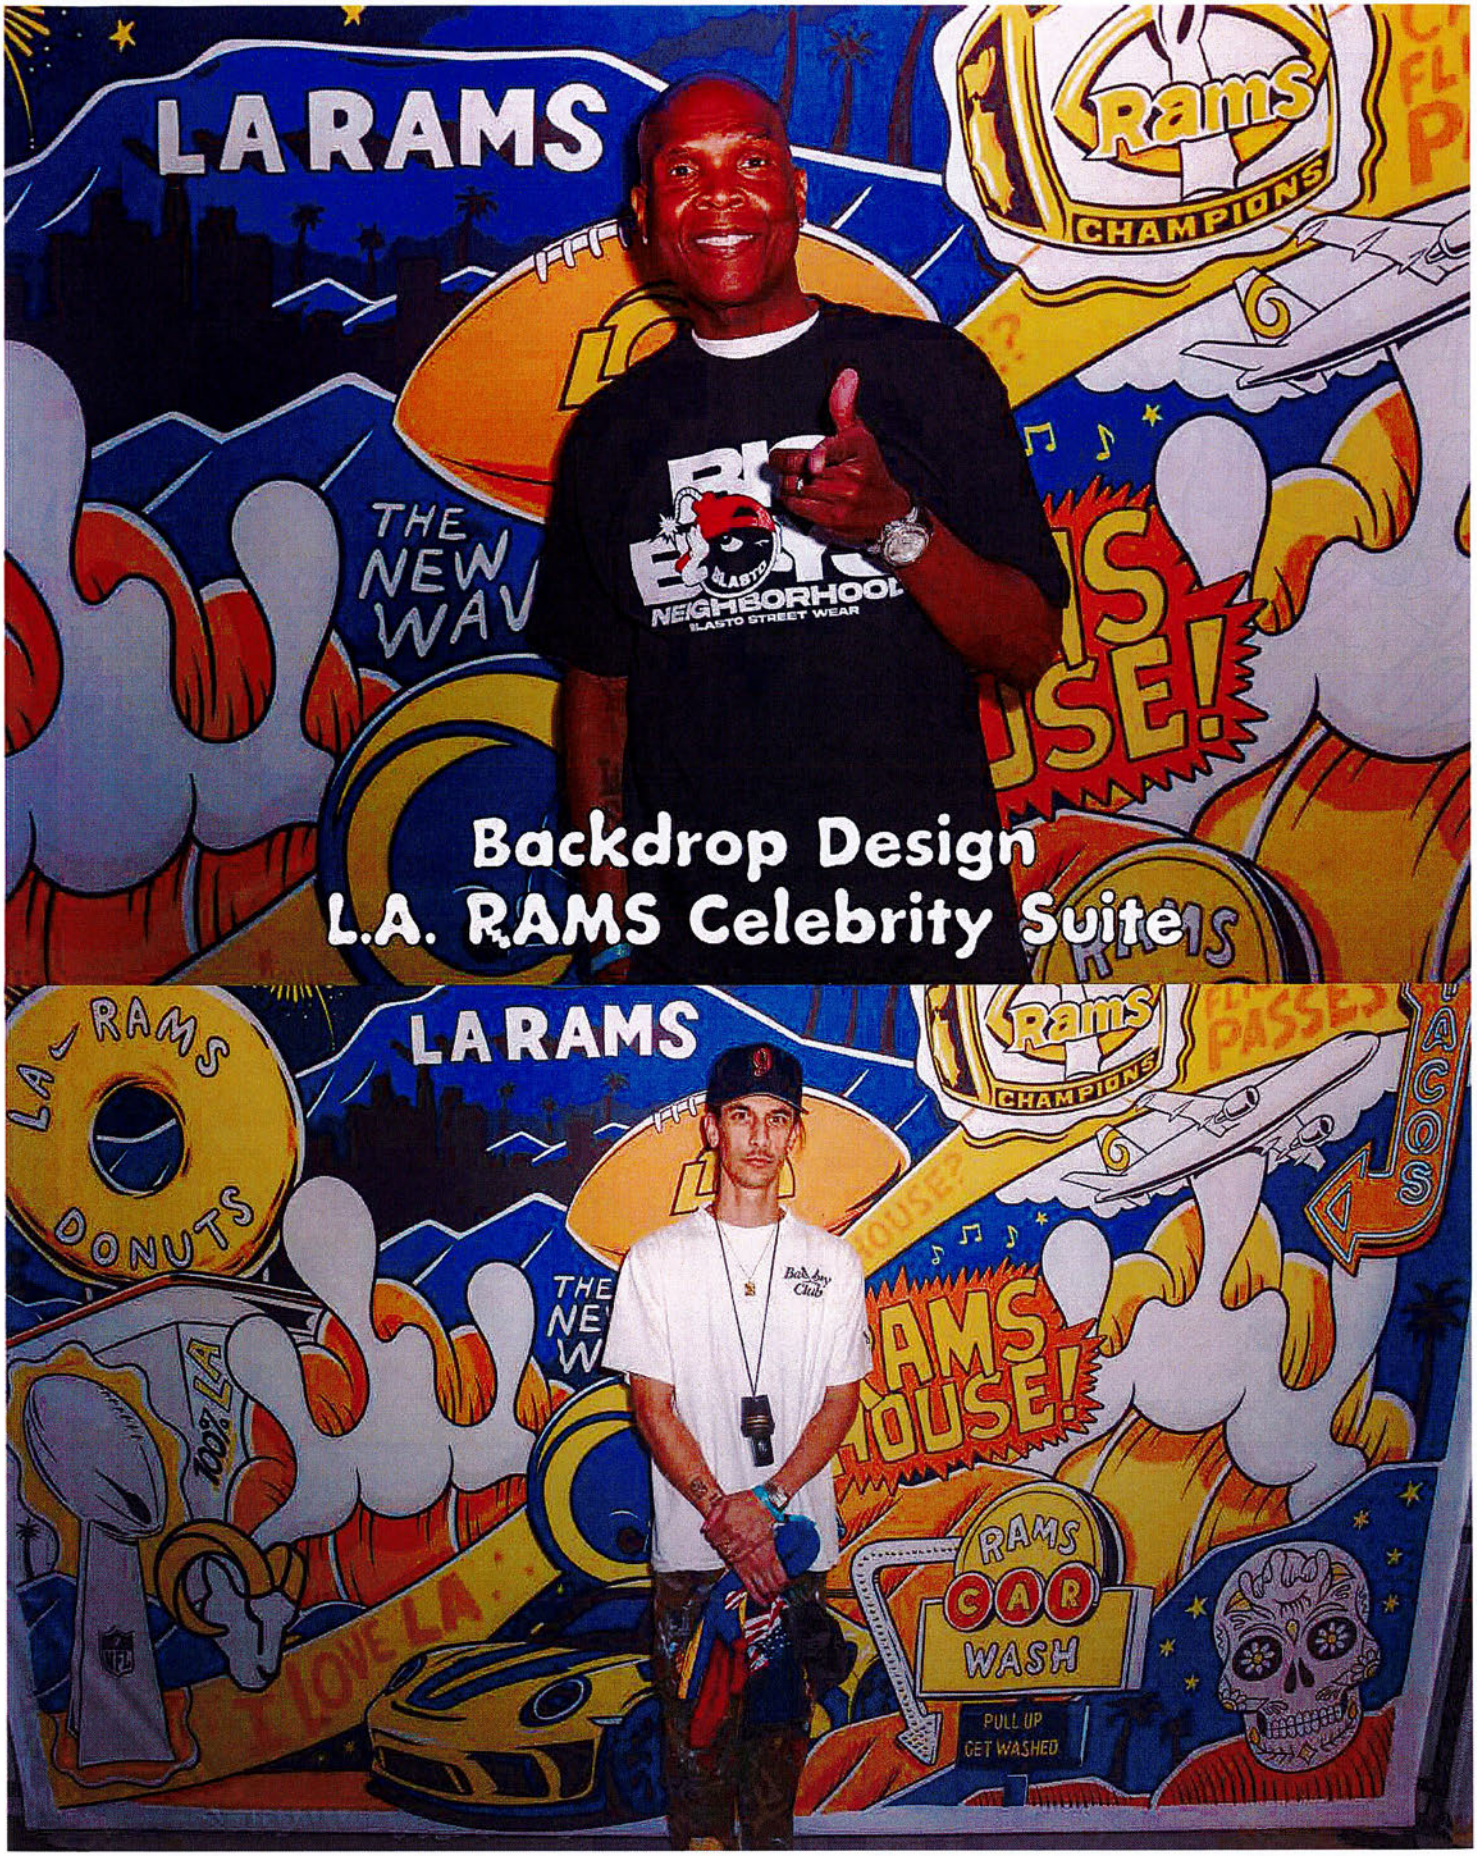

Aaron Kai and team produced a solo independent art show in the Arlington Heights neighborhood of Los Angeles. The art show spanned an entire week with an opening ceremony that saw a **95% sell out of original paintings**. With added support of a merchandise pop-up shop that saw an **80% sell out of inventory** throughout the week.

2. The concept follows along with a series Spencer has been painting for almost a decade, adorning objects and facades worldwide. The series focuses on the value of repetition to unlock new insights and information. These designs have an intent to bring awareness to the storm drains while simultaneosly trying to disguise them into our daily routine. Much as insights can be hideen from us behind a trhin veil of awareness.

3-4. SEE DESIGNS ATTACHED BELOW:

5. To protect agains spills the storm drains with be covered with 5mm vinyl sheeting and taped off so that nothing can enter during painting. To dispose of paint the water, it will be filtered to remove and solids and then taken to paint disposal sight for safe removal.

6. CURRICULUM VITAE
Spencer Mar Guilburt was born in Santa Monica, CA in 1983. Guilburt is a Contemporary artist whose style blends a variety of influences and media from painting, photography, to large-scale murals. Spencer works almost entirely from memory and loose digital mock-up leaving the final adaptation of the compositions to come from a less predetermined space. The paintings are as much meditations as they are thoughtful explorations on a reoccurring theme. The works often seem to unfold and define themselves fully only as they are being created. His oeuvre often appears bound purely to aesthetic appeal of line and the relationship between colors but, references to life, gesture, and movement abound. His "fire-flower" motif is a recurring homage to the natural world that has taken many forms. Repetition of the theme relaxes the mind, allowing it to go into an almost meditative state, where information can flow more freely, without the obstructions and trappings of conscious thought. In this state true insights are uncovered and the art seems to flow from a place of "thought" to a state of "being" with the artist simply being the conduit not the creator.

Spencer's work is included in Swizz Beats' Dean Collection, the Neiman Marcus Collection, and he has designed the Neiman Marcus holiday window display alongside artists like Jasper Johns and Warhol. He has shown works at the Whitney Museum and embellished clock at LACMA in correlation with Christian Marclay's "The Clock". He recently completed installations for BMW, Adidas, the University of California Los Angeles, and the LA Rams. He has collaborated with world renowned photographer Terry O'Neill on a series of works. Spencer and his work, were featured on a nationwide television interview on ABC Sports. His work is also seen online and in such publications as W Magazine, Whitewall, Interiors Magazine, Artillery Magazine, Forbes, Juxtapoz, Hypebeast, Complex, Angeleno, The Hollywood Reporter, Caras (MEXICO), Fine Life (JAPAN) and LA Weekly.

Subject: Proposal for Malibu Storm Drain Artwork Project
Kristin Riesgo, Community Services Director
KRiesgo@malibucity.org

Dear Kristin,

My name is Ernie Merlan and I'm writing to express my enthusiastic interest in contributing to Malibu's Storm Drain Artwork Project. It's a wonderful opportunity to use vibrant, dynamic art to spotlight Malibu's storm drains and their importance in keeping Malibu's beaches, coastline and natural environments clean and welcoming to wildlife.

I am happy to come make a presentation to provide more details.

PROJECT APPROACH

The designs I propose for the storm drain artwork will remind the community of their essential role to consciously focus on our oceans and coast, and preserving the beauty of Malibu. The designs will emphasize the beauty and vibrancy of tide pools.

As an artist and arts leader with over 35 years of scenic art, public art, mural-making experience for Walt Disney Imagineering, Universal Creative, and many more. I believe deeply in the power of public art to reflect our shared values and inspire people to reach towards their better nature; in this case the role we all have to responsibly protect our natural resources and beautiful, public spaces.

I am also the Founder and Executive Director of Muralism, a nonprofit dedicated to creating inclusive, community-driven public art that trains and employs artists with disabilities to collaborate with neighborhoods, schools, civic and community organizations to paint large-scale outdoor murals across LA County. Over 85 murals have been completed for Cities of Los Angeles, Pasadena and Carpinteria, including 65 for LA Unified Schools. Our murals don't just beautify – they build connections and become a space for dialogue, creativity, and community pride.

STORM DRAIN ARTWORK DESIGN CONCEPT

The designs for the storm drains will emphasize the beauty and vibrancy of tide pools. Visuals renderings are below under Project Proposal.

With rich, dynamic colors and detail, each storm drain will look as if you are passing a tide pool complete with anemones, starfish, crabs, mussels, clams, sea urchins and even wandering, lost octopus. The small but realistic nature of these creatures will be created at life-size proportions; this will encourage families to stop and look closer, to search and find the hidden treasures in the tide pool's details and ecosystem.

One design variable to incorporate, and I'd want input from the Malibu Arts Commission on, would be to include in each storm drain design one or two items that are out of place and do not belong like a plastic bottle or aluminum can. Painted in stark contrast to remind folks that whatever you put down the storm drain will eventually end up in our tide pools, this will call attention to the harm they cause to the creatures that populate them.

MATERIALS AND PROCESS:

The process will incorporate a thorough cleaning and priming. After the image has been transferred to the primed surface low VOC acrylic paint will be used to fill in the colors and work out the details. Having used this process in public settings both on walls and on paths, I am confident the art will look great in four years, even when exposed to constant water, dirt and traffic.

I only use high quality Acrylic Low VOC paint that is color fast even before clear-coating, and I will be happy to select from Malibu's previously approved products. As the protective sealant will be handled by the city staff I will not be concerned with the final finish.

I will design and be responsible for all aspects of the painting and execution of each of the storm drains' artwork. I will be supported by Muralism artists onsite. Muralism is dedicated to provide young adult artists with special needs viable career paths and break down stigmas to show what they can accomplish to meaningfully contribute valued and beautiful work to all communities. They are excited to be part of such a worthy environmental project.

SPILL RESPONSE PLAN

The storm drain opening itself will be covered with a plastic adhesive cover that I use on all floors and walls I want to protect on the murals I produce. This will prevent any spills from going into the drain. An ample supply of rags and clean water will be on hand to clean up any potential spills. We will also have a supply of sawdust on hand to help soak up any spills. The saw dust is easily swept up to be disposed of properly.

DISPOSAL OF WASTEWATER

Any used water, paint or spill residue is taken back to our studio where it is sorted and either reused or disposed of properly. Hazardous materials are taken to the appropriate disposal sites.

TIMELINE:

Once the storm drain artwork designs have been approved by the Malibu Arts Commission, completion for all four storm drains will take four weeks.

Professional Experience

Muralism – Valley Village, CA
Executive Director (2018–Present)

Founder and leader of a nonprofit dedicated to training young adults with disabilities to produce murals that connect the community. Overseeing the production of more than 100 murals across LA County and as far north as Santa Barbara County in collaboration with city agencies, schools, and nonprofits. Building employment pathways for artists with disabilities. Securing partnerships with Nickelodeon, LAPD, Michaels, Children's Burn Foundation, and LAUSD. Raising over $100K in startup funds and millions in project-based support.

Walt Disney Imagineering – Valley Village, CA
Ultraviolet Light Paint Specialist Consultant (2019–Present)

Designed and produced UV paint art for immersive theme park attractions worldwide. Responsible for digital-to-physical art integration using Photoshop, Illustrator, and manual touch-up.

Exceptional Minds – Sherman Oaks, CA
Executive Director (2011–2018)

Developed and led a groundbreaking vocational school and studio for young adults on the autism spectrum. Directed training and studio production in animation and visual effects; clients included Marvel, ILM, and Sesame Street. Grew annual enrollment from 9 students to over 250 served; raised over $3M in private and public funding.

Merlan Creative / Iguana Digital – North Hollywood, CA
Principal / Owner (2007–2011)

Ran a boutique design and animation firm. Managed projects for The Walt Disney Company, Universal Studios, as well as small movie and live television productions.

Universal Studios – Port Aventura – Spain
Field Art Director (1999–2002)

Directed scenic art production for an international theme park; won THEA Award for Outstanding Achievement.

Walt Disney Imagineering – Mural Makers – North Hollywood, CA
Senior Scenic Artist (1994–2002)

Scenic Artist on attractions including Indiana Jones, Toon Town, and Tokyo Disney Seas. Created digital mural production process for vinyl printing and installation.

Public Murals & Community Projects

Over 100 murals completed, including:

- 60+ murals at 30+ schools
- Mural projects for 10 nonprofit organizations
- 13 city-sponsored murals in Los Angeles and Carpinteria

Highlights include:

- Roy Romer Middle – "Welcome Mural" (2025)
- Fair Ave Elementary – "Golden Fields" (2024)
- North Hollywood Fire Station 60 "Tongva: Then and Now" (2024)
- Portola Middle – "Bugs Eye View" (2024)
- Garfield Elementary – "Nickelodeon Art Club" (2023)
- Shemish Farms – "Everyday is Earth Day" (2023)
- Exceptional Children's Foundation "Colors of the Rainbow" (2022)
- City of Los Angeles – "NoHo K-Rail Beautification" (2021)
- Hope of the Valley Tiny Home Village – "Amanda Gorman – Be the Light" (2021)
- LA Family Housing – Pacoima Place "Nickelodeon Kids at Play" (2019)
- North Hollywood LAPD – "Cadets – Where the Future Begins" (2018)

Film and Visual Effects Credits

"Good Night Scare Crow" – Werner Krow Productions
- Production Designer & Art Director (2019)

"Black Panther" – Marvel

INSTAGRAM: @P.ANNA_ARTS

PROJECT APPROACH

Design Concept

This mural transforms the storm drain infrastructure into a vibrant, immersive underwater ecosystem, highlighting the beauty and fragility of Malibu's coastal waters. The design reimagines the visual language of a terrestrial "superbloom" as a marine phenomenon - an abundant, flowing composition of sea anemones, corals, and marine invertebrates that echo the richness and diversity of ocean habitats.

Each design presents a unique "underwater bloom," where organic forms radiate outward and interweave, creating a sense of movement and life. The compositions are unified by a dynamic background of swirling blue currents, inspired by expressive, movement-driven painting traditions. These currents visually connect all panels, symbolizing the continuous flow of water- from street to storm drain, and ultimately into the ocean. The concept includes four design variations for presentation on a provided template, which can be adapted to the specific shape and dimensions of each storm drain.

The mural invites viewers to reconsider what enters these drains. What disappears from sight does not disappear from impact. By framing the drain as a gateway rather than an endpoint, the artwork emphasizes the direct connection between urban runoff and the health of marine ecosystems.

Color plays a key role in storytelling. Vibrant corals, ranging from warm oranges and reds to luminous purples and soft bioluminescent hues, stand in contrast to deep ocean blues, capturing both the vitality and vulnerability of these habitats. The visual abundance is intentional: thriving ecosystems depend on clean, balanced conditions. Pollution disrupts this balance, often invisibly.

Rather than presenting a literal message, the mural uses beauty and immersion to create an emotional connection. The goal is to inspire curiosity, appreciation, and ultimately stewardship of coastal waters and the sensitive habitats they sustain.

Community & Educational Impact

The design supports environmental education by making the invisible visible. Storm drains become points of awareness, prompting viewers to consider how everyday actions (littering, chemical runoff, and waste disposal etc) affect ocean life.

The artwork is accessible and engaging for a wide audience, including families, students, and visitors. Its bold, flowing composition and recognizable organic forms encourage interaction, photography, and social sharing, extending its reach beyond the physical site.

Materials & Durability

Given the functional nature of storm drain infrastructure and its exposure to water, sun, and debris, durability is a primary consideration.

Surface Preparation: Thorough cleaning and priming of the surface to ensure proper adhesion.

Paint: High-quality, exterior-grade acrylic or mineral-based paints designed for longevity, UV resistance, and color retention.

Sealant: Anti-graffiti, non-slip protective coating to safeguard the artwork while maintaining safety and ease of maintenance (provided by the City).

Application: Layered painting techniques to achieve depth and vibrancy while ensuring long-term durability in a coastal environment.

All materials will be selected to withstand Malibu's specific environmental conditions, including sun exposure, salt air, and periodic water flow.

Proposed Timeline

Week 1-2: Final Design Development

Refine selected concept with stakeholder feedback

Adjust color palette and composition for site-specific conditions

Week 3: Surface Preparation

Cleaning, repairs (if needed), and priming of storm drain surfaces

Week 4-5: Painting Phase. Layout and base layers

Detailed rendering of corals, anemones, and background currents

Week 6: Finishing & Sealing

Final detailing, application of protective coating.

Timeline may be adjusted based on weather conditions and site access requirements.

ATTACHMENT 3

SPILL RESPONSE PLAN

Due to the environmentally sensitive nature of the storm drain locations, I will implement strict preventative measures to ensure that no paint or materials enter the drainage system. Prior to beginning work, all storm drain openings will be temporarily protected using fitted covers, absorbent socks, and waterproof barriers to block any potential runoff. Work will be conducted using controlled application methods (brush and roller rather than spray) to minimize overspray and accidental spills.

A spill response kit will be kept on-site at all times, including absorbent pads, containment socks, cleaning cloths, and sealable waste bags. In the event of a spill, work will stop immediately and the area will be contained using absorbent materials to prevent any migration toward the drain. All spilled material will be promptly collected and removed from the site.

Only low-VOC, water-based paints and materials will be used. Paint quantities will be managed carefully, and all containers will remain sealed when not in use to reduce the risk of accidental tipping or leakage.

Wastewater generated from brush cleaning or surface preparation will not be discharged into the storm drain. Instead, it will be collected in designated containers and either filtered for reuse or disposed of in accordance with local environmental regulations. Any solid waste, including used absorbents and cleaning materials, will be bagged and disposed of at an approved waste facility.

These measures ensure full protection of the stormwater system and compliance with environmental safety standards.

Anna Pearson

VISUAL ARTIST AND MURALIST

Anna Pearson is a Ukrainian-born, San Diego-based contemporary artist whose work reflects the convergence her cultural heritage, the vibrance of her current environment and her deep connection to the expressive power of art. Passionate about pushing boundaries and exploring new perspectives through her art Anna specializes in big scale murals and custom paintings.l that immerse viewers in a world of color, movement and emotion.

MONIKA PETROCZY

ATTACHMENT 3

2026 Storm Drain Artist Application

Monika Petroczy Artist info & Contact

is an artist, photographer, cartographer, graphic and web designer living in Ventura county for the past 13 years. She has also painted numerous small murals for municipal utility box beautification projects in Souther California and several large murals at schools in Pasadena and Pearblossom Community Center with her partner Jen Swain.

Monika and Jen are currently on the artist team painting the Moon Ditch mural, a mile-long mural in progress in Ventura County visible from 101 Southbound and Amtrak rail alongside the Ventura Auto Center.

Monika is also experienced chalk maddonara, having created numerous 6-12 foot chalk murals for iMaddonari, Ventura, Lompoc Chalks, Orcutt Children's arts, San Diego and Pasadena chalk festivals for the past 10 years.

Monika enjoys ultimate frisbee, fitness, the outdoors and being a 'crazy cat lady' in her spare time.

Her design, murals and photography can be seen at

https://www.monidesign.com/murals &

https://www.instagram.com/mapgrrrrrl

Monika Petroczy | [redacted] | @mapgrrrrrl | [redacted] | photo.monidesign.com

Project Approach

My proposed designs are inspired my pointilism and tribal art, with the intention of showing that the storm drains lead to the ocean and affect sealife. The designs are meant to be colorful, simple but eye catching for viewers that only see them for a few seconds.

Jen Swain would be my assistant helping me install artwork.

My timeline for each installation would be approximately three days per piece, approximating the same timeline as needed for installing an electrical box mural. I would clean each area (we may require pressure washing), and use chalk grids to trace the artwork outlines, tailoring each piece to its actual shape and dimensions. I would use Dunn-Edwards exterior paint, and small round sponges to make the dots. I would bring water in buckets for cleaning brushes and take all materials off-site for cleaning and dispose of any waste of-site. Ventura is under an hour away and we can stay with family in Malibu as needed.

If necessary, the art work can be modified to use parkling lot paint, if the City of Malibu deems necessary for longer life.

Spill Response Plan

For each site there will be a waddle ("straw snake") placed into the drainage to prevent any paint from going into it, in case of a spill. There will have a bucket of rags and wipes to soak up any paint in case of spill also and disposed off-site.

Used paint water will be taken away in a closed 5 gallon bucket and mixed with clumping cat litter to dry before it is thrown away.

MONI DESIGN

RESUME

Current work: Freelance web and graphic design and public art. Focus on small business and non profit web design, branding, print and social media; portrait photography.

Highlights of Work Experience:

- Design and develop web sites, branding and marketing for small businesses and non profits.
- Creating marketing materials, ads and custom email marketing for Antioch University SB
- Manage website, social media campaign, aparrel, swag and branding for a large tournament.
- Part of a team that redesigned and rebuilt all Antioch University web sites
- Transit map sourcing, design, layout and printing, using agency style guides
- Training colleagues in design practices and techniques
- Educational maps, charts, sourcing, design, layout and printing, using agency style guides
- Created leggings apparel e-commerce store
- Painted 20 + Public murals in Southern California

Responsibilities include project management, client relations, design and layout for web and print; graphic design production in the Adobe Creative Suite including Photoshop, InDesign and Illustrator. Proficiency in iMovie, MS Office, ArcGIS, and more.
Building web sites in WordPress customizing CSS and templates, using Photoshop, and online resources.

Portfolio: www.monidesign.com

Work History:
2008-present: Independent contractor for Fritz Creative Marketing, Digital Orange Studios, Phi Web Studios - web and graphic design; social media campaign building. Freelance graphic design, web consulting, custom cartography, portrait and event photography

2001-2008: CHK America employee - cartography, project management client relations

2001: Mark Oliver Inc., package design

1999-2001: Freelance graphic design

1996-1999: Maps.com - cartography, project management, client relations

Education:

- Bachelors of Science University of California Santa Barbara in Geography and Earth Sciences
- Mapping and Geographic Information Systems course at Santa Barbara City College:
- UCSB Extension courses in web design, and graphic design for print.
- Photography courses Ventura & Moorpark Colleges

Project Proposal:

My design for the Malibu storm drain project transforms each inlet into a visual threshold between land and ocean, making visible the otherwise unseen movement of water through the city and into the sea. Drawing from my sculptural practice, these works translate organic, flowing forms into simplified, bold compositions that are legible from a distance while still offering moments of discovery up close.

The four proposed designs function as a cohesive series, each exploring a different expression of flow, accumulation, and transformation. Using curvilinear lines, layered color fields, and biomorphic shapes, the compositions evoke tidal movement, underwater plant life, microbial systems, and shifting environmental conditions. While each drain is visually distinct, a shared visual language unifies the series through rhythm, repetition, and directional movement toward the drain opening, reinforcing the idea of water being carried from street to ocean.

The visual representations included in this proposal reflect my intended approach for each site, demonstrating how the compositions will be adapted to the shape and placement of each storm drain while maintaining clarity, cohesion, and visual impact. Final designs will be refined in collaboration with City staff to ensure alignment with site conditions and project goals.

The visual language of these designs is rooted in my sculptural practice and extended through drawing and painting. Three of the proposed compositions originate from photographs of my sculptures, which I then translate into simplified, graphic forms through drawing and paint. This process allows complex, dimensional works to be reinterpreted into clear, flowing surface designs that retain a sense of movement and material energy. The fourth design is derived from an oil painting that engages themes of environmental degradation, bringing a more painterly and atmospheric sensibility into the series.

Although my current practice is centered in sculpture, my foundation is in painting and anthropology, which continues to inform how I approach color, detail, and visual storytelling. This combination allows me to move fluidly between dimensional and surface-based work, creating compositions that are both structurally dynamic and visually engaging. In this project, that background supports a balance between bold, accessible forms and moments of detail that invite closer looking.

A key aspect of the approach is balance: approximately seventy percent of each composition consists of bold, simplified color fields and wide, flowing bands of color, allowing for clarity, durability, and visual impact. The remaining areas concentrate more detailed patterning and linework, creating focal points that reward closer viewing without overwhelming the composition. This strategy ensures the work remains both visually striking and practical to execute and maintain.

Color plays an essential role in the project. The palette draws from coastal and ecological references, including deep ocean blues, kelp greens, sand tones, and moments of high-contrast color that suggest bioluminescence, energy, and environmental shifts within water systems. These transitions create emotional resonance while subtly prompting reflection on the relationship between urban runoff and ocean health.

The designs will be executed using high-quality, exterior-grade acrylic or water-based street paints formulated specifically for asphalt and concrete surfaces. These materials provide strong adhesion, UV resistance, and durability under foot traffic and environmental exposure. Painting will be done by hand using brushes and rollers to maintain control, clarity, and clean edges, ensuring the integrity of each composition.

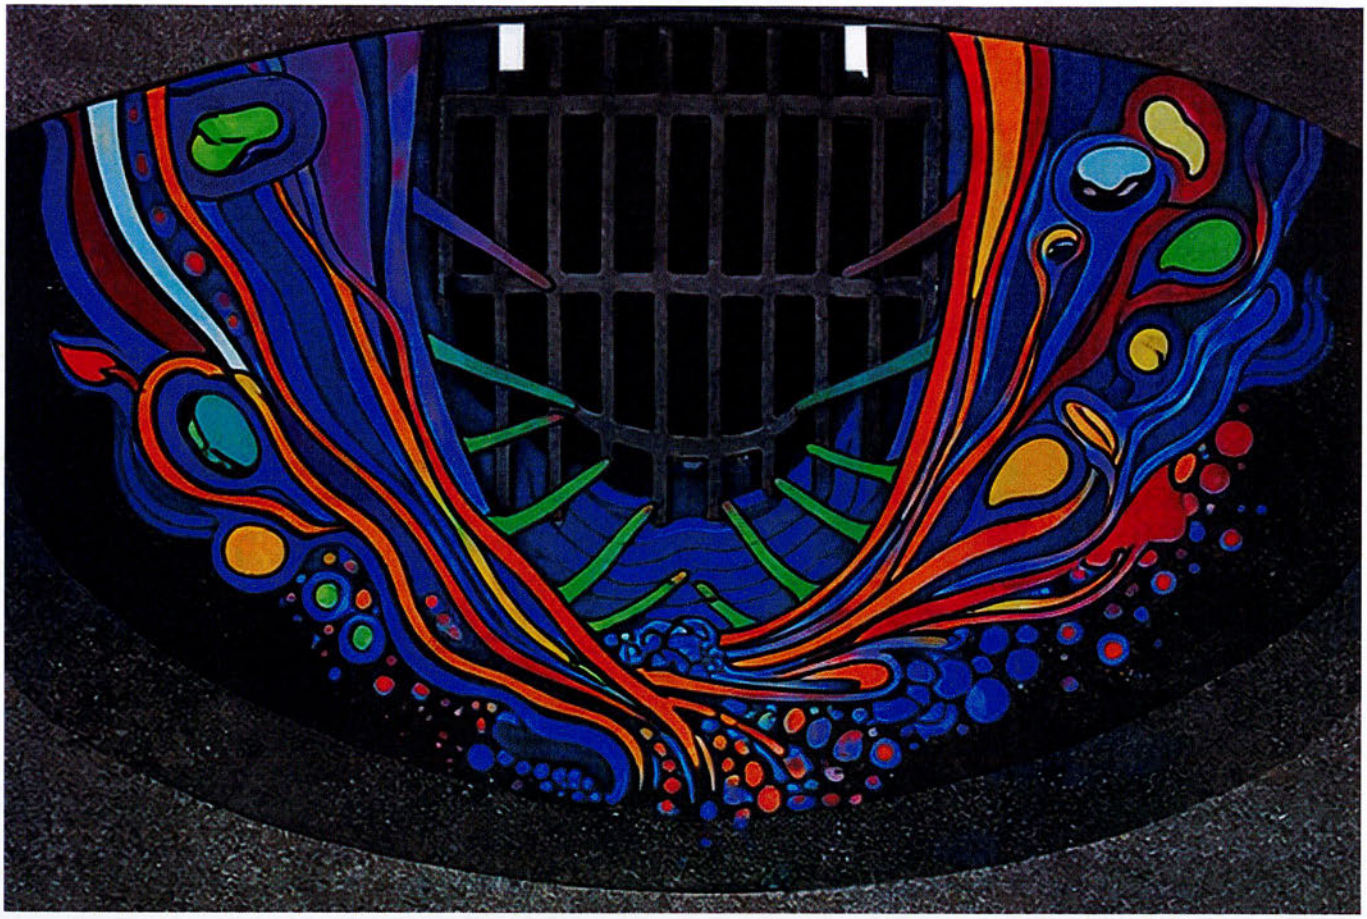

A non-toxic, water-based sealant or anti-graffiti coating will be applied as a protective layer to extend the lifespan of the artwork and support long-term maintenance. All materials will be selected with environmental responsibility in mind, aligning both the concept and execution of the project with Malibu's commitment to ocean stewardship.

Project Proposal:

Drain 1: ***Kelp Currents. Gathering Tides.***

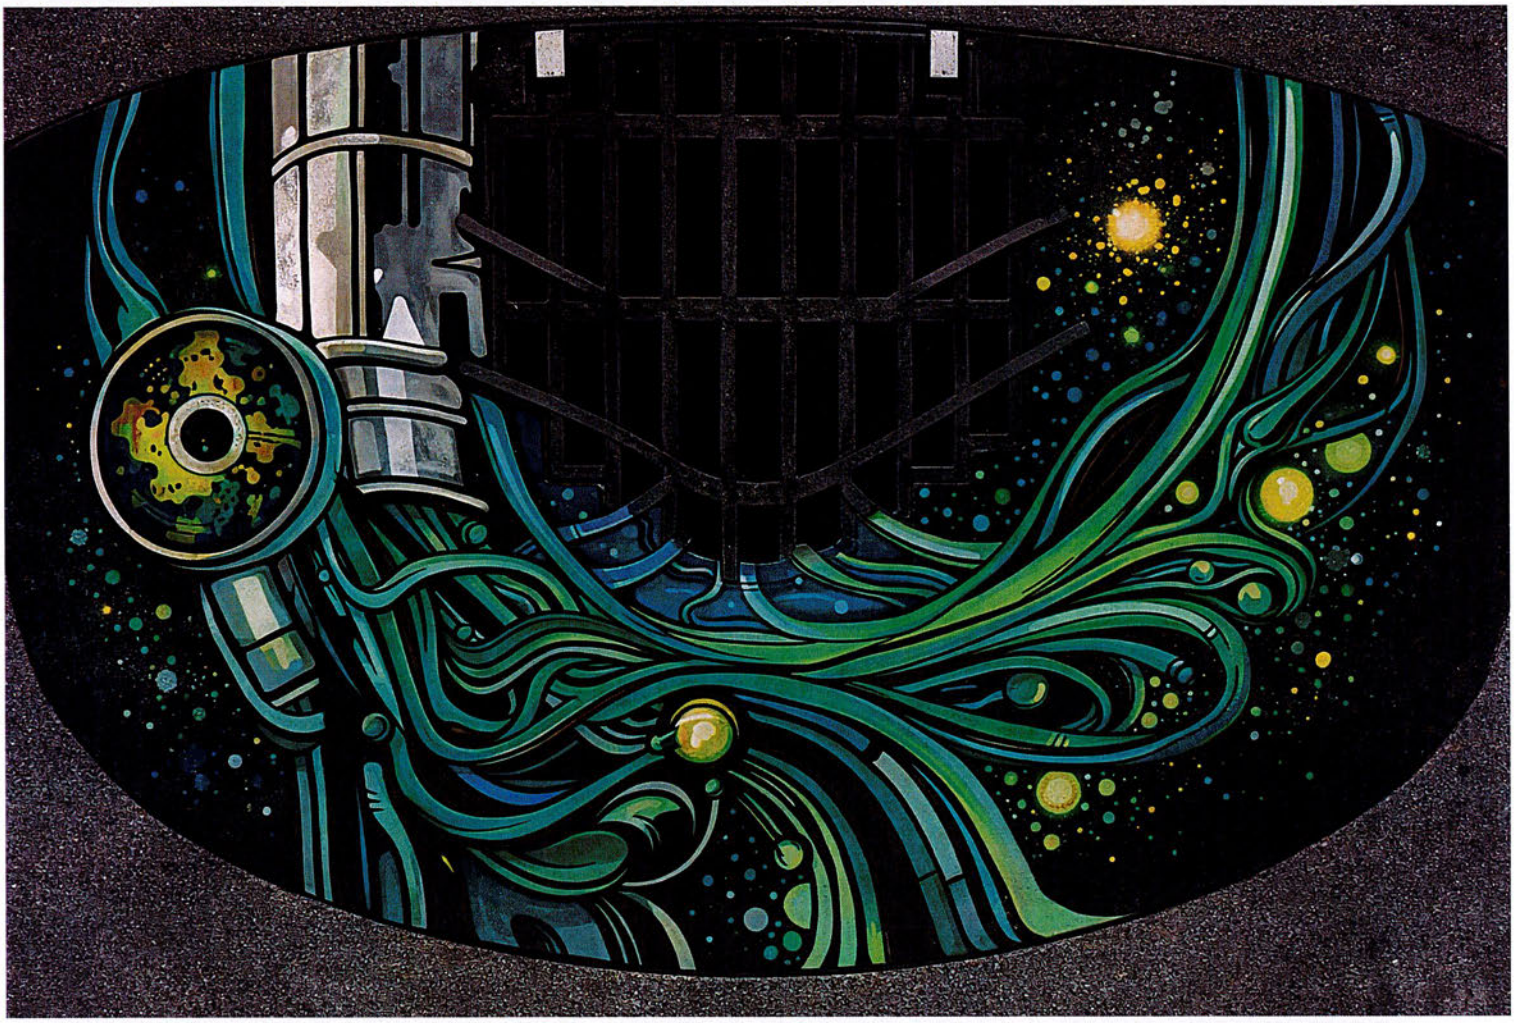

Drain 2: *Converging Streams. Electric Ocean.*

Drain 3: *Tidal Bloom. Echoes of the Deep.*

Drain 4: ***Celestial Flow. Ocean Systems.***

Spill Response Plan

Protection of the stormwater system is a primary consideration in both the design and installation of this project. All work will be conducted in accordance with best practices for surface painting near active drainage infrastructure.

Prior to installation, each storm drain inlet will be fully isolated using a multi-layer containment system. This will include a fitted drain insert or plug, impermeable plastic sheeting, and secondary absorbent barriers (such as berms or socks) placed around the perimeter of the work area. These measures will ensure that no paint, debris, or liquid can enter the storm system during the painting process.

All materials used will be water-based, low-VOC, and non-toxic. Application will be performed using brushes and rollers only, eliminating the risk of overspray and airborne particulates.

In the event of a spill, work will cease immediately and the affected area will be contained using absorbent pads or granular absorbents. Contaminated materials will be collected and placed into sealed, labeled containers for proper disposal. No washout, rinsing, or dilution will occur on-site that could result in runoff entering the storm system.

All wastewater generated from brush cleaning or surface preparation will be captured in dedicated containers. Wastewater will be filtered as needed and disposed of in accordance with local, state, and federal regulations, including transport to an approved sanitary sewer connection or hazardous waste facility if required. Under no circumstances will wastewater be discharged into storm drains, gutters, or public rights-of-way.

At the end of each workday, the site will be inspected to confirm that containment systems remain secure, all materials are properly stored, and no residue or debris is left in the surrounding area.

These procedures ensure full compliance with environmental safety standards and align with the City of Malibu's commitment to protecting coastal water quality.

2. **Project approach (concept, proposed timeline, and choice of materials)**

The design concept centers on a positive, forward-looking approach to raising awareness about the consequences of neglecting the ocean. Rather than focusing on fear-based narratives, the work emphasizes appreciation and respect by celebrating the ocean's richness, resilience, and the many benefits it provides. My artwork exemplifies the connection between ocean, biodiversity, and humanity. The message of this work is : The well being of earth is directly tied to the oceans health, and everything is sustained and connected through cycles. We have an obligation to not only save but celebrate the ocean's life.

In contrast to fear-based imagery, this piece focuses on themes of abundance, harmony, and hope. The composition is vibrant and celebrates the interconnected relationship between ocean life and the ways we, as humans, engage with and depend on the sea.

At its core, the art depicts a dynamic community of fish, symbolizing the richness and biodiversity that exists beneath the surface. This visual emphasizes that life below the water is both abundant and essential, supporting ecosystems far beyond the ocean itself.

The inclusion of a beach scene featuring a surfboard and coastal birds extends this narrative to the shoreline, highlighting the deep cultural and environmental significance of the ocean in California. The beach serves as a bridge between marine and terrestrial life, illustrating how both humans and land-based animals benefit from the ocean's climate and ecological systems.

Additionally, I have incorporated underwater plant life, such as coral, to further emphasize the beauty, fragility, and vitality of marine ecosystems. Together, these elements create a unified image that reflects our shared connection to the ocean and underscores the importance of its preservation.

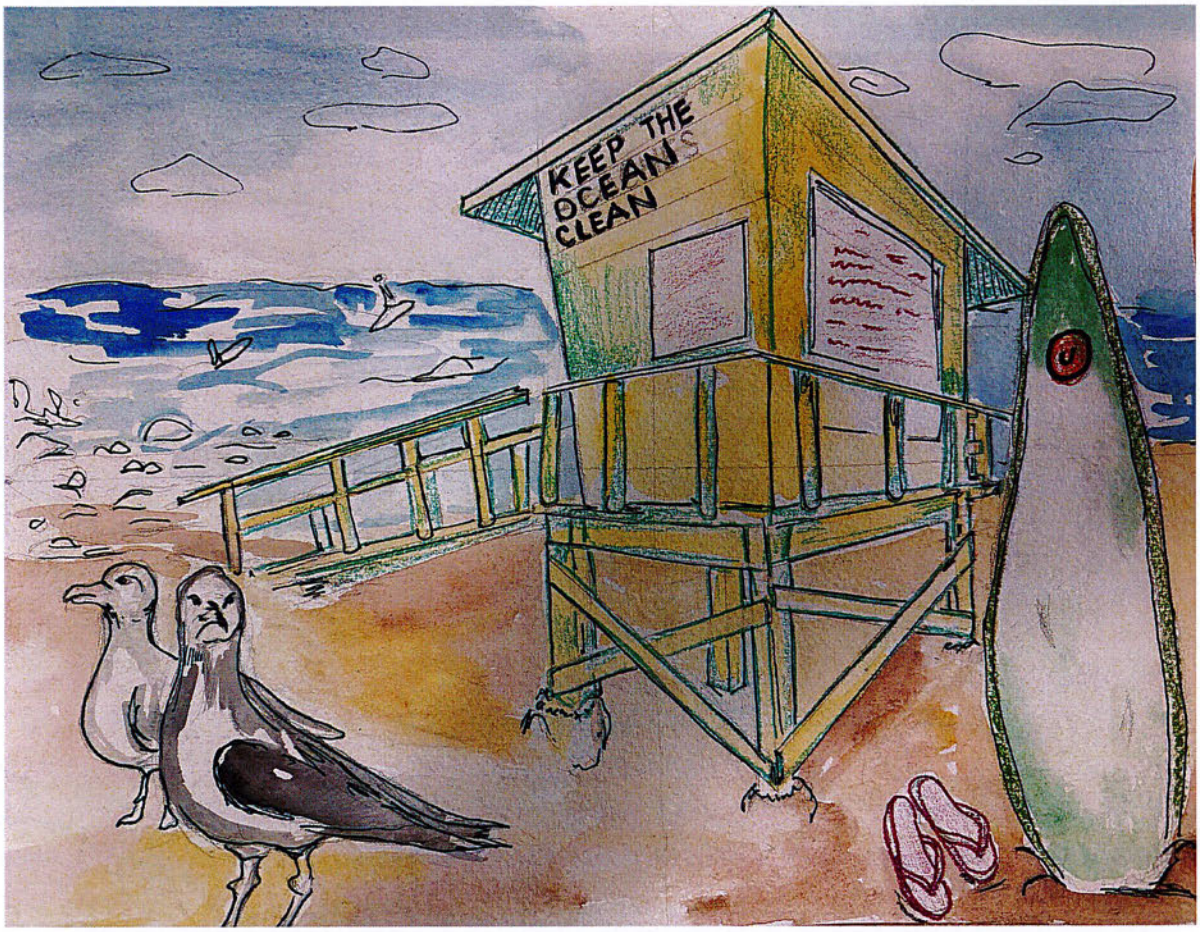

The fourth thumbnail of the mural vision emphasizes that to care for the land's beauty, plant life, and the climate, is to care for the ocean itself. The thriving hillside becomes a symbol of the ocean's unseen influence, reminding viewers that clean air, stable weather, and sustainable ecosystems all begin with a healthy ocean.

While the mock-up features a vibrant palette, my painting approach refines these colors into a softer, more natural tonal range that integrates harmoniously with the surrounding environment.

The project timeline is estimated at six (6) weeks, encompassing all phases from initial outlining through final detailing and touch-ups. I will execute the four murals consecutively to ensure consistency in quality, color balance, and overall composition across all surfaces.

All work will be completed using premium, professional-grade materials, including high-quality coatings from Benjamin Moore, selected for their durability, longevity, and suitability for exterior coastal conditions. Throughout the process, I maintain a clean and organized worksite, adhering to best practices for material handling, surface preparation, and post-project cleanup.

3. **Project Proposal (images you created)**

Beach Scene ***(The beach serves as a bridge between marine and terrestrial life, illustrating how both humans and land-based animals benefit from the ocean's climate and ecological systems.)***

a dynamic community of fish, symbolizing the richness and biodiversity that exists beneath the surface. This visual emphasizes that life below the water is both abundant and essential, supporting ecosystems far beyond the ocean itself.

Coral, to further emphasize the beauty, fragility, and vitality of marine ecosystems. Together, these elements create a unified image that reflects our shared connection to the ocean and underscores the importance of its preservation.

Emphasizes that to care for the land's beauty, plant life, and the climate, is to care for the ocean itself. The thriving hillside becomes a symbol of the ocean's unseen influence, reminding viewers that clean air, stable weather, and sustainable ecosystems all begin with a healthy ocean.

4. Spill response

I adhere to environmentally responsible practices in all mural projects. I supply and manage my own water and do not wash brushes or dispose of wastewater on-site. All materials are handled off-site to ensure that no paint or contaminants enter storm drains or surrounding areas.

I use high-quality, low-VOC coatings from Benjamin Moore, selected for their durability and resistance to moisture and coastal conditions. These materials are appropriate for exterior applications, including areas near gutters and downspouts, and are designed to perform safely once fully cured.

In compliance with project requirements, I implement a strict spill response protocol to prevent any hazardous materials from entering the stormwater system. All paint water and liquid waste

are collected in a dedicated, sealed 8-gallon containment bucket and transported off-site for proper disposal in accordance with local environmental regulations.

These practices reflect my commitment to sustainability, public safety, and environmental stewardship, particularly in sensitive coastal communities such as Malibu.

5. Resume

Education

- Loyola Marymount University at Los Angeles Master of Arts (M.A.) in Education - Visual Arts May 2024

- University of Nevada Las Vegas at Las Vegas Bachelor of Science (B.S.) in Business Administration in Marketing

Titles Served

- Fine Arts Teacher, Viewpoint School - Calabasas, CA (2025 - present)
-
- Art Director , St. Mary's Academy- Inglewood, CA (2021 - 2024)
-
- English Teacher, April Academy - 2018 - 2020
-
- Childlife Specialist : Arts and Crafts Volunteer Summerlin Hospital, Summerlin, Nevada January 2017 - December 2017

Roles and Description

- Inspired students and assisted in developing creativity and self-expression through various art forms and media.
- Taught classes on painting, collage, and color theory.
- Managed art room supplies, equipment and resources to maintain consistent supply for projects.
- Collaborated with community arts organizations to bring real-world experiences into classrooms and provide students with opportunities for learning and growth.
- Create budget for art department, buying supplies for school year, organizing materials for all use and purposes Instructor for AP Studio Art, Ceramics, Photography, Art Honors, and Drawing grades 9th-12th
- Provided classes with rigorous content and a focus on creativity, expression and differentiated instruction
- Developed lessons plans to incorporate best practices, useful techniques and school requirements Implemented custom curricula and personalized instruction to help individual students

- Prepared students for art showcases by guiding through techniques and artistic choices Interpreted literature and essays in context with historical period to promote critical thinking Cultivated welcoming learning environments in both classroom and online contexts

Project Approach

My design demonstrates my commitment to environmental storytelling, community engagement, and durable, site-responsive design. Having completed public murals across the country—from coastal towns to urban corridors, my process that blends artistic vision with practical execution, ensuring each installation is both visually compelling and built to withstand the demands of outdoor public space.

Concept: For this project, I drew inspiration from Malibu's unique coastal ecology to create a series of vibrant, interconnected murals that transform storm drains into visual reminders of the delicate relationship between land and ocean. My design features native marine species, flowing water motifs, symbolic elements that highlight the journey of runoff from street to shoreline, and a palette and style that harmonize with the city's natural environment, Sunlit blues, sandy neutrals, and organic shapes that echo kelp forests, tide pools, and migratory marine life will create a cohesive, beautiful, and educational installation which will engage residents and represent the need to protect and preserve Malibu's waters.

Choice of Materials: Durability and environmental responsibility are central to Rivard's material choices. His murals across the country have remained vibrant for years due to his disciplined approach to surface preparation, paint selection, and protective finishes.Key materials include:

- Paint: Sherwin Williams EVERLAST Paint plus Primer designed for exterior use, offering strong adhesion and fade resistance
- Primer: Kilz 3 Premium to minimize environmental impact while providing a strong, durable surface prep
- Sealant: Vandlguard Mural Guard anti-graffiti coatings & UV-resistant clear coat to protect against vandalism and Malibu's intense sun exposure

Timeline: Considering I use multiple coats of primer and paint to ensure durability and longevity, ach drain will take approximately 3 days to complete for a total of 12 days to completion.

Spill Response Plan

To prevent paint or other materials from entering the storm drain in the event of a spill, I will implement a containment-first approach. Before beginning any work, I will place a protective barrier—such as a drain cover. This will create a barrier to stop liquids from reaching the drainage system.

I will also keep spill-response materials, including absorbent pads and inert absorbents like clay or sand, immediately on hand. If a spill occurs, I will stop the source, contain the material within the work area, and use absorbents to capture and collect the spill before it can migrate toward any drainage pathway. All used absorbent materials will be gathered and stored in sealed containers for proper disposal.

For wastewater disposal, I will follow environmentally responsible practices that prevent contamination of soil or waterways. Wastewater generated from cleaning tools, equipment, or surfaces will never be discharged onto the ground, into storm drains, or into any outdoor area. Instead, I will collect all wastewater in designated containers and transport it to an approved disposal location.

I have never had a spill at any of my mural sites because I always take the necessary precautionary measures before installation.

Resume

Upcoming Public Mural Art Projects

"Thommie Walsh" A Life on Stage", Auburn, NY (Spring 2026)
"Above the Nest", Sarasota, FL (Spring 2026)

Completed Public Art Mural Projects

"Satoru Tsuneishi Park" Mural, Monrovia, CA (Dec 2025; 6ft x 100ft; $25,000)

Mural traces Satoru Tsuneishi's remarkable journey in Monrovia, CA from immigrant student to community leader and poet, spanning nearly eight decades. Significant milestones include his graduation in 1914 becoming the first Japanese American to graduate from Monrovia High School, and his integration of Japanese tradition into American culture through haiku and poetry. His family remains active in Monrovia, and his name continues to be honored through public memorials such as this public art installation.

"Modesto's 150th Anniversary", Modesto, CA (October 2025; 1200 sq ft; $25,000)

Design captures Modesto, California from a cultural perspective using colorful vignettes weaved together to create a visually captivating mural to celebrate the city's 150th anniversary (founded in 1870). Inspired by historic places such as McHenry Mansion, Hawkes Castle, Dry Creek Bridge, Southern Pacific Railroad, and the Gallo Center for the Arts (to name a few), it is the Modesto Arch and its curved sweeping lines that tie together the highlights of the city's history such as folklorico dance and Chief Estanislao.

Resume

"Jackson Legends", the AMP in downtown Jackson, TN (April 2025; 1200 sq ft; $32,500)

"Jackson Legends" honors the late Jackson-born musicians including Big Maybelle, Joe Hunter, Denise LaSalle, Gil Scott-Heron, Carl Perkins, Sonny Boy Williamson I, W.S. Holland, and Ruby Falls. The overall design forms the letters "AMP" and spans the 3 walls surrounding the staircase. Funded by Our Jackson Home and theCO in collaboration with the City of Jackson, TN. My initial design/ concept proposal was selected from a pool of 80+ applicants across the nation. The project culminated with a mural unveiling with the late musicians' family members in attendance. Video: https://youtu.be/ZAFZTzHFPsA

***"Generations"* mural, Hillsborough College - Ybor City Campus, Tampa, FL (July 2023; 2000+ sq ft; $20,000)**

Mural highlights the college's academic offerings and the rich & diverse history of the Ybor City community. This 3-story immersive mural showcases the educational programs including firefighting program, law enforcement academy, automotive technology program, welding, and dance, all weaved together against the backdrop of Ybor, once the cigar capital of the world in the early 1900's. Cuban, Spanish, and Italian immigrants, notably Vicente Martinez Ybor and Jose Marti (featured in the mural), founded the city and brought economic prosperity. Red brick architecture, lampposts, cigars, trolleys, flamenco dancers of the era combined with the colors of the Ybor City flag create a vibrant backdrop for students and visitors to the campus. Videos: https://youtube.com/shorts/rQIRERa8Wck?si=NBvYvACRN9mRIedC
https://youtu.be/p2lLDYIZZoQ?si=dkvZelayrjoq1Euu

***"Livery Square"*, Downtown Helena, MT (September 2024; 1250 sq ft; $12,000)**

Installed at Livery Square in Downtown Helena, this mural pays homage to Livery Square and the surrounding area at the turn of the nineteenth century; a horse livery turned auto carriage is the foundational theme represented by abstracted wagon wheels, classic cars, and the people who made it possible. Bob Stanley, one of the four Georgians, gold prospector, and early investor in Helena, is predominantly featured against the backdrop of Mt. St. Helena.

Resume

***"Another Day in Paradise"*, Las Vegas, NV (June 2024; 475 sq ft; $13,500)**

Installed at Paradise Pointe Skate Park, this skateboarding-themed mural embodies the daring, adrenaline, free-spirit nature that embodies skate culture. Color, movement, and overall composition provide a backdrop which features skaters doing a multitude of tricks inside the word "Paradise", where the angles/curves of the letters are ramps, rails, and half pipes.
Video:https://youtu.be/dHUrWL2RkvA?si=vwdygHz1DsYhXc25

"Blaze Beyond", Centralia, WA (June 2025; 100 sq ft; $12,000)

Created specifically for Robert H. and Josephine L. O'Neill Memorial Earth Science Wing of Centralia College, "Blaze Beyond" symbolizes students blazing a path towards the future with courage; different elements including the sun, mountains, trees, water, and waterfalls symbolizes our connections with the natural world as we blaze beyond and celebrate connections between students and environment.

***"Community Heroes"* mural, Palm Desert, CA (May 2024; dimensions 160 ft x 6ft; $16,000)**

Mural honors the Palm Desert public works department and their heroic efforts serving the community during hurricane Hillary. Funded by the City of Palm Desert, this community mural project was led under my direction and supervision, allowing community volunteers to assist in the installation of this mural.

***EXPLORE"* mural, Downtown Zephyrhills, FL (August 2022; 500 sq ft; $10,000)**

Mural encourages the growing community to explore its past, present, and future via landmarks and attractions. Mainstreet Zephyrhills Inc. in partnership with the City of Zephyrhills, FL commissioned me to design and install this mural to represent Zephyrhills which is known as a destination for skydiving (aka "skydive city"). The WWII History Museum, Train Depot Station, golf, Sarah Vande Berg Tennis Center, skate park, and water park, are also featured in this family-friendly mural. Completed Public Art Projects -"Satoru Tsuneishi Park"

"Satoru Tsuneishi Park", Monrovia, CA (November 2025; 100 ft x 6 ft; budget $25,000)

Mural celebrates Satoru Tsuneishi and the Japanese - American community in the City of Monrovia using an abstracted, contemporary Japanese - American motif to illustrate the timeline of Mr. Tsuneishi's life, family, and service to this country. The wall features (left to right): the high school where he graduated, his marriage, his chicken farm and roadside fruit stand (on Route 66), his service in World War II, and his time at Heart Mountain, Wyoming). The mural concludes with Satoru in his final years, culminating in his awards, medals, poetry and haiku; Satoru was published in Japan and the U.S. under the pen name of Shisei.

“Satoru Tsuneishi Park”, Monrovia, CA (November 2025; 100 ft x 6 ft; budget $25,000

Completed Public Art Projects -"Jackson Legends" mural

"Jackson Legends" mural, the AMP in downtown Jackson, TN (April 2025; 1200 sq ft; budget $32,500)

"Jackson Legends" honors the late Jackson-born musicians including Big Maybelle, Joe Hunter, Denise LaSalle, Gil Scott-Heron, Carl Perkins, Sonny Boy Williamson I, W.S. Holland, and Ruby Falls. The overall design forms the letters "AMP" and spans the 3 walls surrounding the staircase.

See video of mural: https://youtu.be/ZAFZTzHFPsA

This project was funded by Our Jackson Home and theCO in collaboration with the City of Jackson, TN. My initial design/ concept proposal was selected from a pool of 75+ applicants across the nation. Once selected, the community was involved in selecting/ voting for the specific musicians featured in the mural. The project culminated with a mural unveiling with the late musicians' family members in attendance.

Completed Public Art Projects - "Modesto's 150th Anniversary" mural

"Modesto's 150th Anniversary" mural, Modesto, CA (September 2025; 1500 sq ft; budget $25,000)

Design captures Modesto, California from an architectural and cultural perspective using colorful vignettes weaved together to create a visually captivating mural to celebrate the city's 150th anniversary (founded in 1870). Inspired by historic places such as McHenry Mansion, Hawkes Castle, Dry Creek Bridge, Southern Pacific Railroad, State Theater, and the Gallo Center for the Arts (to name a few), it is the Modesto Arch and its curved sweeping lines that tie together the highlights of the city's iconic landmarks and history. The overarching style draws from mid-century modern architecture combined with Modesto's culture, paying specific homage to Chief Estanislao as well as Folklorico dance. Furthermore, the selected color palette creates an engaging and captivating representation of Modesto's geography, climate, and cultural diversity.

"*Modesto's 150th Anniversary*" mural, Modesto, CA (September 2025; 1500 sq ft; budget $25,000)

Completed Public Art Projects -"Livery Square" mural

***"Livery Square"* mural, Livery Square LLC - Downtown Helena, MT (September 2024; 1200 sq ft; budget $10,000)**

Mural showcases downtown Helena, specifically the Livery Square building and surrounding area at the turn of the 19th century as it transitioned from horse livery to auto carriage. Featured are the Texaco and Dodge emblems from the early 1900's, classic cars, and one of the four Georgians (Bob Stanley) who was a gold prospector and early investor in Helena. The mural's design aesthetic emphasizes wagon wheels, tires, and gold billowing throughout, paying homage to the gold rush and prospectors who are cemented in Helena's rich history.

Completed Public Art Projects -"Generations" mural

***"Generations"* mural, Hillsborough Community College - Ybor City Campus, Tampa, FL (July 2023; 2000+ sq ft)**

Mural highlights the college's academic offerings and the rich & diverse history of the Ybor City community. This 3-story immersive mural showcases the educational programs including firefighting program, law enforcement academy, automotive technology program, welding, and dance. These images are weaved together against the backdrop of Ybor which was once the cigar capital of the world in the early 1900's as a result of the Cuban, Spanish, and Italian immigrants, notably Vicente Martinez Ybor and Jose Marti (featured in the mural),who founded the city and brought economic prosperity. Red brick architecture, lampposts, cigars, trolleys, flamenco dancers of the era combined with the colors of the Ybor City flag create a vibrant backdrop for students and visitors to the campus.

Subject: Letter of Recommendation

To whom it may concern,

I am writing on behalf of Hillsborough Community College (HCC) Art Galleries to express my recommendation for Trinity Rivard. His professionalism, vision, adaptability and creativity make him an ideal artistic collaborator.

As an institution dedicated to fostering artistic expression and cultural engagement, we are proud to be home to one of Trinity's most recent mural projects, *Generations*. Located on the HCC Ybor City Campus, *Generations* celebrates our past and present. The layered imagery communicates the story of the city as a place where generations of families worked and grew, chased their dreams, went to school, and contributed to the rich cultural and historical vibrancy of the community. The mural weaves together Ybor City's diverse history with the transformative impact of post-secondary education, including vignettes that highlight several academic pathways unique to the HCC Ybor City Campus.

Trinity Rivard's vision was a key factor in the mural's success, and his professionalism was consistent throughout the entire process. With public projects, there are typically unforeseen challenges that arise (no matter how carefully you plan!). However, Trinity adapted to each of these with patience, understanding, and creativity.

On a personal note, as project manager for all of HCC's public art projects, I want to convey what a pleasure it was to work with Trinity. *Generations* was one of our largest and most complicated mural projects at the Ybor City Campus to date, but his steadfast vision kept the process moving forward and resulted in a mural that will have a lasting impact on our community.

Sincerely,

Amanda Poss, MA

To Whom it may Concern:

I have had the great opportunity to work directly with Trinity Rivard on behalf of Main Street Zephyrhills for the EXPLORE mural. The mural was designed and completed in Downtown Main Street Zephyrhills in 2022. It is a large-scale exterior mural approximately 12'x30' in size. The EXPLORE mural is a celebration of Zephyrhills' past, present, and future. Elements of this mural include the local Skate Park, Water Park, golf, Skydive City, Sarah Vande Berg Tennis & Wellness Center, Barracks Museum, Depot Museum, and Veteran's Memorial Park. The inspiration behind this mural is to reflect Zephyrhills' diverse, growing community and active lifestyle, while paying homage to its historic roots.

Trinity worked incredibly hard to deliver superb and detailed concept sketches for review and approval. Additionally, he went above and beyond working in difficult Florida weather conditions to deliver a beautiful and complete mural within the designated timeline.

In addition to myself and Main Street, many members of the community have expressed positive feedback of Trinity's artistic talents and creativity. The EXPLORE mural has become a wonderful representation of our community woven within the fabric of downtown Zephyrhills.

Sincerely,

Christine Bennett

To Whom It May Concern,

It is with great pleasure that I recommend Trinity Rivard as a master mural artist.

This summer, Downtown Pittsfield, Inc., as a leading partner of Let It Shine! Celebration of Public Art collaboration, published a call for mural artists. These murals were intended to beautify downtown and the West Side of Pittsfield by reflecting and celebrating the communities, history, environment, and future of Pittsfield.

Trinity's application was immediately chosen based on the thoughtful responses and examples of work. Once contracted, he took the time to interview multiple residents and partners to really understand the importance of its subject matter, the Young Legends of our Westside Community. Receptive to suggestions and last-minute changes, including the location of the mural, Trinity was extremely professional and easy to work with. He was able to use his expertise in his field to bring forward recommendations and express concerns in a way that instilled confidence and calm in our group. His work was done on time and as designed.

Most importantly, Trinity's mural is amazing! The artistry is exceptional and has been the addition to our city mural tour that has been most talked about. We would highly recommend him for any project.

Thank you,

Rebecca Brien

Letter of Recommendation

HENDERSON

November 6, 2024

Letter of Recommendation: Trinity Rivard

To Whom It May Concern,

I am writing to express my support and recommendation for artist Trinity Rivard. Trinity worked with the City of Henderson in June 2024 to design, create, and facilitate a 400 square foot mural titled, "Another Day in Paradise," at one of our local parks called Paradise Point.

Trinity submitted a strong proposal with a unique and site-specific design that considered the park and park-goers. We were excited to add his work to our collection of public art. However, beyond his artistic talent and commitment to craft, Trinity's level of professionalism, communication, flexibility, and positivity made his work shine even brighter. He was a joy to work with and made the mural creation process easeful and pleasurable.

Trinity is responsive to requests with an ability to provide the necessary paperwork that is required of a municipality. He is also flexible and adaptable to changes in the project plan. While in the field, Trinity represented the City of Henderson well, connecting with park visitors and sharing more about his process.

As an artist myself and an administrator who has worked with artists over 20 years, I can say that Trinity is a unique combination of a talented, creative practitioner and an efficient project manager. He would be an excellent choice for all scales of art projects.

I am open to discussing our experience working with Trinity and can be reached at, [redacted]

Sincerely,

Megan Heeres
Visual and Public Art Supervisor

Mural Proposal: Storm Drain Artwork

My proposed mural concept centers on depicting ocean life that is directly impacted by urban runoff and pollution. By illustrating marine creatures such as fish, sea turtles, and other coastal wildlife on storm drains, the artwork aims to create a visual and emotional connection between everyday human actions and their consequences on the ocean ecosystem. The goal is to encourage the public to reconsider the disposal of hazardous materials and to promote environmentally responsible behavior.

Storm drains often lead directly to the ocean, carrying pollutants that can harm marine life. By placing vibrant, engaging imagery of ocean creatures at these sites, the murals serve as a visual reminder that what enters the drain ultimately affects these animals and their habitats. This approach is designed to resonate with viewers on a personal level, fostering greater awareness and discouraging improper waste disposal.

In addition to their environmental messaging, the murals will contribute to the visual appeal of the surrounding area. Each piece will be thoughtfully designed with bold colors and dynamic compositions to enhance curb appeal and create a sense of place within the community. The intention is to balance educational impact with artistic quality, resulting in work that is both meaningful and visually compelling.

Materials and Methods

All murals will be executed using high-quality, water-based exterior paints, including primer and water-based spray paint where appropriate. These materials are selected for their durability, environmental safety, and suitability for outdoor public art applications. Upon completion, each mural will be sealed with a clear, water-based exterior coating to protect against weathering and to extend the lifespan of the artwork.

During the painting process, protective measures will be taken to prevent any materials from entering the storm drain system. Drop cloths or appropriate coverings will be placed over drains while work is in progress to ensure that no paint or debris contaminates the drainage system.

Timeline

Each individual curb or storm drain mural is estimated to take approximately three to four days to complete, depending on the complexity of the design and site conditions. This timeline allows for proper surface preparation, painting, and sealing to ensure a high-quality and long-lasting result.

Spill Prevention and Cleanup Plan

Environmental responsibility is a key priority throughout this project. As part of the spill prevention plan, all storm drains will be covered during painting to eliminate the risk of accidental contamination. The use of water-based, non-toxic paints further minimizes environmental impact, as these materials are safer and easier to manage.

Any wastewater generated during the painting process will be collected and stored in sealed containers, such as empty water bottles, and properly disposed of through recycling or appropriate waste channels. Paint rags and cleaning materials will be used to address any spills or messes promptly and effectively.

I am committed to following all local regulations and best practices for waste disposal. Should the city provide specific guidelines or preferred methods for handling materials, I will fully adhere to those requirements to ensure compliance and environmental stewardship.

Malibu Storm Drain Public Art Proposal

Artist Statement

My work is based on a pattern language that is both fractal and aperiodic, drawing inspiration from naturally occurring systems while reflecting the structured geometry of human-built environments. By combining straight and curved lines in non-repeating arrangements, my designs create a visual dialogue between nature and infrastructure—expressing a sense of harmony between the two.

Through public art, I aim to transform overlooked or purely functional spaces into meaningful visual experiences. My work invites closer observation and encourages viewers to consider their relationship to the environment, particularly in places where natural systems and urban development intersect.

Project Narrative

This proposal includes designs for four storm drain locations in Malibu, each responding to its specific context while contributing to a unified conceptual framework. The designs integrate aesthetic patterning with environmental storytelling, with select locations incorporating infographic elements to illustrate the flow of water through Malibu's watershed.

At the Cross Creek Road location, the design features a stylized infographic map that communicates the journey of stormwater—from the drain, through underground channels, into the creek, lagoon, and ultimately the ocean. As a high-traffic tourist destination, this site is an ideal location for a visually engaging educational component that raises awareness of the unseen systems connecting the built and natural environments.

The surrounding composition is inspired by the lagoon and coastline, using soft, bright blue-green tones to evoke clarity and cleanliness of water. These tones deepen toward the drain itself, guiding the viewer's eye and reinforcing the conceptual flow of water. The drain structure will be integrated into the composition through coordinated coloration, creating a cohesive visual experience.

At Heathercliff Road, near Point Dume Village, the design responds to the area's role as a social and communal hub. The pattern draws from a "village" sensibility, incorporating soft blues alongside pinks and purples to create a welcoming and vibrant atmosphere. This design enhances the identity of the location while maintaining consistency with the broader visual language. An optional infographic may be incorporated here to illustrate drainage flow into the Point Dume area.

At Morning View Drive and Phillip Avenue, where visibility and tourist traffic are lower, the focus shifts toward pure aesthetics and neighborhood enhancement. Inspired by the name "Morning View," this design incorporates bright yellows, deep oranges, and complementary pastel tones—including magentas, purples, teals, and pinks—to evoke warmth, light, and optimism. The intention is to create a visually uplifting experience for local residents.

The fourth site continues the overall conceptual framework, representing another stage of Malibu's watershed process while maintaining visual cohesion with the other locations.

Project Summary

The four proposed locations collectively represent different stages of the watershed process in Malibu. The core concept utilizes fractal, non-repeating pattern structures to symbolize the integration of human systems within the natural environment.

At key tourist-facing locations, infographic elements may be included to educate the public about stormwater flow and its direct connection to Malibu's creeks, lagoon, and ocean. Many visitors are unaware that storm drains discharge directly into these natural systems, and this project aims to make that connection visible and understandable.

The primary goals of the project are:

- To raise environmental awareness
- To educate the public about watershed systems and shared responsibility
- To enhance the aesthetic character of the city
- To contribute to a higher quality of life for residents and visitors

Materials and Technical Approach

The proposed materials include a water-based two-part epoxy coating system, selected for its durability, adhesion, and resistance to environmental conditions. This system is suitable for surfaces exposed to vehicular traffic, pedestrian use, and intermittent water flow.

A protective clear coat may be applied as a final layer to increase longevity, provide UV resistance, and protect against wear.

Surface preparation will include:

- Removal of all loose or deteriorating paint from previous installations
- Thorough cleaning of the substrate
- Proper priming to ensure optimal adhesion of the coating system

All materials will be selected to meet durability standards appropriate for exterior public infrastructure.

Development Note

Please note that designs and infographic elements included in this proposal are conceptual and meant to depict the design direction. If selected, precise stylized renderings will be developed based on verified watershed data and in coordination with relevant environmental or municipal agencies.

Installation Plan

The installation process will be carried out with attention to efficiency, safety, and minimal disruption to the surrounding area.

- Each site will be completed within an estimated timeframe of 30 days, depending on scale and conditions
- Work will be scheduled to minimize interference with traffic and pedestrian flow
- Storm drain functionality will be maintained throughout the process
- Basic safety measures, including cones or barriers, will be used as needed

Conclusion

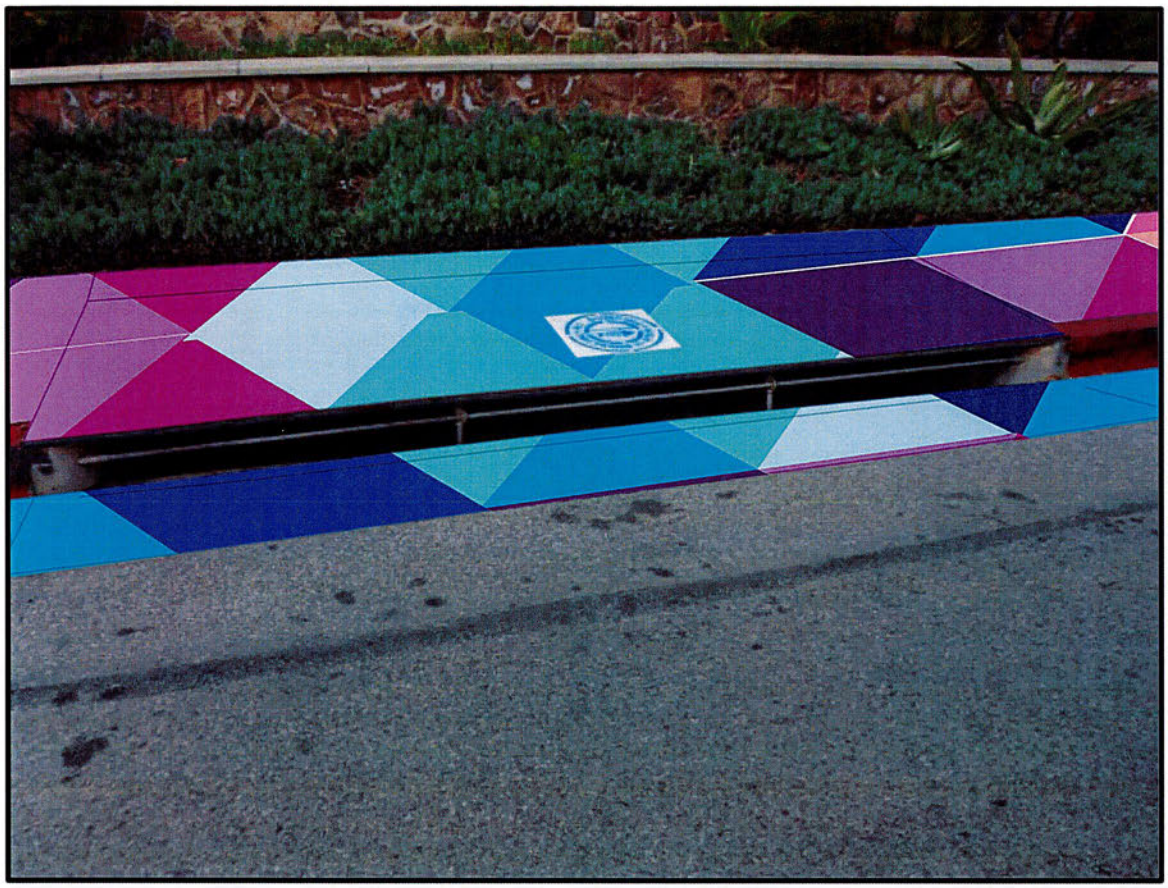

This project seeks to transform functional storm drain infrastructure into meaningful public artworks that both beautify the environment and communicate important ecological information. By combining a distinctive visual language with site-specific design and educational elements, the work aims to foster greater awareness of Malibu's watershed systems and encourage a deeper sense of environmental responsibility.

Through this integration of art, infrastructure, and education, the project contributes to a more informed, visually engaging, and connected public space.

ATTACHMENT 3

Environmental Responsibility Plan

The prep will involve removing the existing worn paint using a combination of compressed air, hand scrapers and a vacuum cleaner. Harsh chemicals and pressure washing will not be used in order to protect the sensitive surrounding environment. The openings will be temporarily sealed using plastic and tape while the flaking paint chips from the previous installation are carefully removed and vacuumed. The collected waste will be taken to a proper hazardous waste disposal facility. The opening will remain sealed for the majority of the installation to prevent any foreign materials from entering. In the event of a spill while painting, the spilled paint would be carefully scooped up and put into a disposal container. The remaining paint will be washed with soapy water while being simultaneously vacuumed with a wet-vac to prevent the water from entering any drains. Any paint water will be taken back to the studio and evaporated to separate the paint particles, which will then be properly disposed of at a hazardous waste facility.

Precautionary measures:

- 2 or more people are always on site during the prep and installation.
- A vacuum and power generator are always on site. Vacuum is set as a dry-vac during the prep process and a wet-vac during the paint process.
- An air compressor and scrapers will be used to remove the old paint instead of harsh chemicals and pressure washing.
- Water buckets are always sealed with a lid when not using / rinsing brushes.
- All paint and water buckets will NEVER be placed close to the drain so that if there is a spill there will be no chance of paint or water entering the drain
- Plastic paint scraping and disposal bucket always on site for spills
- All hazardous waste will be properly disposed of at a facility.

ATTACHMENT 3

Malibu Storm Drains Submission:

1. Nicole Sherman
[redacted]
IG: @nicolethesherm
www.nicoleshermanart.com

2. I am extremely interested in this project! Born and raised in South Florida has shaped and inspired my murals and the love of the ocean. My creative practice revolves around creating a way to bring awareness between the relationship with ourselves and the importance of the ocean and nature around us. I am a dedicated environmentalist and advocate for the protection of our oceans and marine wildlife, which continues to guide both the subject matter and intention behind my work. I have previously collaborated with organizations such as Surfrider LA, whose mission to protect oceans and coastlines closely aligns with my own values. That experience reinforced my commitment to using public art as a tool for environmental education and engagement. For this project, I propose a series of storm drain murals, each centered on a different marine species native to the California coast. These will include the Great White Shark, Gray Whale, Steelhead Trout, and Short-Beaked Common Dolphin. Each design will visually connect the storm drain to the ocean marine life, illustrating the direct impact that urban runoff can have on them. The name of the species will be paired with the murals to serve as educational prompts encouraging conversation, and a greater awareness of the ecosystems just beyond our coastline. Before I paint the storm drains, I will first clean the area from dirt and debris. Then I will seal them with Foundation Armor SX5000 (zero VOC) and let it cure for over 24/48 hours. This will protect the concrete and reduces water absorption allowing my mural paint to keep its color as long as possible. Once that step is done, I will paint the murals on the storm drains which will take one weekend each to paint depending on site conditions. I would use a professional-grade, water-based acrylic masonry paint that is low-VOC and specifically formulated for exterior concrete surfaces. These can be purchased at Home Depot or Lowes. Once the murals are finished the city will apply a clear, environmentally sensitive protective sealant.

3. Artwork for storm drains:

Cross Creek Road (Bus Stop)

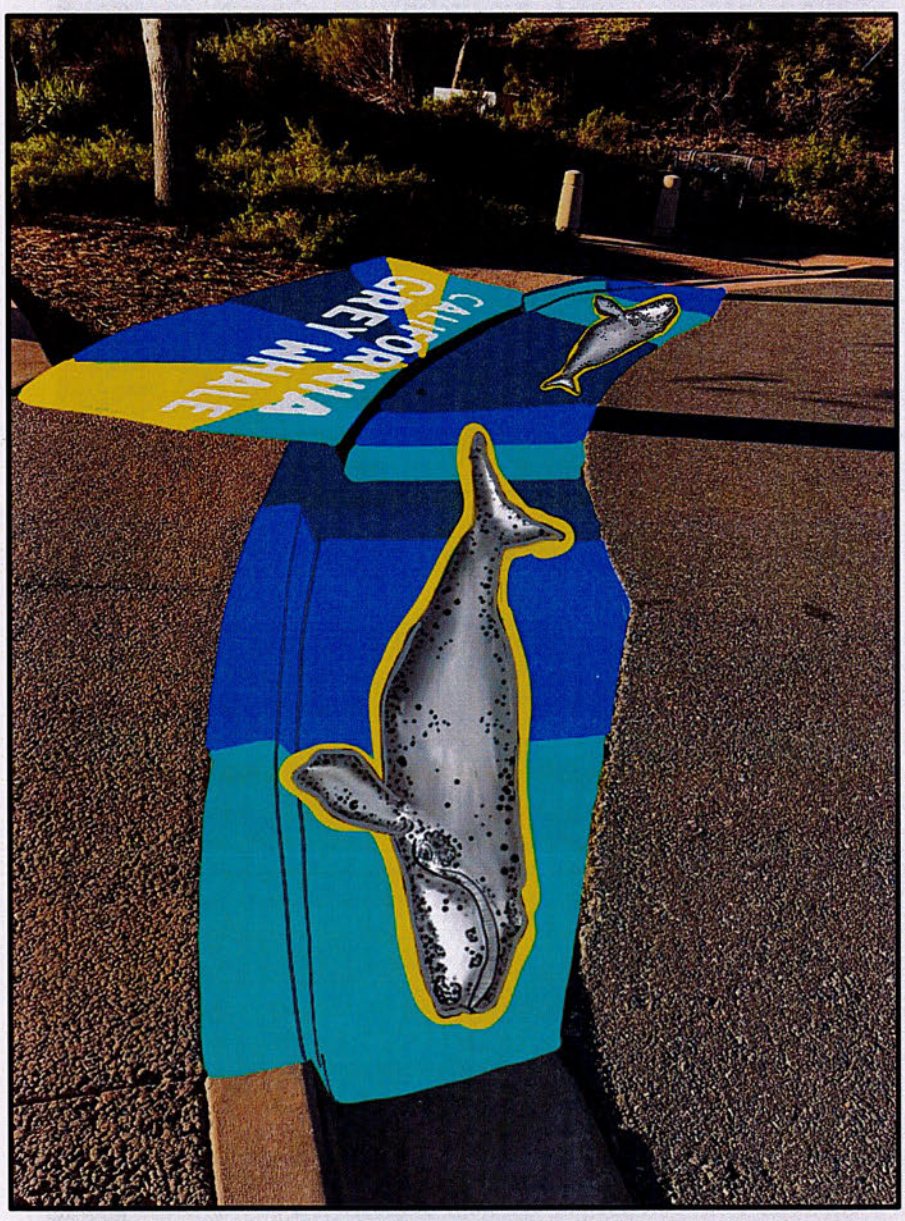

Morning View Drive and Philip Avenue

Heathercliff Road (Point Dume Village)

Trancas Canyon Park (cul-de-sac)

4. In order to protect the drain from spills while painting, I will use a plastic sheathing over the drain hole and securely tape it. I will also use drop cloths around it for extra precaution and have extra rags. All my water will be in its own container and dirty water will be poured into an empty container to be disposed with off the property. No wastewater or cleaning materials will be discharged on-site. All tools will be cleaned off site using a designated container to catch the water. This wastewater will then be properly disposed of through appropriate sanitary systems, in compliance with local

regulations. At no point will any wastewater be discharged into the street, gutter, or storm drain, ensuring that all materials are handled in a way that protects the local watershed and marine environment.

5. I have attached my resume and reference contacts to this email for you.

6. Image list:

Image#: Sherman_Whale1
Title: Whale – Surfrider LA
Dimensions: 8' x 40 '
Location: 2902 Lincoln Blvd
Materials: Acrylic Paint
Year: October 2023
Description: This mural was painted on a shipping container which was super challenging on such an uneven surface. I really loved how it turned out and it has become a great backdrop for Surfrider Chapter meetings.

Image#: Sherman_Southflorida2
Title: South Florida Wildlife
Dimensions: 7' x 20 '
Location: 3200 SW 4th Ave, Fort Lauderdale, FL 33315
Materials: Acrylic Paint
Year: April 2024
Description: I wanted to donate this mural to this amazing organization that takes in injured wildlife and rescues, rehabilitates/and releases them back into the wild. It helped brighten up the center.

Image#: Sherman_flamingo3
Title: Flamingo
Dimensions: 10' x25'
Location: Venice/Centinela Avenue.
Materials: Acrylic Paint
Year: March 2025
Description: For this mural, I wanted to bring a little east coast to the west coast with these Florida Flamingos. The background was inspired by a doodle I had created on paper and I have been incorporating it to a bunch of murals since.

Image#: Sherman_Pilates4
Title: Pilates mural – CAMP LA
Dimensions: 15'x54'
Location: 2723 Lincoln Blvd
Materials: Acrylic Paint
Year: January 2026

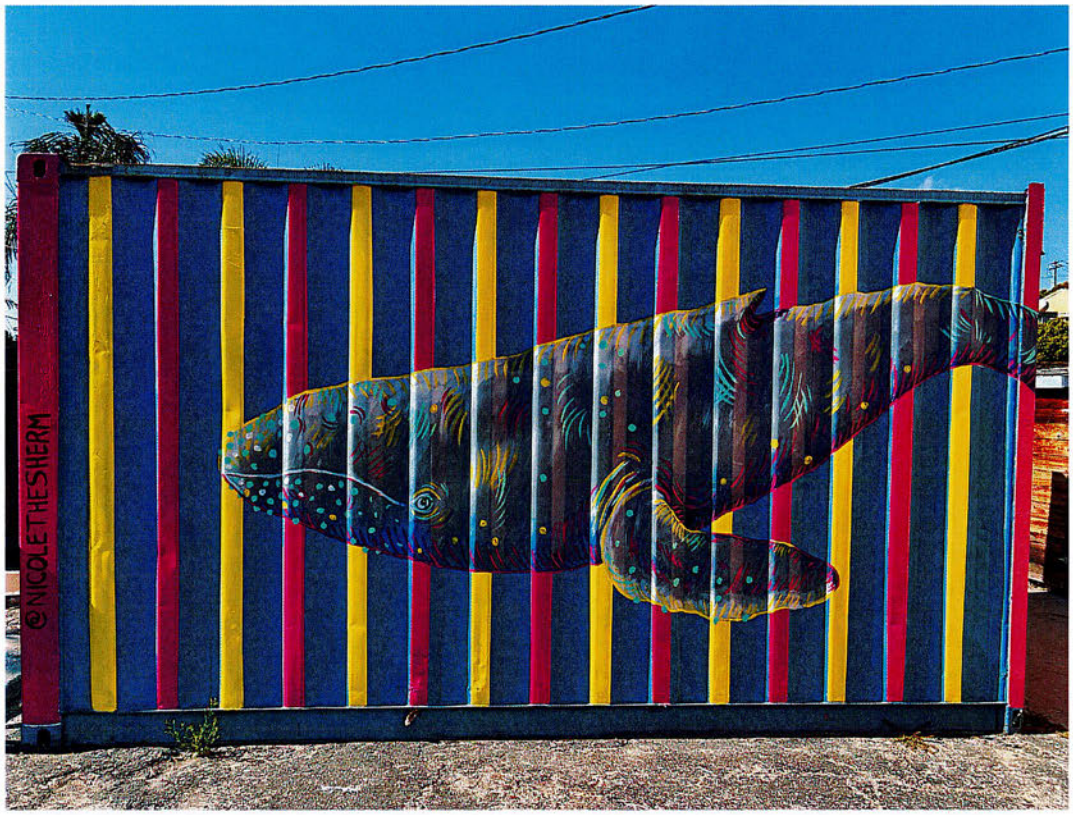

Description: The client needed a wall painted to promote their new Pilates program. The brightness of the flowers captures the attention of people driving by.

Image#: **Sherman_Krail5**
Title: Santa Monica K-rails
Dimensions: 3' x10'
Location: Main street Santa Monica
Materials: Acrylic Paint
Year: January 2021
Description: I was hired by the City of Santa Monica to paint the K-rails during the pandemic to create a more welcoming space for people to eat outside. I painted 10 of them around town of various beach scenes.

7. I've also attached the artist agreement to this email for you!

Artist Statement

Painter and designer Jen Swain creates artwork that is playful, magical, and uplifting. Her work is known for its joyful spirit, vibrant color, and imaginative imagery that invites viewers into a world of creativity and wonder. She studied at ArtCenter College of Design in Pasadena, and her practice spans painting, illustration, chalk art murals, large-scale city murals, electrical box designs, and mosaic art.

Swain is especially drawn to public art and installations because of their power to transform both spaces and the way people experience them. She believes art can shift the mood of an environment, spark curiosity, and create meaningful moments of connection within a community. Inviting people to create with her painted murals is often created. For her, public art is an opportunity to bring color and positivity into everyday life.

Her passion for this work comes from the belief that art can be anything you imagine—it is a creative world where ideas come to life and can inspire others. Whether through beauty, storytelling, or emotion, her goal is to create art that resonates with people and leaves a lasting impression. She values how public art becomes part of a shared visual landscape and enjoys contributing to the art people encounter around their city.

Project Approach:

My design concept for the Malibu Storm Drain Artwork is a cohesive, ocean-centered series titled "One Ocean, One Connection." This series uses a large, expressive octopus as a visual for one storm drain location. The octopus serves as a symbolic "guardian of the ocean," helping viewers understand how everyday actions on land directly impact marine life. Viewers can walk across the stone steps that are painted on the sidewalk.

Each storm drain will represent a different part of the environmental story: cause, movement, impact, and solution. The next design, for Cross Creek shows a premier birding hotspot featuring shorebirds, including the Brown Pelican and the Great Blue Heron. On the below surface there is a wide variety of different stylized fish swimming as a reminder of the sea and not to pollute. The third design will illustrate the above-ground journey of the baby turtles and thier walk to the ocean where mom and dad are waiting for them. This with feature the endangered green sea turetles that are spotted occasionally near the Malibu Pier and along the beach. Viewers walk on the sand and see the fun ocean life along the way. Optional text slogan "Protect the Ocean with Care and Devotion" or another can be here. The fourth will depict the ocean environment with lots of colorful jellyfish showing that if you are responsible we can have a clean ocean environment and positive human behaviors that protect it.

Each mural can include a simple, engaging slogan such as "Only Rain in the Drain" or "Show Devotion, Protect the Ocean," reinforcing the educational message in a way that is accessible to all ages. The designs will be bold, colorful, and easy to read at a distance, encouraging curiosity, conversation, and awareness.

This project builds on my experience creating public art, including a recently completed storm drain mural in San Pedro featuring a large seahorse. That project strengthened my understanding of scale, durability, and the importance of creating artwork that is both visually impactful and educational in a public setting.

Proposed Timeline (3–4 Weeks)
Week 1: Finalize designs in collaboration with City staff, confirm materials, and prepare surfaces.
Week 2: Begin base painting and block in major forms at all four locations.
Week 3: Complete detailed painting, color work, Final touch-ups and lettering.
Week 4: Preparation for protective sealing approved by City staff.

Materials and Durability
I will use high-quality, professional-grade exterior acrylic paints designed for long-term outdoor use, with strong pigmentation and UV resistance to maintain color vibrancy for at least four years and an anti-slip additive to prevent slips applied during the final coat. Materials will be selected for durability against sun exposure, foot traffic, and coastal conditions. All paints and materials will be approved by the City prior to use. Work will be scheduled during dry weather conditions and coordinated to ensure safety and minimal disruption to the public.

Through this approach, the artwork will transform functional infrastructure into meaningful public art that reflects Malibu's coastal identity while educating and inspiring the community to protect the ocean.

Spill Response Plan

Due to the environmentally sensitive nature of storm drain locations, I will take careful precautions to prevent any paint, materials, or wastewater from entering the storm drain system. Prior to beginning work, I will prepare each site using protective measures including drop cloths, absorbent pads, and hay wattles (fiber rolls) placed around and in front of the storm drain openings. These wattles will act as a physical barrier to block and absorb any potential runoff.

All paints will be kept in secure, clearly labeled containers, and only small working amounts will be used at a time to reduce the risk of spills. Brushes and materials will be managed carefully and never left unattended near the drain. A spill response kit will be on-site at all times, including absorbent materials, towels, and cleanup supplies.

In the event of a spill, I will immediately stop work and contain the area using absorbent materials and hay wattles to prevent any movement toward the storm drain. The spill will be cleaned promptly and thoroughly, and all contaminated materials will be collected and properly disposed of off-site.

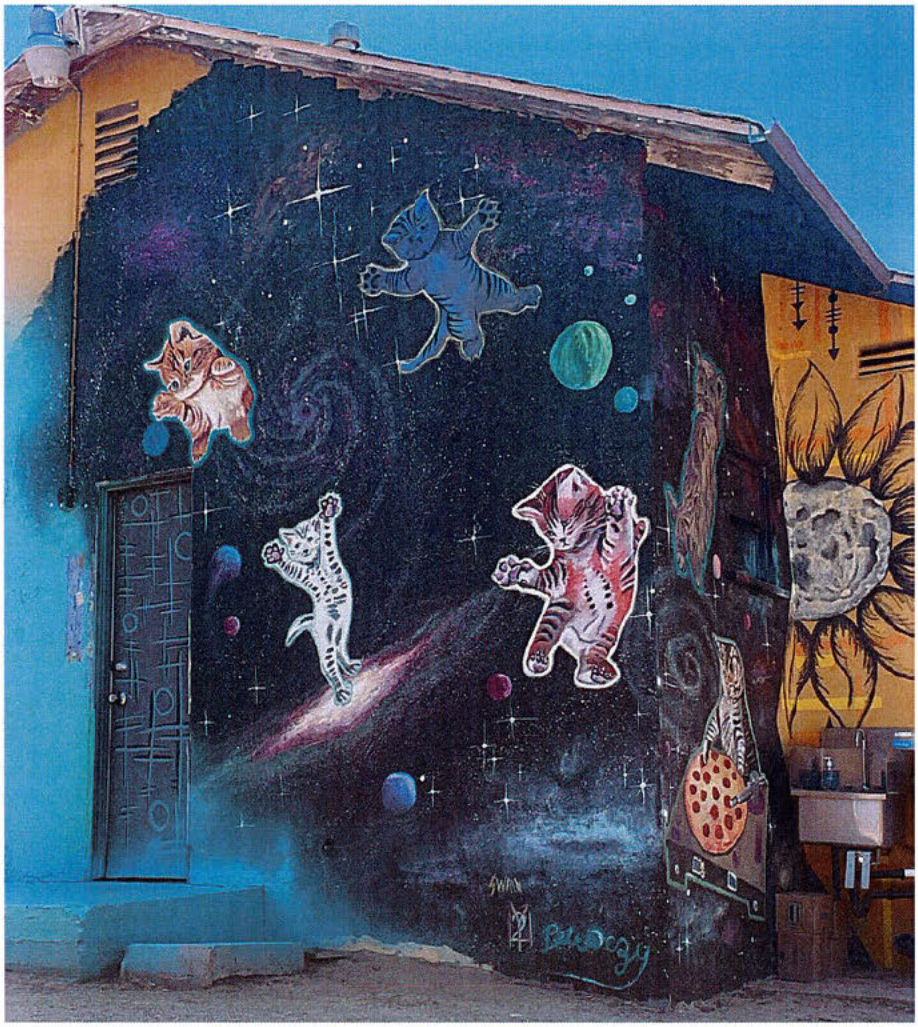

No wastewater, rinse water, or paint residue will be discharged into the street, gutter, or storm drain. All cleaning of tools will take place off-site in a controlled environment. Wastewater will be disposed of in accordance with local environmental guidelines.

These measures ensure that the project is completed safely and responsibly while fully protecting Malibu's coastal environment.

I am currently painting a Drainage Ditch in Ventura the Moon Ditch, which is a mile long and all precautions are taken for safe and clean paint and disposal for the project.

Storm Drain
San Pedro, 2022
Harbor Rd and 6th st.
LA Maritime Mueum
Painted with Acrylic Outdoor Paint. Also applied Anti-slip and Exterior coating.
Project was to create an image that is near the ocean that would show that the water travels to the ocean. They wanted artwork that would stand out and be remembered.

Cats in Space
Pearblossom, 2022
City Arts Council of Pearblossom
Painted with Acrylic Outdoor Paint and coated with clear coating. Project was to create something fun for the childern at the afterschool program and for events that were run at the facility. DJ Pizza Cat was definitely a hit.

SAMUEL TURNER

ATTACHMENT 3

Samuel Turner
[redacted]
Cell phone: [redacted]
Email: [redacted]
Website: https://smauel.myportfolio.com/

April 17, 2026

To the members of the Selection Committee:

My name is Samuel Turner and I'm an Ann Arbor-based muralist specializing in vibrant, character-driven artwork. After graduating from the Stamps School of Art & Design, I've since worked with Treetown Murals and Brushmonkeys on projects across Southeast Michigan. Creature design is at the center of my artwork. I've always empathized with misunderstood things, so I love to use these characters to examine complex issues and bring joy to public spaces.

I'm very excited to work with Malibu on this project because of the ideals you champion. Water as a source of societal sustenance is important to me as a Michigander, and it's truly inspiring to see your city care more about its conservation than many places in my home state. Supporting cities through murals helps your city's cultural and communal character, and when paired with environmental goals, it serves such an important purpose. I'm passionate about fostering urbanist progress like this through my artwork, and I'm eager to create art for the storm drain system.

For this project, I propose creating an educational array of important fish relevant to Malibu and Southern California. In addition to an illustration of each creature with an agreed-upon slogan, I will also paint both the colloquial and scientific names for educational interest. The color palette of this project is limited to blue, yellow, and white to create a linocut style. This works alongside my mission to draw attention from pedestrians and slow oncoming traffic on these streets, making them safer for the wider public.

The criteria for each fish range from their endangered species status, cultural significance, and visual appeal when painted on a unique canvas. Each location will be paired with a respective species: at Cross Creek Road, the cowcod rockfish, at Heathercliff Road, the bay pipefish, at Morning View Drive/Pacific Coast Highway, the garibaldi, and at Trancas Canyon Park, the tidewater goby. My inspiration for this installation is the scientific illustrations of Adolphe Millot as well as linocut poster designs. This mixture of styles is meant to take the educational value of Millot's work with the visual language of social action.

My working slogan for this piece is "Know Your Neighbor", centering each fish with their respective personality. Understanding how your water usage impacts your environment helps anthropomorphize these creatures as fellow citizens of a shared world. However, I'm absolutely willing to work with the selection committee on a better slogan and an altered design.

My material for this project will be Nova Color Acrylic Paint. I've used this product on all of my projects because of its proven reliability for at least four years in places as physically stressful as a seawall on the coast of wet, chilly Lake Huron. Knowing its ability to withstand the changing seasons up north, I have full confidence that it can hold well in Malibu's climate. Additionally, I wish to use Nova Color because it is a Hawthorne-based brand. It's important to source locally as much as possible, or at least from inside the US, so Nova Color's proximity to Malibu makes this choice a no-brainer.

Finally, I estimate my timeline to last around 8 days, accounting for 2 days per location. Assuming the first payment occurs sometime between mid to late May after being accepted to this project, I will arrive in Malibu between late September and complete the project by mid-October. However, I'd prefer to start in January 2027 if possible. Though this is the wettest period, it is the most convenient to my schedule and a better personal fit for temperature comfort. Leading up to my arrival, I will conduct monthly updates with revisions and communications taking place between those deadlines.

I've been in public art for five years, and much of that time was spent working for Treetown Murals under Mary Thiefuls and Danijel Matanic. With the help of these prolific muralists, I've gained experience on different project types, connecting with diverse communities, and learned how to successfully execute ground murals like the "Eberwhite Roundabout" in Ann Arbor, MI. Under Mary's direction, I found success with 10 other local artists, using Nova Color to restore the space and establish it as a traffic-calming, pedestrian-friendly neighborhood bridge. This has since informed my practice on pieces like "She Has a Dream", and it is now leading me towards a similar approach in Malibu.

This project is as much an expression of joy for your state as it is the mission of conservation and awareness for the responsible usage of this resource. Because of my experience in producing site-specific ground murals, I feel uniquely qualified to create Storm Drain Artwork and look forward to your consideration.

Sincerely,

Spill Response Plan

Baseline Precautionary Measures

1. Begin painting on a day with no forecasted precipitation.
2. Cover storm drains with window wraps to prevent any liquid from entering.
3. Establish mixing zones far away from storm drains at all times in plastic containers, away from sidewalks and roads.
    a. Mark mixing zones with construction cones.
    b. Additionally, create paint water "processing" zones.
4. Utilize multiple drop cloths around the paint areas to minimize potential spillage.
5. Apply paint with care and awareness of potential spillage.
6. Once dried, apply sealer as in step 5.
7. Once dried, remove window wraps from storm drain entrances.
8. Clean painting areas and begin processing contaminated water.
9. Repeat steps 1-8 until all murals have been finished.

In The Event of a Spill

1. Contain the affected area with a plastic barrier and a clump of rags in the direction of the drain.
2. Pour the minimum necessary amount of water on the affected area to loosen the paint.
3. Use a wire brush to transfer paint from the ground into the water.
4. Use a rag to absorb any water before it reaches the drain.
5. Repeat steps 1-4 until the affected area is free of paint.

Paint Water Cleanup

1. Water will be transported in a 5-gallon bucket and distributed into smaller containers matching a given paint color.
2. Once finished, the paint water will be collected and reintroduced to the bucket.
3. After each mural is completed, the paint water will pass through a charcoal and coffee filter overnight.
4. This filtered water will then be poured into basins at the temporary residence to evaporate, leaving behind the leftover pigment. Any leftover pigment and water will be transported home to my studio to continue evaporation and recollection.

Curriculum Vitae

Image List

1. **Welcome to Goudy**
    a. October 2025
    b. Acrylic on Brick
    c. 15' x 105'
    d. This mural was a commission of Treetown Murals created in collaboration with the Wayne DDA and the Detroit Institute of Arts. I was responsible for this mural's design, while the majority of the painting was completed by myself and Robin Speth. Mary Thiefels and Danijel Matanic organized this commission and were responsible for the finishing touches on this piece.
2. **Eberwhite Roundabout**
    a. July 2025
    b. Concrete Stain on Asphalt
    c. 50' x 40'
    d. This piece was created to assist in traffic calming at the 5-road intersection in Ann Arbor's Eberwhite neighborhood. This project was directed and designed by Mary Thiefles through Treetown Murals. I assisted in prepping/painting the surface and working alongside 10 additional local artists.
3. **She's Got a Dream**
    a. September 2025
    b. Acrylic on Asphalt
    c. 16' x 8'
    d. This mural was created for Sarah Moore as a senior parking spot tradition at Plymouth-Canton High School. I designed this piece and was assisted by Sarah and Jennifer Moore in its construction.
4. **Rackham Class of 21' Graduation Mural**
    a. April 2021
    b. Turf Paint on Asphalt
    c. 18' x 400'
    d. The directors of this project were Yen Azzuro and Liz Guilmet. I was a squad leader of 5 student artists in a total team of 31. We were assigned an 18' x 20' section and, once completed, we blocked out and assisted other groups in completing this piece.
5. **Les Poissons Du Huron**
    a. August 2023
    b. Acrylic on Aluminum Seawall
    c. 4' x 50'
    d. This solo project created a small catalogue of common fish found in Lake Huron around this coastal private residence. The intention was to provide passersby along the beach with beautiful and educational artwork. This piece was inspired by the work of Adolphe Millot.

1560ft²

This mural was a commission of Treetown Murals created in collaboration with the Wayne DDA and the Detroit Institute of Arts. I was responsible for this mural's design, while the majority of painting was completed by myself and Robin Speth. Mary Thiefels and Danijel Matanic organized this commission and were responsible for the finishing touches on this piece.

Welcome to Goudy, 15' x 105', 2025, $20,000 Budget, Exterior Acrylic Paint on Brick, Wayne, MI

ATTACHMENT 3

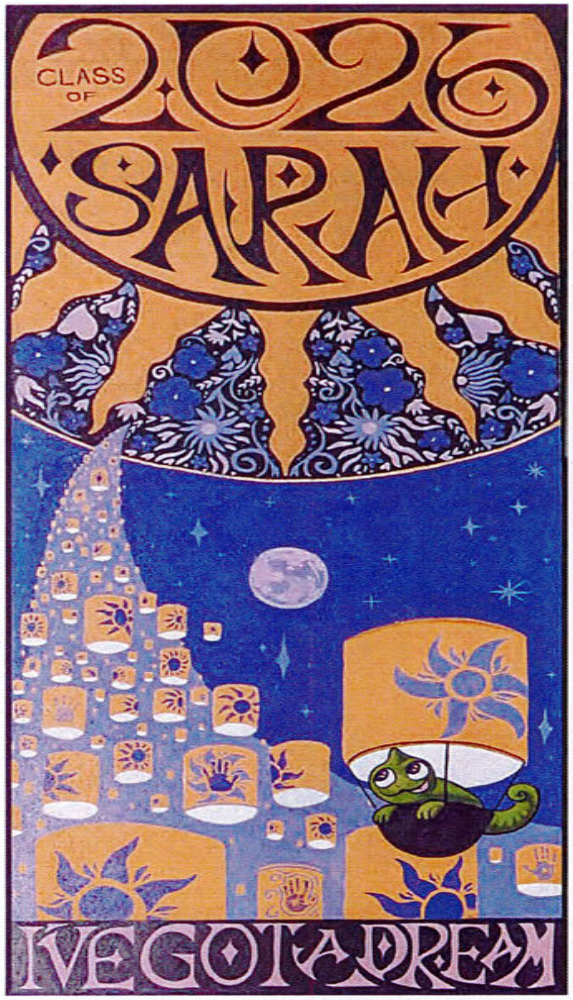

1260ft^2

This piece was created to assist in traffic calming at the 5-road intersection in Ann Arbor's Eberwhite neighborhood. This project was directed/designed by Mary Thiefels through Treetown Murals, and I assisted in prepping/painting the surface before the arrival of 10 additional local artists.

Eberwhite Roundabout, ~50' x ~40', 2025, $10,000 Budget, Concrete Stain on Concrete, Ann Arbor, MI

ATTACHMENT 3

128ft²

She Has a Dream, 16' x 8', 2025, $300 Budget, Exterior Acrylic Paint on Asphault, Canton, MI

This mural was created for Sarah Moore as a senior parking spot tradition at Plymouth-Canton High School. I designed this piece and was assisted by Sarah and Jennifer Moore in its construction.

7200ft^2

The directors of this project were Yen Azzuro and Liz Guilmet. I was a squad leader of a group of 5 in a team of 31. I was assigned to a 18' x 20' section. Once completed, I blocked out the clouds and hats on either side.

Rackham '21 Graduation Temporary Mural, 18' x 400', 2021, $15,000 Budget
Latex Paint on Concrete Wall, Rackham Graduate Building, Ann Arbor, MI

$200ft^2$

Les Poissons Du Huron, 4' x 50', 2023, $2,500 Budget
Latex Paint on Aluminum Wall, Alabaster Township, MI

Solo project meant to create a small catalogue of common fish found in Lake Huron. This piece was inspired by the work of Adolphe Millot.

EXPERIENCE

Graphic Designer | Social Media Manager | Admin Assistant

Online Events LLC *Oct 2024- Current*

Graphic Design:

- Designed graphics and created production ready screen print files for garments, hats, and accessories
- Retouched product and lifestyle photos for web and print use
- Designed custom packaging and marketing materials for retail and direct to consumer channels
- Maintained brand identity across visual assets for three distinct companies

Social Media:

- Increased follower count by 26.7% and boosted engagement through consistent content strategy
- Captured and edited BTS content for engagement and brand storytelling
- Built and maintained monthly content calendars across three brand channels

Admin Assistant:

- Managed invoicing, quoting, and pricing for custom promotional products
- Tracked weekly sales, payroll, and cost of goods reports
- Assisted in event coordination and tradeshow logistics

Graphic Designer

StudioChic *Oct 2023- Oct 2024*

- Developed original textile patterns for home décor sold in major retailers such as Costco and Sam's Club
- Created illustrations using traditional and digital techniques to be used for repeat and engineered patterns then prepared files for sample production and final manufacturing
- Conducted trend and market research to support seasonal design development to create mood boards and presentations for design team
- Maintained the physical and digital sample library, organizing swatches, trims, and print references

Wellness Coordinator | Scale House

Waste Management *May 2021- Oct 2023*

- Executed site wide wellness events focused on financial and physical health. Initiatives included educational workshops, health screenings and fitness challenges.
- Assited in the planning and organization of a company wide 5K event, including logisitics, promotion, and coordinations with vendors and participants.
- Coordinated with The Boy Scouts of America to organize events that facilitated badge requirements, fostering community engagement and supporting youth development
- Efficiently operated the scale house, including weighing incoming and outgoing vehicles, accurately recording waste data, and ensuring compliance with landfil

EDUCATION

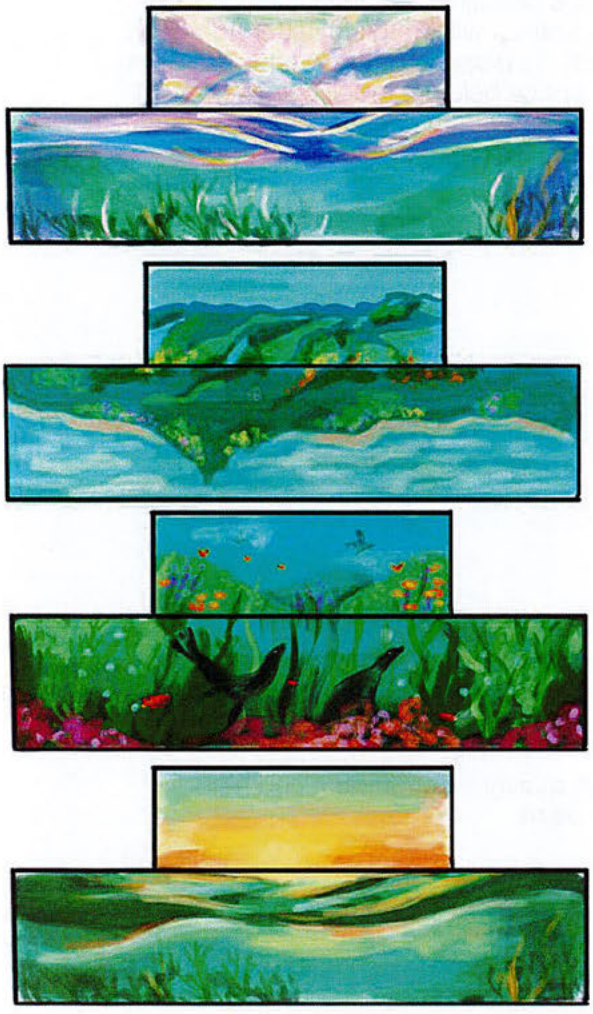

- Bachelors of Studio Arts, CSU Channel Islands, May 2020
- Bachelors of Studio Arts, Paris American Academy, June 2019
- Associates of Art History, Studio Art, Liberal Studies, Moorpark College, May 2018

SKILLS

- Adobe Creative Suite: Photoshop, Illustrator, InDesign
- Microsoft Office Suite
- Photo retouching
- Knowledge of various printing techniques
- Pre-production file prep
- Creative direction
- Copywriting
- Creation of assets for pitch decks
- Surface pattern and textile design
- Color theory, typography, and layout
- Illustration (hand-drawn and digital)
- Package Design
- Fabric knowledge (cotton, linen, blends)
- Production workflows and quality control
- Event Planning & Production
- Budget management, vendor coordination, and timeline development
- Strong communication and collaboration
- Creative problem solving and adaptability
- Detail oriented with excellent time and project management
- Comfortable working independently or leading a team

My proposal explores the fluid transition between land and ocean, tracing a visual journey from the light filled coastal atmosphere down to the vibrant ecosystems of the ocean floor. This body of work emphasizes the often unseen connections between terrestrial and marine environments revealing a continuous, interdependent relationship between what we experience above the surface and what exists below.

Design Concepts

1.**Sunrise**
A dual perspective composition capturing the quiet emergence of light across both sky and sea, symbolizing renewal and the beginning of ecological cycles.

2. Where the Mountains Meet the Sea
The meeting point of the Santa Monica Mountains and the Malibu coastline, illustrating the natural flow of energy, water, and life between these two environments.

3. Interwoven Ecosystems
An evolving composition where underwater flora and fauna gradually transform into native wildflowers, birds, and butterflies. Highlighting the shared rhythms and mutual dependence of land and marine habitats.

4. Sunset: Above and Below the Surface
A reflective counterpart to the sunrise, emphasizing closure, balance, and the enduring continuity of these interconnected systems.

By visualizing the parallels and connections between land and ocean, this work invites viewers to reconsider the boundaries we often perceive between these spaces. The goal is to spark awareness and inspire meaningful action toward protecting our coastal waters and preserving native habitats, both seen and unseen.

Timeline: To complete all 4 of these storm drains I would allot myself 1 week per drain, depending on the approved schedule that could be done week after week or spaced out.

Materials: I would use a high quality exterior paint suitable for high traffic areas with a concrete bonding primer.
Primer: Kilz Klear or Kilz 3
Exterior Paint: Benjamin Moore Command waterborne acrylic urethane enamel. Other brand high quality exterior paint from Home Depot/Lowe's. High quality acrylic paint like Nova Color or Liquitex for small details.

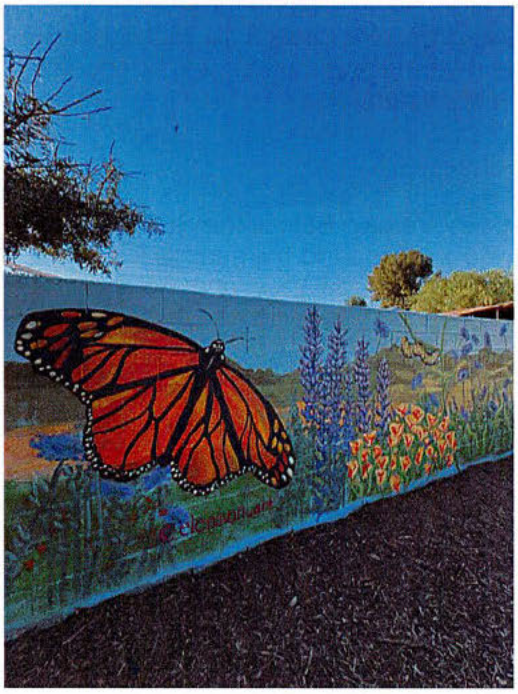

Spills/Cleanup: To prevent any spills I will premix needed paint colors and transport all paint in large storage containers. The paint will stay in the storage container in a safe location near by the work zone to prevent any clutter or opportunity for spills. I will bring kitty litter (to absorb any liquid) and ample soap and rags in case of an accident. To dispose of the wastewater from the project I'll use a container that has a mesh grate with space below it for all paint sediment to collect. Once the project is completed I'll allow the extra water in the container to evaporate or be absorbed by kitty litter. Once all water has evaporated I'll correctly dispose of the dry paint sediment.
