Date prepared: February 6, 2020

Meeting date: February 18, 2020

Subject: Coastal Development Permit No. 17-071 and Site Plan Review No. 17-036 - An application for an interior and exterior remodel of, and addition to, an existing single-family residence (Continued from February 3, 2020)

Location: 33608 Pacific Coast Highway, within the appealable coastal zone

APN: 4473-021-010

Owner: Michael Price

RECOMMENDED ACTION: Adopt Planning Commission Resolution No. 20-11 (Attachment 1) determining the project is categorically exempt from the California Environmental Quality Act (CEQA), and approving Coastal Development Permit (CDP) No. 17-071 to allow an interior and exterior remodel of, and 1,159 square feet of additions to, an existing 2,547 square foot, two-story, single-family residence, involving 15 percent demolition of exterior walls; including Site Plan Review (SPR) No. 17-036 for construction up to 24 feet in height with flat roofs for the residence located in the Rural Residential-Two Acre (RR-2) zoning district at 33608 Pacific Coast Highway (Price).

DISCUSSION: This agenda report provides a project overview, a summary of project setting and surrounding land uses, a description of the project scope, an analysis of the project’s consistency with applicable provisions of the Malibu Local Coastal Program (LCP) and Malibu Municipal Code (MMC), and environmental review pursuant to CEQA. The analysis and findings contained herein demonstrate the project is consistent with the LCP and MMC.
On February 3, 2020, the Planning Commission continued the item to the February 18, 2020 Regular Planning Commission meeting to allow time for Planning Commissioners to complete a site visit with the applicant present.

**Project Overview**

The subject property is the most seaward of two parcels that are between the Pacific Ocean and Pacific Coast Highway located in western Malibu, approximately .75 miles west of Decker Canyon Road (Figure 1). The subject site is on a previously graded coastal bluff that extends from Pacific Coast Highway to the ocean. There is a curved common access driveway that begins at Pacific Coast Highway on vacant property northeast of the subject property and cuts through the slope, and then terminates at the subject property. The project site is located on a flat pad between the beach and the access driveway, which abuts a steep ascending slope. The property is developed with a two-story, single-family residence and a detached, two-story guest house and garage. Non-beachfront development standards are applied to the subject property due to its Rural Residential zoning designation. However, because the property abuts the shoreline, the rear yard setback is measured from the mean high tidaline or stringline, whichever is more restrictive.

According to the Los Angeles County Assessor, the property was initially developed in 1955. In 1987, the California Coastal Commission approved CDP No. 5-86-594 for a remodel of the existing single-family residence, addition of a gym and guest house, and repair of the rock revetment. In 1999, the California Coastal Commission approved CDP No. 4-98-190 for the repair of a driveway destroyed by a landslide, including construction of a 12-foot-tall retaining wall on soldier piles, remedial grading, and the installation of dewatering wells. Portions of the subsurface dewatering well are depicted as a “stream” and two “waterfalls” on the project plans (Attachment 2). According to the wave uprush reports dated May 10, 2013, March 21, 2018 and July 11, 2018, by the project coastal engineer, David C. Weiss, the existing rock revetment provides protection for the existing residential structures. There are no repair or maintenance activities proposed to the rock revetment under the subject application. Additionally, to mitigate the construction of the rock revetment, CDP No. 4-98-190 included an offer to dedicate an easement for lateral public access and passive recreational use along the shoreline.

In 2013, the City of Malibu approved Over-the-Counter (OC) No. 13-097, for an interior remodel of the existing single-family residence and detached guest house on the subject property. The approved remodel included demolition of 1.4 percent of exterior walls of the existing single-family residence.

On October 20, 2014, the City of Malibu approved CDP No. 13-050, to allow for the construction a new swimming pool and spa, installation of a new alternative onsite wastewater treatment system (AOWTS), new stone pavers, new on-grade wood decks
and a new fire pit, remodel of the existing single-family residence and detached guest house, and demolition of 13.6 percent of the exterior walls of the existing single-family residence.

Pursuant to Local Implementation Plan (LIP) Section 13.4.2(D), the replacement of 50 percent or more of a single-family residence, as measured by 50 percent of exterior walls, is not repair and maintenance, but instead constitutes a replacement structure, which is required to be brought into conformance with the policies and standards of the LCP. The proposed project also includes the replacement of 15 percent of exterior walls. However, as the cumulative total of exterior walls replaced for the single-family residence is less than 50 percent (30 percent), the project qualifies as repair and maintenance. The project has been conditioned to require the owner to sign a major remodel agreement to ensure that at least 50 percent of exterior walls are maintained.

**Figure 1 – Aerial Photo**

![Aerial Photo](image_url)

Source: GovClarity 2019

The subject application includes 366 square feet of additions to the second story of the existing two-story, single-family residence and the addition of 793 square feet of covered decks to the first story. The application also includes a site plan review for construction up to 24 feet in height with flat roofs.
**Surrounding Land Uses and Project Setting**

The entire site is located within the Appealable Jurisdiction as depicted on the Post-LCP Certification Permit and Appeal Jurisdiction Map and no trails are shown on or adjacent to the subject property according to the LCP Park Lands Map. The subject site does not contain environmentally sensitive habitat area (ESHA).

Table 1 provides a summary of the lot dimensions and the lot area of the subject parcel.

**Project Description**

The proposed scope of work is as follows:

**Demolition**

a. 15 percent demolition of exterior walls (cumulative total of 30 percent including OC No. 13-097 and CDP No. 13-050).

**Construction**

b. An interior and exterior remodel of an existing two-story, single-family residence including:
Additional Discretionary Request

c. SPR No. 17-036 for construction up to 24 feet in height for a flat roof.

Proposed Total Development Square Footage (TDSF)

- Main House (2,547 existing + 366 proposed) 2,913 sq. ft.
- Main House Covered Areas > 6 Ft. (351 existing + 793 proposed) 1,144 sq. ft.
- Detached Guest House 868 sq. ft.
- Detached Garage 465 sq. ft.

Total: 5,390 sq. ft.

LCP Analysis

The LCP consists of the Land Use Plan (LUP) and LIP. The LUP contains programs and policies implementing the Coastal Act in the City of Malibu. The purpose of the LIP is to carry out the policies of the LUP. The LIP contains specific policies and regulations to which every project requiring a coastal development permit must adhere.

There are 14 LIP chapters that potentially apply depending on the nature and location of the proposed project. Of these, five are for conformance review only and contain no findings: 1) Zoning, 2) Grading, 3) Archaeological/Cultural Resources, 4) Water Quality, and 5) OWTS. These chapters are discussed in the LIP Conformance Analysis section. The nine remaining LIP chapters do contain required findings: 1) Coastal Development Permit; 2) ESHA; 3) Native Tree Protection; 4) Scenic, Visual and Hillside Resource Protection; 5) Transfer of Development Credits; 6) Hazards; 7) Shoreline and Bluff Development; 8) Public Access; and 9) Land Division. For the reasons described in this report, including the project site, the scope of work and substantial evidence in the record, only the following chapters and associated findings are applicable to the project: Coastal Development Permit (including the required findings for the SPR), Scenic Visual and Hillside Resource Protection, Hazards, and Shoreline and Bluff Development. These chapters are discussed in the LIP Findings section of this report.

LIP Conformance Analysis

The proposed project has been reviewed by the Planning Department, City Biologist, City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department, California State Lands Commission (CSLC), Los Angeles County Waterworks District No. 29 (WD29), and the Los Angeles County Fire Department.
WD29 provided a letter to the applicant stating that WD29 can serve water to the property. The project, as proposed and conditioned, has been found to be consistent with all applicable LOP codes, standards, goals and policies with the inclusion of SPR No. 17-036.

Zoning (LIP Chapter 3)

The project is subject to non-beachfront development and design standards set forth under LIP Sections 3.5 and 3.6. Table 3 provides a summary and indicates the proposed project meets those standards.

LIP Section 13.5 specifies that existing, lawfully established structures, which do not conform to the provisions of the LCP, may be maintained and/or repaired, and/or may have additions or improvements made, provided that such repair and maintenance, additions or improvements do not increase the extent of nonconformity of the structure, and provided that such additions or improvements comply with the current LCP standards. Substantial additions, demolition and reconstruction, that result in demolition and/or replacement of more than 50 percent of the exterior walls shall not be permitted unless such structures are brought into conformance with the policies and standards of the LCP. The subject application does not propose any development that would increase a nonconformity and no development is proposed on the existing nonconforming guest house.

Grading (LIP Chapter 8)

LIP Section 8.3 ensures that new development minimizes the visual resource impacts of grading and landform alteration by restricting the amount of non-exempt grading to a maximum of 1,000 cubic yards for a residential parcel. The project does not propose any grading or landform alteration as part of the project. Therefore, the proposed project complies with grading requirements set forth under LIP Section 8.3.
Archaeological / Cultural Resources (LIP Chapter 11)

LIP Chapter 11 requires certain procedures be followed to determine potential impacts on archaeological resources. A Phase I Archaeological Report was prepared by Compass Rose Archaeological, Inc. in March of 2013 for the proposed project site. No archaeological resources were found onsite during the Phase I investigation. The Phase I Archaeological Report determined that the proposed improvements should have no adverse impacts to known cultural resources.

Nevertheless, a condition of approval has been incorporated into the proposed project which states that in the event that potentially important cultural resources be found in the course of geologic testing or during construction, work shall immediately cease until a qualified archaeologist can provide an evaluation of the nature and significance of the resources and until the Planning Director can review this information. The project has been conditioned to meet this requirement and complies with LIP Chapter 11.

Water Quality (LIP Chapter 17)

The City Public Works Department has reviewed and approved the project for conformance to LIP Chapter 17 requirements for water quality protection. Standard conditions of approval require that prior to permit issuance, a Local Storm Water Pollution Prevention Plan be submitted. With the implementation of these conditions, the project conforms to the Water Quality Protection standards of LIP Chapter 17.

Wastewater Treatment System Standards (LIP Chapter 18)

LIP Chapter 18 addresses OWTS. LIP Section 18.7 includes specific siting, design, and performance requirements. The project has been reviewed and approved by the City Environmental Health Administrator and, as proposed, does not require the installation of a new OWTS. The City Environmental Health Administrator has reviewed the subject application and determined that the existing OWTS will meet all applicable requirements.

LIP Findings

A. General Coastal Development Permit (LIP Chapter 13)

Pursuant to LIP Section 13.9, the following four findings need to be made on all coastal development permits.

Finding 1. That the project as described in the application and accompanying materials, as modified by any conditions of approval, conforms with the certified City of Malibu Local Coastal Program.
The project is located in the RR-2 zoning district, an area designated for rural residential uses. A single-family residence and associated development are permitted uses. The project has been reviewed for conformance with the LCP by the Planning Department, City Biologist, City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department and LACFD. As discussed herein, based on submitted reports, project plans, visual analysis and site investigations, the proposed project, as conditioned, conforms to the LCP and MMC in that it meets all applicable residential development standards with the inclusive of the requested SPR.

Finding 2. If the project is located between the first public road and the sea, that the project is in conformity to the public access and recreation policies of Chapter 3 of the Coastal Act of 1976 (commencing with Sections 30200 of the Public Resources Code).

The project is located between the first public road and the sea. However, the proposed project and related construction activities are not anticipated to interfere with the public's right to access the coast as both lateral and vertical beach access exists nearby and no development is proposed on sandy beaches.

The LCP Public Access Map indicates that a lateral accessway has been recorded on the subject property. Additionally, vertical beach access easements have been recorded and developed approximately 320 feet west of the site and approximately 765 feet east. Therefore, the project complies with the Coastal Act of 1976.

Finding 3. The project is the least environmentally damaging alternative.

The following alternatives to the proposed project were considered.

Alternative Project – On October 22, 2019, staff visited the project site to document the story poles erected in October, 2019 and reviewed alternate site locations for the proposed project. Story pole photographs are included as Attachment 5. Due to the size and shape of the lot and the presence of steep slopes on the property, it was determined that the proposed development will not block bluewater views from neighboring properties. Additionally, the proposed additions to the existing single-family residence will not be visible from Pacific Coast Highway, an LCP designated scenic highway. A smaller or alternative project could be proposed on the subject parcel. However, the proposed development complies with TDSF and impermeable coverage. It is not anticipated that a smaller or relocated project would be an environmentally superior alternative. Therefore, an alternative project would not provide an environmental advantage and would not meet the project objectives.
Proposed Project — The project consists of an interior and exterior remodel of and additions to an existing single-family residence. The proposed development is a permitted use within the RR zoning classification of the subject property. The proposed development has been reviewed and conditionally approved by the City Biologist, City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department, and the LACFD, and the project meets the City's residential development policies of the LCP and MMC. The proposed development is sited on an existing, approved development pad and the project does not propose grading or landform alterations. Additionally, the proposed development complies with setback requirements and does not proposed construction on steep slopes. As proposed, the project is the least environmentally damaging alternative.

Finding 4. If the project is located in or adjacent to an environmentally sensitive habitat area pursuant to Chapter 4 of the Malibu LIP (ESHA Overlay), that the project conforms with the recommendations of the Environmental Review Board, or if it does not conform with the recommendations, findings explaining why it is not feasible to take the recommended action.

The subject property is not in a designated ESHA or ESHA buffer as shown on the LCP ESHA and Marine Resources Map. Therefore, Environmental Review Board review was not required, and this finding does not apply.

B. Site Plan Review for Construction in Excess of 18 Feet in Height (LIP Section 13.27.5)

LIP Section 13.27.5(A) requires that the City makes four findings in the consideration and approval of a site plan review for construction in excess of the City's base 18 feet in height up to a maximum of 24 feet with a flat roof. Two additional findings are required pursuant to MMC Section 17.62.060. The applicant is proposing 366 square feet of additions to an existing two-story, single-family residence at a height not to exceed 24 feet with a flat roof. Based on the evidence in the record, the findings of fact for SPR No. 17-036 are made as follows:

Finding 1. The project is consistent with policies and provisions of the Malibu LCP.

As stated in Section A, the project has been reviewed for conformance with all relevant policies and provisions of the LCP. Based on submitted reports, visual impact analysis, and detailed site investigation, the project is consistent with all policies and provisions of the LCP and MMC.
Finding 2. The project does not adversely affect neighborhood character.

Story poles were installed in October 2019. Staff visited the project site on October 22, 2019, photo-documented the story poles and evaluated the project for conformance with City codes (Attachment 5 – Story Pole Photographs). Neighboring properties are developed with a mix of one- and two-story residential structures of similar size with mature landscaping. The subject application includes additions to the second story at the front of the existing single-family residence, not to exceed 24 feet in height with a flat roof. As demonstrated with the story pole photographs, due to the size, shape, and topography of the lot, the proposed development will not be visible from scenic roads. Furthermore, the story poles demonstrate that the proposed development will not be located within primary views of neighboring properties. Based on the existing development within the surrounding neighborhood, the proposed project is expected to blend with the surrounding built environment. Therefore, the portion of the residence in excess of 18 feet is not anticipated to adversely affect neighborhood character.

Finding 3. The project provides maximum feasible protection to significant public views as required by Chapter 6 of the Malibu LIP.

As evident from the story poles, the proposed residence is similar in size, height and massing to existing, neighboring residences. As designed, the proposed development will be lower in elevation than the adjacent property to the north, thereby providing views over the residence toward the Pacific Ocean. Additionally, due to the steep topography and existing mature vegetation, the proposed development will not block public views from Pacific Coast Highway toward the Pacific Ocean. Therefore, the proposed development is designed to not block views from a scenic area, scenic road or public viewing area.

Finding 4. The proposed project complies with all applicable requirements of state and local law.

The proposed project will comply with all applicable requirements of State and local law and is conditioned to comply with any relevant approvals, permits and licenses from the City of Malibu and other related agencies.

Finding 5. The project is consistent with the City’s general plan and local coastal program.

The proposed project is consistent with the LCP in that the property is located in an area that has been identified and zoned for residential use. The proposed project is also consistent with the City’s General Plan and LCP. The goals and policies of the General Plan intend to maintain rural residential character in this area, and all components of the project are consistent with these goals. The proposed project is consistent with the LCP in that it conforms to the residential land use designation and all applicable development standards.
Finding 6. The portion of the project that is in excess of 18 feet in height does not obstruct visually impressive scenes of the Pacific Ocean, off-shore islands, Santa Monica Mountains, canyons, valleys, or ravines from the main viewing area of any affected principal residence as defined in MMC Section 17.40.040(A)(17).

The proposed development is not expected to obstruct visually impressive scenes from private property as all nearby residences have views oriented away from, or over, the subject property. This analysis is based on aerial photographs, site visits and story pole placement.

C. Environmentally Sensitive Habitat Area Overlay (LIP Chapter 4)

The subject property is not in a designated ESHA, or ESHA buffer, as shown on the LCP ESHA and Marine Resources Map. Therefore, the findings of LIP Section 4.7.6 are not applicable.

D. Native Tree Protection (LIP Chapter 5)

No protected native trees exist within the project area. Therefore, the findings contained in LIP Chapter 5 do not apply.

E. Scenic, Visual and Hillside Resource Protection (LIP Chapter 6)

The Scenic, Visual and Hillside Resource Protection Chapter governs those coastal development permit applications concerning any parcel of land that is located along, provides views to or is visible from any scenic area, scenic road or public viewing area. The subject parcel is located between Pacific Coast Highway and the beach. Therefore, the findings set forth in LIP Section 6.4 are enumerated herein.

Finding 1. The project, as proposed, will have no significant adverse scenic or visual impacts due to project design, location on the site or other reasons.

The proposed project is an interior and exterior remodel of and additions to an existing two-story, single-family residence. Story poles were placed on the project site to demonstrate the size, mass, height, and bulk of the proposed development. An analysis of the project’s visual impact was conducted through site inspections, architectural plans and review of neighborhood character. Based on a staff site visit after story poles were installed, it was determined that portions of the proposed development will be visible from the beach, however, the proposed development is not expected to have significant adverse scenic or visual impacts as the development is proposed landward of the MHTL and on an existing, approved development pad. Therefore, the project as conditioned will not have significant adverse scenic or visual impacts due to project design, location or
other reasons. Standard conditions of approval have been included for colors, materials, and lighting.

Finding 2. The project, as conditioned, will not have significant adverse scenic or visual impacts due to required project modifications, landscaping or other conditions.

The project has been designed to avoid any adverse or scenic impacts. The proposed development has been conditioned to utilize colors and materials that will be compatible with the surrounding natural environment. Additionally, the project site has been conditioned to restrict exterior lighting per the requirements of the City's Dark Sky Ordinance. Therefore, the proposed development will not result in significant adverse scenic visual impacts.

Finding 3. The project, as proposed or as conditioned, is the least environmentally damaging alternative.

As discussed in Section A, the project, as proposed or conditioned, is the least environmentally damaging alternative as the proposed development is sited on an existing, approved development pad and does not propose any grading of landform alteration.

Finding 4. There are no feasible alternatives to development that would avoid or substantially lessen any significant adverse impacts on scenic and visual resources.

The project, as designed and conditioned, is not expected to adversely affect scenic and visual resources and no feasible alternatives would avoid or substantially lessen any significant adverse impacts on scenic and visual resources.

Finding 5. Development in a specific location on the site may have adverse scenic and visual impacts but will eliminate, minimize or otherwise contribute to conformance to sensitive resource protection policies contained in the certified LCP.

As discussed in Findings 1 and 2, the project, as proposed and conditioned, will not result in significant impacts on scenic and visual resources. The location proposed for development would not result in significant visual impacts to public views from Pacific Coast Highway and will not impact sensitive resources. Therefore, the proposed development, as designed, is sited to minimize or otherwise contribute to conformance to sensitive resources.

The subject property is a beachfront lot; however, the proposed project will not expand the footprint seaward of the existing residence and the proposed development will not touch the sand. The proposed development is sited to eliminate or minimize impacts or otherwise contribute to conformance to beach protection policies.
F. Transfer of Development Credits (LIP Chapter 7)

The proposed project does not include a land division or multi-family development. Therefore, the findings of LIP Chapter 7 are not applicable.

G. Hazards (LIP Chapter 9)

Pursuant to LIP Section 9.3, written findings of fact, analysis and conclusions addressing geologic, flood and fire hazards, structural integrity or other potential hazards listed in LIP Section 9.2(A) must be included in support of all approvals, denials or conditional approvals of development located on a site or in an area where it is determined that the proposed project has the potential to create adverse impacts upon site stability or structural integrity.

The proposed development has been analyzed for the hazards listed in LIP Chapter 9 and has been reviewed and approved for conformance with all relevant policies and regulations of the LCP and MMC by the Planning Department, City Biologist, City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department, and LACFD. The required findings are made as follows:

Finding 1. The project, as proposed will neither be subject to nor increase instability of the site or structural integrity from geologic, flood, or fire hazards due to project design, location on the site or other reasons.

Analysis for potential hazards included review of the submitted geotechnical reports prepared by CalWest Geotechnical Consulting Engineers, dated March 24, 2017, August 3, 2017, and September 13, 2017. According to the geotechnical reports, the proposed development was determined to not increase instability of the site or structural integrity from a geologic, flood or fire hazards perspective. Based on review of the project plans by City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department and LACFD, these specialists and agency determined that adverse impacts to the project site related to the proposed development are not expected. The proposed project will neither be subject to nor increase the instability from geologic or fire hazards. In summary, the proposed development is suitable for the intended use provided that the certified engineering geologist and/or geotechnical engineer’s recommendations and governing agency’s building codes are followed.

All recommendations of the City geotechnical staff and City Public Works Department shall be incorporated into the final design and construction. Final plans shall be reviewed and approved by the City geotechnical staff and City Public Works Department prior to the issuance of a grading permit.
Wave Runup / Tsunami Hazard

According to the wave uprush reports dated May 10, 2013, March 21, 2018 and July 11, 2018, by the project coastal engineer, David C. Weiss, the existing rock revetment provides protection for the existing residential structures and associated development. The reports indicate that the existing finish floor elevation of +19.27 ft. NAVD88\(^1\) is adequate to prevent overtopping by ocean waves. Due to the existing setback from the top of the revetment, wave runup will have little, if any, impact on the development. The report also addresses the phenomena of tsunamis caused by displacement of faults immediately offshore of Malibu. The report indicates that there is an extremely low probability of tsunami generated waves occurring in the vicinity of the subject property. The proposed development is sited landward of the maximum runup limit and no additional shoreline protective device or repair is required.

The City Coastal Engineer has reviewed and conditionally approved the proposed project. Conditions of approval have been incorporated in the resolution requiring that a shoreline protection monitoring program be provided. The existing finish floor elevation is +19.27 ft. NAVD88, the breaking wave crest elevation is +16.23 ft. NAVD88, and the wave uprush limit is +12.00 ft. NAVD88. Therefore, wave uprush is not anticipated to affect the proposed development.

Liquefaction / Landslide

The subject site is located within a landslide zone on the State of California Seismic Hazard Map. According to the geotechnical engineers, the proposed improvements will be safe against hazards from landslide, settlement or slippage and the proposed improvements will not have an adverse effect on the stability of the subject site or immediate vicinity provided the geotechnical recommendations are made part of the building plans and implemented during construction. Furthermore, the area of the proposed improvements is considered to be stable from a geotechnical point of view.

The project, as conditioned, will incorporate all recommendations contained in the above cited geotechnical reports and conditions required by the City Coastal Engineer, Public Works Department, City geotechnical staff, and the LACFD. As such, the proposed project will not increase instability of the site or structural integrity from geologic, flood, or any other hazards.

---

\(^1\) North American Vertical Datum of 1988 (NAV88) is the vertical control datum of orthometric height established for vertical control surveying in the USA.
Fire Hazard

The entire city limits of Malibu are within an identified fire hazard zone. The property is currently subject to wildfire, however, development of a residence on the subject property will not increase the site's susceptibility to wildfire. The scope of work proposed as part of this application is not expected to have an impact on wildfire hazards. The proposed development may actually decrease the site's susceptibility to wildfire through the use of appropriate building materials during construction.

The City is served by the LACFD, as well as the California Department of Forestry, if needed. In the event of major fires, the County has “mutual aid agreements” with cities and counties throughout the State so that additional personnel and firefighting equipment can augment the LACFD. Conditions of approval have been included in the resolution to require compliance with all LACFD development standards. As such, the proposed project, as designed and conditioned, will not be subject to nor increase the instability of the site or structural integrity involving wildfire hazards.

Finding 2. The project, as conditioned, will not have significant adverse impacts on site stability or structural integrity from geologic, flood or fire hazards due to required project modifications, landscaping or other conditions.

As stated in Finding 1, the project as designed, conditioned, and approved by the City geotechnical staff and City Public Works Department, does not have any significant adverse impacts on site stability or structural integrity from geologic or fire hazards due to the project design.

Finding 3. The project, as proposed or as conditioned, is the least environmentally damaging alternative.

As previously stated in Section A, the project, as proposed and conditioned, is the least environmentally damaging alternative.

Finding 4. There are no alternatives to development that would avoid or substantially lessen impacts on site stability or structural integrity.

The proposed development has been analyzed for the hazards listed in LIP Chapter 9 by the City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department and LACFD. These specialists and agency determined that the proposed project does not impact site stability or structural integrity. As previously discussed in Section A, there are no feasible alternatives to the proposed development that would result in less site disturbance.
Finding 5.  Development in a specific location on the site may have adverse impacts but will eliminate, minimize or otherwise contribute to conformance to sensitive resource protection policies contained in the certified Malibu LCP.

As previously discussed in Section A, the proposed project, as designed and conditioned, will not have adverse impacts on sensitive resources.

H. Shoreline and Bluff Development (LIP Chapter 10)

The project site is located on the ocean side of Pacific Coast Highway along the shoreline. Given the proposed additions will be located above the existing footprint and the proposed additions will not touch the sand, the proposed project will not impact shoreline access along the beach at the rear of the property. Furthermore, the proposed scope of work does not include alterations to the existing seawall and no work is proposed on the beach. In accordance with LIP Section 10.2, the requirements of LIP Chapter 10 are applicable to the project and the required findings are made as follows.

Finding 1. The project, as proposed, will have no significant adverse impacts on public access, shoreline sand supply or other resources due to project design, location on the site or other reasons.

The subject property is located in a developed neighborhood and neighboring properties are developed with similarly sized single-family residences. Given the location of the proposed additions, no alterations to the seawall are proposed. Additionally, no adverse impacts to public access are likely as a lateral access easement has been recorded on the property and sufficient vertical beach access exists nearby. All proposed development is sited landward of the required 10-foot MHTL setback and no work is proposed on the sand. Additionally, no new encroachments are proposed on the bluff. The project as designed and conditioned, is not expected to have significant adverse impacts on public access, shoreline sand supply or other resources.

Finding 2. The project, as conditioned, will not have significant adverse impacts on public access, shoreline sand supply or other resources due to required project modifications or other conditions.

The project, as designed and conditioned, is not expected to have any significant adverse impacts on public access or shoreline sand supply or other resources as all proposed development is sited landward of the MHTL and on the existing, approved development pad.
Finding 3. The project, as proposed or as conditioned, is the least environmentally damaging alternative.

The project, as designed and conditioned, is the least environmentally damaging alternative as the proposed additions are sited on an existing graded pad and no additional grading or landform alterations are proposed.

Finding 4. There are no alternatives to the proposed development that would avoid or substantially lessen impacts on public access, shoreline sand supply or other resources.

The project, as designed and conditioned, is not expected to have any significant adverse impacts on public access or shoreline sand supply or other resources.

Finding 5. The shoreline protective device is designed or conditioned to be sited as far landward as feasible to eliminate or mitigate to the maximum feasible extent adverse impacts on local shoreline sand supply and public access, and there are no alternatives that would avoid or lessen impacts on shoreline sand supply, public access or coastal resources and it is the least environmentally damaging alternative.

The project does not propose or require a new shoreline protection device. Therefore, this finding does not apply.

I. Public Access (LIP Chapter 12)

LIP Section 12.4 requires public access for lateral, bluff-top, and vertical access near the ocean, trails, and recreational access for the following cases:

A. New development on any parcel or location specifically identified in the Land Use Plan or in the LCP zoning districts as appropriate for or containing a historically used or suitable public access trail or pathway.
B. New development between the nearest public roadway and the sea.
C. New development on any site where there is substantial evidence of a public right of access to or along the sea or public tidelands, a blufftop trail or an inland trail acquired through use or a public right of access through legislative authorization.
D. New development on any site where a trail, bluff top access or other recreational access is necessary to mitigate impacts of the development on public access where there is no feasible, less environmentally damaging, project alternative that would avoid impacts to public access.

No official LCP trail is mapped on the subject property. A recorded lateral access easement exists on the subject property, outside of the project area, that extends the entire width of the property from the MHTL to the toe of the revetment. Additionally, bluff-top, trail, vertical and recreational access are not applicable given the subject property's
location. Therefore, the requirement for public access of LIP Section 12.4 does not apply and further findings are not required.

J. Land Division (LIP Chapter 15)

This project does not include a land division. Therefore, the findings of LIP Chapter 15 are not applicable.

ENVIRONMENTAL REVIEW: Pursuant to the authority and criteria contained in CEQA, the Planning Department has analyzed the proposed project. The Planning Department found that this project is listed among the classes of projects that have been determined not to have a significant adverse effect on the environment. Therefore, the project is categorically exempt from the provisions of CEQA pursuant to Sections 15301(a) and (e) – Existing Facilities. The Planning Department has further determined that none of the six exceptions to the use of a categorical exemption apply to this project (CEQA Guidelines Section 15300.2).

CORRESPONDENCE: Staff has not received any public correspondence regarding this project.

PUBLIC NOTICE: On January 9, 2020, staff published a Notice of Public Hearing Notice in a newspaper of general circulation within the City of Malibu and mailed the notice to property owners and occupants within a 500-foot radius of the subject property.

SUMMARY: The required findings can be made that the project complies with the LCP. Further, the Planning Department’s findings of fact are supported by substantial evidence in the record. Based on the analysis contained in this report and the accompanying resolution, staff recommends approval of this project subject to the conditions of approval contained in Section 5 (Conditions of Approval) of Planning Commission Resolution No. 20-11. The project has been reviewed and conditionally approved for conformance with the LCP by Planning Department and appropriate City departments.

CITY OF MALIBU PLANNING COMMISSION
RESOLUTION NO. 20-11

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MALIBU, DETERMINING THE PROJECT IS CATEGORICALLY EXEMPT FROM THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AND APPROVING COASTAL DEVELOPMENT PERMIT NO. 17-071 TO ALLOW AN INTERIOR AND EXTERIOR REMODEL OF AND 1,159 SQUARE FEET OF ADDITIONS TO AN EXISTING 2,547 SQUARE FOOT, TWO-STORY, SINGLE-FAMILY RESIDENCE, INVOLVING 15 PERCENT DEMOLITION OF EXTERIOR WALLS; INCLUDING SITE PLAN REVIEW NO. 17-036 FOR CONSTRUCTION UP TO 24 FEET IN HEIGHT WITH FLAT ROOFS FOR THE RESIDENCE LOCATED IN THE RURAL RESIDENTIAL-TWO ACRE ZONING DISTRICT AT 33608 PACIFIC COAST HIGHWAY (PRICE)

The Planning Commission of the City of Malibu does hereby find, order and resolve as follows:

SECTION 1. Recitals.

A. On June 21, 2017, an application for Coastal Development Permit (CDP) No. 17-071 and Site Plan Review (SPR) No. 17-036 was submitted to the Planning Department by the applicant, Burdge and Associates Architects, Inc., on behalf of the property owner, Michael Price. The application was routed to the City Biologist, City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department, Los Angeles County Fire Department (LACFD), and Los Angeles County Waterworks District 29 (WD29) for review.

B. On October 22, 2019, Planning Department staff conducted a site visit to document the story poles.

C. On January 9, 2020, a Notice of Coastal Development Permit (CDP) Application was posted on the subject property.

D. On January 9, 2020, the CDP application was deemed complete for processing.

E. On January 9, 2020, a Notice of Planning Commission Public Hearing was published in a newspaper of general circulation within the City of Malibu and was mailed to all property owners and occupants within a 500-foot radius of the subject property.

F. On February 3, 2020, the Planning Commission continued the item to the February 18, 2020 Regular Planning Commission meeting.

G. On February 18, 2020, the Planning Commission held a duly noticed public hearing on the subject application, reviewed and considered the staff report, reviewed and considered written reports, public testimony, and other information in the record.

SECTION 2. Environmental Review.

Pursuant to the authority and criteria contained in the California Environmental Quality Act (CEQA), the Planning Commission has analyzed the proposed project. The Planning Commission has found that this project is listed among the classes of projects that have been determined not to
have a significant adverse effect on the environment. Therefore, the project is categorically exempt from the provisions of CEQA according to CEQA Guidelines Sections 15301(a) and (e) – Existing Facilities. The Planning Commission has further determined that none of the six exceptions to the use of a categorical exemption applies to this project (CEQA Guidelines Section 15300.2).

SECTION 3. Coastal Development Permit Findings.

Based on substantial evidence contained within the record and pursuant to Local Coastal Program (LCP) Local Implementation Plan (LIP) Sections 13.7(B) and 13.9 and Malibu Municipal Code (MMC) Section 17.62.070, the Planning Commission adopts and approves the analysis in the agenda report, incorporated herein, the findings of fact below, and approves CDP No. 17-071 to allow an interior and exterior remodel of and 1,159 square feet of additions to an existing 2,547 square foot, two-story, single-family residence, involving 15 percent demolition of exterior walls; including SPR No. 17-036 for construction up to 24 feet with flat roofs for the residence located in the Rural Residential-Two Acre (RR-2) zoning district at 33608 Pacific Coast Highway.

The project is consistent with the LCP’s zoning, grading, cultural resources, water quality, and wastewater treatment requirements. With the inclusion of the proposed site plan review, the project, as conditioned, has been determined to be consistent with all applicable LCP codes, standards, goals, and policies. The required findings are made herein.

A. General Coastal Development Permit (LIP Chapter 13)

1. The project is located in the RR-2 zoning district, an area designated for residential uses. The project has been reviewed for conformance with the LCP by the Planning Department, the City Biologist, City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department, California State Lands Commission (CSLC), LACFD, and WW29. The proposed project, with the inclusion of the site plan review, as conditioned, conforms to the LCP and MMC in that it meets all applicable residential development standards.

2. Evidence in the record demonstrates that the proposed project conforms to the public access and recreational policies in Chapter 3 of the Coastal Act as the subject parcel contains an existing lateral access easement and vertical beach access exists nearby.

3. The proposed project meets the development policies of the LCP and MMC, with the inclusion of the site plan review and has been determined to be the least environmentally damaging feasible alternative. The proposed development has been sited on an existing, approved development pad, limiting environmental impacts such as grading and landform alteration. Additionally, there are no significant adverse impacts anticipated as a result of the proposed development. Therefore, the proposed project has been determined to be the least environmentally damaging feasible alternative.

B. Site Plan Review for Construction in Excess of 18 Feet in Height (LIP Section 13.27.5)

SPR No. 17-036 from the development standards contained in LIP Section 13.27 will allow construction over 18 feet in height for flat roofs up to 24 feet for the proposed additions to the existing single-family residence.
1. The project has been reviewed for conformance with all relevant policies and provisions of the LCP. Based on submitted reports, visual impact analysis, and a detailed site investigation, the project is consistent with all policies and provisions of the LCP and MMC.

2. Story poles were installed in October 2019 and demonstrate that the project is compatible with the surrounding development. Surrounding properties are developed with one- and two-story residential structures. As demonstrated by the story poles, the proposed development will not be visible from a public viewing area and will not block bluewater views from neighboring properties. Therefore, the project will not be more impactful than the surrounding development with regards to neighborhood character and is not anticipated to adversely affect neighborhood character.

3. As designed, the proposed development will be lower in elevation than the adjacent property to the north, thereby providing views over the residence toward the Pacific Ocean. Due to the steep topography on the lot and existing mature vegetation, the proposed development will not block views from Pacific Coast Highway. Therefore, the proposed development is designed to not block views from a scenic area or scenic road.

4. The proposed project will comply with all applicable requirements of State and local law and is conditioned to comply with any relevant approvals, permits and licenses from the City of Malibu and other related agencies.

5. The proposed project is consistent with the LCP in that the property is located in an area that has been identified and zoned for residential use. The proposed project is consistent with the LCP in that it conforms to the residential land use designation and all applicable development standards.

6. The proposed development is not expected to obstruct visually impressive scenes from private property as all nearby residences have views oriented away from, or over, the subject property.

C. Scenic, Visual and Hillside Resource Protection (LIP Chapter 6)

1. Based on an analysis of the project's visual impacts, it was determined that the proposed development is not expected to have significant adverse scenic or visual impacts. The proposed development will be visible from the beach, however, with the inclusion of the conditions set forth in this resolution, pertaining to permissible exterior colors, materials and lighting restrictions, the project will blend in with the surrounding developed environment. As demonstrated by the story poles, the proposed development will not have significant adverse scenic or visual impacts as the proposed development is located landward of the mean high tide line and on an existing, approved development pad. Standard conditions of approval have been included for colors, materials, and lighting.

2. The project has been designed and conditioned to not have significant adverse scenic or visual impacts. The project has been conditioned to include limitations on lighting and colors of the materials used to prevent any visual impacts to scenic areas and primary views.
3. As previously discussed in Section A, the project is the least environmentally damaging alternative. The proposed development is sited on an existing, approved development pad and does not propose any grading or landform alteration. Therefore, the project, as proposed and conditioned, is the least environmentally damaging alternative.

4. The project, as designed and conditioned, is not expected to adversely affect scenic and visual resources and no feasible alternatives would avoid or substantially lessen any significant adverse impacts on scenic and visual resources.

5. The proposed project will not result significant visual impacts to public views from Pacific Coast Highway and will not impact sensitive resources. The proposed development is sited to minimize or otherwise contribute to conformance to sensitive resource protection policies.

D. Hazards (LIP Chapter 9)

1. Evidence in the record demonstrates that the project will neither be subject to nor increase the instability of the site from geologic, flood, or fire hazards. The proposed development is suitable for the intended use provided that the certified engineering geologist and/or geotechnical engineer’s recommendations and governing agency’s building codes are followed.

2. The project, as designed, conditioned, and approved by the City geotechnical staff and the City Public Works Department, does not have any significant adverse impacts on the site stability or structural integrity from geologic or fire hazards due to the project design.

3. The project, as conditioned, is the least environmentally damaging alternative.

4. The proposed development has been analyzed for the hazards listed in LIP Chapter 9 by the City Biologist, City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department, and LACFD. These specialists and agency determined that the proposed project does not impact site stability or structural integrity. There are no feasible alternatives to the proposed development that would result in less site disturbance.

5. The proposed project, as designed and conditioned, will not have adverse impacts on sensitive resources.

E. Shoreline and Bluff Development (LIP Chapter 10)

1. The subject property is located in a developed neighborhood and neighboring properties contain similarly sized residential development. The proposed development complies with the development standards of LIP Chapter 10 as all proposed development is sited landward of the mean high tide line and no work is proposed on the sand. Additionally, no new encroachments are proposed on the bluff. The project as designed and conditioned, is not expected to have significant adverse impacts on public access, shoreline sand supply or other resources.

2. The project, as designed and conditioned, is not expected to have any significant adverse impacts on public access or shoreline sand supply or other resources as the proposed development is sited landward of the mean high tide line and on the existing, approved development pad.
3. The project, as designed and conditioned, is the least environmentally damaging alternative as the proposed additions are sited on the existing graded pad and no additional grading or landform alterations are proposed.

4. The project, as designed and conditioned, is not expected to have any significant adverse impacts on public access or shoreline sand supply or other resources.

Based on the foregoing findings and evidence contained within the record, the Planning Commission hereby approves CDP No. 17-071 and SPR No. 17-036 subject to the following conditions.

SECTION 5. Conditions of Approval.

1. The property owners, and their successors in interest, shall indemnify and defend the City of Malibu and its officers, employees and agents from and against all liability and costs relating to the City’s actions concerning this project, including (without limitation) any award of litigation expenses in favor of any person or entity who seeks to challenge the validity of any of the City’s actions or decisions in connection with this project. The City shall have the sole right to choose its counsel and property owners shall reimburse the City’s expenses incurred in its defense of any lawsuit challenging the City’s actions concerning this project.

2. Approval of this application is to allow for the following:

 Demolition

   a. 15 percent demolition of exterior walls (cumulative total of 30 percent including Over-the-Counter No. 13-097 and CDP No. 13-050).

 Construction

   b. An interior and exterior remodel of an existing two-story, single-family residence including:
      i. 366 square feet of additions to the second story; and
      ii. 793 square feet of covered decks.
      Total: 1,159 square feet

 Additional Discretionary Request

   c. SPR No. 17-036 for construction up to 24 feet in height for a flat roof.

3. Except as specifically changed by conditions of approval, the proposed development shall be constructed in substantial conformance with the approved scope of work, as described in Condition No. 2 and depicted on plans on file with the Planning Department date stamped June 20, 2019. The proposed development shall further comply with all conditions of approval stipulated in this resolution and Department Review Sheets attached
hereto. In the event project plans conflict with any condition of approval, the condition shall take precedence.

4. Pursuant to LIP Section 13.18.2, this permit and rights conferred in this approval shall not be effective until the property owner signs, notarizes and returns the Acceptance of Conditions Affidavit accepting the conditions of approval set forth herein. The applicant shall file this form with the Planning Department prior to the issuance of any development permits.

5. The applicant shall submit three (3) complete sets of plans, including the items required in Condition No. 6 to the Planning Department for consistency review and approval prior to plan check and again prior to the issuance of any building or development permits.

6. This resolution, signed and notarized Acceptance of Conditions Affidavit and all Department Review Sheets attached to the agenda report for this project shall be copied in their entirety and placed directly onto a separate plan sheet behind the cover sheet of the development plans submitted to the City of Malibu Environmental Sustainability Department for plan check, and the City of Malibu Public Works Department for an encroachment permit (as applicable).

7. The CDP shall expire if the project has not commenced within three (3) years after issuance of the permit, unless a time extension has been granted. Extension of the permit may be granted by the approving authority for due cause. Extensions shall be requested in writing by the applicant or authorized agent prior to expiration of the three-year period and shall set forth the reasons for the request. In the event of an appeal, the CDP shall expire if the project has not commenced within three years from the date the appeal is decided by the decision-making body or withdrawn by the appellant.

8. Any questions of intent or interpretation of any condition of approval will be resolved by the Planning Director upon written request of such interpretation.

9. All development shall conform to requirements of the City of Malibu Environmental Sustainability Department, City Biologist, City Coastal Engineer, City Environmental Health Administrator, City geotechnical staff, City Public Works Department, CSLC, d LACFD, as applicable. Notwithstanding this review, all required permits shall be secured.

10. Minor changes to the approved plans or the conditions of approval may be approved by the Planning Director, provided such changes achieve substantially the same results and the project is still in compliance with the Malibu Municipal Code and the Local Coastal Program. Revised plans reflecting the minor changes and additional fees shall be required.

11. Pursuant to LIP Section 13.20, development pursuant to an approved CDP shall not commence until the CDP is effective. The CDP is not effective until all appeals, including those to the California Coastal Commission (CCC), have been exhausted. In the event that the CCC denies the permit or issues the permit on appeal, the coastal development permit approved by the City is void.

12. The property owner must submit payment for all outstanding fees payable to the City prior to issuance of any building permit, including grading or demolition.
Cultural Resources

13. In the event that potentially important cultural resources are found in the course of geologic testing or during construction, work shall immediately cease until a qualified archaeologist can provide an evaluation of the nature and significance of the resources and until the Planning Director can review this information. Thereafter, the procedures contained in LIP Chapter 11 and those in MMC Section 17.54.040(D)(4)(b) shall be followed.

14. If human bone is discovered during geologic testing or during construction, work shall immediately cease, and the procedures described in Section 7050.5 of the California Health and Safety Code shall be followed. Section 7050.5 requires notification of the coroner. If the coroner determines that the remains are those of a Native American, the applicant shall notify the Native American Heritage Commission by phone within 24 hours. Following notification of the Native American Heritage Commission, the procedures described in Section 5097.94 and Section 5097.98 of the California Public Resources Code shall be followed.

Colors and Materials

15. The project is visible from scenic roads or public viewing areas, therefore, shall incorporate colors and exterior materials that are compatible with the surrounding landscape.
   a. Acceptable colors shall be limited to colors compatible with the surrounding environment (earth tones) including shades of green, brown and gray, with no white or light shades and no bright tones. Colors shall be reviewed and approved by the Planning Director and clearly indicated on the building plans.
   b. The use of highly reflective materials shall be prohibited except for solar energy panels or cells, which shall be placed to minimize significant adverse impacts to public views to the maximum extent feasible.
   c. All windows shall be comprised of non-glare glass.

16. All driveways shall be a neutral color that blends with the surrounding landforms and vegetation. Retaining walls shall incorporate veneers, texturing and/or colors that blend with the surrounding earth materials or landscape. The color of driveways and retaining walls shall be reviewed and approved by the Planning Director and clearly indicated on all grading, improvement and/or building plans.

Lighting

17. Exterior lighting must comply with the Dark Sky Ordinance and shall be minimized, shielded, or concealed and restricted to low intensity features, so that no light source is directly visible from public view. Permitted lighting shall conform to the following standards:
   a. Lighting for walkways shall be limited to fixtures that do not exceed two feet in height and are directed downward, and limited to 850 lumens (equivalent to a 60 watt incandescent bulb);
   b. Security lighting controlled by motion detectors may be attached to the residence provided it is directed downward and is limited to 850 lumens;
   c. Driveway lighting shall be limited to the minimum lighting necessary for safe vehicular use. The lighting shall be limited to 850 lumens;
d. Lights at entrances as required by the Building Code shall be permitted provided that such lighting does not exceed 850 lumens;
e. Site perimeter lighting shall be prohibited; and
f. Outdoor decorative lighting for aesthetic purposes is prohibited.

18. No permanently installed lighting shall blink, flash, or be of unusually high intensity or brightness. Lighting levels on any nearby property from artificial light sources on the subject property(ies) shall not produce an illumination level greater than one-foot candle.

19. Night lighting from exterior and interior sources shall be minimized. All exterior lighting shall be low intensity and shielded directed downward and inward so there is no offsite glare or lighting of natural habitat areas.

20. String lights are allowed in occupied dining and entertainment areas only and must not exceed 3,000 Kelvin.

21. Motion sensor lights shall be programmed to extinguish ten minutes after activation.

22. Three sequential violations of the conditions by the same property owner will result in a requirement to permanently remove the outdoor light fixture(s) from the site.

**Shoreline Protection**

23. All construction debris shall be removed from the beach daily and at the completion of development.

24. No stockpiling of dirt or construction materials shall occur on the beach.

25. Measures to control erosion, runoff, and siltation shall be implemented at the end of each day’s work.

26. The applicant shall not store any construction materials or waste where it will be or could potentially be subject to wave erosion and dispersion.

27. No machinery shall be placed, stored or otherwise located in the intertidal zone at any time, unless necessary for protection of life and/or property.

28. Construction equipment shall not be cleaned on the beach.

29. Construction debris and sediment shall be properly contained and secured on site with BMPs to prevent the unintended transport of sediment and other debris into coastal waters by wind, rain or tracking.

**Biology/Landscaping**

30. No new landscaping is proposed with this project; therefore, none is approved. Should the applicant intend to plant any new vegetation with a potential to exceed six feet in height or an area of 2,500 square feet or more, a detailed landscaping plan shall be submitted for review and approval prior to any planting.
31. Grading, excavation and vegetation removal scheduled between February 1 and September 15 will require nesting bird surveys by a qualified biologist prior to initiation of grading activities. Surveys shall be completed no more than five days from proposed initiation of site preparation activities. Should active nests be identified, a buffer area no less than 150 feet (300 feet for raptors) shall be fenced off until it is determined by a qualified biologist that the nest is no longer active. A report discussing the results of the surveys shall be turned in to the City within two business days of completion of surveys.

32. Construction fencing shall be placed at the top of the rock revetment. Construction fencing shall be installed prior to the beginning of any construction and shall be maintained throughout the construction period to protect the beach.

33. Night lighting from exterior and interior sources shall be minimized. All exterior lighting shall be low intensity and shielded so it is directed downward and inward so that there is no offsite glare or lighting of natural habitat areas.

34. The use of pesticides, including insecticides, herbicides, rodenticides or any toxic chemical substance which has the potential to significantly degrade biological resources shall be prohibited throughout the City of Malibu. The eradication of invasive plant species or habitat restoration shall consider first the use of non-chemical methods for prevention and management such as physical, mechanical, cultural, and biological controls. Herbicides may be selected only after all other non-chemical methods have been exhausted. Herbicides shall be restricted to the least toxic product and method, and to the maximum extent feasible, shall be biodegradable, derived from natural sources, and use for a limited time.

Coastal Engineering

35. The property owner shall comply with the requirements for recorded documents and deed restrictions outlined in LIP Sections 10.6(A) and 10.6(B)(1).

36. The Project Coastal Engineer shall submit a Shore Protection Device (SPD) Monitoring Program for the existing rock revetment that is consistent with the City’s requirements. The property owner is required to record a “Covenant and Agreement regarding Maintenance of the Shoreline Projection Device and the Use and Transfer of Ownership of Property,” informing any successors-in-interest to the property of these SPD monitoring requirements for the onsite rock revetment.

Geology

37. All recommendations of the consulting certified engineering geologist or geotechnical engineer and/or the City geotechnical staff shall be incorporated into all final design and construction including foundations, grading, sewage disposal, and drainage. Final plans shall be reviewed and approved by the City geotechnical staff prior to the issuance of permits.

38. Final plans approved by the City geotechnical staff shall be in substantial conformance with the approved CDP relative to construction, grading, sewage disposal and drainage. Any substantial changes may require a CDP amendment or a new CDP.
Public Works

39. The consulting engineer shall sign the final plans prior to the issuance of permits.

Grading/Drainage/Hydrology

40. Exported soil from a site shall be taken to the Los Angeles County Landfill or to a site with an active grading permit and the ability to accept the material in compliance with LIP Section 8.3.

Stormwater

41. A Local Storm Water Pollution Prevention Plan (LSWPPP) shall be provided prior to issuance of grading/building permits. This plan shall include an Erosion and Sediment Control Plan (ESCP) that includes, but not limited to:

<table>
<thead>
<tr>
<th>Erosion Controls Scheduling</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preservation of Existing Vegetation</td>
</tr>
<tr>
<td>Sediment Controls Silt Fence</td>
</tr>
<tr>
<td>Sand Bag Barrier</td>
</tr>
<tr>
<td>Stabilized Construction Entrance</td>
</tr>
<tr>
<td>Non-Storm Water Management</td>
</tr>
<tr>
<td>Water Conservation Practices</td>
</tr>
<tr>
<td>Dewatering Operations</td>
</tr>
<tr>
<td>Waste Management</td>
</tr>
<tr>
<td>Material Delivery and Storage</td>
</tr>
<tr>
<td>Stockpile Management</td>
</tr>
<tr>
<td>Spill Prevention and Control</td>
</tr>
<tr>
<td>Solid Waste Management</td>
</tr>
<tr>
<td>Concrete Waste Management</td>
</tr>
<tr>
<td>Sanitary/Septic Waste Management</td>
</tr>
</tbody>
</table>

42. All Best Management Practices (BMP) shall be in accordance to the latest version of the California Stormwater Quality Association (CASQA) BMP Handbook. Designated areas for the storage of construction materials, solid waste management, and portable toilets must not disrupt drainage patterns or subject the material to erosion by site runoff.

Demolition/Solid Waste

43. Prior to demolition activities, the applicant shall receive Planning Department approval for compliance with conditions of approval.

44. The applicant/property owner shall contract with a City approved hauler to facilitate the recycling of all recoverable/recyclable material. Recoverable material shall include but shall not be limited to asphalt, dirt and earthen material, lumber, concrete, glass, metals, and drywall.

45. Prior to the issuance of a building/demolition permit, an Affidavit and Certification to implement waste reduction and recycling shall be signed by the Owner or Contractor and submitted to the Environmental Sustainability Department. The Affidavit shall indicate the
agreement of the applicant to divert at least 65 percent (in accordance with CalGreen) of all
collection waste from the landfill.

46. Upon plan check approval of demolition plans, the applicant shall secure a demolition
permit from the City. The applicant shall comply with all conditions related to demolition
imposed by the Building Official.

47. No demolition permit shall be issued until building permits are approved for issuance.
Demolition of the existing structure and initiation of reconstruction must take place within
a six-month period. Dust control measures must be in place if construction does not
commence within 30 days.

48. The project developer shall utilize licensed subcontractors and ensure that all asbestos-
containing materials and lead-based paints encountered during demolition activities are
removed, transported, and disposed of in full compliance with all applicable federal, state
and local regulations.

49. Any building or demolition permits issued for work commenced or completed without the
benefit of required permits are subject to appropriate “Investigation Fees” as required in
the Building Code.

50. Upon completion of demolition activities, the applicant shall request a final inspection by
the Building Safety Division.

51. Fifty percent or more of exterior walls must remain in place during construction. Pursuant
to LIP Section 13.4.2, the replacement of 50 percent or more of a single-family residence
is not repair and maintenance, but instead constitutes a replacement structure requiring a
coastal development permit. A major remodel agreement acknowledging this shall be
required prior to issuance of building permits for the project. Contact Planning Department
staff to discuss options PRIOR TO DEMOLITION of more than 50 percent of the existing
exterior walls, should any questions or issues concerning exterior wall demolition come up
during construction. Demolition of exterior walls will be determined based on LCP Policy
3 (Remodels and Additions).

Construction / Framing

52. Prior to the commencement of work, the applicant shall submit a copy of their Construction
Management Plan. The Construction Management Plan shall include a dedicated parking
location for construction workers, not within the public right of way.

53. Construction hours shall be limited to Monday through Friday from 7:00 a.m. to 7:00 p.m.
and Saturdays from 8:00 a.m. to 5:00 p.m. No construction activities shall be permitted on
Sundays or City-designated holidays.

54. Construction management techniques, including minimizing the amount of equipment used
simultaneously and increasing the distance between emission sources, shall be employed
as feasible and appropriate. All trucks leaving the construction site shall adhere to the
California Vehicle Code. In addition, construction vehicles shall be covered when
necessary; and their tires rinsed prior to leaving the property.
55. When framing is complete, a site survey shall be prepared by a licensed civil engineer or architect that states the finished ground level elevation and the highest roof member elevation. Prior to the commencement of further construction activities, said document shall be submitted to the assigned Building Inspector and Planning Department for review and sign off on framing.

56. Construction debris and sediment shall be properly contained and secured on site with BMPs to prevent the unintended transport of sediment and other debris into coastal waters by wind, rain or tracking.

57. All new development, including construction, grading, and landscaping shall be designed to incorporate drainage and erosion control measures prepared by a licensed engineer that incorporate structural and non-structural Best Management Practices (BMPs) to control the volume, velocity and pollutant load of storm water runoff in compliance with all requirements contained in LIP Chapter 17, including:
   a. Construction shall be phased to the extent feasible and practical to limit the amount of disturbed areas present at a given time;
   b. Grading activities shall be planned during the Southern California dry season (April through October);
   c. During construction, contractors shall be required to utilize sandbags and berms to control runoff during on-site watering and periods of rain in order to minimize surface water contamination; and
   d. Filter fences designed to intercept and detain sediment while decreasing the velocity of runoff shall be employed within the project site.

Deed Restrictions

58. The property owner is required to execute and record a deed restriction which shall indemnify and hold harmless the City, its officers, agents, and employees against any and all claims, demands, damages, costs and expenses of liability arising out of the acquisition, design, construction, operation, maintenance, existence or failure of the permitted project in an area where an extraordinary potential for damage or destruction from wildfire exists as an inherent risk to life and property. The property owner shall provide a copy of the recorded document to Planning Department staff prior to final Planning Department approval.

Prior to Final Sign-Off

59. Prior to, or at the time of final inspection, the City Biologist shall inspect the project site and determine that all Planning Department conditions to protect natural resources are in compliance with the approved plans.

60. The applicant shall request a final Planning Department inspection prior to final inspection by the City of Malibu Environmental and Sustainability Department. A final approval shall not be issued until the Planning Department has determined that the project complies with this CDP.
61. Any construction trailer, storage equipment or similar temporary equipment not permitted as part of the approved scope of work shall be removed prior to final inspection and approval, and if applicable, the issuance of the certificate of occupancy.

Fixed Conditions

62. This coastal development permit shall run with the land and bind all future owners of the property.

63. Violation of any of the conditions of this approval may be cause for revocation of this permit and termination of all rights granted there under.

SECTION 6. The Planning Commission shall certify the adoption of this resolution.

PASSED, APPROVED AND ADOPTED this 18th day of February 2020.

JEFFREY JENNINGS, Planning Commission Chair

ATTEST:

KATHLEEN STECKO, Recording Secretary

LOCAL APPEAL - Pursuant to Local Coastal Program Local Implementation Plan (LIP) Section 13.20.1 (Local Appeals) a decision made by the Planning Commission may be appealed to the City Council by an aggrieved person by written statement setting forth the grounds for appeal. An appeal shall be filed with the City Clerk within 10 days and shall be accompanied by an appeal form and filing fee, as specified by the City Council. Appeal forms may be found online at www.malibucity.org, in person at City Hall, or by calling (310) 456-2489, ext. 245.

COASTAL COMMISSION APPEAL - An aggrieved person may appeal the Planning Commission’s approval to the Coastal Commission within 10 working days of the issuance of the City’s Notice of Final Action. Appeal forms may be found online at www.coastal.ca.gov or in person at the Coastal Commission South Central Coast District office located at 89 South California Street in Ventura, or by calling (805) 585-1800. Such an appeal must be filed with the Coastal Commission, not the City.
I CERTIFY THAT THE FOREGOING RESOLUTION NO. 20-11 was passed and adopted by the Planning Commission of the City of Malibu at the regular meeting held on the 18th day of February 2020 by the following vote:

AYES:
NOES:

The project review package is INCOMPLETE and; CANNOT proceed through Final Planning Review until corrections and conditions from Biological Review are incorporated into the proposed project design (See Attached).

The project is APPROVED, consistent with City Goals & Policies associated with the protection of biological resources and CAN proceed through the Planning process.

The project may have the potential to significantly impact the following resources, either individually or cumulatively: Sensitive Species or Habitat, Watersheds, and/or Shoreline Resources and therefore Requires Review by the Environmental Review Board (ERB).

Recycled Paper
CONDITIONS FOR COMPLETE APPLICATIONS:

1. The project is recommended for **APPROVAL** with the following conditions:

   A. No new landscaping is proposed with this project. Therefore, none is approved. Should the applicant intend to plant any new vegetation with a potential to exceed six (6) feet in height, or change 2,500 sq.ft. or more of the existing landscaping, a detailed landscape plan shall be submitted for review and approval prior to any planting.

   B. Grading/excavation/vegetation removal scheduled between February 1 and September 15 will require nesting bird surveys by a qualified biologist prior to initiation of such activities. Surveys shall be completed no more than 5 days from proposed initiation of site preparation activities. Should active nests be identified, a buffer area no less than 150 feet (300 feet for raptors) shall be fenced off until it is determined by a qualified biologist that the nest is no longer active. A report discussing the results of the surveys shall be turned in to the City within 2 business days of completion of surveys.

   C. Construction fencing shall be placed at the top of the rock revetment. Construction fencing shall be installed prior to the beginning of any construction and shall be maintained throughout the construction period to protect the beach.

   D. No equipment or materials shall be staged or stored on the beach at any time.

   H. Night lighting from exterior and interior sources shall be minimized. All exterior lighting shall be low intensity and shielded so it is directed downward and inward so that there is no offsite glare or lighting of natural habitat areas.

   I. Lighting of the shore is prohibited.

---

If you have any questions regarding the above requirements, please contact the City Biologist office at your earliest convenience.

PROJECT DESCRIPTION: Second story addition, remodel, green house and yoga deck

TO: Malibu Planning Division and/or Applicant

FROM: Coastal Engineering Reviewer

☑ The project is feasible and CAN proceed through the Planning process.

☐ The project CANNOT proceed through the planning process until coastal engineering feasibility is determined. Depending upon the nature of the project, this may require submittal of coastal engineering reports and/or wave run-up studies which evaluate the coastal environment setting, processes, and hazards.

SIGNATURE: ___________________________________ DATE: 7/20/2018

Determination of Coastal Engineering feasibility is not approval of building and/or grading plans. Plans and/or reports must be submitted for Building Department approval, and may require approval of both the City Geotechnical Engineer, and City Coastal Engineer. Additional requirements/conditions may be imposed at the time of building and/or grading plans are submitted for review. Geotechnical reports may also be required.

City Coastal Engineering Staff may be contacted on Tuesday and Thursday between 8:00 am and 11:00 am at the City Hall Public counter, or by calling (310) 456-2489, extension 269.

Remarks:
The referenced plans and reports were reviewed by the City from a coastal engineering perspective relative to the requirements of the following City codes and guidelines:

- City of Malibu Local Coastal Program – Land Use Plan and Local Implementation Plan (LCP-LUP and LCP-LIP)
- Malibu Municipal Code – Title 15, Buildings and Construction, and
- California Coastal Commission Sea Level Rise Policy Guidance – Adopted August 12, 2015
The proposed project will consist of the addition and remodel to an existing SFR and any required changes to the existing OWTS. The property includes a detached garage and guest house. An existing rock revetment has been constructed for the protection of the existing OWTS. The main house finished floor is at +19.27 ft NAVD88. The garage and guest house finished floor is at +19.46 ft NAVD88. The Coastal Engineering Consultant has determined, for a 4-ft, 18-second period wave on an unprotected beach without a seawall and sea level rise of 2 feet, a breaking wave crest at Elevation +16.23 ft NAVD88 and a wave uprush limit at Elevation +12.00 ft NAVD88 at approximately 137.7 ft seaward from the service road right-of-way line. Based on recent flood hazard mapping, the site is within the Preliminary FEMA Zone A (FEMA, 2016).

Planning Stage Conditions of Approval:

The following items shall be made planning conditions of approval and shall be addressed during the building plan check review stage. Completed/notarized documents shall be submitted to the Coastal Engineering Reviewer for review and signature.

1. The property owner shall comply with the requirements for recorded document and deed restriction outlined in Section 10.6A of the City of Malibu LCP/LIP. This shall be made a condition of approval and shall be completed during the building plan check stage of review.

2. The Project Coastal Engineer shall submit a Shore Protection Device (SPD) Monitoring Program for the existing rock revetment that is consistent with the City’s requirements. The property owner will be required to record a “Covenant and Agreement Regarding Maintenance of the Shoreline Protection Device and the Use and Transfer of Ownership of Property”, informing any successors-in-interest to the property of these SPD monitoring requirements for the onsite rock revetment. The Shore Protection Monitoring Program shall be attached to the covenant as Exhibit B.

Templates for the deed restriction and covenant are available from City staff.

Building Plan Check Stage Review Comments:

Upon submittal to Building Plan Check, please include the following standard items:

1. The Project Coastal Engineer’s recommendations, contained in the coastal engineering report and addendums, shall be incorporated into the plans as notes and details, and referenced on the project structural plans. One set of plans shall be submitted to the coastal engineering review staff for Building Plan Check. Additional review comments may be raised at that time that may require a response. The Project Coastal Engineer shall review, sign and wet-stamp the final building plans.

2. The final project plans shall show the land and beach contours, and that include: design beach profile, storm scour profile, design stillwater levels, wave uprush limits for the maximum breaking waves showing the landward extent of the uprush limit, the Mean High Tide line with month and year on plans based on available historical surveys, and the location and elevations of existing shore protection.

3. Supplemental recommendations provided by the Coastal Engineer shall be reviewed by the City Coastal Engineering Staff and by the project geotechnical consultants and NOWTS consultant.

4. The final approved architectural, structural and NOWTS plans and above items should be submitted to the Coastal Engineering Reviewers in Building Plan Check, along with a Building Plan Check review fee of $732.
Limitations:

This coastal engineering peer review has been performed to provide technical assistance to the City of Malibu with its discretionary permit decisions, and is limited to review of the documents identified herein in accordance with the guidelines of the City of Malibu and local standard of practice in respect to coastal developments. The opinions, conclusions and recommendations provided by the applicant's Coastal Engineering Consultant do not necessarily represent the opinions of the peer reviewer or the City of Malibu.

REVIEW FINDINGS

Planning Stage: □ CONFORMANCE REVIEW COMPLETE for the City of Malibu Local Coastal Program/Local Implementation Plan (LIP) and Malibu Plumbing Code (MPC). The listed conditions of Planning stage conformance review and plan check review comments shall be addressed prior to plan check approval.

☑ CONFORMANCE REVIEW INCOMPLETE for the City of Malibu LIP and MPC.
The listed Planning stage review comments shall be addressed prior to conformance review completion.

OWTS Plot Plan: □ NOT REQUIRED
☑ REQUIRED (attached hereto) □ REQUIRED (not attached)

Environmental Health conformance review has been completed for the development proposal described in the project description provided by the Planning Department and the project plans and reports submitted to this office. Please distribute this review sheet to all of the project consultants and, prior to final approval, provide a coordinated submittal addressing all conditions for final approval and plan check items.

The conditional conformance findings hereby transmitted complete the Planning stage Environmental Health review of the project. In order to obtain Environmental Health final approval of the OWTS Plot Plan and project construction drawings (during Building Safety plan check), all conditions and plan check items listed below must be addressed through submittals to the Environmental Health office.
Conditions of Planning Conformance Review for Building Plan Check Approval

1) Building Plans: All final project plans shall be submitted for Environmental Health review and approval. These plans must be approved by the Building Safety Division prior to receiving Environmental Health final approval.

   The final floor plans must show no more than 3 bedrooms and 35 plumbing fixture units.

2) Environmental Health Final Review Fee: A fee in accordance with the adopted fee schedule at the time of final approval shall be paid to the City of Malibu for Environmental Health Building Plan Check review.

-000-

If you have any questions regarding the above requirements, please contact the Environmental Health office at your earliest convenience.

cc: Environmental Health file
    Planning Department
NOTES:

1. This conformance review is for an addition, yoga deck, guest house (2 fixture units), and a 3 bedroom (38 fixture units) remodel to an existing single family dwelling Main House. No renovation to the existing onsite wastewater treatment system is required.

2. This review relates only to the minimum requirements of the MPC, and the LCP, and does not include an evaluation of any geological or other potential problems, which may require an alternative method of review treatment.

3. This review is valid for one year, or until MPC, and/or LCP, and/or Administrative Policy changes render it noncomplying.

PROJECT DESCRIPTION: 2nd story addition, remodel, green house and yoga deck

Compliance with the conditions checked below is required prior to Fire Department approval:

The project DOES require Fire Department Plan Review and Developer Fee payment  
The project DOES NOT require Fire Department Plan Review  
The required fire flow for this project is 250 gallons per minute at 20 pounds per square inch for a 2 hour duration. (Provide flow information from the water dept.)  
The project is required to have an interior automatic fire sprinkler system.  
Final Fuel Modification Plan Approval is required prior to Fire Department Approval

Conditions below marked “not approved” shall be corrected on the site plan and resubmitted for Fire Department approval.

Required Fire Department vehicular access (including width and grade %) as shown from the public street to the proposed project.  
Required and/or proposed Fire Department Vehicular Turnaround  
Required 5 foot wide Fire Department Walking Access (including grade %)  
Width of proposed driveway access roadway gates

*County of Los Angeles Fire Department Approval Expires with City Planning permits expiration, revisions to the County of Los Angeles Fire Code or revisions to Fire Department regulations and standards.

**Minor changes may be approved by Fire Prevention Engineering, provided such changes achieve substantially the same results and the project maintains compliance with the County of Los Angeles Fire Code valid at the time revised plans are submitted. Applicable review fees shall be required.

SIGNATURE  
DATE: June 14, 2018

Additional requirements/conditions may be imposed upon review of complete architectural plans.

## GEOTECHNICAL REVIEW SHEET

**Date:** October 24, 2017  
**Review Log #:** 4031

### Project Information

- **Site Address:** 33608 Pacific Coast Highway  
- **Lot/Tract/PM #:**  
- **Planning #:** CDP 17-071  
- **Consultant(s)/Report Date(s):**  
- **Building Plan-Check Stage Review:**  
- **Previous Reviews:** 9-7-17, 7-17-17, Environmental Health Review Sheet dated July 5, 2017

### Review Findings

**Coastal Development Permit Review**

- The residential development project is **APPROVED** from a geotechnical perspective.
- The residential development project is **NOT APPROVED** from a geotechnical perspective. The listed ‘Review Comments’ shall be addressed prior to approval.

**Building Plan-Check Stage Review**

- **Awaiting Building plan check submittal.** Please respond to the listed ‘Building Plan-Check Stage Review Comments’ AND review and incorporate the attached ‘Geotechnical Notes for Building Plan Check’ into the plans.
- **APPROVED** from a geotechnical perspective. Please review the attached ‘Geotechnical Notes for Building Plan Check’ and incorporate into Building Plan-Check submittals.
- **NOT APPROVED** from a geotechnical perspective. The listed ‘Building Plan-Check Stage Review Comments’ shall be addressed prior to Building Plan-Check Stage approval.

**Remarks**

The referenced addendum geotechnical report was reviewed by the City from a geotechnical perspective. The project comprises remodeling the existing 2,898 square foot two-story single-family residence and adding 367 square feet to the second-story and a new covered porch. The existing two-story garage/guest house will remain with no modifications. A new 120 square-foot greenhouse is proposed along with a new 227 square foot yoga deck. Grading is proposed, consisting of the removal of the landslide debris on the ascending slope, based on the recommendations by the Project Geotechnical Consultant.
Building Plan-Check Stage Review Comments:

1. Please submit a fee of $957.00 to City geotechnical staff for building plan check review.

2. Please provide a set of grading plans for review.

3. The proposed building plans should be revised to comply with the code requirements for minimum building setbacks from the adjacent ascending slope. Accordingly, the geotechnical cross-sections should be revised and updated to reflect these changes.

4. The site coordinates used to estimate seismic parameters appear to be for a different site and significantly differ from the site coordinates. Please review and revise, as necessary.

   **Note 1:** The response to this comment is considered incomplete for the following reason: The consultant corrected the coordinates, but did not revise the seismic parameters for the right coordinates. The consultant should provide the seismic code parameters for the site.

   **Note 2:** The consultant revised the coordinates, but didn’t revise the seismic parameters as previously requested.

5. The Consultant should evaluate the lateral deformation and rotation of the proposed piles when foundations loads and plans become available. Verification of this evaluation may be the Consultant’s approval and stamp on the final plans.

6. Please provide reduced setback letters from the OWTS, geotechnical and structural consultants for any reduced setbacks between the OWTS components and new foundations, as applicable.

7. Section 7.4 of the City’s geotechnical guidelines requires a minimum thickness of 10 mils for vapor barriers beneath slabs-on-grade. Building plans shall reflect this requirement.

8. Please include the following note on the plans: "The Project Geotechnical Consultant shall prepare an as-built report documenting the installation of the pile foundation elements for review by City Geotechnical staff. The report shall include total depths of the piles, minimum depth into the recommended bearing material, actual depth into the recommended bearing material, and a map depicting the locations of the piles."

9. Two sets of final grading, green house, yoga deck, and remodel and addition plans (APPROVED BY BUILDING AND SAFETY) incorporating the Project Geotechnical Consultant’s recommendations and items in this review sheet must be reviewed and wet stamped and manually signed by the Project Engineering Geologist and Project Geotechnical Engineer. City geotechnical staff will review the plans for conformance with the Project Geotechnical Consultants’ recommendations and items in this review sheet over the counter at City Hall. Apointments for final review and approval of the plans may be made by calling or emailing City Geotechnical staff.
City of Malibu

Geotechnical Review Sheet

Please direct questions regarding this review sheet to City Geotechnical staff listed below.

Geotechnical Engineering Review by: Ali Abdel-Haq, G.E. #2308, Exp. 12-31-17
Geotechnical Engineering Reviewer (805-496-1222)
Email: ali@geodynamics-inc.com

Engineering Geology Review by: Christopher Dean, C.E.G. #1751, Exp. 9-30-18
Engineering Geology Reviewer (310-456-2489, x306)
Email: cdean@mailcity.org

This review sheet was prepared by City Geotechnical Staff, including representatives of Cotton, Shires and Associates, Inc. and GeoDynamics, Inc., contracted through Cotton, Shires and Associates, Inc., as an agent of the City of Malibu.
The following standard items should be incorporated into Building Plan-Check submittals, as appropriate:

1. One set of grading, green house, yoga deck, and remodel and addition to the residence plans, incorporating the Project Geotechnical Consultant’s recommendations and items in this review sheet, must be submitted to City geotechnical staff for review. Additional review comments may be raised at that time that may require a response.

2. Show the name, address, and phone number of the Project Geotechnical Consultant(s) on the cover sheet of the Building Plans.

3. Include the following note on Grading and Foundation Plans: "Subgrade soils shall be tested for Expansion Index prior to pouring footings or slabs; Foundation Plans shall be reviewed and revised by the Project Geotechnical Consultant, as appropriate."

4. Include the following note on the Foundation Plans: "All foundation excavations must be observed and approved by the Project Geotechnical Consultant prior to placement of reinforcing steel."

5. The Foundation Plans for the proposed project shall clearly depict the embedment material and minimum depth of embedment for the foundations in accordance with the Project Geotechnical Consultant’s recommendations.

6. Show the onsite wastewater treatment system on the Site Plan.

7. Please contact the Building and Safety Department regarding the submittal requirements for a grading and drainage plan review.

8. A comprehensive Site Drainage Plan, incorporating the Project Geotechnical Consultant’s recommendations, shall be included in the Plans. Show all area drains, outlets, and non-erosive drainage devices on the Plans. Water shall not be allowed to flow uncontrolled over descending slopes.

**Grading Plans (as Applicable)**

1. Grading Plans shall clearly depict the limits and depths of overexcavation, as applicable.

2. Prior to final approval of the project, an as-built compaction report prepared by the Project Geotechnical Consultant must be submitted to the City for review. The report must include the results of all density tests as well as a map depicting the limits of fill, locations of all density tests, locations and elevations of all removal bottoms, locations and elevations of all keyways and back drains, and locations and elevations of all retaining wall backdrains and outlets. Geologic conditions exposed during grading must be depicted on an as-built geologic map. This comment must be included as a note on the grading plans.

**Retaining Walls (As Applicable)**

1. Show retaining wall backdrain and backfill design, as recommended by the Geotechnical Consultant, on the Plans.

2. Retaining walls separate from a residence require separate permits. Contact the Building and Safety Department for permit information. One set of retaining wall plans shall be submitted to the City for review by City geotechnical staff. Additional concerns may be raised at that time which may require a response by the Project Geotechnical Consultant and applicant.

City of Malibu
MEMORANDUM

To: Planning Department
From: Public Works Department
Nicole Benyamin, Assist. Civil Engineer
Date: July 14, 2017
Re: Proposed Conditions of Approval for 33608 Pacific Coast Highway CDP 17-071

The Public Works Department has reviewed the plans submitted for the above referenced project. Based on this review sufficient information has been submitted to confirm that conformance with the Malibu Local Coastal Plan (LCP) and the Malibu Municipal Code (MMC) can be attained. Prior to the issuance of building and grading permits, the applicant shall comply with the following conditions.

GRADING AND DRAINAGE

1. Exported soil from a site shall be taken to the County Landfill or to a site with an active grading permit and the ability to accept the material in compliance with the City's Local Implementation Plan (LIP), Section 8.3. The applicant shall place a note on the plans that addresses this condition.

STORMWATER

2. A Local Storm Water Pollution Prevention Plan shall be provided prior to the issuance of the Grading/Building permits for the project. This plan shall include an Erosion and Sediment Control Plan (ESCP) that includes, but not limited to:

<table>
<thead>
<tr>
<th>Erosion Controls</th>
<th>Scheduling</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Preservation of Existing Vegetation</td>
</tr>
<tr>
<td>Sediment Controls</td>
<td>Silt Fence</td>
</tr>
<tr>
<td></td>
<td>Sand Bag Barrier</td>
</tr>
<tr>
<td></td>
<td>Stabilized Construction Entrance</td>
</tr>
<tr>
<td>Non-Storm Water Management</td>
<td>Water Conservation Practices</td>
</tr>
<tr>
<td>Waste Management</td>
<td>Dewatering Operations</td>
</tr>
<tr>
<td></td>
<td>Material Delivery and Storage</td>
</tr>
</tbody>
</table>
All Best Management Practices (BMP) shall be in accordance to the latest version of the California Stormwater Quality Association (CASQA) BMP Handbook. Designated areas for the storage of construction materials, solid waste management, and portable toilets must not disrupt drainage patterns or subject the material to erosion by site runoff.

MISCELLANEOUS

3. The Developers Consulting Engineer shall sign the final plans prior to the issuance of permits.

NOTICE OF PUBLIC HEARING

The Malibu Planning Commission will hold a public hearing on Monday, February 3, 2020, at 6:30 p.m. in the Council Chambers, Malibu City Hall, 23825 Stuart Ranch Road, Malibu, CA, for the project identified below.

COASTAL DEVELOPMENT PERMIT NO. 17-071 AND SITE PLAN REVIEW NO. 17-036 - An application for an interior and exterior remodel of and 1,159 square feet of additions to an existing 2,547 square foot, two-story, single-family residence, new covered porches/decks deeper than six feet, and a new roof deck, including demolition of 15 percent of exterior walls and including a site plan review for construction up to 24 feet in height for flat roofs

LOCATION / APN / ZONING:
33606 Pacific Coast Hwy / 4473-021-010 / Rural Residential-Two Acre (RR-2)

APPLICANT /OWNER(S):
Burdge and Associates Architects, Inc. / Michael Frice

ENVIRONMENTAL REVIEW:
Categorical Exemption CEQA Guidelines Sections 15301(a) and 15301(e)

APPLICATION FILED:
June 21, 2017

CASE PLANNER:
Jessica Cleavenger, Associate Planner, jcleavenger@malibucity.org (310) 456-2489, ext. 234

A written staff report will be available at or before the hearing for the project, typically 10 days before the hearing in the Agenda Center: http://www.malibucity.org/agendacenter. Related documents are available for review at City Hall during regular business hours. You will have an opportunity to testify at the public hearing: written comments which shall be considered public record, may be submitted any time prior to the beginning of the public hearing. If the City’s action is challenged in court, testimony may be limited to issues raised before or at the public hearing.

LOCAL APPEAL - A decision of the Planning Commission may be appealed to the City Council by an aggrieved person by written statement setting forth the grounds for appeal. An appeal shall be filed with the City Clerk within ten days following the date of action which the appeal is made and shall be accompanied by an appeal form and filing fee, as specified by the City Council. Appeal forms may be found online at www.malibucity.org/planning/forms or in person at City Hall, or by calling (310) 456-2489, extension 245.

COASTAL COMMISSION APPEAL - An aggrieved person may appeal the Planning Commission’s approval directly to the Coastal Commission within 10 working days of the issuance of the City’s Notice of Final Action. More information may be found online at www.coastal.ca.gov or by calling 805-585-1800.

BONNIE BLUE, Planning Director
