Date prepared: January 22, 2026 Meeting date: February 2, 2026

Subject: Coastal Development Permit No. 21-045 – An application to construct a new 594 square-foot Accessory Dwelling Unit/Second Unit on a proposed second building pad in the Malibu Country Estates Overlay (Continued from December 1, 2025)

Location: 24507 Vantage Point Terrace, partially within the appealable coastal zone

APN: 4458-033-006

Owner: Meissner Family Trust

RECOMMENDED ACTION: Adopt Planning Commission Resolution No. 26-02 (Exhibit A) determining that the California Environmental Quality Act does not apply to projects that a public agency rejects or disapproves, and denying Coastal Development Permit (CDP) No. 21-045 for a new detached 594 square-foot Accessory Dwelling Unit/Second Unit (ADU/Second Unit) on a proposed second building pad in the Malibu Country Estates (MCE) Overlay District and Single Family Medium (SFM) zoning district at 24507 Vantage Point Terrace (Meissner Family Trust).

DISCUSSION: This item was continued from the December 1, 2025 Regular Planning Commission meeting at the request of the applicant. The Resolution number, recitals and meeting date were updated to reflect the continuance to February 2, 2026 (Exhibit A). The agenda report and supplemental report for the December 1, 2026 meeting are provided in Exhibit B. The correspondence received for the December 1, 2026 meeting and prior to publication of this agenda report is provided in Exhibit C. There have been no changes made to the recommended action, Local Coastal Program Analysis or Local Implementation Plan findings.

CITY OF MALIBU PLANNING COMMISSION
RESOLUTION NO. 26-02

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MALIBU DETERMINING THE CALIFORNIA ENVIRONMENTAL QUALITY ACT DOES NOT APPLY TO PROJECTS THAT A PUBLIC AGENCY REJECTS OR DISAPPROVES, AND DENYING COASTAL DEVELOPMENT PERMIT NO. 21-045 TO CONSTRUCT A NEW 594 SQUARE-FOOT ACCESSORY DWELLING UNIT/SECOND UNIT ON A PROPOSED SECOND BUILDING PAD IN THE MALIBU COUNTRY ESTATES OVERLAY DISTRICT LOCATED AT 24507 VANTAGE POINT TERRACE (MEISSNER FAMILY TRUST)

THE PLANNING COMMISSION OF THE CITY OF MALIBU DOES HEREBY FIND, ORDER AND RESOLVE AS FOLLOWS:

SECTION 1. Recitals.

A. On September 23, 2021, the subject application was submitted to the City of Malibu Planning Division by Keystone Strategic Planning, on behalf of property owner, the Meissner Family Trust. The application was routed to the City Biologist, City Public Works Department, City geotechnical consultant reviewers, Los Angeles County Waterworks District No. 29 (WD29), and Los Angeles County Fire Department (LACFD) for review. The proposed development is located in the Malibu Country Estates (MCE) Overlay District, included within the City's certified Local Coastal Program (LCP) Local Implementation Plan (LIP) as LIP Section 3.4.1(D).

B. On August 26, 2024, the applicant notified the Planning Division that it will not be requesting relief from various objective development standards in the LIP through variances and requested the Planning Division continue to process the application for development on a proposed second building pad within the MCE Overlay District.

C. On October 9, 2025, the applicant requested the subject application be agendized for the Planning Commission. On October 10, 2025, the Planning Division scheduled the application for the next available Planning Commission meeting. To date, the Planning Division has been unable to deem the project application complete based on the information submitted by the applicant.

D. On November 13, 2025, the Planning Division issued a Notice of Hearing Requirements letter to the California Coastal Commission (CCC) and the project applicant stating that the project would be heard at a public hearing before the Planning Commission and was not appealable to the CCC.

E. On October 30, 2025, the applicant posted a Notice of Application sign at the subject site.

F. On November 20, 2025, a Notice of Planning Commission Public Hearing was published in a newspaper of general circulation within the City of Malibu and was mailed to all property owners and occupants within a 500-foot radius of the project site and to all interested parties.

G. On December 1, 2025, the Planning Commission continued the item to the February 2, 2026 Regular Planning Commission meeting prior to opening the public hearing.

EXHIBIT A

H. On February 2, 2026, the Planning Commission held a duly noticed public hearing on the subject application, reviewed and considered the staff report, reviewed and considered written reports, public testimony, and other information in the record.

SECTION 2. Environmental Review.

Pursuant to the authority and criteria contained in California Environmental Quality Act (CEQA), the Planning Commission has analyzed the proposed project and finds that, pursuant to CEQA Guidelines Section 15270, CEQA does not apply to projects that a public agency rejects or disapproves.

SECTION 3. Coastal Development Permit Findings.

Based on evidence contained within the record, including the agenda report for the project and the hearing on February 2, 2026, and pursuant to the LIP including Sections 13.7(B) and 13.9, the Planning Commission adopts the findings of fact, and denies CDP No. 21-045 for a 594 square-foot Accessory Dwelling Unit/Second Unit (ADU/Second Unit) proposed on a second building pad on property located in the MCE Overlay District and Single Family Medium (SFM) zoning district at 24507 Vantage Point Terrace (Meissner Family Trust).

The project has been determined to be inconsistent with all applicable LCP codes, standards, goals, and policies. The required findings of denial are made herein.

A. General Coastal Development Permit (LIP Chapter 13)

This finding cannot be made because the proposed location of the ADU/Second Unit is not consistent with the MCE Overlay standards in LIP Section 3.4.1.(D) or residential development standards in LIP Section 3.6(N)(1) and, therefore, does not meet the requirements for LIP Chapter 3 (Zoning). Furthermore, the proposed location does not comply with LIP Chapter 8 (Grading) and compliance with LIP Chapter 11 (Archaeological/Cultural Resources) cannot be determined based on the information submitted.

1. The proposed project fails to meet various requirements outlined in LIP Chapter 3 including: LIP §3.4.1(D)(2)(c) which requires rear yard setback to be at least 15 feet (4 feet proposed); LIP §3.4.1(D)(4)(a) which stipulates that “no walls...in excess of 6 feet shall be allowed within the required rear...yard setback areas” (wall heights associated with the proposed structure extend above 6 feet in the rear yard setback); LIP §3.4.1(D)(5) which limits structure height to additions/remodels of an existing structure, a new structure on a vacant parcel, or where an existing structure is replaced (no modifications to the existing structure are proposed, the site is not vacant, and the proposed structure is not associated with the replacement of the existing residence); LIP §3.4.1(D)(6), which stipulates that the site of construction for all development is limited to one single building pad and that no structures shall be sited downhill from the existing building pad (the project proposes a second building pad and has located the proposed second building pad downhill of the existing building pad); LIP §3.4.1(D)(7) which strictly limits impermeable surfaces on the existing building pad (the proposed structure is located on a proposed second building pad); LIP §3.4.1(D)(8) which states grading shall only be permitted for the construction of swimming pools and spas and that no grading occur for purposes of extending the existing building pad (proposed grading associated for a use other than a

swimming pool or spa and proposed for an additional building pad); LIP §3.4.1(D)(10)(b) which limits roof materials to clay tile, concrete tile or similar material (proposed roof materials include Class “A” fire-rated architectural shingles); and LIP §3.6(N)(c)(i) that requires a second residential unit be located within the required development area for the project site and clustered with the primary dwelling unit (the proposed second unit is located downhill from the existing residence, is not within the required development area as stipulated in the MCE Overlay standards, and is not clustered with the existing residence).

The proposed development is inconsistent with LIP Chapter 8 (Grading). The MCE Overlay standards provide more strict regulations for grading of property within the MCE Overlay District (LIP Section 3.4.1(D)(8)) by prohibiting grading on existing building pads except for export of 500 cubic yards associated with the construction of a swimming pool and spa, with additional provisions for cut and fill grading and remedial grading subject to the approval of a Site Plan Review. Based on the applicant’s submitted materials, the proposed second building pad proposes remedial and re-compaction grading for the upper 3 feet of previously compacted fill to be removed and recompacted to a minimum of 3 feet beyond the proposed footprint. The proposed grading is for a use other than a swimming pool or spa and, therefore, does not comply with LIP Section 3.4.1(D)(8) or LIP Chapter 8 pursuant to the provision in LIP Section 8.2. Additionally, the LIP Section 8.3(G) defines remedial grading as “grading necessary to mitigate an environmental hazard as recommended by a geotechnical report approved by the City Geotechnical staff. No such remedial grading will be allowed when it could be avoided by changing the position or location of the proposed development.” Remedial grading appears to be avoidable by changing the location of the proposed development to an area within the existing building pad.

Based on the information submitted by the applicant, the Planning Division is unable to determine if the proposed project complies with LIP Chapter 11 (Archaeological/Cultural Resources). Although the project site has been evaluated for potential impacts to archeological resources and it has been determined that due to the previous grading activities to create the existing building pad and MCE community, the project has very low probability of disturbing archeological resources for construction proposed on the existing building pad. It is not clear if the proposed second building pad would have potential impacts given that it is proposed downhill from the existing building pad in an undeveloped area and has not been evaluated for potential impacts during construction. The applicant has not provided information demonstrating that the proposed second building pad has been evaluated for impacts to archeological resources.

In the event there is a conflict between a provision of the LCP and a provision of the General Plan or of any other City-adopted plan, resolution, or ordinance not included in the LCP, and it is not possible for the development to comply with both the LCP and the other provision, pursuant to LIP Section 1.3.1, the LCP governs. Consequently, the development may not be approved unless it complies with the LCP provision.

For the reasons provided herein, the proposed ADU/Second Unit does not conform to the current LIP’s objective development requirements and the applicant has not requested relief pursuant to the provisions in LIP Section 13.26 (Variances). Therefore, the Planning Division cannot make the required finding per LIP Section 13.9 in support of the requested CDP.

2. The subject parcel is not located between the first public road and the sea. The project site is located inland and not located along the shoreline. Therefore, this finding does not apply.

3. As discussed in Finding 1, the applicant stated that the proposed location on a proposed second building pad downhill of the existing building pad is the only suitable location due to the site's sewer and water line easements and steep slopes. However, the applicant did not provide an alternate location or adequately justify why the ADU/Second Unit could not be developed within the existing building pad in compliance with the MCE Overlay standards. Furthermore, the applicant did not demonstrate that an alternate location within the residence as part of a conversion or adjacent to the residence on a flat portion of the existing building pad was infeasible. Additionally, the applicant did not provide information indicating that the proposed second building pad has been evaluated for potential impacts to archaeological/cultural resources.

As part of the Planning Division's review of the subject application, alternate locations for development appeared feasible and would maintain consistency with the MCE Overlay standards, as well as consistency with LIP Chapters 3, 8 and 11. The alternate locations do not appear to necessitate the extent of proposed grading to accommodate the second building pad or result in the need for relief from the MCE Overlay standards. As proposed, the second building pad location is not considered to be the least environmentally damaging alternative.

4. The LCP Environmentally Sensitive Habitat Area (ESHA) and Marine Resources Map does not identify any ESHA on the subject property or on any adjacent properties. The subject property is not in a designated ESHA or ESHA buffer and, therefore, Environmental Review Board review was not required. This finding does not apply.

B. Native Tree Protection (LIP Chapter 5)

There are three unidentified trees adjacent to the proposed second building pad. Based on the information provided by the applicant, it is unclear if the trees are native or not native. Therefore, the findings for LIP Chapter 5 conformance cannot be determined based on the information provided by the applicant.

C. Scenic, Visual and Hillside Resource Protection (LIP Chapter 6)

The MCE Overlay District was established approximately 50 years ago at which time each parcel was graded and designated one building pad to create terraced views of the surrounding mountains and/or the Pacific Ocean. The elevation of each building pad has been documented with specified height and grading controls for development, and applicants are not permitted to alter the elevation of each building pad. Because the standards of the MCE Overlay District are intended to maximize the protection of scenically impressive views from public viewing areas, including scenic roads, strict adherence to the MCE Overlay standards specified in LIP Section 3.4.1(D) ensures compliance with the relevant standards of LIP Chapter 6. As previously described in CDP Findings 1 and 3 above, the proposed second building pad and proposed structure do not comply with several MCE Overlay

standards. Therefore, the findings for LIP Chapter 6 conformance cannot be determined under the current proposal.

SECTION 4. Planning Commission Action.

Based on the foregoing findings and evidence contained within the record, the Planning Commission hereby denies CDP No. 21-045.

SECTION 5. The Planning Commission shall certify the adoption of this resolution.

PASSED, APPROVED AND ADOPTED this 2nd day of February 2026.

ELIZABETH RIDDICK, Planning Commission Chair

ATTEST:

REBECCA EVANS, Recording Secretary

LOCAL APPEAL - Pursuant to LIP Section 13.20.1 (Local Appeals) a decision made by the Planning Commission may be appealed to the City Council by an aggrieved person by written statement setting forth the grounds for appeal. An appeal shall be filed with the City Clerk within 10 days and shall be accompanied by an appeal form and filing fee, as specified by the City Council. Appeal forms may be found online at www.malibucity.org, in person at City Hall, or by calling (310) 456-2489, ext. 246.

Any action challenging the final decision of the City made as a result of the public hearing on this application must be filed within the time limits set forth in Section 1.12.010 of the MMC and Code of Civil Procedure. Any person wishing to challenge the above action in Superior Court may be limited to raising only those issues they or someone else raised at the public hearing, or in written correspondence delivered to the City of Malibu at or prior to the public hearing.

I CERTIFY THAT THE FOREGOING RESOLUTION NO. 26-02 was passed and adopted by the Planning Commission of the City of Malibu at the regular meeting thereof held on the 2nd day of February 2026 by the following vote:

AYES:

NOES:

Date prepared: November 20, 2025 Meeting date: December 1, 2025

Subject: Coastal Development Permit No. 21-045 – An application to construct a new 594 square-foot Accessory Dwelling Unit/Second Unit on a proposed second building pad in the Malibu Country Estates Overlay District

Location: 24507 Vantage Point Terrace, partially within the appealable coastal zone

APN: 4458-033-006

Owner: Meissner Family Trust

RECOMMENDED ACTION: Adopt Planning Commission Resolution No. 25-86 (Attachment 1) determining that the California Environmental Quality Act does not apply to projects that a public agency rejects or disapproves, and denying Coastal Development Permit (CDP) No. 21-045 for a new detached 594 square-foot Accessory Dwelling Unit/Second Unit (ADU/Second Unit) on a proposed second building pad in the Malibu Country Estates (MCE) Overlay District and Single Family Medium (SFM) zoning district at 24507 Vantage Point Terrace (Meissner Family Trust).

DISCUSSION: This agenda report provides a project overview with a description of the project background, site and scope, a summary of surrounding land uses and project setting, and an analysis of the project's inconsistency with applicable provisions of the certified Local Coastal Program (LCP). The analysis and findings contained herein demonstrate the project is not consistent with the LCP.

Background and Project Overview

The subject property is a rectangular-shaped lot located on the inland side of Pacific Coast Highway (PCH) adjacent to John Tyler Drive. Pursuant to the City's Post-LCP Certification Permit and Appeal Jurisdiction Map, the downhill portion of the subject property is located within the Appeal Jurisdiction of the California Coastal Commission (CCC). However, pursuant to LIP 2.1 General Definitions for Appealable Coastal Development Permit the proposed project is not appealable to the California Coastal Commission (CCC). The subject property is situated within the MCE Overlay District which includes specific development standards (MCE Overlay standards) in LCP Local Implementation Plan (LIP) Section 3.4.1(D) applicable to all properties within the MCE Overlay District. The parcel is currently developed with a 3,572 square-foot single-family residence that was constructed in 1988 on one building pad located on the flatter portion of the site. The existing building pad is also occupied by a swimming pool, spa, and wooden deck located immediately to the rear of the existing residence. The rest of the site slopes downward to John Tyler Drive. The subject property is served by a centralized wastewater treatment system. With exception to a vacant parcel immediately north of the subject property, the project site is in a neighborhood that is similarly developed with one- and two-story single-family residences within the MCE Overlay District, with each parcel having one building pad developed in compliance with the MCE Overlay standards.

The original application proposed a 623 square-foot ADU/Second Unit with an 11-foot 8-inch height. On April 9, 2024, the applicant provided updated plans with a reduced size of 594 square-foot and an 11-foot 2-inch height for the proposed structure. In both versions, the applicant has sited the ADU/Second Unit on a proposed second building pad located downhill on the property near John Tyler Drive. The proposed development area is not located within the CCC's appealable jurisdiction. Despite having been informed by the Planning Division that the MCE Overlay standards limit all development to one building pad per parcel, the applicant has requested the Planning Division continue to process the project. The Planning Division has explained to the applicant that the proposed second building pad does not meet other MCE Overlay standards and staff requested additional details on the proposed structure which have not been provided. The applicant was informed that relief from the MCE Overlay standards would need to be requested with written findings justifying the request. The applicant has not requested variances for this project.

As discussed herein, the proposed project is not in compliance with the MCE Overlay standards and variance requests have not been submitted. Further, the applicant has not provided an alternative design demonstrating feasibility/infeasibility of whether the requested ADU/Second Unit could be sited on the existing building pad. On August 26, 2024, the applicant notified the Planning Division that it will not be requesting relief through variances and requested the City continue to process the application as an ADU/Second Unit on a proposed second building pad within the rear yard. The applicant stated that the proposed location is the only suitable location due to the site's sewer and water line

easements and steep slopes; however, the applicant has not provided an alternate design depicting existing constraints to development on the existing building pad or project feasibility/infeasibility at an alternate location. Therefore, absent this information and based on the Planning Division's review of the site and existing development, it appears the applicant has design options adjacent to the existing residence on side and/or front yards that could accommodate an ADU/Second Unit. This could be in the form of an attached structure to the residence and/or converted space associated with the residence or garage. An alternate design also appears feasible given that the existing building pad is sufficient in size to support other existing uses including a swimming pool, spa, and wooden deck.

The proposed second building pad is situated approximately 25 feet downhill from the existing building pad in an undeveloped area. As described in Table 3, the proposed project is inconsistent with several requirements in the MCE Overlay District including an approximate 73% reduction in the required rear yard setback (from 15 feet to 4 feet), impermeable coverage, structure height, grading, wall height in setbacks and roofs. The proposed second building pad is also inconsistent with LIP Chapter 8 (Grading as otherwise limited pursuant to LIP Section 8.2) and LIP Chapter 11 (Archaeological Resources).

As previously mentioned, the parcel is located within the MCE Overlay District which restricts development for all properties to one building pad per parcel and prohibits the creation of a secondary building pad pursuant to LIP Section 3.4.1(D)(6)(a), (b), and (c):

- a. All development, excluding walls and fences, shall be limited to the existing building pad.*
- b. There shall be no more than one building pad per lot.*
- c. No structure, excluding walls and fences, shall extend beyond, or be cantilevered over, any downhill slope extending from the existing building pad.*

LIP Section 3.4.1(D)(d) provides the following definition of a building pad in the MCE Overlay District:

- d. For the purposes of this Overlay District, a building pad shall be defined as a single, continuous, graded area, not exceeding 3 percent in slope, designed to accommodate development.*

As currently designed, the Planning Division is unable to recommend that the required findings per LIP 13.9 can be made in support of the requested CDP, including (A) that the project as described in the application and accompanying materials conforms with the certified LCP, and (C) the project is the least environmentally damaging alternative. The project is inconsistent with the MCE Overlay standards and variance requests have not been included. Additionally, alternate designs to development appear feasible on the existing building pad. On October 9, 2025, the applicant requested the subject application

be agendaized for the Planning Commission. On October 10, 2025, the Planning Division scheduled this item on the next available Planning Commission meeting, which was December 1, 2025.

Surrounding Land Uses and Project Setting

The subject property is located within the MCE Overlay District within a neighborhood served by a centralized wastewater treatment system. The existing 3,572 square-foot single-family residence was constructed in 1988, and the building pad is shared by a swimming pool, spa, and wood deck. Wooden steps are located on the north-eastern portion of the parcel at the top of the slope. The lower portion of the site where the proposed second building pad is requested is vacant and comprised of grass with three unidentified trees adjacent to the proposed second building pad and hedges along the property lines.

Table 1 below outlines the surrounding land uses:

Table 1 – Surrounding Land Uses				
Direction	APN	Size	Zoning	Land Use
North	4458-033-005	16,849 SF	SFM	Vacant
East	4458-030-042	1,234,912 SF	No Zone	John Tyler Drive / Pepperdine University
South	4458-033-031	42,495 SF	SFM	Single-Family Residential
West	4458-033-010	13,416 SF	SFM	Single-Family Residential

Source: Malibu CityGIS and LA County Tax Assessor

Table 2 provides a summary of the dimensions and area of the subject parcel.

Table 2 – Property Data	
Lot Depth	160 feet
Lot Width	95 feet
Gross Lot Area	16,862 square feet (0.38 acres)
Area of Easements	1,600 square feet
Area of 1:1 Slopes	628 square feet
Net Lot Area *	14,634 square feet (0.33 acres)

*Net Lot Area = Gross Lot Area minus the area of public or private access easements and 1:1 slopes.

In Figure 1, the existing building pad is located at the top of the slope accessed from Vantage Point Terrace. The existing building pad includes a residence, garage, driveway, front and side yards, walkways, swimming pool, spa, and wooden deck. A 14.83-foot by 40-foot ADU/Second Unit is shown on the rear portion of the parcel downhill from the existing building pad. The ADU/Second Unit is proposed with a 4-foot rear yard setback and a 6-foot 7-inch interior yard setback.

Source: Project Plans (2024)

LCP Analysis

The LCP consists of the Land Use Plan (LUP) and the LIP. The LUP contains programs and policies to implement the Coastal Act in Malibu. The LIP carries out the policies of the LUP and contains specific policies and regulations to which every project requiring a CDP must adhere. There are 14 LIP chapters that potentially apply depending on the nature and location of the proposed project. Of these, five are for conformance review only and contain no findings: 1) Zoning, 2) Grading, 3) Archaeological/Cultural Resources, 4) Water Quality, and 5) Onsite Wastewater Treatment Systems (OWTS). These chapters are discussed under the *LIP Conformance Analysis* section.

The nine remaining LIP chapters contain required findings: 1) CDP findings; 2) ESHA; 3) Native Tree Protection; 4) Scenic, Visual and Hillside Resource Protection; 5) Transfer of Development Credits; 6) Hazards; 7) Shoreline and Bluff Development; 8) Public Access; and 9) Land Division. For the reasons described in this report, including the project site, the scope of work and substantial evidence in the record, only the following chapters and associated findings are applicable to the project: CDP. These chapters are discussed in the *LIP Findings* section of this report.

LIP Conformance Analysis

The proposed project has been reviewed by the Planning Division, City Biologist, City Public Works Division, City geotechnical consultant reviewers, Los Angeles County Waterworks District No. 29 (WD29), and the Los Angeles County Fire Department (LACFD) (Attachment 3 – Department Review Sheets).

Zoning (LIP Chapter 3)

The proposed project is subject to non-beachfront residential development and design standards set forth under LIP Sections 3.4.1(D) (MCE Overlay District). Table 3 provides a project conformance summary with the relevant standards of the LIP. As summarized below, the proposed project does not comply with LIP Chapter 3.

Table 3 – LCP Zoning Conformance

Development Requirement	Allowed/ Required	Proposed	Comments
SITE OF CONSTRUCTION	All development limited to existing building pad; one building pad per lot; no structures downhill from existing building pad	Proposed development extended to proposed second building pad; proposed second building pad on lot; proposed structure located downhill from existing building pad	Does not comply with the LIP §3.4.1(D)(6)
REAR YARD SETBACK	15 ft.	4 ft.	Does not comply with LIP §3.4.1(D)(2)(c)
IMPERMEABLE COVERAGE	No maximum; all impermeable surfaces shall be on the existing building pad	Proposed structure on proposed second building pad	Does not comply with LIP §3.4.1(D)(7)
STRUCTURE HEIGHT	Limits structure height to additions/remodels of existing structure, vacant parcels or where an existing structure is replaced	No modifications to existing structure; proposed second structure not associated with existing structure	Does not comply with LIP §3.4.1(D)(5)(d)(i-ii)
GRADING	Grading for swimming pools and spas; no grading for purposes of extending the existing building pad	Proposed grading associated for use other than swimming pool or spa; proposed grading for second building pad	Does not comply with LIP §3.4.1(D)(8)

Table 3 – LCP Zoning Conformance

Development Requirement	Allowed/ Required	Proposed	Comments
WALL HEIGHT WITHIN SETBACK	No walls exceeding 6 ft in height within required rear yard	Proposed walls associated with the structure extend above 6 ft within required rear yard	Does not comply with LIP §3.4.1(D)(4)(a)
ROOFS	Roof materials limited to clay tile, concrete tile or similar	Proposed roof materials Class “A” fire-rated architectural shingles	Does not comply with LIP §3.4.1(D)(10)(b)

Grading (LIP Chapter 8)

Unless otherwise limited in the LIP pursuant to LIP Section 8.2, LIP Section 8.3 ensures that new development minimizes the visual resource impacts of grading and landform alteration by restricting the amount of non-exempt grading to a maximum of 1,000 cubic yards per lot of single-family development. The MCE Overlay standards provide more strict regulations for grading of property within the MCE Overlay District (LIP Section 3.4.1(D)(8)) by prohibiting grading on existing building pads except for export of 500 cubic yards associated with the construction of a swimming pool and spa, with additional provisions for cut and fill grading and remedial grading subject to the approval of a Site Plan Review. Based on the applicant’s submitted materials, the proposed second building pad proposes remedial and re-compaction grading for the upper 3 feet of previously compacted fill to be removed and recompact to a minimum of 3 feet beyond the proposed footprint. As noted in Table 3, the proposed grading is for a use other than a swimming pool or spa. The proposed project does not comply with LIP Section 3.4.1(D)(8) and, therefore, does not comply with LIP Chapter 8 pursuant to the provision in LIP Section 8.2. Additionally, the LIP Section 8.3(G) defines remedial grading as “grading necessary to mitigate an environmental hazard as recommended by a geotechnical report approved by the City Geotechnical staff. No such remedial grading will be allowed when it could be avoided by changing the position or location of the proposed development.” Remedial grading appears to be avoidable by changing the location of the proposed development to an area within the existing building pad.

Archaeological / Cultural Resources (LIP Chapter 11)

LIP Chapter 11 requires certain procedures to be followed to determine potential impacts on archeological resources. The project site has been evaluated for potential impacts to archeological resources per the adopted City of Malibu Cultural Resources Map and it has been determined that due to the previous grading activities to create the existing building

pad and MCE community, the project has very low probability of disturbing archaeological resources for construction proposed on the existing building pad. However, given the location of the proposed second building pad downhill from the existing building pad, the proposed project site has not been evaluated for potential impacts to important cultural resources that may be found in the course of construction. The applicant has not provided information that demonstrates the proposed second building pad has been evaluated for potential impacts to archaeological resources. The Planning Division is unable to determine if the proposed project complies with LIP Chapter 11.

Water Quality (LIP Chapter 17)

The City Public Works Department reviewed and approved the project for conformance to LIP Chapter 17 requirements for water quality protection. In the event the project were to comply with the relevant standards of the LCP for issuing CDPs, standard conditions of approval were provided to the Planning Division. These include the implementation of storm water management plans during construction activities and management of runoff from the proposed development.

LIP Findings

A. Coastal Development Permit (LIP Chapter 13)

LIP Section 13.9 requires that the following four findings be made for all CDPs.

Finding 1. That the project as described in the application and accompanying materials, as modified by any conditions of approval, conforms with certified City of Malibu Local Coastal Program.

This finding cannot be made because the proposed location of the ADU/Second Unit is not consistent with the MCE Overlay standards in LIP Section 3.4.1.(D) or residential development standards in LIP Section 3.6(N)(1) and, therefore, does not meet the requirements for LIP Chapter 3 (Zoning). Furthermore, the proposed location does not comply with LIP Chapter 8 (Grading) and compliance with LIP Chapter 11 (Archaeological/Cultural Resources) cannot be determined based on the information submitted.

The proposed project fails to meet various requirements outlined in LIP Chapter 3 including: LIP §3.4.1(D)(2)(c) which requires rear yard setback to be at least 15 feet (4 feet proposed); LIP §3.4.1(D)(4)(a) which stipulates that “no walls...in excess of 6 feet shall be allowed within the required rear...yard setback areas” (wall heights associated with the proposed structure extend above 6 feet in the rear yard setback); LIP §3.4.1(D)(5) which limits structure height to additions/remodels of an existing structure, a new structure on a vacant parcel, or where an existing structure is replaced (no modifications to the existing structure are proposed, the site is not vacant, and the proposed structure is not

associated with the replacement of the existing residence); LIP §3.4.1(D)(6), which stipulates that the site of construction for all development is limited to one single building pad and that no structures shall be sited downhill from the existing building pad (the project proposes a second building pad and has located the proposed second building pad downhill of the existing building pad); LIP §3.4.1(D)(7) which strictly limits impermeable surfaces on the existing building pad (the proposed structure is located on a proposed second building pad); LIP §3.4.1(D)(8) which states grading shall only be permitted for the construction of swimming pools and spas and that no grading occur for purposes of extending the existing building pad (proposed grading associated for a use other than a swimming pool or spa and proposed for an additional building pad); LIP §3.4.1(D)(10)(b) which limits roof materials to clay tile, concrete tile or similar material (proposed roof materials include Class “A” fire-rated architectural shingles); and LIP §3.6(N)(c)(i) that requires a second residential unit be located within the required development area for the project site and clustered with the primary dwelling unit (the proposed second unit is located downhill from the existing residence, is not within the required development area as stipulated in the MCE Overlay standards, and is not clustered with the existing residence).

The proposed development is inconsistent with LIP Chapter 8 (Grading). The MCE Overlay standards provide more strict regulations for grading of property within the MCE Overlay District (LIP Section 3.4.1(D)(8)) by prohibiting grading on existing building pads except for export of 500 cubic yards associated with the construction of a swimming pool and spa, with additional provisions for cut and fill grading and remedial grading subject to the approval of a Site Plan Review. Based on the applicant’s submitted materials, the proposed second building pad proposes remedial and re-compaction grading for the upper 3 feet of previously compacted fill to be removed and recompacted to a minimum of a 3 feet beyond the proposed footprint. The proposed grading is for a use other than a swimming pool or spa and, therefore, does not comply with LIP Section 3.4.1(D)(8) or LIP Chapter 8 pursuant to the provision in LIP Section 8.2. Additionally, the LIP Section 8.3(G) defines remedial grading as “grading necessary to mitigate an environmental hazard as recommended by a geotechnical report approved by the City Geotechnical staff. No such remedial grading will be allowed when it could be avoided by changing the position or location of the proposed development.” Remedial grading appears to be avoidable by changing the location of the proposed development to an area within the existing building pad.

Based on the information submitted by the applicant, the Planning Division is unable to determine if the proposed project complies with LIP Chapter 11 (Archaeological/Cultural Resources). Although the project site has been evaluated for potential impacts to archeological resources and it has been determined that due to the previous grading activities to create the existing building pad and MCE community, the project has very low probability of disturbing archaeological resources for construction proposed on the existing building pad. It is not clear if the proposed second building pad would have potential impacts given that it is proposed downhill from the existing building pad in an undeveloped

area and has not been evaluated for potential impacts during construction. The applicant has not provided information demonstrating that the proposed second building pad has been evaluated for impacts to archeological resources.

In the event there is a conflict between a provision of the LCP and a provision of the General Plan or of any other City-adopted plan, resolution, or ordinance not included in the LCP, and it is not possible for the development to comply with both the LCP and the other provision, pursuant to LIP Section 1.3.1, the LCP governs. Consequently, the development may not be approved unless it complies with the LCP provision.

For the reasons provided herein, the proposed ADU/Second Unit does not conform to the current LIP's objective development requirements and the applicant has not requested relief pursuant to the provisions in LIP Section 13.26 (Variances). Therefore, the Planning Division cannot make the required finding per LIP Section 13.9 in support of the requested CDP.

Finding 2. If the project is located between the first public road and the sea. The project conforms to the public access and recreation policies of Chapter 3 of the Coastal Act of 1976 (commencing with Sections 30200 of the Public Resources Code).

The subject parcel is not located between the first public road and the sea. The project site is located inland and not located along the shoreline. Therefore, this finding does not apply.

Finding 3. The project is the least environmentally damaging alternative.

As discussed in Finding 1, the applicant stated that the proposed location on a proposed second building pad downhill of the existing building pad is the only suitable location due to the site's sewer and water line easements and steep slopes. However, the applicant did not provide an alternate location or adequately justify why the ADU/Second Unit could not be developed within the existing building pad in compliance with the MCE Overlay standards. Furthermore, the applicant did not demonstrate that an alternate location within the residence as part of a conversion or adjacent to the residence on a flat portion of the existing building pad was infeasible. Additionally, the applicant did not provide information indicating that the proposed second building pad has been evaluated for potential impacts to archaeological/cultural resources.

As part of the Planning Division's review of the subject application, alternate locations for development appeared feasible and would maintain consistency with the MCE Overlay standards, as well as consistency with LIP Chapters 3, 8 and 11. The alternate locations do not appear to necessitate the extent of proposed grading to accommodate the second building pad or result in the need for relief from the MCE Overlay standards. As proposed, the second building pad location is not considered to be the least environmentally damaging alternative.

Finding 4. If the project is located in or adjacent to an environmentally sensitive habitat area pursuant to Chapter 4 of the Malibu LIP (ESHA Overlay), that the project conforms with the recommendations of the Environmental Review Board, or if it does not conform with the recommendations, findings explain why it is not feasible to take the recommended action.

The LCP ESHA and Marine Resources Map does not identify any ESHA on the subject property or on any adjacent properties. The subject property is not in a designated ESHA or ESHA buffer and, therefore, Environmental Review Board review was not required. This finding does not apply.

B. Environmentally Sensitive Habitat Area Overlay (LIP Chapter 4)

The subject property is not in a designated ESHA or ESHA buffer as shown on the LCP ESHA and Marine Resources Map. Therefore, the findings of LIP Section 4.7.6 are not applicable.

C. Native Tree Protection (LIP Chapter 5)

There are three unidentified trees adjacent to the proposed second building pad. Based on the information provided by the applicant, it is unclear if the trees are native or not native. Therefore, the findings for LIP Chapter 5 conformance cannot be determined based on the information provided by the applicant.

D. Scenic, Visual and Hillside Resource Protection (LIP Chapter 6)

The MCE Overlay District was established approximately 50 years ago at which time each parcel was graded and designated one building pad to create terraced views of the surrounding mountains and/or the Pacific Ocean. The elevation of each building pad has been documented with specified height and grading controls for development, and applicants are not permitted to alter the elevation of each building pad. Because the standards of the MCE Overlay District are intended to maximize the protection of scenically impressive views from public viewing areas, including scenic roads, strict adherence to the MCE Overlay standards specified in LIP Section 3.4.1(D) ensures compliance with the relevant standards of LIP Chapter 6. As previously described in CDP Findings 1 and 3 above, the proposed second building pad and proposed structure do not comply with several MCE Overlay standards. Therefore, the findings for LIP Chapter 6 conformance cannot be determined under the current proposal.

E. Transfer of Development Credit (LIP Chapter 7)

The proposed project does not include a land division or multi-family development. Therefore, the findings of LIP Chapter 7 are not applicable.

F. Hazards (LIP Chapter 9)

The project does not have the potential to create adverse impacts to the site stability or structural integrity; therefore, this finding does not apply.

G. Shoreline and Bluff Development (LIP Chapter 10)

The project is not located within a shoreline or bluff; therefore, this finding does not apply.

H. Public Access (LIP Chapter 12)

LIP Section 12.4 requires public access for lateral, bluff-top, and vertical access near the ocean, trails, and recreational access for the following cases:

- A. New development on any parcel or location specifically identified in the Land Use Plan or in the LCP zoning districts as appropriate for or containing a historically used or suitable public access trail or pathway.
- B. New development between the nearest public roadway and the sea.
- C. New development on any site where there is substantial evidence of a public right of access to or along the sea or public tidelands, a blufftop trail or an inland trail acquired through use or a public right of access through legislative authorization.
- D. New development on any site where a trail, bluff top access or other recreational access is necessary to mitigate impacts of the development on public access where there is no feasible, less environmentally damaging, project alternative that would avoid impacts to public access.

As described herein, the subject property and the proposed project do not meet any of these criteria in that no trails are identified on the LCP Park Lands Map on or adjacent to the property, the property is not located near a recreational area, and the property is not located between the first public road and the shoreline. Additionally, bluff-top, trail, and recreational access are not applicable given the subject property's location. Therefore, the requirement for public access of LIP Section 12.4 does not apply and further findings are not required.

I. Land Division (LIP Chapter 15)

This project does not include land division. Therefore, findings from this chapter do not apply.

ENVIRONMENTAL REVIEW: Pursuant to the authority and criteria contained in CEQA, the Community Development Director has analyzed the proposed project and finds that, pursuant to CEQA Guidelines Section 15270, CEQA does not apply to projects that a public agency rejects or disapproves.

CORRESPONDENCE: At the time of writing this report, no public correspondence has been received by staff concerning the proposed project.

PUBLIC NOTICE: On November 20, 2025, staff published a Notice of Public Hearing in a newspaper of general circulation within the City of Malibu and mailed the notice to all property owners and occupants within a 500-foot radius of the subject property (Attachment 4).

SUMMARY: The required findings cannot be made that the project complies with the LCP. Based on the analysis contained in this report and the accompanying resolution, staff recommends denial of this project by the adoption of Planning Commission Resolution No. 25-86.

Should the Planning Commission determine that the findings can be made in support of the application, the Planning Commission will need to make a series of findings including that the project is categorically exempt from CEQA, that the requested CDP can be supported by LIP Sections 13.9(A-D) and LIP Section 6.4(A)(1-5), adherence to LIP Chapters 5 and 11 can be determined, and variances can be supported by LIP Section 13.26.5 to provide relief from relevant MCE Overlay standards and LIP Chapter 3 residential development standards. The Planning Commission would need to direct staff to return with an approval resolution at a future public hearing.

4. Public Hearing Notice

CITY OF MALIBU PLANNING COMMISSION
RESOLUTION NO. 25-86

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MALIBU DETERMINING THE CALIFORNIA ENVIRONMENTAL QUALITY ACT DOES NOT APPLY TO PROJECTS THAT A PUBLIC AGENCY REJECTS OR DISAPPROVES, AND DENYING COASTAL DEVELOPMENT PERMIT NO. 21-045 TO CONSTRUCT A NEW 594 SQUARE-FOOT ACCESSORY DWELLING UNIT/SECOND UNIT ON A PROPOSED SECOND BUILDING PAD IN THE MALIBU COUNTRY ESTATES OVERLAY DISTRICT LOCATED AT 24507 VANTAGE POINT TERRACE (MEISSNER FAMILY TRUST)

THE PLANNING COMMISSION OF THE CITY OF MALIBU DOES HEREBY FIND, ORDER AND RESOLVE AS FOLLOWS:

SECTION 1. Recitals.

A. On September 23, 2021, the subject application was submitted to the City of Malibu Planning Division by Keystone Strategic Planning, on behalf of property owner, the Meissner Family Trust. The application was routed to the City Biologist, City Public Works Department, City geotechnical consultant reviewers, Los Angeles County Waterworks District No. 29 (WD29), and Los Angeles County Fire Department (LACFD) for review. The proposed development is located in the Malibu Country Estates (MCE) Overlay District, included within the City's certified Local Coastal Program (LCP) Local Implementation Plan (LIP) as LIP Section 3.4.1(D).

B. On August 26, 2024, the applicant notified the Planning Division that it will not be requesting relief from various objective development standards in the LIP through variances and requested the Planning Division continue to process the application for development on a proposed second building pad within the MCE Overlay District.

C. On October 9, 2025, the applicant requested the subject application be agendized for the Planning Commission. On October 10, 2025, the Planning Division scheduled the application for the next available Planning Commission meeting. To-date, the Planning Division has been unable to deem the project application complete based on the information submitted by the applicant.

D. On November 13, 2025, the Planning Division issued a Notice of Hearing Requirements letter to the California Coastal Commission (CCC) and the project applicant stating that the project would be heard at a public hearing before the Planning Commission and was not appealable to the CCC.

E. On October 30, 2025, the applicant posted a Notice of Application sign at the subject site.

F. On November 20, 2025, a Notice of Planning Commission Public Hearing was published in a newspaper of general circulation within the City of Malibu and was mailed to all property owners and occupants within a 500-foot radius of the project site and to all interested parties.

G. On December 1, 2025, the Planning Commission held a duly noticed public hearing on the subject application, reviewed and considered the staff report, reviewed and considered written reports, public testimony, and other information in the record.

SECTION 2. Environmental Review.

Pursuant to the authority and criteria contained in California Environmental Quality Act (CEQA), the Planning Commission has analyzed the proposed project and finds that, pursuant to CEQA Guidelines Section 15270, CEQA does not apply to projects that a public agency rejects or disapproves.

SECTION 3. Coastal Development Permit Findings.

Based on evidence contained within the record, including the agenda report for the project and the hearing on December 1, 2025, and pursuant to the LIP including Sections 13.7(B) and 13.9, the Planning Commission adopts the findings of fact, and denies CDP No. 21-045 for a 594 square-foot Accessory Dwelling Unit/Second Unit (ADU/Second Unit) proposed on a second building pad on property located in the MCE Overlay District and Single Family Medium (SFM) zoning district at 24507 Vantage Point Terrace (Meissner Family Trust).

The project has been determined to be inconsistent with all applicable LCP codes, standards, goals, and policies. The required findings of denial are made herein.

A. General Coastal Development Permit (LIP Chapter 13)

This finding cannot be made because the proposed location of the ADU/Second Unit is not consistent with the MCE Overlay standards in LIP Section 3.4.1.(D) or residential development standards in LIP Section 3.6(N)(1) and, therefore, does not meet the requirements for LIP Chapter 3 (Zoning). Furthermore, the proposed location does not comply with LIP Chapter 8 (Grading) and compliance with LIP Chapter 11 (Archaeological/Cultural Resources) cannot be determined based on the information submitted.

1. The proposed project fails to meet various requirements outlined in LIP Chapter 3 including: LIP §3.4.1(D)(2)(c) which requires rear yard setback to be at least 15 feet (4 feet proposed); LIP §3.4.1(D)(4)(a) which stipulates that “no walls...in excess of 6 feet shall be allowed within the required rear...yard setback areas” (wall heights associated with the proposed structure extend above 6 feet in the rear yard setback); LIP §3.4.1(D)(5) which limits structure height to additions/remodels of an existing structure, a new structure on a vacant parcel, or where an existing structure is replaced (no modifications to the existing structure are proposed, the site is not vacant, and the proposed structure is not associated with the replacement of the existing residence); LIP §3.4.1(D)(6), which stipulates that the site of construction for all development is limited to one single building pad and that no structures shall be sited downhill from the existing building pad (the project proposes a second building pad and has located the proposed second building pad downhill of the existing building pad); LIP §3.4.1(D)(7) which strictly limits impermeable surfaces on the existing building pad (the proposed structure is located on a proposed second building pad); LIP §3.4.1(D)(8) which states grading shall only be permitted for the construction of swimming pools and spas and that no grading occur for purposes of extending the existing building pad (proposed grading associated for a use other than a swimming pool or spa and proposed for an additional building pad); LIP §3.4.1(D)(10)(b) which limits roof materials to clay tile, concrete tile or similar material (proposed roof materials include Class “A” fire-rated architectural shingles); and LIP §3.6(N)(c)(i) that requires a second residential unit be located

within the required development area for the project site and clustered with the primary dwelling unit (the proposed second unit is located downhill from the existing residence, is not within the required development area as stipulated in the MCE Overlay standards, and is not clustered with the existing residence).

The proposed development is inconsistent with LIP Chapter 8 (Grading). The MCE Overlay standards provide more strict regulations for grading of property within the MCE Overlay District (LIP Section 3.4.1(D)(8)) by prohibiting grading on existing building pads except for export of 500 cubic yards associated with the construction of a swimming pool and spa, with additional provisions for cut and fill grading and remedial grading subject to the approval of a Site Plan Review. Based on the applicant's submitted materials, the proposed second building pad proposes remedial and re-compaction grading for the upper 3 feet of previously compacted fill to be removed and recompacted to a minimum of 3 feet beyond the proposed footprint. The proposed grading is for a use other than a swimming pool or spa and, therefore, does not comply with LIP Section 3.4.1(D)(8) or LIP Chapter 8 pursuant to the provision in LIP Section 8.2. Additionally, the LIP Section 8.3(G) defines remedial grading as "grading necessary to mitigate an environmental hazard as recommended by a geotechnical report approved by the City Geotechnical staff. No such remedial grading will be allowed when it could be avoided by changing the position or location of the proposed development." Remedial grading appears to be avoidable by changing the location of the proposed development to an area within the existing building pad.

Based on the information submitted by the applicant, the Planning Division is unable to determine if the proposed project complies with LIP Chapter 11 (Archaeological/Cultural Resources). Although the project site has been evaluated for potential impacts to archeological resources and it has been determined that due to the previous grading activities to create the existing building pad and MCE community, the project has very low probability of disturbing archeological resources for construction proposed on the existing building pad. It is not clear if the proposed second building pad would have potential impacts given that it is proposed downhill from the existing building pad in an undeveloped area and has not been evaluated for potential impacts during construction. The applicant has not provided information demonstrating that the proposed second building pad has been evaluated for impacts to archeological resources.

In the event there is a conflict between a provision of the LCP and a provision of the General Plan or of any other City-adopted plan, resolution, or ordinance not included in the LCP, and it is not possible for the development to comply with both the LCP and the other provision, pursuant to LIP Section 1.3.1, the LCP governs. Consequently, the development may not be approved unless it complies with the LCP provision.

For the reasons provided herein, the proposed ADU/Second Unit does not conform to the current LIP's objective development requirements and the applicant has not requested relief pursuant to the provisions in LIP Section 13.26 (Variances). Therefore, the Planning Division cannot make the required finding per LIP Section 13.9 in support of the requested CDP.

2. The subject parcel is not located between the first public road and the sea. The project site is located inland and not located along the shoreline. Therefore, this finding does not apply.

3. As discussed in Finding 1, the applicant stated that the proposed location on a proposed second building pad downhill of the existing building pad is the only suitable location due to the site's sewer and water line easements and steep slopes. However, the applicant did not provide an alternate location or adequately justify why the ADU/Second Unit could not be developed within the existing building pad in compliance with the MCE Overlay standards. Furthermore, the applicant did not demonstrate that an alternate location within the residence as part of a conversion or adjacent to the residence on a flat portion of the existing building pad was infeasible. Additionally, the applicant did not provide information indicating that the proposed second building pad has been evaluated for potential impacts to archaeological/cultural resources.

As part of the Planning Division's review of the subject application, alternate locations for development appeared feasible and would maintain consistency with the MCE Overlay standards, as well as consistency with LIP Chapters 3, 8 and 11. The alternate locations do not appear to necessitate the extent of proposed grading to accommodate the second building pad or result in the need for relief from the MCE Overlay standards. As proposed, the second building pad location is not considered to be the least environmentally damaging alternative.

4. The LCP Environmentally Sensitive Habitat Area (ESHA) and Marine Resources Map does not identify any ESHA on the subject property or on any adjacent properties. The subject property is not in a designated ESHA or ESHA buffer and, therefore, Environmental Review Board review was not required. This finding does not apply.

B. Native Tree Protection (LIP Chapter 5)

There are three unidentified trees adjacent to the proposed second building pad. Based on the information provided by the applicant, it is unclear if the trees are native or not native. Therefore, the findings for LIP Chapter 5 conformance cannot be determined based on the information provided by the applicant.

C. Scenic, Visual and Hillside Resource Protection (LIP Chapter 6)

The MCE Overlay District was established approximately 50 years ago at which time each parcel was graded and designated one building pad to create terraced views of the surrounding mountains and/or the Pacific Ocean. The elevation of each building pad has been documented with specified height and grading controls for development, and applicants are not permitted to alter the elevation of each building pad. Because the standards of the MCE Overlay District are intended to maximize the protection of scenically impressive views from public viewing areas, including scenic roads, strict adherence to the MCE Overlay standards specified in LIP Section 3.4.1(D) ensures compliance with the relevant standards of LIP Chapter 6. As previously described in CDP Findings 1 and 3 above, the proposed second building pad and proposed structure do not comply with several MCE Overlay standards. Therefore, the findings for LIP Chapter 6 conformance cannot be determined under the current proposal.

SECTION 4. Planning Commission Action.

Based on the foregoing findings and evidence contained within the record, the Planning Commission hereby denies CDP No. 21-045.

SECTION 5. The Planning Commission shall certify the adoption of this resolution.

PASSED, APPROVED AND ADOPTED this 1st day of December 2025.

ELIZABETH RIDDICK, Planning Commission Chair

ATTEST:

REBECCA EVANS, Recording Secretary

LOCAL APPEAL - Pursuant to LIP Section 13.20.1 (Local Appeals) a decision made by the Planning Commission may be appealed to the City Council by an aggrieved person by written statement setting forth the grounds for appeal. An appeal shall be filed with the City Clerk within 10 days and shall be accompanied by an appeal form and filing fee, as specified by the City Council. Appeal forms may be found online at www.malibucity.org, in person at City Hall, or by calling (310) 456-2489, ext. 246.

Any action challenging the final decision of the City made as a result of the public hearing on this application must be filed within the time limits set forth in Section 1.12.010 of the MMC and Code of Civil Procedure. Any person wishing to challenge the above action in Superior Court may be limited to raising only those issues they or someone else raised at the public hearing, or in written correspondence delivered to the City of Malibu at or prior to the public hearing.

I CERTIFY THAT THE FOREGOING RESOLUTION NO. 25-86 was passed and adopted by the Planning Commission of the City of Malibu at the regular meeting thereof held on the 1st day of December 2025 by the following vote:

PROJECT DESCRIPTION: (N) ADU with Minor Modification for rear yard setback modification.

TO: Malibu Planning Department and/or Applicant

FROM: Fire Prevention Engineering Assistant

Compliance with the conditions checked below is required prior to Fire Department approval.

The project DOES require Fire Department Plan Review and Developer Fee payment

The project DOES NOT require Fire Department Plan Review

The required fire flow for this project is 1,250 gallons per minute at 20 pounds per square inch for a 1 hour duration. (Provide flow information from the water dept.)

The project is required to have an interior automatic fire sprinkler system.

Final Fuel Modification Plan Approval is required prior to Fire Department Approval

Conditions below marked "not approved" shall be corrected on the site plan and resubmitted for Fire Department approval.

	App'd	N/app'd
Required Fire Department vehicular access (including width and grade %) as shown from the public street to the proposed project.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Required and/or proposed Fire Department Vehicular Turnaround	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Required 5 foot wide Fire Department Walking Access (including grade %)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Width of proposed driveway/access roadway gates	<input checked="" type="checkbox"/>	<input type="checkbox"/>

*County of Los Angeles Fire Department Approval Expires with City Planning permits expiration, revisions to the County of Los Angeles Fire Code or revisions to Fire Department regulations and standards.

**Minor changes may be approved by Fire Prevention Engineering, provided such changes achieve substantially the same results and the project maintains compliance with the County of Los Angeles Fire Code valid at the time revised plans are submitted. Applicable review fees shall be required.

REVIEW FINDINGS

Review Status:	<input type="checkbox"/>	<u>INCOMPLETE:</u> Additional information and/or a response to the listed review comments is required.
	<input checked="" type="checkbox"/>	<u>APPROVED:</u> The project has been approved with regards to biological impacts.
	<input type="checkbox"/>	<u>CANNOT APPROVE AS SUBMITTED:</u> The proposed project does not conform to the requirements of the MMC and/or LCP.
	<input type="checkbox"/>	<u>ERB:</u> This project has the potential to impact ESHA and may require review by the Environmental Review Board pursuant to LIP Section 4.4.4

RECOMMENDATIONS:

1. The project is recommended for **APPROVAL** with the following conditions:
 - A. No new landscaping is proposed with this project. Therefore, none is approved. Should the applicant intend to plant any new vegetation with a potential to exceed six feet in height, or change 500/2,500 square feet or more (new residence/existing residence) of the existing landscaping area, a detailed landscape plan shall be submitted for review and approval prior to any planting.
 - B. Grading shall be scheduled only during the dry season from April 1 - October 31. If it becomes necessary to conduct grading activities from November 1 – March 31, a comprehensive erosion control plan shall be submitted for approval prior to issuance of a grading permit and implemented prior to initiation of vegetation removal and/or grading activities.
 - C. Grading/excavation/vegetation removal scheduled between February 1 - September 15 will require nesting bird surveys by a qualified biologist prior to initiation of such activities. Surveys shall be completed no more than five days from proposed initiation of site preparation activities. Should active nests be identified, a buffer area no less than 150 feet (300 feet for raptors) shall be fenced off until it is determined by a qualified biologist that the nest is no longer active. A report discussing the results of the surveys shall be turned in to the City within two business days of completion of surveys.
 - D. Night lighting from exterior and interior sources shall be minimized. All exterior lighting shall be low intensity and shielded so it is directed downward and inward so that there is no offsite glare or lighting of natural habitat areas. Up-lighting is prohibited.

-000-

If you have any questions regarding the above requirements, please contact the City Biologist office at your earliest convenience.

Project Type:	New pre-manufactured accessory dwelling unit (ADU)		

Submittal Information

Consultant(s)/Report GeoSoils Consultants, Inc. (Miller, GE 2257; Ruberti, CEG 1708):
Date(s): **12-15-2021 (revised 1-14-2022), 10-12-2020**
(Current submittal(s) in **Bold**.)

Architectural plans prepared by Keystone Strategic Planning dated October 20, 2020.
Structural plans prepared by Chapman Home Builders, Inc. dated April 30, 2020 (in geotechnical report).

Previous Reviews: 10-11-2021

Review Findings

Coastal Development Permit Review

- The proposed ADU is **APPROVED** from a geotechnical perspective, with the following comments to be addressed prior to building plan check stage approval.
- The proposed ADU is **NOT APPROVED** from a geotechnical perspective. The listed 'Review Comments' shall be addressed prior to approval.

Building Plan-Check Stage Review

- Awaiting Building plan check submittal. Please respond to the listed 'Building Plan-Check Stage Review Comments' AND review and incorporate the attached 'Geotechnical Notes for Building Plan Check' into the plans.
- APPROVED** from a geotechnical perspective. Please review the attached 'Geotechnical Notes for Building Plan Check' and incorporate into Building Plan-Check submittals.
- NOT APPROVED** from a geotechnical perspective. The listed 'Building Plan-Check Stage Review Comments' shall be addressed prior to Building Plan-Check Stage approval.

Remarks

The referenced response geotechnical report was reviewed by the City from a geotechnical perspective. The project includes the construction of a new 623 square foot pre-manufactured ADU adjacent to John Tyler Road on the property. R & R grading is proposed.

--

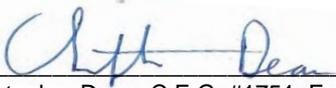

Review Comments:

None.

Building Plan-Check Stage Review Comments:

1. Please provide a plan check review fee of \$1,016.00 for City geotechnical staff to review the plans upon Building Plan Check submittal.
2. Please submit a grading plan that implements the Project Geotechnical Consultant's recommendations for removal and re-compaction grading (upper 3 feet of previously compacted fill to be removed and recompacted to a minimum of 3 feet beyond the ADU footprint).
3. A drainage plan prepared by a licensed civil engineer is to be included as part of the plans.
4. Include the following note on all the foundation plans: *"All foundation excavations must be observed and approved by the Project Geotechnical Engineer prior to placement of reinforcing steel."*
5. Prior to final approval of the project, an as-built compaction report prepared by the Project Geotechnical Consultant must be submitted to the City for review. The report must include the results of all density tests, a dry density and optimum moisture maximum curve(s), a map depicting the limits of fill, locations and elevations of all density tests, locations and elevations of all removal bottoms, and the expansion index of the sandstone bedrock used for foundation embedment. Geologic conditions exposed during grading must be depicted on an as-built geologic map. This comment must be included as a note on the grading plans.
6. **HARD COPY PLANS:** Three sets of grading and ADU plans (**APPROVED BY BUILDING AND SAFETY**) incorporating the Project Geotechnical Consultant's recommendations and items in this review sheet must be **reviewed and wet stamped and manually signed by the Project Engineering Geologist and Project Geotechnical Engineer**. City geotechnical staff will review the plans for conformance with the Project Geotechnical Consultants' recommendations and items in this review sheet. **Appointments for final review and approval of the plans may be made by calling or emailing City Geotechnical staff.**
7. **ELECTRONIC PLANS:** If final foundation and civil plans are digitally signed and stamped by the Project Geotechnical Consultant, as allowed under Board of Registration for Professional Engineers and Land Surveyors (2020 PE & PLS Board Rules (16 CCR §§400-476), the Plan Review Letter must contain the following:
 - Project description – Address, scope, including structures being permitted (e.g., pool, guest house etc.).
 - Plan set information – The date and preparer of the plan set reviewed; this must match the plan set that was submitted to the city for final approval.
 - Report references – All applicable geotechnical or coastal engineering reports need to be referenced.
 - Approval of specific plan sheets reviewed – List all plan sheets approved, e.g., civil (grading and drainage) as well as structural.
 - Licensed Professional signature and stamp – The letter must be signed and stamped by all licensed professionals who signed the reports.

Please direct questions regarding this review sheet to City Geotechnical staff listed below.

- GEOTECHNICAL -

NOTES FOR BUILDING PLAN-CHECK

The following standard items should be incorporated into Building Plan-Check submittals, as appropriate:

1. One set of grading and ADU plans, incorporating the Project Geotechnical Consultant's recommendations and items in this review sheet, must be submitted to City geotechnical staff for review. **Additional review comments may be raised at that time that may require a response.**
2. Show the name, address, and phone number of the Project Geotechnical Consultant(s) on the cover sheet of the Swimming pool plans.
3. Include the following note on the Foundation Plans: *"All foundation excavations must be observed and approved by the Project Geotechnical Consultant prior to placement of reinforcing steel."*
4. The Foundation Plans for the proposed swimming pool and spa shall clearly depict the embedment material and minimum depth of embedment for the foundations in accordance with the Project Geotechnical Consultant's recommendations.
5. Show the onsite wastewater treatment system on the Site Plan.
6. Please contact the Building and Safety Department regarding the submittal requirements for a grading and drainage plan review.
7. A comprehensive Site Drainage Plan, incorporating the Project Geotechnical Consultant's recommendations, shall be included in the Plans. Show all area drains, outlets, and non-erosive drainage devices on the Plans. Water shall not be allowed to flow uncontrolled over descending slopes.

This comment must be included as a note on the grading plans.

Retaining Walls (As Applicable)

1. Show retaining wall backdrain and backfill design, as recommended by the Project Geotechnical Consultant, on the Plans.
2. Retaining walls separate from a residence require separate permits. Contact the Building and Safety Department for permit information. One set of retaining wall plans shall be submitted to the City for review by City geotechnical staff. Additional concerns may be raised at that time which may require a response by the Project Geotechnical Consultant and applicant.

Grading Plans (as Applicable)

1. Grading Plans shall clearly depict the limits and depths of overexcavation, as applicable.
2. Prior to final approval of the project, an as-built compaction report prepared by the Project Geotechnical Consultant must be submitted to the City for review. The report must include the results of all density tests as well as a map depicting the limits of fill, locations of all density tests, locations and elevations of all removal bottoms, locations and elevations of all keyways and back drains, and locations and elevations of all retaining wall backdrains and outlets. Geologic conditions exposed during grading must be depicted on an as-built geologic map.

MEMORANDUM

To: Planning Department

From: Public Works Department
Danh Duong PE., Assistant Civil Engineer

Date: October 25, 2021

Re: Proposed Conditions of Approval for 24507 Vantage Point Terrace - ACDP 21-045

The Public Works Department has reviewed the plans submitted for the above referenced project. Based on this review sufficient information has been submitted to confirm that conformance with the Malibu Local Coastal Plan (LCP) and the Malibu Municipal Code (MMC) can be attained. Prior to the issuance of building and grading permits, the applicant shall comply with the following conditions.

STORMWATER

1. A Local Storm Water Pollution Prevention Plan shall be provided prior to the issuance of the Grading/Building permits for the project. This plan shall include an Erosion and Sediment Control Plan (ESCP) that includes, but not limited to:

Erosion Controls	Scheduling
	Preservation of Existing Vegetation
Sediment Controls	Silt Fence
	Sand Bag Barrier
	Stabilized Construction Entrance
Non-Storm Water Management	Water Conservation Practices
	Dewatering Operations
Waste Management	Material Delivery and Storage
	Stockpile Management
	Spill Prevention and Control
	Solid Waste Management
	Concrete Waste Management
	Sanitary/Septic Waste Management

All Best Management Practices (BMP) shall be in accordance to the latest version of the California Stormwater Quality Association (CASQA) BMP Handbook. Designated areas for the storage of construction materials, solid waste management, and portable toilets must not disrupt drainage patterns or subject the material to erosion by site runoff.

MISCELLANEOUS

2. The developer's consulting engineer shall sign the final plans prior to the issuance of permits.

APPLICATION FILED: September 23, 2021
CASE PLANNER: Magda Gonzalez, Contract Planner, mgonzalez@4leafinc.com
(925) 789-7160

A written staff report will be available at or before the hearing for the projects. All persons wishing to address the Commission regarding these matters will be afforded an opportunity in accordance with the Commission's procedures. Copies of all related documents can be reviewed by any interested person at City Hall during regular business hours. Oral and written comments may be presented to the Planning Commission on, or before, the date of the meeting.

LOCAL APPEAL - A decision of the Planning Commission may be appealed to the City Council by an aggrieved person by written statement setting forth the grounds for appeal. An appeal shall be filed with the City Clerk within ten days following the date of action which the appeal is made and shall be accompanied by an appeal form and filing fee, as specified by the City Council. Appeal forms may be found online at www.malibucity.org/planningforms or in person at City Hall, or by calling (310) 456-2489, extension 246.

IF YOU CHALLENGE THE CITY'S ACTION IN COURT, YOU MAY BE LIMITED TO RAISING ONLY THOSE ISSUES YOU OR SOMEONE ELSE RAISED AT THE PUBLIC HEARING DESCRIBED IN THIS NOTICE, OR IN WRITTEN CORRESPONDENCE DELIVERED TO THE CITY, AT OR PRIOR TO THE PUBLIC HEARING.

Dear Malibu Planning Staff,

Our office was retained by the applicant of the above-referenced application to assist with addressing various questions and concerns raised leading up to the upcoming hearing. Please see attached an analysis of the questions/concerns raised in the Staff Report for Coastal Development Permit No. 21-045.

Also attached are the accompanying alternatives analysis and two updated exhibits: an updated Floor Plan and Elevations plan that reflect the use of updated roofing materials, from shingles to tiles, and a site plan identifying four previously unidentified trees. These materials are provided to ensure the record accurately reflects the project's constraints, the applicable standards, feasible options available, and responses to outstanding questions/concerns that the Staff Report indicates may not have been sufficiently addressed previously.

Thank you for your time and attention to these items, and if you need any additional information or would like clarification on any portion of the submittal, we would be happy to assist and/or discuss further at your convenience.

Sincerely,

Andrew Tuck

RE: CDP Application 21-045 – 24507 Vantage Point Terrace Staff Report Comments and Additional Information

Dear Mr. Eaton,

We are in receipt of the Staff Report prepared for the above-referenced application, dated November 20, 2025. The below analysis and supporting documentation are intended to correct/clarify and provide additional information pertaining to the statements/findings made within the staff report to assist in moving the application forward, consistent with applicable State and Local laws that govern the proposed development. In particular, this correspondence is intended to address and clarify unique circumstances that pertain to Accessory Dwelling Units (ADUs) and their treatment under State law, the role of the California Coastal Act, the historical record for development of the subject property/neighborhood with respect to building pad establishment, and the history, purpose and appropriate application of the local Malibu Country Estates (MCE) Overlay District to the subject application.

It appears that Staff's conclusions rest on a series of assumptions that may be inaccurate or incomplete—most notably that the MCE Overlay categorically limits all parcels within the Overlay District to a single building pad, and that such a limitation derives from or is mandated by the Coastal Act. As discussed further below, certain critical assumptions and conclusions made by Staff appear to be inconsistent with the history and facts surrounding original tract map and CC&Rs, the evolution of local regulatory controls, the physical conditions of what was then Lot 85 (now 24507 Vantage Point Terrace), and the statutory framework governing ADUs. Based upon our evaluation of the property's history and relevant governing regulations, it appears that the subject parcel contains two approved and existing building pads that predate the Coastal Act and the LCP, that the proposed ADU is sited entirely on an existing, compliant pad, and that neither the Coastal Act nor the LIP provides a lawful basis to deny the proposed project.

One Building Pad per Parcel

The principal issue raised by staff is the assertion that the Malibu Country Estates (MCE) Overlay District limits all development to one building pad per parcel. Staff relies on LIP Section

One Building Pad per Parcel

The principal issue raised by staff is the assertion that the Malibu Country Estates (MCE) Overlay District limits all development to one building pad per parcel. Staff relies on LIP Section 3.4.1(D), which provides the following standards for building pads within the MCE Overlay District:

- a. All development, excluding walls and fences, shall be limited to the existing building pad.
- b. There shall be no more than one building pad per lot.
- c. No structure, excluding walls and fences, shall extend beyond, or be cantilevered over, any downhill slope extending from the existing building pad.
- d. A building pad is defined as a single, continuous, graded area, not exceeding three percent slope, designed to accommodate development.

As demonstrated below, staff's interpretation is inconsistent with the historical record, the legal framework governing ADUs, and the physical conditions of the subject parcel.

Historical Background of Malibu Country Estates

Staff claims the *"MCE Overlay District was established approximately 50 years ago."* While the Overlay District technically was not established until the mid-nineties, the Malibu Country Estates neighborhood was originally developed in the 1970s. The original CC&Rs, recorded in 1972, expressly state their purpose was *"to protect the owner of each Lot against such improper development and use of the surrounding Lots as will depreciate the value of his Lot."* **[Attachment A]**

DECLARATION OF RESTRICTIONS

FEE \$ 14.20 G

THIS DECLARATION OF RESTRICTIONS, made this 17th day of AUGUST, 1972 by Century Malibu, Inc., a Delaware corporation, hereinafter called OWNER or GRANTOR, having its principal office in California at 10100 Santa Monica Boulevard, Los Angeles, California, Owner in fee simple of all that real property situated in the County of Los Angeles, State of California, described as follows:

All Lots contained in Tract No. 30134, as per map thereof recorded in the office of the County Recorder of the County of Los Angeles, on 8-25-72, in Book 820, Pages 15 to 22, inclusive, of Maps, in the records of said County of Los Angeles, which property has been subdivided into lots as shown on said map for the purpose of sales and conveyance thereof;

NOW, THEREFORE, this Declaration of Restrictions WITNESSETH:

That for the purpose of designating and creating certain conditions and restrictions upon all of said lots for the benefit of all other lots in said Tract, the following covenants, conditions and restrictions shall apply to said land as well before the execution and delivery to any buyer thereof, of a deed conveying said realty to said buyer, as after said deed shall have been executed and delivered, and shall operate as covenants running with the land, being hereby created as mutual equitable servitudes in favor of each and every lot and portion of said land as against each and every other lot and portion thereof;

Further, the purpose of these restrictions is to insure proper development and use of the Premises, to protect the owner of each Lot against such improper development and use of the surrounding Lots as will depreciate the value of his Lot, to prevent the erection on the Premises of structures built of improper design or materials, to encourage the erection of attractive improvements at appropriate locations, to prevent haphazard and inharmonious improvements, to secure and maintain proper setbacks from streets and adequate free spaces between structures, and in general to provide adequately for a high type and quality of improvement of the Premises in accordance with a general plan.

Any and all lots, or portions of lots, conveyed by or for afore-said Owner, or Grantor, and any conveyance thereof accepted by any Purchaser or Grantee, shall be and is expressly made subject to the terms, conditions, covenants, and restrictions following, which shall apply to and be binding upon the parties to such conveyance, their heirs, devisees, legatees, executors, administrators, successors and assigns, to-wit:

1. Said premises shall be used only for the purpose of one-single family private residence per lot, including appurtenant private garage, servants' quarters and other appurtenant outbuildings and improvements and no structure shall be moved from any other place onto said premises. No temporary dwelling, garage, servants' quarters or outbuildings shall be erected on said premises, nor shall any structure be erected or allowed on

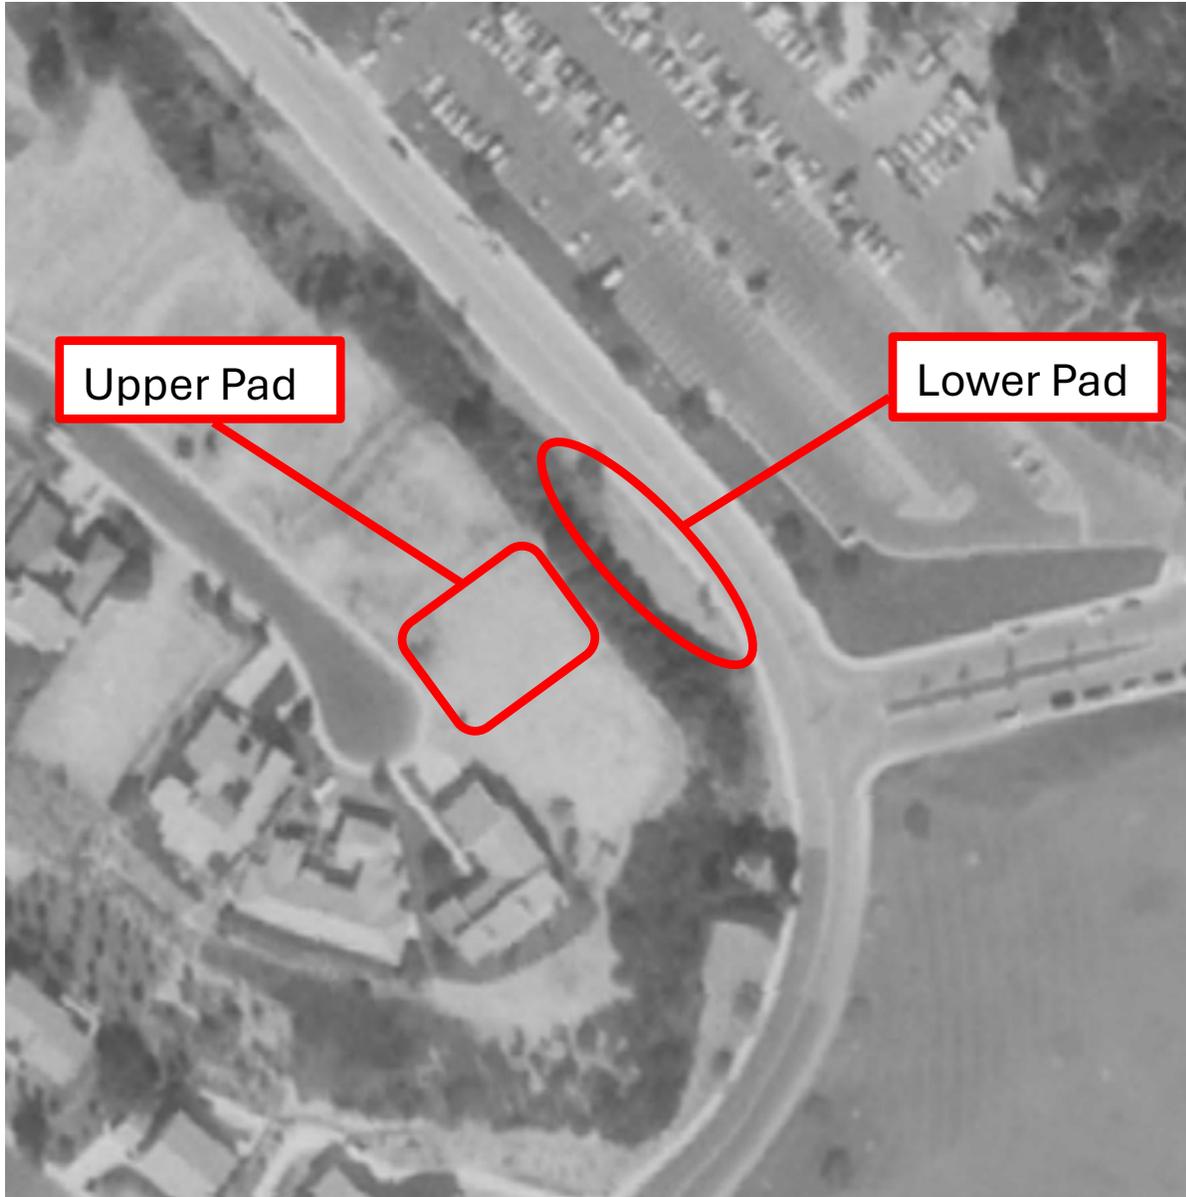

AUG 28 1972

3553

These original community standards restrictions were understandably intended to protect private property interests and value at the time. However, there is no intent to protect public coastal resources, as that is not the purpose of CC&Rs, and the MCE CC&Rs predate the California Coastal Act and the Malibu Local Coastal Program.

The CC&Rs specifically restricted development within areas designated as “Restricted Use Areas” on portions of lots 12, 13, 30, 31, 88, 89, 90, 91, 92, 93, 94, 100, 101, 102, 103, 104, 105, 106, and 107, as shown on Tract No. 30134 [**Attachment B**]. Lot 85 (now 24507 Vantage Point Terrace) was not among the parcels subject to Restricted Use Areas.

An aerial photograph from 1980 clearly shows that Lot 85 contained two distinct graded pads at that time—prior to the City’s incorporation and adoption of local zoning ordinances, the MCE Overlay District, and the Malibu LCP.

Evolution of Regulatory Controls

In the mid-1990s, the Malibu Country Estates HOA and the City collaborated to adopt Custom Subdivision Development Criteria, which effectively codified HOA-based development standards derived from the above-referenced 1972 CC&Rs. On September 10, 1993, then Planning Director Robert Bernard reached out to the Malibu Country Estates HOA to initiate the process of applying for Custom Development Criteria **[Attachment C]**. The Malibu City Council passed an ordinance (#122) in March 1995, thereby establishing the Malibu Country Estates Overlay District.

The Local Coastal Program (LCP/LIP) was later certified in 2002, incorporating many existing development standards and criteria derived from Malibu’s existing local Zoning laws, including portions of the MCE Overlay District, which was derived from the HOA CC&Rs.

It appears that the originally limited, parcel-specific restrictions broadened to limit all development to a single building pad on every MCE parcel, regardless of the existing site conditions or the site-specific restricted use areas called out on the original tract map and CC&Rs. Given the history of the MCE Overlay District/CC&Rs, Staff’s analysis appears to grant undue weight as it pertains to the primacy of this Overlay District through reference to the Coastal Act—despite originating as private view-protection measures, not public resource protections.

LCP vs. State ADU Law

The LCP consists of the Land Use Plan (LUP) and the Local Implementation Plan (LIP). The LUP establishes policies to implement the Coastal Act, while the LIP contains the regulatory provisions applicable to individual projects.

California Civil Code §4751 provides that “Any covenant, restriction, or condition contained in any deed, contract, security instrument, or other instrument affecting the transfer or sale of any interest in a planned development, and any provision of a governing document, that either effectively prohibits or unreasonably restricts the construction or use of an accessory dwelling unit or junior accessory dwelling unit on a lot zoned for single-family residential use that meets the requirements of Article 2 (commencing with Section 66314) or Article 3 (commencing with Section 66333) of Chapter 13 of Division 1 of Title 7 of the Government Code, is void and unenforceable.”

Several conclusions in the Staff Report stem from the mistaken assumption that all elements included in the LCP automatically prevail over State ADU law. While Government Code § 66329 states that ADU law does not supersede the Coastal Act: “*Except as provided in subdivision (b), nothing in this article shall be construed to supersede or in any way alter or lessen the effect or application of the California Coastal Act of 1976 (Division 20 (commencing with [Section 30000](#)) of the Public Resources Code)*”, the 1972 CC&Rs and the MCE Overlay District standards are not referenced or alluded to in any way in the Coastal Act and do not acquire Coastal Act authority simply because certain private property restrictions for the benefit of private property owners were added to the LCP, amidst the public resource protection policies of the Coastal Act that the LCP is required to implement.

If local jurisdictions could insulate ADU-prohibitive policies merely by incorporating them into an LCP, State ADU law would be rendered toothless within the coastal zone—an outcome clearly inconsistent with the legislative intent of State ADU law to enhance housing affordability.

The MCE Overlay District is also part of the local zoning ordinance (MMC 17.42.020(D)), which predates the adoption of the LCP and contains the same requirements. State ADU law supersedes local zoning ordinances. Subdivisions (a) and (b) of § 66325 state:

“(a) Except as provided in subdivision (b), this article shall supersede a conflicting local ordinance.

(b) This article does not limit the authority of local agencies to adopt less restrictive requirements for the creation of an accessory dwelling unit.”

The Coastal Act’s central purpose is protection of public coastal resources, including public views—not the preservation of private views between neighboring parcels nor to maintain high property values, as stated in the CC&Rs.

Correction to Staff Project Description of Project Site

The Staff report describes the parcel as containing a single flat pad with the remainder of the site sloping downward to John Tyler Drive. Based upon the foregoing, this description appears to be inaccurate. The site clearly consists of a flat pad, a slope, and a second flat pad. The omission of the existing lower pad materially affects staff’s analysis and conclusions regarding building pad limitations and slope development. Ultimately, it leads to the erroneous conclusion that findings cannot be made to recommend approval of the proposed ADU.

Building Pads and Development Area

The proposed ADU is not located on a “*proposed building pad*” as staff asserts, but on an existing building pad. As evidenced above, aerial photographs demonstrate that this pad has been in existence since at least 1980. The proposed structure is sited on a pad of less than 3 percent grade, not a slope, and does not extend beyond or cantilever over any downhill slope in accordance with the development standards of the MCE Overlay District.

The parcel contains two existing, legally established building pads. As documented in the attached geotechnical report, the manufactured slope and flat base are comprised of “*well graded*”, compacted, artificial fill, which demonstrates that the existing lower pad was the result of intentional grading. The submitted Geology Report states as follows:

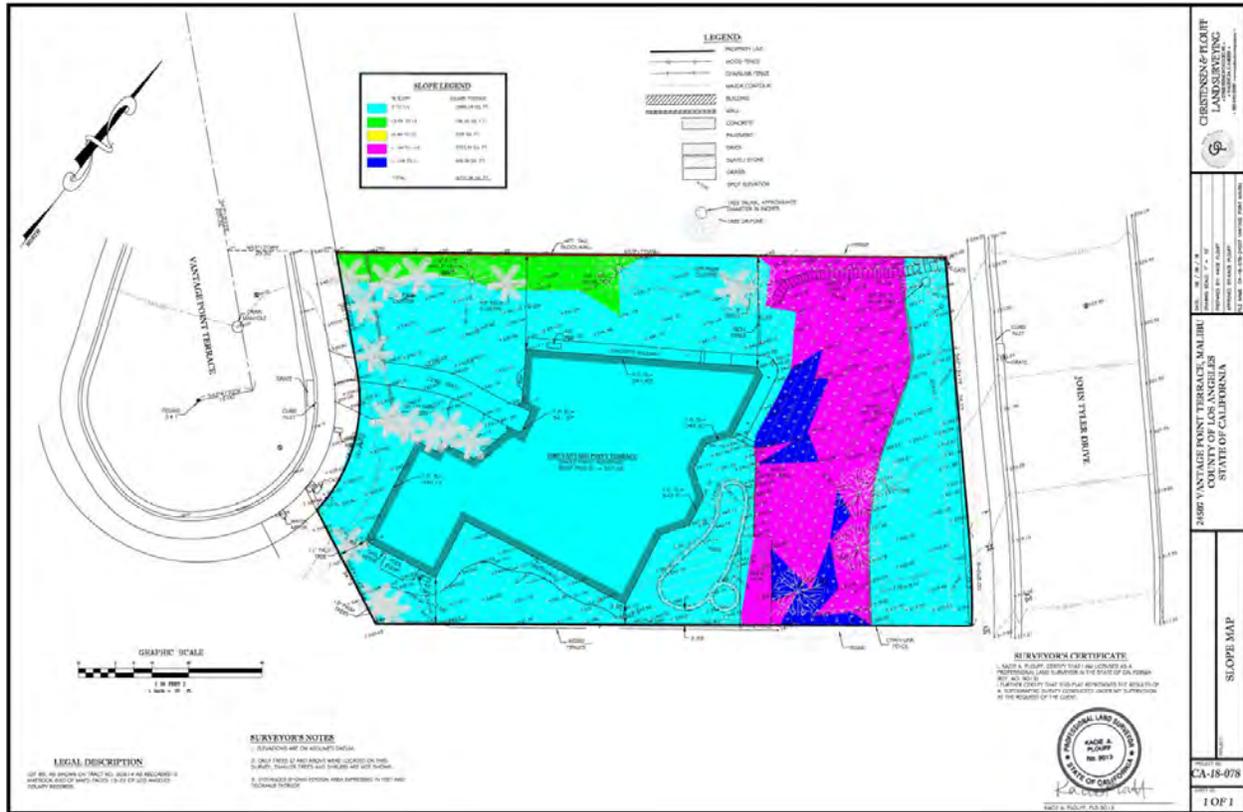

We offer the following general description of materials encountered during our subsurface explorations.

*Artificial fill (af): Approximately 20-feet of certified compacted fill blankets the site. The fill can be described as silty gravelly sand with clay binder. The fill is light grey brown to brown, slightly moist to moist at depth, well compacted, dense with abundant cobble and well graded. The lab work revealed that the upper 2 to 3 feet of material has been disturbed. All undisturbed fill materials are unsuitable for structural support. The fill materials below 3 feet are suitable for use as a base for the placement of compacted fill. (Geotechnical Report Page 5, **Attachment D**)*

And later:

*In areas of proposed development, the upper 3 feet of compacted fill shall be removed and recompacted. Following grading, the building pad area shall be underlain by a minimum of 3 feet of compacted fill. The limits of fill shall extend a minimum of three feet beyond the building footprint. Grading within areas of proposed hardscape shall consist of removing previous fill to expose firm compacted fill and the placement of new fill to design grades. (Geotechnical Report Page 11, **Attachment D**)*

LIP Section 3.4.1(D)(6)(d) states, “For the purposes of this Overlay District, a building pad shall be defined as a single, continuous, graded area, not exceeding 3 percent in slope, designed to accommodate development.” The conditions present in the lower building pad meet all objective criteria for the definition of a building pad. It is a uniformly graded whole (per page 5 of the geotechnical report cited above) that does not exceed 3 percent in slope (shown on the slope map below). In summary, contrary to the assessment provided in the Staff Report, the proposed building site is an existing, legally established, graded pad. No new pad is proposed, no grading to extend a pad is proposed, and no grading to create a new pad is proposed.

Other parcels within Malibu Country Estates were subject to Restricted Use Areas under the original tract map; Lot 85 was not. Accordingly, Lot 85 cannot now be artificially limited to one pad when two pads have long existed.

Views – Public vs. Private

The MCE Overlay’s building pad provisions were designed to preserve private views as demonstrated in the previously cited 1972 MCE CCRs, not public coastal views. No public views are impacted by the proposed ADU. Moreover, no private views are impacted, given an 11-foot 2-inch height for the proposed structure and an approximately 20-foot slope, which shields it from view from uphill neighbors.

(Attachment E)

Public Resources Code section 30251 states,

The scenic and visual qualities of coastal areas shall be considered and protected as a resource of public importance. Permitted development shall be sited and designed to protect views to and along the ocean and scenic coastal areas, to minimize the alteration of natural land forms, to be visually compatible with the character of surrounding areas, and, where feasible, to restore and enhance visual quality in visually degraded areas.

The proposed ADU siting will not impact public views, in accordance with the Coastal Act. Additionally, the proposed ADU is sited on an existing graded and manufactured pad. Therefore, no alteration of natural landforms is proposed.

Similarly, chapter 6 of the LIP directs new development to minimize adverse visual impact.

6.5. DEVELOPMENT STANDARDS A. Development Siting 1. New development shall be sited and designed to minimize adverse impacts on scenic areas from scenic roads or public viewing areas to the maximum feasible extent. If there is no feasible building site location on the proposed project site where development would not be visible, then the development shall be sited and designed to minimize impacts on scenic areas from scenic highways or public

viewing areas, through measures including, but not limited to, siting development in the least visible portion of the site”

Siting the ADU on the existing lower building pad conforms with the LIP in that it is the least visible portion of the site.

Single Building Pad

In discussing LIP Chapter 6, staff asserts that each parcel was designated a single building pad at that time. This does not appear to be supported by the record. The tract map (**Attachment B**) recorded August 25, 1972, identifies Restricted Use Areas on specific parcels only, and Lot 85 was not among them.

The 1980 aerial photograph further confirms the presence of a second lower pad on Lot 85.

(Attachment E)

MCE Overlay District Intent

Staff asserts that “*the standards of the MCE Overlay District are intended to maximize the protection of scenically impressive views from public viewing areas, including scenic roads.*” This is inconsistent with the express intent of the CC&Rs. Nowhere in the CC&Rs is there mention of protecting public views. Quite the opposite. They exist to protect the

owner of each lot. As stated in the CC&Rs, *“The purpose of these restrictions is to insure proper development and use of the Premises, to protect the owner of each Lot.”*

Alternative Design Analysis

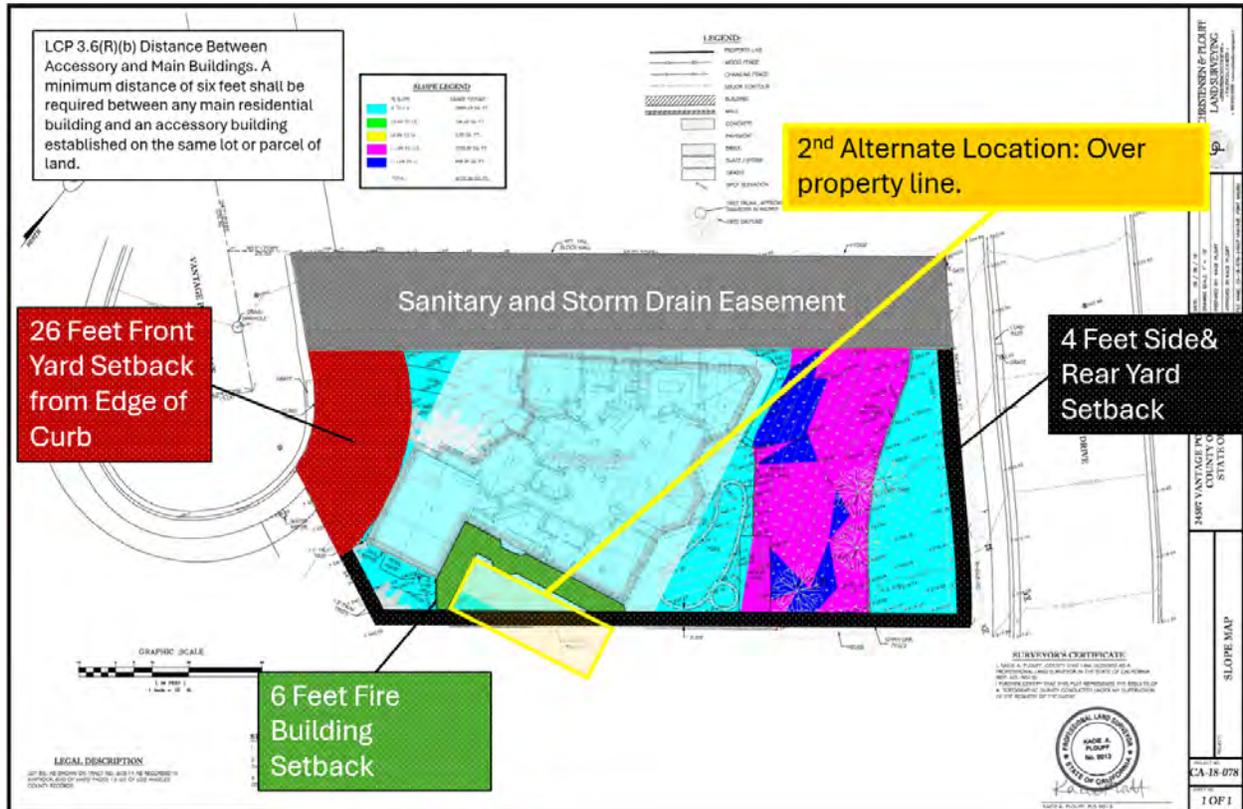

The Staff Report states that, *“the applicant has not provided an alternate design depicting existing constraints to development on the existing building pad or project feasibility/infeasibility at an alternate location.”* To clarify, the applicant submitted a constraints map to City staff on September 7, 2022, which demonstrated significant constraints for development of an ADU on the upper portion of the lot. In order to further clarify the implications of these constraints, our office has included an expanded alternatives analysis, submitted with this response, that clearly depicts the impracticality and infeasibility of siting the ADU in alternative locations.

The Staff report suggests that conversion of the existing garage to an ADU might be a feasible alternative. However, this option would eliminate required on-site covered parking and require property owner vehicles to be parked on a cul-de-sac with limited street parking. This would be in opposition to one of the stated purposes of the LCP: *“1.2. PURPOSE (H.) To lessen congestion on the streets and provide for adequate off-street parking.”*

It appears that converting the garage to an ADU and ignoring the on-site parking requirements would be less consistent with the requirements of the LCP than the provisions of the MCE Overlay District that are cited by Staff as a basis for denial. Unlike the siting of the proposed ADU on the lower pad, garage conversion and off-site parking would have meaningful adverse impacts to neighbors’ use and enjoyment of their property, parking for guests, etc.

Staff asserts an *“alternate design also appears feasible given that the existing building pad is sufficient in size to support other existing uses including a pool, spa, and wooden deck.”* However, the presence of recreational amenities does not demonstrate capacity for an ADU. The presence of a chimney or a bay window would not demonstrate the capacity for an ADU on a building pad any more than the presence of a pool. Capacity for one type of use is not inherently interchangeable with another. It is unclear whether Staff is proposing that the applicant remove the existing pool or deck in order to construct the ADU. However, that is not proposed, and it is not the applicant’s desire to remove/trade existing development for the ADU, when the proposed development meets the requirements of State ADU law. Additionally, there are other considerations/constraints that make trading out the pool or deck for an ADU infeasible.

The alternatives analysis' 2nd Alternate Location clearly shows the infeasibility of siting the ADU on the side yard, as there is not enough space between the main residence and the property line, even when utilizing the reduced setbacks afforded by State ADU Law. The proposed location is the only alternative that sufficiently meets the requirements/allowances for an ADU under State Law, the Coastal Act, and relevant local ordinances.

Alternatives Analysis – 2nd Alternate Location

Dimensional Standards: Setbacks

Staff asserts that, “the proposed project is inconsistent with several requirements in the MCE Overlay District including an approximate 73% reduction in the required rear yard setback (from 15 feet to 4 feet).” However, the proposed 4-foot rear yard setback and 6-foot 7-inch interior yard setback comply with State ADU law, which permits “four-foot side and rear setbacks [Gov. Code, § 66321, subd. (b)(3)].” Setbacks from property lines (i.e. yard setbacks) are a function of local zoning regulations, which State ADU law explicitly supersedes. The yard setbacks contained within the LCP are the same as those contained

within the City’s local zoning ordinance and therefore do not fall under ADU law provisions to adhere to Coastal Resource protection policies of the Coastal Act.

Dimensional Standards: Walls

The staff report asserts: “The proposed project fails to meet various requirements outlined in LIP Chapter 3 including...LIP §3.4.1(D)(4)(a) which stipulates that, “*no walls...in excess of 6 feet shall be allowed within the required rear...yard setback areas,*” (*wall heights associated with the proposed structure extend above 6 feet in the rear yard setback*).”

Walls are defined in the LCP §2.1 as “*artificially constructed barriers...erected to enclose or screen an area of land.*” This definition does not apply to the wall of a residential structure.

Clearly, the exclusions listed in LIP Section 3.4.1(D)(6)(a) “*All development, excluding walls and fences, shall be limited to the existing building pad*” and (c) “*No structure, excluding walls and fences, shall extend beyond, or be cantilevered over, any downhill slope extending from the existing building pad.*” would make no sense if it were referring to the walls of a structure. In this case, the term “wall” is being used in the technical sense defined in the LCP rather than the more commonly used vernacular.

Regardless, Government Code §66314 (d)(7) allows “*a setback of no more than four feet from the side and rear lot lines shall be required for an accessory dwelling unit that is not converted from an existing structure or a new structure constructed in the same location and to the same dimensions as an existing structure*”, and the project complies.

Dimensional Standards: Structure Height

The Staff Report asserts that the proposed ADU does “*not comply with LIP*” as it pertains to height and cites §3.4.1(D)(5)(d)(i-ii) (highlighted below and shown in context).

§3.4.1(D)

5. Structure Height:

- a. No building or structure shall exceed one story and 18 feet in height to the highest point on the roof, except for chimneys, for those parcels located in Area “A” of this Overlay District as designated on the Zoning Map.*
- b. No building or structure shall exceed two stories and 28 feet in height to the highest point on the roof, except for chimneys, for those parcels located in Area “B” of this Overlay District as designated on the Zoning Map.*
- c. No building or structure shall exceed 18 feet in height to the highest point on the roof, except for chimneys, for the portion of the structure within 34 feet of the front property line and shall not exceed two stories and 28 feet in height to the highest point on the roof for the remaining portions of the building for those parcels located in Area “C” of this Overlay District as designated on the Zoning Map.*

d. The reference point for structure height measurements described in subsections a, b and c above shall be as follows:

i. For an addition or remodel of an existing structure, the height shall be measured from the finished first floor except that the new structure height shall not exceed that of the existing structure at its highest point on the roof, excluding chimneys.

ii. For the case where no structure exists or when an existing structure is removed to rebuild or replace, the height shall be measured from the control point set forth in the chart below.

*iii. The finished first floor level of any part of any building shall not be more than 3 feet above the control point shown in the **chart below**.*

The Staff Report erroneously concludes that the above code “Limits structure height to additions/remodels of existing structure, vacant parcels or where an existing structure is replaced.” This analysis does not appear to construe and apply the code correctly; the code appears instead to indicate the proper height and relative control point elevation for all construction cases. For addition or remodel of an existing structure “i” is in effect. For cases where no structure exists or when an existing structure is removed to rebuild or replace “ii” is in effect. The ADU is proposed to be constructed on the lower building pad where no structure exists, thus per the code “the height shall be measured from the control point set forth in the chart below.”

Additionally, the “chart below” referenced in LIP Section 3.4.1(D)(5)(d)(ii and iii) does, in fact, not exist anywhere in the LIP. It appears in the local zoning ordinance (MMC 17.42.020(D)) from which the MCE Overlay standards were derived, but it was never adopted into the LCP. This omission, where the reference was copied but the referent was not, further demonstrates how MCE Overlay standards contained in the LCP derive from local zoning (in an incomplete manner), not the Coastal Act, and are superseded by State ADU law. The Staff Report conclusions and even the code itself are both incomplete and convoluted, when the proposed project’s consistency with regards to height is abundantly clear and simple. The proposed ADU is consistent with the lowest maximum allowable height within the MCE Overlay District at less than 18 ft. in height, as the proposed ADU is only 11 ft. 2 inches in height.

Roofing Materials

Although enhanced requirements for certain roof aesthetics do not fall under the purview of the Coastal Act and could be construed as an undue cost imposed on an ADU under State ADU law, the applicant has agreed to revise the roofing materials from the previously proposed architectural shingles to Mediterranean Brava tile. This tile matches exactly the tiles approved for the primary residence in 2022 and is fully consistent with LIP Section 3.4.1(D) “*Roof materials shall be limited to clay tile, concrete tile or similar material.*” This

modification addresses concerns with regards to LCP consistency as it pertains to roofing materials.

Archaeological Resources

The Staff Report discusses archaeological resources and seems to imply that there are potentially some questions in this regard. However, Staff did not request any information or documentation prior to issuance of the Staff Report, as confirmed by the submitted checklist pictured below wherein Staff checked the box that an Archaeology Survey would not be required. The original determination is understandable, given that the Staff Report notes the "project site has been evaluated for potential impacts to archeological resources per the adopted City of Malibu Cultural Resources Map and it has been determined that due to the previous grading activities to create the existing building pad and MCE community, the project has very low probability of disturbing archaeological resources for construction proposed on the existing building pad." Based upon the foregoing, it appears that appropriate Staff level review has been completed under the requirements of LIP Chapter 11 and findings should be made that the project is consistent with the LCP as

it pertains to Archaeological Resources.

City of Malibu

Coastal Development Permit Submittal Checklist

NOTE To submit a new application with the City of Malibu Planning Department, all required items as specified by City Staff on the Submittal Checklist, including application fees and those materials required by City Departments, must be provided at the time of submittal. **Incomplete application submittals WILL NOT be accepted.** An appointment is required for submittals. For an appointment, call 310-456-2489, ext. 485, or email mplanning@malibucity.org. See the [New Application Submittal Guide](#) for more information. For more information, visit the [Planning Department](#) website.

Trees

The Staff Report references four trees that were not explicitly identified on the site survey and allude to uncertainties about whether the project is in compliance with Native Tree protection policies of the LCP. To clarify, the identified trees consist of three cedar trees and one orange tree. These are non-native species and are not among the protected trees listed in LCP Chapter 5 (oak, walnut, sycamore, alder, and toyon).

(Attachment H)

Impermeable Coverage

The Staff Report states that LIP §3.4.1(D)(7) “*strictly limits impermeable surfaces on the existing building pad (the proposed structure is located on a proposed second building pad).*” As discussed previously, the ADU is proposed to be sited on the existing lower building pad as defined in LCP Section 3.4.1(D)(6)(d). Thus, per LIP §3.4.1(D)(7) “*Impermeable Coverage: There shall be no maximum impermeable coverage limitation. However, including any structures, impermeable surfaces shall only be permitted on the existing building pad...*” Contrary to the Staff Report’s assertion that there are strict limits on impermeable surfaces, the Code explicitly states that there is “no maximum impermeable coverage limitation” in the MCE Overlay, provided construction takes place on an existing building pad, which is what the applicant is proposing, as outlined above. Therefore, it is our understanding that the project complies with LCP impermeable coverage allowances/requirements.

Grading

Per the Staff Report, the “*building pad proposes remedial and re-compaction grading for the upper 3 feet of previously compacted fill to be removed and recompact to a minimum of 3 feet beyond the proposed footprint.*” The City’s Grading Verification Form

that Staff utilizes to verify compliance with the LCP has separate columns for “Remedial” and “R&R” (further defined as “Removal and Recompaction”). It is unclear which was intended in Staff’s reference to “remedial and re-compaction grading”.

TOTAL GRADING YARDAGE VERIFICATION CERTIFICATE

PLANNING DEPARTMENT REVIEW LEVEL

PROJECT NUMBER: _____

PROJECT ADDRESS: _____

The completed form must be provided at the time of Planning Department application for grading approval. All applicable cubic yardages shall be completed in the table. **All calculations utilized to estimate the cubic yardages indicated shall be attached to this form.** This form and the required calculations must be prepared by a State of California Licensed Civil Engineer. The form and the calculations shall be stamped and wet signed by the preparing party.

	Exempt			Non-Exempt	Remedial	Total
	R&R	Understructure	Safety			
Cut						
Fill						
Total						
Import						
Export						

All quantities indicated shall be in cubic yards only.
 R&R = Removal and Recompaction – *R&R must be balanced.*
 Safety Grading is required grading for L.A. County Fire Department access approval beyond the 15 foot minimum access and may include turnouts, hammerheads, turnarounds, and access roadway widening.
 Remedial grading is grading recommended by a full site geotechnical or soils report prepared by a licensed geologist or soils engineer which is necessary to correct physical deficiencies on the site for the construction of a primary residential structure or access to the lot.
 Imported means soil that is brought on to the site. Exported means soil that is leaving the site. This information will be used to calculate the number of truck trips required for site preparation.

To clarify, the only grading proposed is the removal/recompaction for the foundation per the recommendations of the Geotechnical Report, which states that:

In areas of proposed development, the upper 3 feet of compacted fill shall be removed and recompacted. Following grading, the building pad area shall be underlain by a minimum of 3 feet of compacted fill. The limits of fill shall extend a minimum of three feet beyond the building footprint. Grading within areas of proposed hardscape shall consist of removing previous fill to expose firm compacted fill and the placement of new fill to design grades.

(Geotechnical Report Page 11, Attachment D)

This type of grading is explicitly exempted per the LCP 8.3. DEVELOPMENT STANDARDS I. “Exceptions. Excavation for foundations and other understructure excavation and

*incremental excavation for basements and safety purposes **shall be excluded from grading limitations.***” This is further verified by the City’s Total Grading Yardage Verification Certificate, which notes that R&R grading is exempt. Therefore, contrary to the Staff Report analysis, the proposed project complies with the LCP as it pertains to grading, as the proposed R&R grading for the foundation is excluded from LCP grading limitations.

Conclusion

In summary, the Staff Report’s recommendation is premised on a misunderstanding and/or mischaracterization of the site, an overextension of the MCE Overlay District’s intent and authority under ADU law, and a conflation of private, HOA-derived view protections with the Coastal Act’s mandate to protect public coastal resources. The historical record confirms that Lot 85 was not originally subject to a single-pad restriction, that two graded pads have existed on the parcel for decades, and that the proposed ADU fully complies with the objective definition of a building pad under the LIP. The project is sited on the least visible portion of the site, does not impact public views, proposes no non-exempt grading/landform alteration or new pad, maintains existing required on-site covered parking to avoid adverse impacts to neighbors, conforms to applicable Coastal Act and LIP standards for Coastal resource protection, and is entitled to the protections afforded by State ADU law, which supersedes conflicting local zoning provisions. Additionally, the project has no impacts to public access or Environmentally Sensitive Habitat Areas and is compliant with all provisions/allowances/requirements of State ADU law. For these reasons, we believe that the proposed ADU should be found consistent with the LCP as applied under relevant State Law/requirements and approved accordingly.

Thank you for your time, attention, and consideration of this additional information. If there are any questions, please let us know.

Sincerely,

Keystone Strategic Planning

Matt Jewett

DECLARATION OF RESTRICTIONS

FEE \$ 14.26

THIS DECLARATION OF RESTRICTIONS, made this 17th day of AUGUST 1972 by Century Malibu, Inc., a Delaware corporation, hereinafter called OWNER or GRANTOR, having its principal office in California at 10100 Santa Monica Boulevard, Los Angeles, California, Owner in fee simple of all that real property situated in the County of Los Angeles, State of California, described as follows:

All Lots contained in Tract No. 30134, as per map thereof recorded in the office of the County Recorder of the County of Los Angeles, on 8-25-72, in Book 820, Pages 15 to 22, inclusive, of Maps, in the records of said County of Los Angeles, which property has been subdivided into lots as shown on said map for the purpose of sales and conveyance thereof;

NOW, THEREFORE, this Declaration of Restrictions WITNESSETH:

That for the purpose of designating and creating certain conditions and restrictions upon all of said lots for the benefit of all other lots in said Tract, the following covenants, conditions and restrictions shall apply to said land as well before the execution and delivery to any buyer thereof, of a deed conveying said realty to said buyer, as after said deed shall have been executed and delivered, and shall operate as covenants running with the land, being hereby created as mutual equitable servitudes in favor of each and every lot and portion of said land as against each and every other lot and portion thereof;

Further, the purpose of these restrictions is to insure proper development and use of the Premises, to protect the owner of each Lot against such improper development and use of the surrounding Lots as will depreciate the value of his Lot, to prevent the erection on the Premises of structures built of improper design or materials, to encourage the erection of attractive improvements at appropriate locations, to prevent haphazard and inharmonious improvements, to secure and maintain proper setbacks from streets and adequate free spaces between structures, and in general to provide adequately for a high type and quality of improvement of the Premises in accordance with a general plan.

Any and all lots, or portions of lots, conveyed by or for aforesaid Owner, or Grantor, and any conveyance thereof accepted by any Purchaser or Grantee, shall be and is expressly made subject to the terms, conditions, covenants, and restrictions following, which shall apply to and be binding upon the parties to such conveyance, their heirs, devisees, legatees, executors, administrators, successors and assigns, to-wit:

1. Said premises shall be used only for the purpose of one-single family private residence per lot, including appurtenant private garage, servants' quarters and other appurtenant outbuildings and improvements and no structure shall be moved from any other place onto said premises. No temporary dwelling, garage, servants' quarters or outbuildings shall be erected on said premises, nor shall any structure be erected or allowed on

AUG 28 1972

3553

said premises which is not designed, built, maintained and used exclusively for private residential purposes or for making said premises more convenient for residence thereon. When the construction of any residence or structure is once begun, work thereon shall be prosecuted diligently and must be completed within a reasonable time. No shack, tent or trailer shall at any time be used on said premises as a residence, either temporarily or permanently, except that during the construction of a residence and upon written approval of the trailer to be used, and its proposed location, a trailer may be used on said premises for the purpose of construction efficiency for a period not to exceed eight months, provided the trailer and its use conform to all requirements of the County of Los Angeles.

2. All oil and mineral rights have been reserved by a former owner but with no right of surface entry. No well for the production of, or from which there is produced oil, gas or water, shall be drilled, dug or operated on said premises; nor shall any excavation be made on said premises, unless such excavation is necessary in connection with the erection of an approved structure thereon. No rubbish or debris of any kind or character shall ever be placed or permitted to accumulate upon said premises so as to render said premises unsanitary, unsightly, offensive, or detrimental to any other lot or lots in said Tract, or to the occupants thereof.

3. No building or other structure of any nature whatsoever, nor any addition to any building or other structure, shall be erected, maintained or permitted on said premises or the erection or construction thereof begun thereon, until complete Plans and Specifications prepared under the supervision of a registered architect or registered building designer shall have first been approved in writing by the Committee hereinafter provided for. Preliminary Plans must be submitted for approval prior to completion of the Final Plans and it is suggested that in order to avoid unnecessary planning and revision costs, schematic plans may be submitted before Preliminary Plans. Three sets of Final Plans and Specifications for any and all buildings, structures, walls, fences, and any alterations thereof or additions thereto, together with proposed exterior colors to be approved, shall be submitted to said Committee for approval, and all such Final Plans and Specifications shall show in detail the nature, kind, shape, height, material, color scheme and elevation of any such structure, and shall likewise show in detail the lot or building site plan indicating the location of such building or structure, and all outbuildings on any building site, and, when specifically requested, the grading plan of the building site to be built upon; said Plans and Specifications shall in every case be complete and detailed, and no structure of any kind shall be erected, maintained or permitted on said premises if the plans, elevations and specifications of such structure have not received the written approval of said Committee or which does not fully comply with such approved Plans, Specifications and Elevations, or which is not located on the building site upon which the same is to be erected according to said Plans and Specifications. One set of any such Plans and Specifications shall be retained by said Committee.

Final Plans submitted for approval, in addition to showing setbacks and other details, shall show the relation of the finished first floor level or floor levels of the house, to the highest point of the front street curb of such lot and shall include a Plot Plan showing contour lines of the existing pad and any proposed changes therein. Such plans shall also show:

AUG 28 1972

3553

- a. The total number of square feet in such house as determined in accordance with Paragraph 8 hereof.
- b. The relation in terms of feet of the maximum roof height of the house, to the highest point of the front street curb of such lot, in accordance with paragraph 10 hereof.
- c. The relation in terms of feet of the garage floor to the finished floor level or levels of the house in accordance with paragraph 10 hereof.

In the event that said Committee fails to approve or disapprove such plans within thirty (30) days after submission of the plans to it, then such approval will be deemed to have been given; PROVIDED, HOWEVER, that all other restrictions and conditions contained in this Declaration of Restrictions, including any Amendments thereto made with the concurrence of all the lot owners, shall remain applicable to such plans and all structures to be erected on the lot or building site to which the plans refer.

If the plans as submitted are approved by the Committee, such approval shall be limited solely to approval of the exterior architectural design of the buildings, walls, fences and other structures to be erected on the premises to which the plans refer. Approval for use on any lot of any plans or specifications shall not be deemed a waiver of the Committee's right, in its discretion, to disapprove such plans, features or elements, which are subsequently submitted for approval for use on any other lot or lots.

The owner of each respective lot in said Tract No. 30134 has the sole responsibility at all times of determining that all plans and specifications for the structures to be erected on such lot and the erection of all buildings, walls, fences and other structures on such lot conform and comply in all respects with this Declaration of Restrictions and all amendments hereto, with the covenants and recitals in the deed to such lot and with all building codes, rules, orders and regulations of the proper governmental authority, and that the exterior architectural design and color of all structures, when completed, conform with the exterior architectural design and color as approved by the Committee.

The Committee shall have the authority and right to inspect premises under construction for the purpose of determining that all construction complies with the plans, elevations and specifications as approved by it, but shall have no responsibility to take such action. Grantor may from time to time at any reasonable hour, enter and inspect any lot, structure or other property subject to these restrictions for the purpose of determining compliance herewith.

4. The Committee hereinabove referred to shall consist of not less than three (3) members. Any action by said Committee may be taken by a majority thereof, and the members of said Committee may act without a meeting. CENTURY MALIBU, INC., Grantor, shall have the right, and it shall be the duty of said Company to appoint the initial three members of such Committee; one of which may be replaced by a member to be appointed by a majority of the lot purchasers within the Tract after the first 50 lots have been sold. CENTURY MALIBU, INC., Grantor, shall have the right at any time to remove any of the three (3) members of said Committee so appointed by it, and to fill any vacancies caused by such removal or by the death,

AUG 28 1972

3553

resignation, or other inability to act, of said Committee members. In the event and whenever said CENTURY MALIBU, INC., Grantor, desires to be relieved of the responsibility of maintaining such Committee, it may do so by filing, in the office of the County Recorder of the County of Los Angeles, a notice to that effect, and thereafter the right of appointing and removing members of said Committee shall be vested in the persons owning lots in said Tract, who may act by a majority of such lot owners, either at a meeting of such lot owners or in writing without a meeting. In no event, however, shall CENTURY MALIBU, INC. be liable for the consequences of action or inaction by said Committee or any member or members thereof whether appointed by CENTURY MALIBU, INC., Grantor, or otherwise.

5. Roofs shall be covered with wood shingle, wood shake, clay tile, concrete tile, or such other material and color as may be approved by the Committee, provided, however, that no flat roof shall exceed 20% of the total roof area, and provided further that no composition shingle, asphalt shingle, composition sheet, rock or gravel roof shall be used on any of the roof area except the above-mentioned flat area which shall not exceed 20% of the total roof area. No simulated mansard roof shall be used and any true mansard design shall be covered with metal sheeting or wood shingles, the design, material and treatment of which shall be approved by the Committee. For the purpose of these restrictions, any roof or portion thereof having a pitch flatter than 8 feet horizontally to 1 foot vertically shall be construed to be a flat roof.

No air conditioning unit nor air conditioning vents shall be exposed above the roof of any structure, and air conditioning units and vents, pump equipment and motors for swimming pools, etc., if any, shall be enclosed in a manner in keeping with the architecture of the home structure and shall be soundproofed so as not to be a nuisance to adjacent or nearby homeowners.

Patio walls and roofs shall be of the same design and material as the main part of the house, and the roof thereof shall be subject to the same provisions as above. Roll-back or sliding canvas covers or awnings may be used over patios provided the design and colors are approved by the Committee.

6. All exterior stucco shall be painted.

7. No lot may be subdivided for any reason whatsoever, except that three or more adjacent lots may be combined and the resulting total area divided into a smaller number of lots, with the approval of the County of Los Angeles, provided each resulting lot is larger than any one of the original lots so combined.

8. No residence building shall ever be erected, maintained or permitted on said premises which building contains less than 2,000 square feet of floor area.

In determining the number of square feet contained within any residence building erected or to be erected on said premises, the space contained within covered or uncovered porches, covered or uncovered entries, balconies, garage (whether or not it is an integral part of the residence), covered or uncovered patios, basement or cellar, shall not be considered in computing the square footage contained in any such building. For the purpose of computing the "minimum required floor area", it shall be deemed to include the total floor area of the residence building, measurements to be taken for this purpose from the outer faces of exterior walls.

AUG 28 1972

3553

9. All buildings on lots 1, 2, 5 to 14, inclusive, 16 to 30 inclusive, 35 to 38 inclusive, 41, 45 to 49 inclusive, 57 to 75 inclusive, 79 to 98 inclusive, and 107 shall not exceed one story in height above the finished first floor level.

Buildings on lots 3, 4, 15, 31 to 34 inclusive, 39, 40, 50 to 56 inclusive and 76 to 78 inclusive, shall not exceed two stories in height above the finished first floor level.

Buildings on lots 42 to 44 inclusive, and 99 to 106 inclusive, may have the rear portion of the building two stories in height, provided no portion of the building within the first 34 feet back from the front property line exceeds one story in height above the finished first floor level.

10. The highest point of the roof (chimneys excepted) of buildings on lots 1, 2, 5 to 14 inclusive, 16 to 30 inclusive, 35 to 38 inclusive, 41, 45 to 49 inclusive, 57 to 75 inclusive, 79 to 98 inclusive, and 107 shall not exceed eighteen (18) feet above the control point designated for each respective lot on the schedule hereinafter shown as Schedule 10A.

The highest point of the roof (chimneys excepted) for all buildings on lots 3, 4, 15, 31 to 34 inclusive, 39, 40, 50 to 56 inclusive and 76 to 78 inclusive, shall not exceed twenty eight (28) feet above the control point designated for each respective lot on Schedule 10A.

The highest point of the roof (chimneys excepted) of all portions of buildings limited to one story in height as per Paragraph 9 above on lots 42 to 44 inclusive and 99 to 106 inclusive, shall not exceed eighteen (18) feet above the control point designated for each respective lot on Schedule 10A. That portion of buildings limited to two stories in height on the above lots shall not exceed twenty eight (28) feet above the control point designated for each respective lot on Schedule 10A.

The finished first floor level of any part of any building shall not be more than 3 feet above the control point shown in Schedule 10A.

The finished floor level of any garage shall not be more than eight (8) feet below the height control point for each respective lot as shown in Schedule 10A, and no retaining wall adjacent to and parallel with either side of a driveway shall exceed three (3) feet in height within the front setback area of any lot.

11. No residence or any part of any residence, garage or any other building or structure, exclusive of walls and fences, shall be placed on any lot nearer than 26 feet from the front of the front curb of said lot; and front, side and rear building setback lines on each lot shall conform in all respects to requirements of the County of Los Angeles, provided that no structure, including a porch, balcony, patio or terrace, but excluding walls and fences, shall extend down or be cantilevered or otherwise constructed over or on any downhill slope beyond the front, side or rear lines of the manufactured pad; and provided further that in the case of corner lots, any driveway entering said lot from the secondary street shall have at least 26 feet of driveway between the curb on said secondary street and the entrance doors to the garage.

The right has been dedicated to the County of Los Angeles to restrict the erection of buildings or other structures within areas designated as "Restricted Use Areas" on portions of lots 12, 13, 30, 31, 88, 89, 90, 91, 92, 93, 94, 100, 101, 102, 103, 104, 105, 106 and 107 on the map of Tract No. 30134.

AUG 28 1972

3553

SCHEDULE 10A

The following schedule has been established to set a control point for each lot (which control point represents the height of the approximate center of each lot pad) from which the maximum roof height and the maximum finished first floor level shall be measured. The control point for each lot pad is above or below the highest point of the curb of each respective lot, as follows:

	<u>Number feet above or below high point of curb</u>		<u>Number feet above or below high point of curb</u>		<u>Number feet above or below high point of curb</u>
Lot No. 1	<u>- 1.6</u>	22	<u>- 2.1</u>	43	<u>+ 0.8</u>
2	<u>+14.2</u>	23	<u>- 0.3</u>	44	<u>+ 0.7</u>
3	<u>+26.7</u>	24	<u>+ 0.2</u>	45	<u>-14.9</u>
4	<u>+20.1</u>	25	<u>- 1.3</u>	46	<u>- 5.2</u>
5	<u>-12.9</u>	26	<u>- 1.5</u>	47	<u>- 2.4</u>
6	<u>- 3.2</u>	27	<u>- 9.7</u>	48	<u>- 0.6</u>
7	<u>- 5.0</u>	28	<u>- 5.7</u>	49	<u>+ 0.4</u>
8	<u>- 5.1</u>	29	<u>+ 1.5</u>	50	<u>+ 4.3</u>
9	<u>- 6.6</u>	30	<u>+ 1.4</u>	51	<u>+ 4.4</u>
10	<u>- 6.0</u>	31	<u>+ 3.4</u>	52	<u>+ 8.3</u>
11	<u>- 0.6</u>	32	<u>+ 3.1</u>	53	<u>+ 3.1</u>
12	<u>- 1.9</u>	33	<u>+ 1.1</u>	54	<u>- 6.4</u>
13	<u>- 3.9</u>	34	<u>- 0.2</u>	55	<u>+ 7.0</u>
14	<u>- 1.2</u>	35	<u>+ 0.5</u>	56	<u>+ 6.1</u>
15	<u>+15.2</u>	36	<u>+ 1.8</u>	57	<u>+ 0.5</u>
16	<u>+11.2</u>	37	<u>- 3.3</u>	58	<u>+ 3.4</u>
17	<u>+12.4</u>	38	<u>+ 3.1</u>	59	<u>+ 2.2</u>
18	<u>+ 4.7</u>	39	<u>+24.8</u>	60	<u>+ 0.3</u>
19	<u>-14.4</u>	40	<u>+22.9</u>	61	<u>+ 1.0</u>
20	<u>+15.7</u>	41	<u>- 0.4</u>	62	<u>+ 1.2</u>
21	<u>+ 1.5</u>	42	<u>+ 2.6</u>	63	<u>+ 0.8</u>

AUG 28 1972

		94	- 0.8
		95	+ 2.4
		96	- 0.7
		97	- 0.5
		98	-14.5
		99	- 3.2
		100	- 4.4
		101	- 2.5
		102	- 6.4
		103	- 7.6
		104	- 2.9
		105	+ 0.9
		106	+ 4.1
		107	- 2.6

Note:

In the case of a corner lot, the highest point of the curb (from which the above measurement has been made) may be located on the primary or secondary street. In the case of Lot 56, the measurement has been made from the highest point of the curb on Malibu Country Drive.

The above control points for each lot are intended to represent the height of the approximate center of each lot pad as originally graded. If a subsequent certified survey indicates that the approximate center of any of the above lots as originally graded is different from the control point so designated, said control point to be used for the respective lot shall be adjusted to the correct control point.

AUG 28 1972

3553

In addition to the above, no structure, wall or fence in excess of six feet in height shall be constructed on any area of the following lots which area is located more than the number of feet designated below, as measured from the front of the curb of such lot:

- Lots 62 - 64 inclusive - 137 feet
- Lots 90 - 93 inclusive - 137 feet
- Lots 94 - 96 inclusive - 117 feet

IT IS EXPRESSLY UNDERSTOOD, however, that any eave or roof overhang extending beyond the wall of such structure or structures a distance of 48 inches or less shall not be considered a violation of these restrictions. Any garage structure not connected with the residence as an integral part thereof shall be located not nearer than the required setback for the main structure from the FRONT property line of said building site.

12. If driveway curb cut and apron are in place on a given lot, the driveway shall remain at such location, unless a different location is approved by the Committee and the existing curb cut is replaced with curb and sidewalk of design typical of Tract 30134 and using the typical concrete mixture specified below. On other lots, the driveway curb cut and apron may be at such location as may be approved by the Committee and shall be of design typical of Tract 30134 and paved with concrete having a typical formula mixture of two pounds lamp black to each cubic yard of concrete mixture. Driveways between street and garage may be of black top, concrete having typical lamp black mixture as above, or such other material as may be approved by the Committee.

The following lots shall have reciprocal easements for driveway purposes: lots 2 and 3, lots 4 and 5, lots 15 and 16, lots 39 and 40, and lots 76 and 77. These double driveways shall be improved with paving 20 feet wide. Such driveways may be of blacktop or concrete provided that, if concrete, mixture shall be two pounds lamp black to each cubic yard of concrete mixture, or such other material as may be approved by the Committee.

Single access strip-type driveways serving Lots 17 and 29 shall be improved with paving 15 feet wide and may be of blacktop or of the typical concrete mixture specified above, or such other material as may be approved by the Committee.

The 15 foot driveway adjacent to Lot 52 is not a part of Tract 30134 and is not intended to serve Lot 52. This driveway will be the access driveway for a future lot to be created to the north of Lot 52.

The fire access roadway between Marie Canyon Road and Forest Gate Circle (as shown on the Final Map for Tract 30134) is not available for parking and must be kept free of parked cars at all times.

13. All walls and fences shall be maintained in good condition and be painted or stained if of wood or iron. If standard plain cement or slumpstone cement blocks are used, said walls shall be constructed of block not over four inches in height and painted. If standard cement blocks are used which are more than four inches in height, the wall shall be covered with stucco and shall be painted. Pattern or custom cement blocks shall not be used unless such blocks are of unusual custom design and unless the size of the blocks, design and wall are specifically approved by the Committee. In front of the front setback line, no wall or fence shall exceed five (5) feet in height above the surface of the ground upon which it is located, nor shall a wall or fence exceed six (6) feet in height to the

AUG 28 1972

3553

rear of said front setback line unless said wall or fence is not within the side or rear setback areas. No hedge shall be planted or maintained in front of the front setback line at a greater height than five (5) feet from the ground, nor shall any hedge exceed six (6) feet in height to the rear of said front setback line unless said hedge is not within the side or rear setback lines.

In cases where the side or rear property line of a lot is at the top of the slope adjacent to the pad level of an upper lot, the owner of the lower lot shall not build a wall or fence on the said side or rear property line or on the slope adjacent thereto which wall or fence extends more than three feet above the pad level of the adjacent upper lot unless a written agreement and approval to do so is obtained from the owner of the upper lot and duly recorded.

No tennis court shall be constructed on any lot or combination of lots without the owner thereof having first obtained and recorded the written approval of the owner of every lot in Tract 30134 which is adjacent to such lot or combination of lots.

14. Each owner of a lot in said tract shall not in any way interfere with the established drainage in or over any lot in said Tract. In the event it is necessary to change the established drainage over any lot, adequate provisions for proper drainage shall be made therefor. For the purpose hereof "Established Drainage" is defined as the drainage as the same existed at the time of the overall grading of said Tract, including the landscaping of each lot in said Tract as completed by the undersigned.

Each lot owner shall provide continuous maintenance for all planted slopes within his lot and for all drainage benches, drainage channels and/or slopes to prevent drainage from overflowing onto other property. The owner of each lot shall keep said lot free and clear of weeds, debris and rubbish and keep the premises neat and in good order. Excepting homes not yet sold by Grantor, upon completion of a residence building, the lot owner shall within ninety (90) days plant and maintain lawns or otherwise landscape the front yard, and in the case of corner lots also the side street yard. The Grantor, its successors or assigns, hereby reserves the right, in the event of default in the performance of this covenant, after notice in writing to said lot owner to cure said default and lot owner's failure to do so within thirty days thereafter, to enter upon said lot and remove all weeds, debris and rubbish in accordance with this covenant and the expense thereof shall become due and payable from said lot owner to the Grantor within thirty (30) days after written demand therefor.

15. No aerial or antenna for T.V., radio, ham radio, or any other purpose shall be installed on any lot except as may be installed under the roof and within the attic area of the home erected thereon. Spot or flood lights, if any, used for illumination or for accent lighting of landscaping, etc., shall be directed and/or controlled in such a manner as not to be an annoyance or nuisance to adjacent or nearby homeowners.

16. No sign shall be placed or maintained on any lot prior to, during or after the erection of a residence thereon without the prior written consent of the Grantor, its successors or assigns, or duly authorized agent other than one ordinary 18" x 24" "Open for Inspection" "For Rent", "For Sale" or "Sold" sign of design approved by the Committee; and in the event any sign or signs shall be placed or maintained upon said premises in violation of these restrictions, said Grantor, or its successors or assigns, or duly authorized agent, may and is hereby authorized to enter upon said premises and to remove any and all such unauthorized signs.

AUG 28 1972

3553

Nothing contained in these restrictions and conditions shall operate to prohibit the Grantor, its successors, assigns, or its duly authorized agent from maintaining upon any lot or lots in said Tract a real estate Tract Office, together with suitable advertising signs for the purpose of conducting the proper development, sale and management of property in said Tract.

17. No trade, business or commercial activity of any sort shall be carried on upon said premises, nor shall anything be done thereon which may be or become an annoyance or nuisance to adjacent homeowners or a detriment to the neighborhood. No auction or public sale of real or personal property shall be conducted upon said premises, nor shall said premises or any part thereof be sold or offered for sale through an auction or public sale.

18. Any trailer, travel trailer, motor home, truck, boat, or other recreational or commercial vehicle shall not be used as additional living quarters, and shall be parked at all times within the garage of the respective home, except during reasonable loading, waiting, and/or unloading periods.

19. No livestock, dog, cat or other animal breeding, raising or care of a commercial nature shall be permitted. No hogs, sheep, bee hives, goats, cows or horses shall be permitted on said premises. No poultry shall be permitted or maintained on said property.

20. Violation or breach of any restriction herein contained shall give to Grantor and every owner of property subject to these restrictions the right to enter upon the property upon or as to which said violation or breach exists and to summarily abate and remove, at the expense of the owner or lessee thereof, any structure, thing or condition that may be or exist thereon contrary to the intent and meaning of the provisions hereof, or to prosecute a proceeding at law or in equity against the person or persons who have violated or are attempting to violate any of these restrictions to enjoin or prevent them from doing so, to cause said violation to be remedied or to recover damages.

The result of every action or omission whereby any restrictions herein contained is violated in whole or in part is hereby declared to be and to constitute a nuisance, and every remedy allowed by law or equity against an owner, either public or private, shall be applicable against every such result and may be exercised by Grantor or by any owner of property subject to these restrictions.

In any legal or equitable proceeding for the enforcement or to restrain the violation of this Declaration or any provision hereof, the losing party or parties shall pay the attorney's fees and court costs of the prevailing party or parties, in such amount as may be fixed by the Court in such proceedings. All remedies provided herein or at law or in equity shall be cumulative and not exclusive.

The failure of Grantor or any property owner to enforce any restriction herein contained shall in no event be deemed to be a waiver of the right to do so thereafter nor of the right to enforce any other restriction.

AUG 28 1972

3553

21. If at any time any of said Paragraphs 1 to 19, inclusive, or any part thereof, shall be adjudged or held to be illegal, or invalid, such illegality or invalidity shall in no way affect or render illegal or invalid any of the other terms, conditions, covenants, and restrictions of said paragraph, or of any other paragraph or part thereof, but each and all of said other terms, conditions, covenants, and restrictions, notwithstanding said illegality or invalidity, shall be and remain in full force and effect.

Each and all of the conditions herein contained shall in all respects terminate and end and be of no further effect, either legal or equitable, either on said property or any part thereof, or on the parties thereto, their heirs, successors, devisees, executors, administrators or assigns, on or after January 1, of the year 2010 unless prior to said date and effective thereon, a written instrument shall be executed by the record owners of the majority of the lots in said property and duly recorded providing for an extension of these restrictions to a later date.

This Declaration, or any provision hereof, may also be modified or amended with the written consent of 100% of the Lots by recordation of the same in the Official Records of Los Angeles County.

Notwithstanding anything herein contained to the contrary, no breach of any of the foregoing conditions or any re-entry by reason of such breach shall defeat or render invalid the lien of any mortgage or deed of trust made in good faith and for value as to said property or any part thereof; but said conditions shall be binding upon and effective against any owner of said property whose title thereto was acquired by foreclosure, trustee's sale, or otherwise.

The foregoing conditions and restrictions constitute the minimum conditions and restrictions applying to any lot or lots in said Tract 30134. The right is reserved by the Grantor, in the case of any unsold lot or lots, to add other conditions and restrictions, to increase the requirements thereof as to setback lines, square footage content of buildings and otherwise to increase and supplement but not to diminish, the restrictions on said property.

We hereby certify that we are the owners of, or are interested in the land included within the subdivision shown on the annexed map and we consent to the preparation and filing of said subdivision as shown within the colored border lines, and we hereby dedicate to the public use all highways, streets and other public ways shown on said map. We further certify that except as shown on a copy of this map on file in the office of the County Road Commissioner we know of no easement or structure existing within the easements hereby offered for dedication to the public, other than publicly owned water lines, sewers or storm drains. That we will grant no right or interest within the boundaries of said easements offered to the public except where such right or interest is expressly made subject to the said easements. And we hereby dedicate to the County of Los Angeles the easements for storm drain, ^{access} sanitary sewer purposes and for emergency vehicular access over the strips of land so designated on said map, and all rights incident thereto including the right to make connections therewith from adjoining properties. As a dedication to public use while all of Marie Canyon Road adjacent to this subdivision remains a public highway and for such time only we hereby abandon all rights of direct ingress and egress to said highway so that the owners of lots 85 to 87 inclusive, and 107 abutting this highway during such time will have no rights of access whatever in the highway, as such except the general easement of travel which belongs to the whole public. If any change of alignment or width of such highway results in the vacation of any part adjacent to this subdivision, such vacation terminates the above dedication as to the part vacated. We hereby dedicate to the County of Los Angeles the right to prohibit construction of more than one residence and related accessory buildings on lots 1, 3 to 5 inclusive, 9, 11 to 15 inclusive, 29 to 34 inclusive, 39, 40, 50, 51, 52, 76, 79, 86, 87, and 107. We hereby dedicate to the County of Los Angeles the right to restrict the erection of residential buildings or other structures within those areas designated on the map as restricted use areas. We hereby grant Lot 108 in fee simple to the County of Los Angeles.

Malibu, CA 90265

Re: Custom Development Criteria

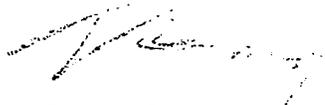

Dear Homeowner Association:

The Interim Zoning Ordinance of the City of Malibu provides for existing Homeowner's Associations and neighborhoods to apply to the City Council for consideration of custom development criteria. Such custom development criteria would allow for development in established neighborhoods to be consistent with existing Conditions, Covenants and Restrictions (C, C & R's) or neighborhood standards in-lieu of the Property Design and Development Criteria specified in the Interim Zoning Ordinance.

Attached is Chapter 9215 of the Interim Zoning Ordinance which authorizes the creation of Custom Subdivision Development Criteria. Additionally, an information and application submittal requirements sheet is included which provides directions as to how to apply for this review. Finally, a sample form is provided which can be used to verify that the required percentage of homeowners have accepted the proposed custom development criteria.

Please call if you have any questions regarding this matter.

Sincerely,

Robert Benard
Planning Director

**Subject: Geologic and Geotechnical Engineering Investigation,
Proposed Manufactured Accessory Dwelling Unit (ADU),
24507 Vantage Point Terrace, Malibu, California 90265**

INTRODUCTION

As requested, GeoSoils Consultants, Inc. (GSC) has performed a geologic and geotechnical engineering investigation for the subject site. The purpose of this investigation was to evaluate the geologic and geotechnical engineering conditions on the site and their impact on the proposed development. Proposed development will consist of a new manufactured accessory dwelling unit located at the toe of the slope.

This report has been prepared in accordance with generally accepted geotechnical engineering practices in the City of Malibu at the time it was prepared. The report presents a brief description of the site, the geotechnical engineering characteristics of the area, the seismicity of the area, an engineering analysis of the site characteristics, conclusions, and preliminary recommendations to development the site.

Opinions presented in this report are based on an inspection of the site, geologic mapping at the site, logging of test pit excavations, a review of the regional geologic maps and seismic hazard reports, review of available geotechnical reports for the surrounding area, and our general knowledge of the geologic and soils engineering conditions in the site area. The opinions presented have been arrived at through the exercise of the generally understood standard of care for our profession and standard of engineering practice, as we understand it.

MDN 21724

SCOPE OF SERVICES

This geotechnical engineering study included:

- a. Research of available data from the City of Malibu online public records system. Copies of available data are presented in Appendix D.
- b. Research of published geologic and seismic hazard reports.
- c. Excavating, sampling, and logging of two hand dug test pits. The test pit locations are shown on the enclosed Plate 1, Geologic Map. The test pit logs (Plates TP-1 and TP-2) are provided in Appendix A along with a general description of the field operations.
- d. Laboratory testing of selected samples to determine the engineering properties of the on-site soils. The results of laboratory testing are presented in Appendix B
- e. Engineering analyses of the data and information obtained from our field study and laboratory testing.
- f. Preparation of this report summarizing our findings, conclusions, and recommendations.

SITE DESCRIPTION

The subject site is located at the south end of the Vantage Point Terrace cul de sac (Figure 1). The existing site conditions are shown on the Geologic Map, Plate 1. The property consists of a generally level artificial fill building pad that descends down to John Tyler Drive. A descending fill slope is located to the east of the existing residence and descends down to the lower street grade. The descending slope is approximately 20 feet high at angles of approximately 2H:1V.

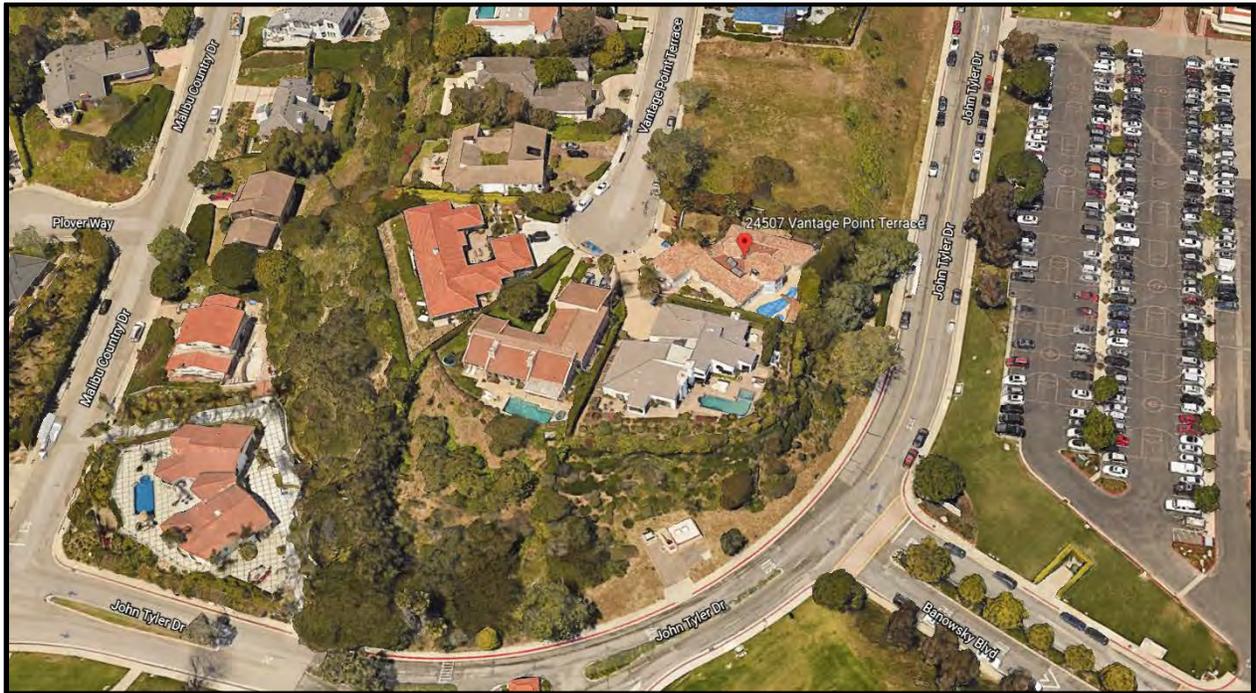

Figure 1: Site Location Map

PROPOSED DEVELOPMENT

The proposed development consists of a manufactured ADU that is located in the flat area along the toe of the slope and John Tyler Drive. Foundation plans are included as SPA-24-3F, Drawings 1 to 3. A perimeter footing will be provided around the structure and pier footings will be supported on concrete pads.

CITY RESEARCH

The City of Malibu files were researched via the OnBase Portal online public records system. For the subject site, soil reports were on file for the recently constructed pool and spa. The report and subsequent addendum were prepared circa late 2016. Per the report prepared by Schick Geotechnical, Inc. dated September 21, 2016, the lot was graded as part of Tract 30134 in the early 1970s and the home was constructed circa 1987. The original reports prepared by James E. Slosson & Associates for the graded tract were not available from the City of Malibu online public records system. However, portions of the reports were referenced in the addendum report by Schick Geotechnical, Inc. dated November 5, 2016.

GEOLOGIC CONDITIONS

Geologic conditions of the site were determined through research, field mapping, and subsurface exploration, and the results were superimposed on the Geologic Map, Plate 1. During construction, a representative from GSC should be present to confirm the geologic conditions encountered on the site are consistent with those presented herein. The following sections present our findings concerning subsurface soil conditions, groundwater conditions, and expansion potential.

Regional Geologic Setting

The subject property is located within the southwestern portion of the Transverse Ranges Geomorphic province of California. The Transverse Ranges consist of generally east-west trending mountains and valleys, which contrast with the north-northwest regional trend elsewhere in the state. The structure of the Transverse Ranges is controlled by the effects of north-south compressive deformation (crustal shortening), which is attributed to convergence between the big bend of the San Andreas fault north of the San Gabriel Mountains and the motion of the Pacific Plate. The valleys and mountains of the Transverse Ranges are typically bounded by a series of east-west trending, generally north dipping reverse faults with left-lateral oblique movement.

Local Regional Setting

The subject site is located within the Malibu Beach USGS 7.5-minute quadrangle. The site is underlain by approximately 20-feet of certified compacted fill and bedrock of the Sespe Formation. A Local Regional Setting Map is presented in Figure 2.

Bedrock, Sespe Formation (Tsp): Bedrock was observed in TP-2. The bedrock consists of claystone and sandstone. The bedrock was observed via the hand auger and sampler at 20-feet and was grey, moist, moderately hard, and dense. The bedrock is suitable for structural support.

The enclosed test pits, which are included in Appendix A, provide a detailed description of the soil strata encountered in our subsurface exploration.

Expansion Potential and Chemical Content of Surficial Site Soils

For preliminary foundation design purposes, the certified fill should be considered to have a low expansion potential with an expansion index of 34.

Chemical series was performed for the onsite soils. The results are presented in Appendix B. The material has a moderate sulfate content and is severely corrosive to ferrous metals.

WATER

Surface Water

Surface water consists of sheet flow from precipitation falling directly on the site and landscape watering.

Groundwater

No groundwater was encountered in our test pits excavated on the site to a maximum depth of 20 feet. However, perched groundwater levels typically fluctuate and may vary in response to season, precipitation patterns, on or off-site construction activities, site utilization, and other factors. Groundwater is not anticipated to pose a problem during development of this site.

FAULTING AND SEISMICITY

The project site is not within an Alquist-Priolo Earthquake Fault Zone or FER-229. A portion of the Malibu Coast Fault is mapped across the southern portion of the property. As stated in the response letter by Schick Geotechnical, Inc. dated November 5, 2016, the fault was

determined to be inactive by Leighton and Associates. As a result, fault trench is not required on the site. However, this site has experienced earthquake-induced ground shaking in the past and can be expected to experience further shaking in the future. Therefore, earthquake resistant design is recommended.

The site is not located within a zone of potential liquefaction; however, the fill slope on-site is located within a zone of potential seismic instability (Figure 3).

Figure 3: Seismic Hazard Zones of Required Investigation

Seismic Design Criteria

The 2019 CBC (California Building Code) seismic coefficient criteria are provided here for structural design consideration (Table 1).

Under the Earthquake Design Regulations of Chapter 16, Section 1613 of the CBC 2019, and based on the mapped values, the following coefficients and factors apply to the lateral-force design for the proposed structure at the site. The site is underlain by compacted fill and Class D is recommended.

TABLE 1 2019 CBC SECTION 1613, EARTHQUAKE LOADS	
Site Class Definition	D
Mapped Spectral Response Acceleration Parameter, S_s (Table 1613.3.1 for 0.2 second)	1.684
Mapped Spectral Response Acceleration Parameter, S_1 (Table 1613.3.1 for 1.0 second)	0.593
Site Coefficient, F_a (Table 1613.3.3(1) short period)	1.2
Site Coefficient, F_v (Table 1613.3.3(2) 1-second period)	null
Adjusted Maximum Considered Earthquake Spectral Response Acceleration Parameter S_{MS} (Eq. 16-37)	2.021
Adjusted Maximum Considered Earthquake Spectral Response Acceleration Parameter S_{M1} (Eq. 16-38)	null
Design Spectral Response Acceleration Parameter, S_{DS} (Eq. 16-39)	1.347
Design Spectral Response Acceleration Parameter, S_{D1} (Eq. 16-40)	null
Notes: Location: Longitude: -118.7093, Latitude: 34.0367 1. Site Class Designation: Class D is recommended based on subsurface condition. 2. S_s , S_{MS} , and S_{DS} are spectral response accelerations for the period of 0.2 second. 3. S_1 , S_{M1} , and S_{D1} are spectral response accelerations for the period of 1.0 second.	

Conformance to the above criteria for seismic excitation does not constitute any kind of guarantee or assurance that significant structural damage or ground failure will not occur if a maximum level earthquake occurs. The primary goal of seismic design is to protect life and not to avoid all damage, since such design may be economically prohibitive. Following a major earthquake, a building may be damaged beyond repair, yet not collapse.

Secondary Earthquake Effects

Ground shaking produced during an earthquake can result in a number of potentially damaging phenomena classified as secondary earthquake effects. These secondary effects include ground rupture, landslides, lurching, seiches and tsunamis, seismically-induced settlement, and liquefaction. Descriptions of each of these phenomenons and how it could potentially affect the site are described below:

Ground Rupture

Ground surface rupture results when the movement along a fault is sufficient to cause a surface gap or rupture along the upper edge of the fault zone. Since there are no known active faults on the site, the potential for ground rupture is considered remote.

Landsliding

Landslides are slope failures that occur where the horizontal seismic forces act to induce soil and/or bedrock failures. The most common failure occurs by the reactivation or movement of a pre-existing landslide. Typically, existing slides that

are stable under static conditions (i.e., factor-of-safety at or greater than one) become unstable and move during strong ground shaking. The subject site is located in an earthquake induced landslide area as per the seismic hazard map of the Malibu Beach Quadrangle. However, the slope consists of a graded fill slope and slope stability analysis was not deemed necessary and has not been performed.

Seiches and Tsunamis

Seiches are generally caused by seismic excitation of a body of water, which causes surface oscillations that vary in period from a few minutes to several hours. Tsunamis are large sea waves produced by submarine earthquakes or volcanic eruptions. Due to the proximity of the site relative to the ocean, seiches and tsunamis are not considered a hazard to the site.

Liquefaction – General

Liquefaction describes a phenomenon where cyclic stresses, which are produced by earthquake-induced ground motion creates excess pore pressures in cohesionless soils. These soils may thereby acquire a high degree of mobility, which can lead to lateral sliding, consolidation and settlement of loose sediments, sand boils, and other damaging deformation. This phenomenon occurs only below the water table, but after liquefaction has developed, it can propagate upward into overlying, non-saturated soils as excess pore water escapes.

Liquefaction susceptibility is related to numerous factors and the following conditions must exist for liquefaction to occur: 1) sediments must be relatively young in age and must not have developed large amounts of cementation, 2) sediments must consist mainly of cohesionless sands and silts, 3) the sediments must not have a high relative density, 4) free groundwater must exist in the sediment, and 5) the site must be exposed to seismic events of a magnitude large enough to induce straining of soil particles.

This site is outside of the designated area of liquefaction potential presented on the State of California Seismic Hazard Zone map. In addition, the site is underlain by compacted fill and bedrock. Therefore, it is our opinion that liquefaction is not considered a potential hazard on this site.

Seismic Settlement Analysis

Seismically-induced settlement in unsaturated (dry) and saturated soils generally occur due to the dissipation of pore pressure.

The potential for seismically-induced settlement is greatest in loose granular soils (i.e., sands, silty sands, sandy silts), whereas cohesive soils (i.e., clays and silts) are generally not prone to settlement. It should be realized that granular soils are susceptible to settlement during a seismic event whether the soils liquefy or not.

As discussed above, compacted fill and bedrock underlies the site and will be used to support the planned improvements. Therefore, seismic settlement is not considered to be a hazard to the site provided the recommendations contained in this report are followed during design and construction.

CONCLUSIONS AND RECOMMENDATIONS

The proposed development is feasible from a geologic and geotechnical engineering perspective, provided the recommendations contained herein are incorporated into the final design and construction phase of the proposed site improvements. All structures should satisfy current slope setback requirements.

GSC anticipates that the proposed site improvements consisting of the residence will be founded into compacted fill.

The recommendations provided in this report are applicable for improvements on the lot provided yard areas have positive drainage that is maintained away from the structures. Therefore, it is important that information regarding drainage and site maintenance be passed on to future homeowners.

As in most of Southern California, the site lies within a seismically-active area, therefore earthquake resistant structural design is recommended.

Site Preparation Recommendations

In areas of proposed development, the upper 3 feet of compacted fill shall be removed and recompacted. Following grading, the building pad area shall be underlain by a minimum of 3 feet of compacted fill. The limits of fill shall extend a minimum of three feet beyond the building footprint. Grading within areas of proposed hardscape shall consist of removing previous fill to expose firm compacted fill and the placement of new fill to design grades. At this time, a grading plan is not available and should be forwarded to this office when complete. Grading guidelines are presented in Appendix C.

The following geologic and geotechnical recommendations for utility trench backfill, foundation design, and drainage should be incorporated into final design and construction. All such work and design shall be in conformance with local governmental regulations or the recommendations contained herein, whichever is more restrictive.

FOUNDATION DESIGN RECOMMENDATIONS

We offer the following site-specific recommendations and comments for purposes of footing design and construction. All structures must satisfy current slope setback requirements per the 2019 CBC Section 1808.7. The proposed improvements should be founded into compacted fill.

All footing subgrades should consist of compacted fill. Under no circumstances should footings be cast atop loose, soft, or slough, debris, existing artificial fill, topsoil, or surfaces covered by standing water. We recommend that a representative of GSC verify the condition of all subgrades before any concrete is placed. The following recommendations are suitable for the proposed manufactured ADU.

Foundation Criteria

1. An allowable soil bearing of 1,500 pounds per square foot may be used in the design of the perimeter footings founded into competent material. Perimeter footings should be continuous and should have a minimum width of 18 inches and a minimum embedment depth of 12 inches below lowest adjacent grade.
2. A coefficient of friction for concrete on competent soil of 0.3 and a lateral bearing value of 200 pounds per square foot per foot of depth may be employed to resist lateral loads. When combining passive pressure and frictional resistance, the passive pressure should be reduced by one third.
3. Seismic piers that support the raised floor should consist of adjustable jacks and be supported on a minimum 12 by 12 inch concrete pad, founded 6 inches into competent material and placed per manufacturer's guidelines.

Utility Trenching and Backfill

Utility Trenching

Open excavations and excavations that are shored shall conform to all applicable Federal, State and local regulations.

Backfill Placement

Approved on-site or imported fill material shall be evenly placed, watered, processed, and compacted in controlled horizontal layers not exceeding eight inches in loose thickness, and each layer should be thoroughly compacted with approved equipment. All fill material should be moisture conditioned, as required to obtain at least optimum moisture, but not greater than 120 percent of optimum moisture content. The fill should be placed and compacted on a horizontal plane, unless otherwise recommended by the Geotechnical Engineer.

Backfill Compaction Criteria

Each layer of utility trench backfill shall be compacted to at least 90 percent of the maximum laboratory density determined by ASTM D-1557-12. The field density shall be determined by the ASTM D-1556-07 method or equivalent. Where moisture content of the fill or density testing yields compaction results less than 90 percent, additional compaction effort and/or moisture conditioning, as necessary, shall be performed until the compaction criteria is reached.

Exterior Trenches Adjacent to Footings

Exterior trenches, paralleling a footing and extending below a 1H: 1V plane projected from the outside bottom edge of the footing should be compacted to 90 percent of the laboratory standard. Sand backfill, unless it is similar to the in-place fill, should not be allowed in these trench backfill areas. Density testing, along with probing, should be accomplished to verify the desired results.

Pipe Bedding

We recommend that a minimum of six inches of bedding material should be placed in the bottom of the utility trench. All bedding materials shall extend at least four inches above the top of utilities which require protection during subsequent trench backfilling. All trenches shall be wide enough to allow for compaction around the haunches of the pipe or materials, such as pea gravel, or controlled density fill (CDF) shall be used below the spring line of the pipes to eliminate the need for mechanical compaction in this portion of the trenches.

Construction Considerations

Erosion Control

Erosion control measures, when necessary, should be provided by the Contractor during grading and prior to the completion and construction of permanent drainage controls.

Compaction Equipment

It is also the Contractor's responsibility to have suitable and sufficient compaction equipment on the project site to handle the amount of fill being placed and the type of fill material to be compacted. If necessary, excavation equipment should be shut down to permit completion of compaction in accordance with the recommendations contained herein. Sufficient watering devices/equipment should also be provided by the Contractor to achieve optimum moisture content in the fill material.

Final Grading Considerations

Care should be taken by the Contractor during final grading to preserve any berms, drainage terraces, interceptor swales, or other devices of a permanent nature on or adjacent to the property.

On-Site Drainage

Seasonal precipitation and/or landscape water should not be allowed to pond within the site, especially next to foundations of any structures. Surface runoff should be collected and disposed of in such a manner as to prevent concentrated erosion. Roof gutters, downspouts, and yard drains should be provided in accordance with the City of Malibu requirements. We recommend that all planters proposed adjacent to structures be self-contained, provided with a subdrain system, and/or allowed to have positive drainage away from structure to drain excess landscape water.

LIMITATIONS

The findings and recommendations of this report were prepared in accordance with generally accepted professional geotechnical engineering principles and practice for the City of Malibu at this time. We make no other warranty, either express or implied.

The conclusions and recommendations contained in this report are based on site conditions disclosed in our subsurface investigation. However, soil conditions can vary significantly between test pits; therefore, further refinements of our recommendations contained herein may be necessary due to changes in the building plans or what is encountered during site grading.

The recommendations provided in this report are applicable for preliminary development planning for the referenced lot provided that surface water will be kept from infiltrating into the subgrade adjacent to the house foundation system. This may include, but not be limited to rainwater, roof water, landscape water and/or leaky plumbing. We caution against constructing open draining planters adjacent to the houses or obstructing the yard drainage in any way.

Since our investigation was based on the site conditions observed, selective laboratory testing, and engineering analysis, the conclusions and recommendations contained herein are professional opinions. Further, these opinions have been derived in accordance with standard engineering practices, and no warranty is expressed or implied.

If the conditions encountered during grading are not consistent with the findings presented in this report, or if proposed construction is moved from the location investigated, this office shall be notified immediately so that the condition or change can be evaluated and appropriate action taken.

“111” STATEMENT

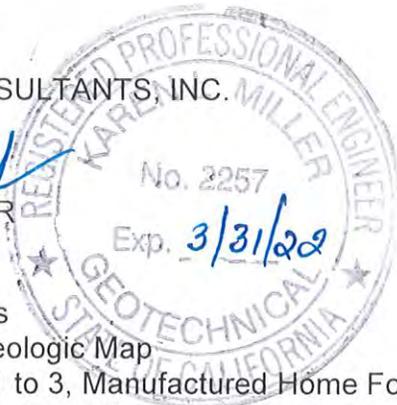

Provided that the recommendations in this report are implemented, it is GSC's opinion that the proposed development will be safe from the hazards of landslide, settlement or slippage. Furthermore, the development will not adversely affect the stability of the adjacent properties nor be adversely affected by adjacent properties.

We appreciate this opportunity to be of continued service to you. If you have any questions regarding the content of this report or any other aspects of the project, please do not hesitate to contact us.

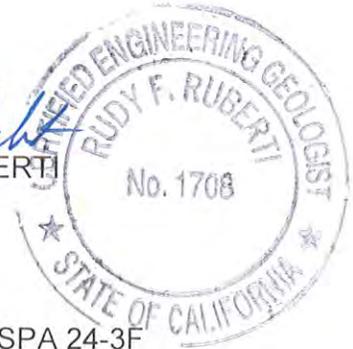

Very truly yours,

GEOSOILS CONSULTANTS, INC.

Building Permit Application

BUILDING PERMIT APPLICATION

OWNER-BUILDER DECLARATION

I hereby affirm under penalty that I am exempt from the Contractor's License Law for the following reason (Section 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

I, as owner of the property, or my employees with wages as their sole compensation will do the work, and the structure is not intended or offered for sale (Section 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with a licensed contractor to construct the project (Section 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a licensed contractor(s) pursuant to the Contractor's License Law.

I am exempt under Section _____ B.&P.C. for this reason _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

I have and will maintain a certificate of consent of self-insure for workers' compensation as provided for by section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier STATE COMPENSATION INSURANCE FUND

Policy No. 9149029 Exp. 01/01/2023

I certify that in the performance of the work of which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provision of section 3700 of the Labor Code, I shall forthwith comply with those provisions.

DocuSigned by:

10/13/2022

Signature of Applicant or Agent _____

Date _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UN-LAWFUL AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction and hereby authorize representatives of the city to enter upon the above mentioned property for inspection purposes.

Re: RPPL2023003558 – CDP Application 21-045 – 24507 Vantage Point Terrace Alternatives Analysis

Dear Malibu Planning Staff,

In response to questions, comments, and concerns raised in the Staff Report for the above-referenced project application, please see below/attached an updated and expanded Alternatives Analysis demonstrating the impracticality/infeasibility of constructing an ADU on the upper building pad.

Proposed Location: Existing Lower Building Pad

Here we have the applicant's proposed location on the lower building pad at the toe of the slope, in the northeast corner of the property adjacent to John Tyler Drive. Each exhibit delineates the 26-foot front yard setback (shown in red), 4-foot rear and side reduced setbacks allowed pursuant to State ADU Law (shown in black), and the sanitary and storm drain easement that dominate the North side of the property (shown in gray). A slope separates the existing upper and lower building pads. This lower building pad that has been present since at least 1980 and therefore does not involve the creation of a new pad or alteration of natural landforms. Siting the ADU here places development in the least visible portion of the property, avoiding impacts to public coastal views and private views alike, and is more consistent with Coastal Act and LIP policies favoring reduced visual impacts than any alternative location. This location represents the only feasible and compliant site, and satisfies State ADU law, Coastal Act policies, and applicable local standards while avoiding environmental, visual, and neighborhood impacts.

1st Alternate Location: Over the pool, over the slope

As implied in the staff report, the pool could theoretically be removed and the ADU sited there, *"given that the existing building pad is sufficient in size to support other existing uses including a pool, spa, and wooden deck."* However, there is insufficient area to support the proposed ADU. LCP (D)(6)(c) states, *"No structure, excluding walls and fences, shall extend beyond, or be*

cantilevered over, any downhill slope extending from the existing building pad.” Given that there must be a 6-foot building setback per the LCP 3.6(R)(b) “Distance Between Accessory and Main Buildings. A minimum distance of six feet shall be required between any main residential building and an accessory building established on the same lot or parcel of land.”

The East-facing living room features a prominent bay window that provides primary light, air, and view to the residence. Light, air, and views would all be blocked by the presence of the ADU, even if it were to fit. This placement, however, results in roughly half of the area of proposed ADU extending beyond and cantilevered over the downhill slope, which would result in a height greater than 18 ft. and/or new site grading/landform alteration on the existing slope. Therefore, this alternative is not feasible practically, would result in greater visual impacts, and does not achieve any greater consistency with relevant policies/regulations than the proposed location.

2nd Alternate Location: Over the property line

Along the southeastern side, behind the garage and adjacent to the Primary (Master) Bathroom, there is a right triangle of area where it might be assumed that an ADU could be sited. This second alternate shows clearly how after accounting for the master bath’s bay window and the required 6-foot building setback, there is not nearly enough space to squeeze the ADU between the house and the property line, even with the benefit of State ADU law side yard setback reductions. The other half would spill into the setback and over the property line. Therefore, this location is not feasible.

Conclusion

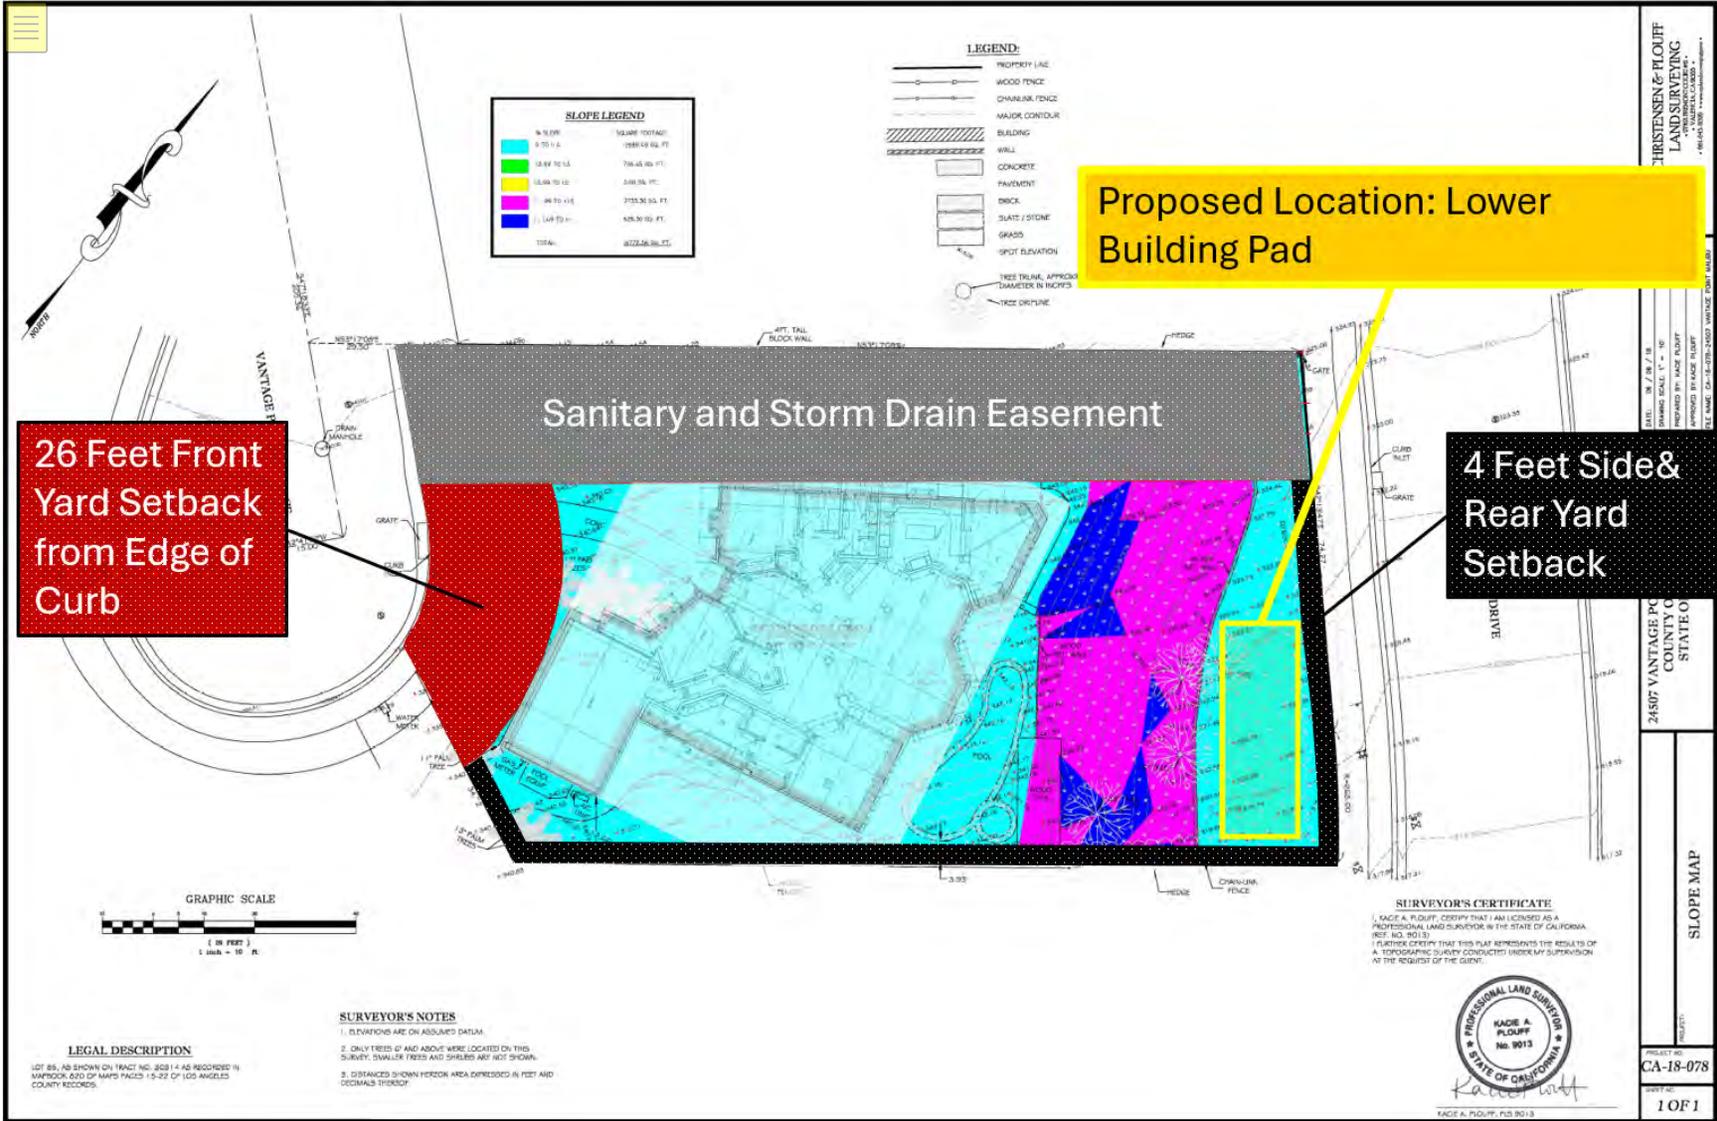

Based on the above analysis, the proposed location appears to be the only feasible location for the proposed ADU, consistent with State ADU law and relevant local ordinances. The proposed location is situated within the allowable front, rear, and side yard setbacks and easements, as required by State ADU law. It does not intrude into neighboring properties. It is not cantilevered over the slope and does not require any non-exempt landform alteration/grading. This location involves the least visible portion of the property, and satisfies State ADU law, Coastal Act policies, and applicable local standards while minimizing environmental, visual, and neighborhood impacts. Thank you for your time and attention to this application.

Sincerely,
Keystone Strategic Planning

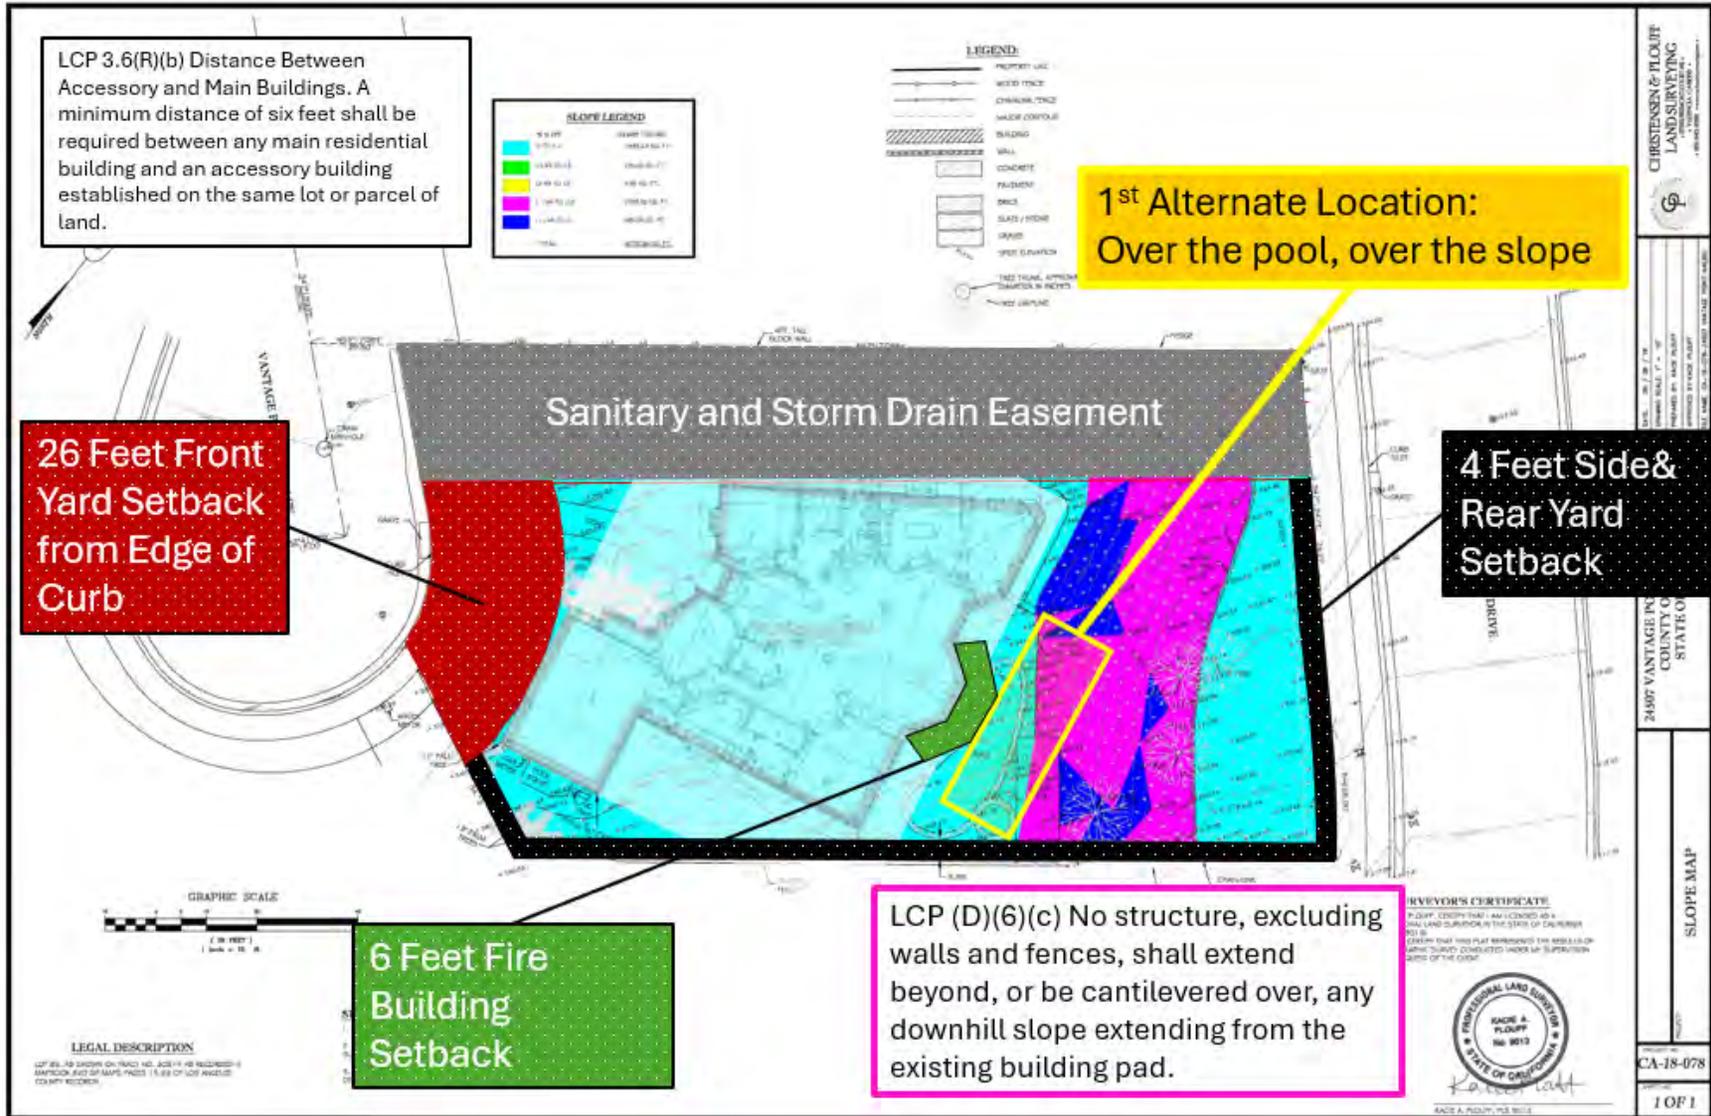

Matt Jewett
Principal

Proposed Location: Lower Building Pad

Dear Planning Commissioners,

I am a homeowner in the Malibu Country Estates and live on the same street as the subject property. Homeowners in MCE should not be denied the opportunity to build an ADU as long as there is appropriate space on the lot, and the ADU does not impact the view of any neighbor. I do not have any objections, especially because there is no view impact with the ADU's roofline being lower than the building pad of the main house. Due to the property's location at the edge of our neighborhood, facing Pepperdine, none of the community's homeowners will even be able to see the proposed structure from their residences since it will be hidden behind vegetation at the bottom of a slope. Therefore, I fully support this ADU. Thank you for your consideration.

Regards,

Doug DeLuca

Hello,

To whom it may concern, We own a property in the Malibu Country Estates that is directly next to the lot the subject ADU is planned for. The project does not pose any view impact since it is at the very bottom of the slope facing the large Pepperdine parking lot on John Tyler. There being no other concerns from our side, there is no reason for us to object and we recommend to approve the application.

Best regards,
Eran Eliyahoo

Dear Planning Commissioners:

Our home is immediately adjacent to the Meissners' property. We have seen the plans and feel comfortable with the project. Therefore, we may ask you to approve it.

Happy Holidays-

Emmanuel Gonzalez

Dear City of Malibu Planning Department,

I'm writing as both a Malibu Country Estates resident and a local Realtor who works closely with families, students, and professionals in our community. I want to express my full support for my neighbor's proposed ADU project, as well as the broader effort to encourage well-planned ADUs in Malibu.

ADUs provide meaningful benefits in a city where housing costs continue to rise. They offer flexible options for those who work or study in Malibu, but cannot afford traditional rental prices. They also give homeowners a way to support aging parents, young adults who are just launching, or long-term local employees who are essential to the fabric of our community. When a property has the space to responsibly accommodate an ADU, it becomes an opportunity to strengthen our neighborhood without changing its character.

From both a resident's and a Realtor's perspective, I've seen how thoughtfully designed ADUs increase stability, improve housing accessibility, and help maintain the economic diversity that keeps Malibu vibrant.

Thank you for your time and consideration. I fully support this project and hope you will too.

Warm regards,

Teresa LeGrove

Hi Magda,

Please see this correspondence regarding CDP 21-045. It should be added with any other correspondence received since the agenda report was last published for this packet when this item next goes to the planning commission.

Regards,

Gail Duncan

Subject: Support of ADU application 24507 Vantage Point Terrace, Malibu (ACDP-21-045)

Dear Commissioners,

I am writing to register my support of the above mentioned project at 24507 Vantage Point Terrace in Malibu. I am a neighbor living at [REDACTED] Vantage Point Terrace, only a few homes away, and I have no opposition to the project going forward.

As a senior citizen living in Malibu I have given much thought to how I might be able to remain in my home. I believe having a separate living space for a caregiver will afford me the best opportunity to stay in my home. As the planning commission surely knows, we have a lack of housing for caregivers in the community and as many in the city of Malibu are over 60 and would surely like to remain in their homes, one solution would be to allow ADU's.

Thank you for taking the time to consider my position regarding this project.

Best,

Dana Harger

Dear Commissioners:

I am a homeowner in the Malibu Country Estates and live on the same street as the applicant. I know from personal experience about the importance of live-in caregivers when a family member needs them.

However, not all properties in our neighborhood lend themselves to a live-in situation. That's why those lots which have sufficient space in their backyard should be allowed to add a small ADU to their home. In the case of the Meissners' property, there is a building pad along John-Tyler Drive available for such purposes. Having an ADU at that location cannot possibly bother any neighbor because you can only see it when you walk through the campus. Based on the foregoing, I fully support the subject application.

Thank you for your consideration.

Sincerely yours,

Mitchell Bredefeld
