ITEM 2.B. COMMISSION / STAFF COMMENT

Commissioner Hill stated determination of neighborhood character should be based upon the current neighborhood, not a projection of the future.

Commissioner Mazza stated it was not realistic for the Commission to consider all projects on the meeting agenda if it contained too many items and long reports. He stated dimensions, particularly height, need to be required on plans if a project were to be considered by the Commission.

Planning Director Mollica stated the City’s Wireless Ordinance was scheduled to be considered at the April 12, 2021 Regular City Council meeting, and a Wireless Communication Facility survey had been distributed to the community and was also available on the City’s webpage at www.malibucity.org/WCF.

He stated that the City’s Public Works Department was working with Caltrans to address the parking conditions at Nobu and Soho House. The proposed revisions will potentially involve the reconfiguration of the traffic signal and driveway as well as a revised valet plan. An application for a conditional use permit amendment and a development permit would be brought before the Commission once the design was finalized.

He stated the Ranch at Solstice was working on design changes requested by the City related to their parking plan and wastewater treatment system.
