Appendix B
Field Monitoring Records
Daily Log

Project Number: 1673.01
Project Name: Rancho Malibu
Project Location: Malibu, CA
Date: 3-31-14
Field Personnel: DR/PL

Notes:
0515 - Depart for site.
0640 - Arrived on site
0650 - SJH drillers arrived on site. Waiting on Peter Lee.
0704 - Peter Lee arrives on site, moves and set up
at RM-2. Conducted health and safety meeting.
Hand auger to 5'.
0745 - Mohsen Mehan arrives on site, discuss days
will installation
0820 - Hand auger complete. Begin drilling.
0900 - Collected sample RM-2-20
0935 - Melinda Larson arrived on site, from LACPH.
1000 - Collected sample RM-2-50
1240 - Collected sample RM-2-95
1300 - Drillers take lunch. At 96' bgs. No water yet
spoke with Dr. Mohsen Mehan. He said to drill till
we hit water, then drill is more feet.
1825 - Continue drilling from 96'.
1330 - Encountered water at 106' bgs.
1445 - At 110' drilling is slow.
1450 - Collected RM-2-110, cleaning out borehole and
begin well install.
1510 - Borehole too hot. Waiting till it cools.
1700 - Borehole cool enough to begin building well.
will place 2' PVC, sand, and bentonite, cover and
grout in am. Peter Lee reports site
1815 - PVC, sand, and bentonite in. Depart site,

DR 13 hrs
Notes:

0630 - Depart for site.
0645 - Arrive on site, met drillers. Conducted health and safety briefing. Begin setting up boring.
0700 - Peter Lee arrives on site.
0830 - Rmac is grouted up, moved to RM-3. Hand auger to 5'.
0900 - Hand auger complete, begin drilling.
0930 - Collected sample RM-3-20
1030 - Collected sample RM-3-50
1230 - Drillers break for lunch, at 85' bgs.
1255 - Drillers finished lunch break.
1715 - Drilled to 189' bgs. No water. Called Mobsen and left message. Will return 0700 4-2-14 and continue drilling until we hit water.
1745 - Cleaned up and Depart Site

4-2-14

0630 - Depart for site.
0645 - Arrived at site, met drillers and Peter Lee. Conducted health and safety briefing.
0700 - Begin pulling auger. More auger is delivered.
1830 - At 150' bgs, soil came up dry but water is inside. Auger bailing out water, will see if we get recharge.
1345 - Removed approximately 150 gallons of water. Not sure if we are in aquifer or if reached water is leaking downward. Waiting to see if water recharges.
Project Number: 107302  Project Name: Rancholoma Bu  Project Location: Malibu
Date: 4-2-14  Field Personnel: RL/PE

Notes:
(cont.) notified mohsen of our plan.
1355 - Drillers broke for lunch, waiting to see if borehole recharges.
1430 - Borehole did not yet measurably recharge, called Mohsen, discussed situation, decided to place temporary well at 155, let it sit overnight.
1445 - Begin setting temp. well 30 ft of screen, 155-125. Peter Lee is staying.

4-3-13
0630 - Depart for site
0655 - Arrive on site, met Jeff drillers, conducted health and safety briefing, checked water levels in Rm3.
Water is at 102.65, called Mohsen, discussed options, decided to build well as is. Screen is 155-125. No geotechnical sample in water bearing zone collected for Rm3 due to difficulty in defining water bearing zone.
0930 - Well grant complete, setting well box.
1045 - Moved to Rm-1, sat up and hand augers to 5'.
1115 - Collecte sample Rm-1-20
1245 - Collected sample Rm-1-30, drillers took lunch.
1310 - Drillers finished lunch, continue drilling from 506.25.
1555 - Rig transmission broken, waiting for drillers to decide what to do. Founding last sample at the day at 85' dys. Filled auger out to 70', will let sit overnight to see if any water in borehole tomorrow morning. Clean up.
1645 - Depart site  10.5 hrs
0630 - Depart for site

0630 - Arrive on site, met drillers, met Peter Lee. Checked RM-1 borehole for water.

0725 - No water in borehole, emailed Mohsen.

Pulling auger, covering borehole with steel plate.

0830 - Auger pulled, borehole covered.

DR = 3.5 hrs

Monday March 7

0530 - Depart for site

0620 - Arrive on site, waiting for 5' drillers.

0644 - 5' drill chase truck arrives on site.

0655 - 5' drill rig arrives on site. Conducted health and safety meeting and set up an boring RM-1, checked to see if any water in boring. Water at 76.5 feet. Saturated zone less than 4' thick. Called Mohsen.

He said he drill to 91' and call him back.

0720 - City of Malibu Public Works came by, said we have to move our wheels off shoulder behind telephone poles to stay on property. Said we could get an encroachment permit if needed. Travis Hart was the inspector.

0930 - at 91'5". Called Mohsen, discussed options.

Decided to set well at 91'6.5".

1150 - Well set. Loading equipment, washing augers, moving to RM-4.
Notes:

1245 - Set up at Rm-4. Begin handing over to 5-bgs.

1320 - Peter Lee arrived on site. Drillers to lunch.
1400 - Collected Rm-4-20
1510 - Collected Rm-4-50
1640 - Drilled to 80', cleaned up and
1710 - Depart site

Apr 14
0630 - Depart for site
0645 - Arrive on site. Waiting for drillers and Peter Lee.
0700 - Drillers arrive on site. Conduct health and safety meeting. Move to Rm-4. Began drilling from 80' bgs.
1325 - Hit a saturated layer - removed at 125'-128' bgs. Called Mohsen. He said to stop continuous sampling and go to 135'. Then pull up and wait till tomorrow am.
1345 - Hit saturated layer at 135'. Called Mohsen back. Decided to drill 15' into saturated layer then set well.
1500 - Drilled to 145' bgs. No longer saturated. Borehole to hot to set well. Pulling up auger and return am to set well.

DR 9 hrs
Daily Log

Project Number: 1073.01  Project Name: Rancho Malibu  Project Location: Malibu CA
Date: 4-9-14  Field Personnel: TL/DR

Notes:
0630 - Depart for site
0650 - Arrive on site, met drillers and Peter Lee, moved to Rm-4.
0710 - Water level in borehole at 141.5', cleaning out borehole and setting well.
0945 - Rm-4 well set, cleaning up and moving to Rm-5.
1025 - Arrived at Rm-5. Preparing site and hand augering to 5'.
1125 - Collected sample Rm-5-20
1155 - Encountered large rock in Rm-5 at 40' bgs. Trying to drill through.
1240 - Drillers break for lunch, collected Rm-5-50
1305 - Break over, drilling from 50'
1430 - At 75' bgs. Now sampling continuously in search of saturated zone.
1630 - At 90' bgs. No water yet, stopped drilling for the day and pulled up to 75' bgs to see if any water flows in overnight. Depart site. OR 10:15 hrs

10 April 14
0640 - Depart for site
0710 - Arrive on site, met drillers and Peter Lee. Conducted health and safety meeting. Continued drilling continuously from 90' bgs.
1245 - Drillers break for lunch at 120'; pulled up to 100' to see if any water entered borehole.
1320 - No water in borehole after 30 minutes. Decided to drill down to 180' continuously, then check again.
1073.01 - Project Name: Rancher mahon  
Date: 4-10-14  
Field Personnel: DR/PE

Notes:
1050 - Thought we may have hit water at 127' bgs. but 129 sample was dry. Called Mahon.
Decided to drill to 140' bgs. Let borehole sit overnight, and check in am. Drilling to 140, sampling changed to every 5'.
1630 - At 137. Driller says he will not be able to get to 140. Collecting sample. Pulling up auger to 110.'
1645 - DR reports site.

4-11-14
0630 - Report for site
0650 - Arrive on site, meet drillers. Conducted health and safety meeting, checking water level in RM-5. 2' of water in borehole.
0715 will attempt to drill to 140' bgs. for 2 hrs
0812 - Collected RM-5-140 sample.
Will begin building cell.
1120 - Cell is in. Set at 140' bgs. Peter Lee staying for clean up
1130 - Depart site for home
1350 - Arrived Westminster

DR 10.5 hrs

Notes: 3 volumes: 123.38' > 16.72' Volume: 2.68

Date: 4/24/14

Well No: KM-5

Project Location: Madera, CA

Project Name: Green Acres LLC

FIELD GROUND WATER MONITORING FORM
0900 Arrived on-site and conduct HASP
0915 Begin GW level measurements - all 5 wells
0850 Setup and begin purging at RM-1
0919 RM-1 went dry after 21 gallons (≈ 2.3 purge volumes)
0950 moved to RM-3 and begin purging
1008 RM-3 went dry after 20 gallons (≈ 1.4 purge volumes)
1038 moved to RM-2 and begin purge
1058 completed purging 3 volumes and collected GW sample RM-2
1141 went back to RM-3 and collected sample RM-3
1158 collected GW sample RM-1
1406 Samples delivered to Calscience
0630 Arrived on Site conducted HASP
0710 Begin purging at RM-4
0732 The well went dry after 22 gallons (~2.6 purge volume)
0830 Moved to RM-5 and began purging
0850 Well went dry after 6 gallons (~2.2 purge volume)
wait for recharge

0938 Collected GW sample RM-4
1010 ** ** RM-5

1234 GW samples delivered to Calscience.
