State Route 1 (Pacific Coast Highway) Drainage Restoration Project & Bridge Replacement at Solstice Canyon Creek

Notice of Public Hearing and Notice of Availability (NOA) of Draft Initial Study/Environmental Assessment (IS/EA)

WHAT'S BEING PLANNED? The California Department of Transportation (Caltrans) proposes a drainage restoration project at nineteen (19) locations on State Route 1 (Pacific Coast Highway) in the cities of Los Angeles, Malibu, and unincorporated areas within Los Angeles County (post miles 37.60 to 62.86) and Ventura County (post miles 0.00 to 0.92). The proposed improvements include repair and rehabilitation of existing drainage facilities along the route to restore full functionality, to prevent further deterioration, and ensure proper drainage in an area subject to erosion. The proposed improvements also include the replacement of the existing bridge/culvert at Solstice Canyon Creek with a new bridge structure with an underlying natural slope creek bottom to provide improved flood water conveyance, and to improve hydraulic conditions to facilitate movement of the endangered Southern steelhead trout population in the project study area. Caltrans is the lead agency under the National Environmental Policy Act (NEPA) under Caltrans' assumption of responsibility pursuant to 23 U.S.C. 327, and the lead agency under the California Environmental Quality Act (CEQA).

WHY THIS NOTICE? Caltrans has studied the effects that the proposed project may have on the environment and community. The results of these studies are contained in an environmental document known as a Draft Initial Study/Environmental Assessment (IS/EA). The purpose of this notice is to inform the public of its completion and availability to any interested individuals.
