## POST-FIRE TEMPORARY FENCING

December 14, 2018  
Planning Department

Properties that had damage as a result of the Woolsey Fire may be secured with temporary fencing without a permit, provided the fencing meets the following requirements:

1. The temporary fencing is installed only on the property owner's private property, and that is on the damaged or destroyed properties list. This list has been generated by the City based on site inspections and photo documentation conducted by building inspectors.
2. The temporary fencing secures developed areas of the property, meaning the building pad(s) and any swimming pool or spa.
3. The fencing is chainlink and visually permeable ("see-through," with no opaque covering), and may not include barbed wire.
4. The temporary fencing is no taller than six feet maximum and does not have permanent footings, such as concrete.
5. The temporary fencing shall not extend into public right-of-way.
6. The temporary fencing may remain for the duration of the fire rebuild rules determined by the City Council. These rules, in the form of a municipal code ordinance, are expected to be considered in the upcoming weeks.
7. Any other fencing requires a Planning Department approval. Please visit the Planning Department public counter when City Hall reopens.

Please sign up for alerts. This is how the City is communicating rebuild and other information to people as soon as we have it ready.
