INTRODUCTION

This report provides an analysis of the financial and administrative obligations of Assessment District No. 98-3 (Malibu Road) ("AD No. 98-3" or the "District") to be paid through the collection of assessments in fiscal year (FY) 2019-2020.

This report is organized into the following sections:

Section I – Background

Section I provides information regarding the formation of AD No. 98-3 and the facilities financed.

Section II - Facilities and Maintenance Financed

Section II provides information regarding the facilities and maintenance financed by AD No. 98-3.

Section III - Cost Estimate

Section III presents the projected budget for FY 2019-2020, the budget for FY 2018-2019, and projected year-end costs for maintenance of the landslide maintenance facilities.

Section IV - Annual Assessments

Section IV contains the proposed assessment of the total FY 2019-2020 maintenance costs upon the parcels within AD No. 98-3 in proportion to the estimated benefits to be received by such parcels from said maintenance, and a reduced copy of the assessment diagram.

I BACKGROUND

On February 26, 1981, the Board of Supervisors of the County of Los Angeles (the "Board") established County Service Area (CSA) No. 2 pursuant to the County Service Area Law (Government Code Sections 25210.1 et. seq.). CSA No. 2 was formed to provide a source of funding for the installation of a system of permanent pumps for wells (installed in response to the 1978 storms) and other facilities in addition to funding the maintenance of these wells and facilities. Upon incorporation of the City of Malibu, the CSA ceased to exist, and the City became responsible for the operation and maintenance of these facilities.

As part of the City's maintenance of the existing system of improvements, the City's Geotechnical Consultant monitors ground movement, dewatering activities, groundwater levels, and water usage within AD No. 98-3. As a result of the intense winter storms of 1997-98, the City's Geotechnical Consultant recommended new analysis of the reactivated landslide plane and reconstruction of the existing dewatering and monitoring system, including installation of the following: a new surface conveyance line, additional dewatering wells, hydraugers, and slope inclinometers.

On June 29, 1998, the City Council of the City of Malibu held a public hearing regarding the Resolution of Intention and Engineer's Report for the reconstruction and annual maintenance of these improvements by AD No. 98-3. A majority of the assessment ballots tabulated at the public hearing were in favor of the assessment and a Resolution approving the Engineer's Report, confirming the assessments, and ordering the construction of the improvements was adopted.

II FACILITIES AND MAINTENANCE FINANCED

The City proposes to levy assessments in FY 2019-2020 to finance the inspection, maintenance and repair of the following facilities and activities:

- Dewatering wells (10 each);
- Monitoring wells (9 each);
- Hydraugers (23 each);
- Slope inclinometers (5 each);
- Multi-stage piezometers (8 each);
- Drainage swales inspection;
- Energy costs; and
- Ground crack observations.

The City of Malibu contributes the costs of the following activities to Assessment District No. 98-3:

- Weed abatement;
- Storm drain cleaning; and
- Road maintenance and crack sealing on public roads.

III COST ESTIMATE

The maximum annual assessment for FY 2019-2020 is \$570.03 per benefit assessment unit, which reflects an increase of 2.71% or the percentage change in the Consumer Price Index, All Urban Consumers, Los Angeles-Long Beach-Anaheim, CA. The maximum annual increase in the maximum assessment is limited to 5.00%. The benefit assessment units applicable to each parcel depend upon land use.

The FY 2019-2020 budget is \$77,282, which consists of costs for operation/maintenance, replacement/special projects, energy, and administration. This is based on projected needs for an average rainfall year. In addition to estimated costs, the assessment levy includes reserves to cover possible expenses associated with an above-average rainfall year and delinquent assessments. Any funds not used in the current year are held in the assessment district account and applied to the next fiscal year. The total desired reserve amount equals approximately \$67,132 or 86.87% of the estimated FY 2019-2020 budget (100.00% of costs for operation/maintenance and replacement/special projects for an above-average rainfall year and 2.00% of the total assessment for delinquency contingency based upon the FY 2018-2019 delinquency rate). The total amount necessary to cover the budget and reserves is \$144,414; subtracting from this amount the estimated FY 2018-2019 year-end fund balance of \$62,758 results in a desired assessment levy of \$81,656. This exceeds the maximum assessment revenues of \$57,003 by \$24,653. Therefore, it is estimated that only \$42,479 of the \$67,132 in desired reserves will be funded.

The number of benefit assessment units applicable to each parcel depends upon location and land use. Properties located within Zone A are assigned benefit assessment units for both slide protection and road access. Properties located within Zone B are assigned benefit units for slide protection only. A comparison of FY 2019-2020 and FY 2018-2019 assessment amounts by zone and for selected land uses is shown in Table 1 below.

Table 1: Summary of Annual Maintenance Assessment

Zone/Land Use	Benefit Units	Actual Annual Assessment		Maximum Annual Assessment	
		FY 2019-2020	FY 2018-2019	FY 2019-2020	FY 2018-2019
Zone A – Protection & Access					
Single Family Home	2.00	\$1,140.06	\$1,109.98	\$1,140.06	\$1,109.98
Condominium/Apartment	1.65	\$940.55	\$915.73	\$940.55	\$915.73
Zone B –Protection Only					
Single Family Home	1.00	\$570.03	\$554.99	\$570.03	\$554.99
Condominium/Apartment	0.65	\$570.03	\$554.99	\$570.03	\$554.99
Total Budget		\$57,003.02	\$55,498.96	\$57,003.02	\$55,498.96
Total Benefit Units		100.00	100.00	100.00	100.00

The proposed budget, current budget, and projected year-end costs are itemized in Appendix A.

IV ANNUAL ASSESSMENTS AND ASSESSMENT DIAGRAM

A Annual Assessments

Pursuant to the provisions of law, the costs and expenses of the facilities inspections, maintenance, and repair to be performed in AD No. 98-3 have been assessed to the parcels of land benefited thereby in direct proportion and relation to the estimated benefits to be received by each of said parcels. For particulars as to the identification of said parcels, reference is made to the Assessment Roll, a copy of which is attached hereto as Appendix B. For particulars as to the determination of benefit, reference is made to the Method of Assessment, a copy of which is attached hereto as Appendix C.

B Assessment Diagram

The assessment diagram is attached hereto as Appendix D.

1.	Beginning Fund Balance (Audited)	\$60,401
2.	Assessment Proceeds ²	\$54,389
3.	Total FY 2018-2019 Resources Available (Line 1 + Line 2)	\$114,790
FY 2018-2019 Expenditures		
4.	Operation & Maintenance and Other Expenditures (Projected)	(\$52,032)
5.	FY 2018-2019 Ending Fund Balance (Line 3 + Line 4)	\$62,758
FY 2019-2020 Expenditures		
6.	Estimated Operation/Maintenance and Replacement/Special Projects (See attached FY 2019-2020 Cost Estimate)	(\$65,500)
7.	Estimated City Administration and Energy Costs (See attached FY 2019-2020 Cost Estimate)	(\$11,782)
8.	Reserve Amount (64.85% x Line 6) ³	(\$42,479)
9.	Delinquency Contingency (0.00% x Line 11) ⁴	\$0
10.	Total FY 2019-2020 Expenditures	(\$119,761)
11.	Assessment⁵	\$57,003
12.	Estimated FY 2019-2020 Surplus/(Deficit) (Line 5 + Line 10 + Line 11)	\$0

¹ Numbers in parentheses represent expenditures. Positive numbers represent revenue sources.

² Reflects the estimated assessment revenue collected by the County Tax-Collector through April 24, 2019.

³ Desired reserve amount for above average rainfall and other unknowns is equal to 100.00% of estimated expenditures. The actual funded reserve amount is equal to 64.85% of FY 2019-2020's estimated expenditures.

⁴ Desired delinquency contingency is equal to 2.00% (FY 2018-2019 delinquency rate) multiplied by FY 2019-2020's assessment. No delinquency contingency is anticipated to be funded for FY 2019-2020.

⁵ Represents maximum assessment permitted under existing Proposition 218 authorization.

APPENDIX C

City of Malibu
Assessment District No. 98-3
Malibu Road
Annual Assessment Report
(Fiscal Year 2019-2020)

METHOD OF ASSESSMENT APPORTIONMENT

Exhibit C
Annual Assessment Report
Assessment District No. 98-3
(Malibu Road)
For Fiscal Year 2019-2020

Method of Spread of Assessment

Assessments levied pursuant to the Municipal Improvement Act of 1913 (hereinafter referred to the "Act") must be based on the benefit which each property receives from the system of improvements. Furthermore, as a result of Proposition 218, more stringent standards have been imposed for determining benefit. For example, Proposition 218 requires that special and general benefits be separated, with the amount of any assessment limited to the special benefits so conferred. Neither the Act nor Proposition 218 specify the method or formula for apportioning benefit or distinguishing special from general benefits.

Identification of the benefit the reconstruction and maintenance of the system of improvements will render to the properties in the Assessment District is the first step in developing the assessment spread methodology. The next step is to determine if the properties in the Assessment District receive a direct and special benefit from the system of improvements which is distinct from benefit received by the general public. For this Assessment District these determinations were made by David Taussig & Associates, the Assessment Engineer; in consultation with the City's Geotechnical Consultant; and the City of Malibu Public Works Department.

Project Need

The primary purpose of the dewatering and monitoring system to be reconstructed and maintained by the AD No. 98-3 is the reduction of groundwater from rainfall and residential effluent percolating down to the slide plane. This reduction in groundwater stabilizes the landslide outlined on the assessment diagram attached as Exhibit D. Stabilization of the landslide plane provides two distinct types of benefit to property within AD No. 98-3: protection of the property (i.e. the parcels) located on the slide plane and protection of the roads within the District.

Assessment District Boundary

The District boundary as shown in Exhibit D was established to encompass those properties which are specifically benefited by the system of improvements. This includes all properties which are located in whole or in part within the ancient landslide area and all properties which are accessed via streets within the landside area.

Specific Benefit

The system of improvements to be installed and maintained by the District specifically benefit the properties within the District in two distinct ways: protection of the property and protection of the roads. First, the dewatering system protects properties located within the ancient slide boundary by reducing the risk and degree of damage or distress suffered from slope failure and/or movement (the "protection" benefit). Second, access is maintained for those properties which are reached using roads affected by the slide (the "access" benefit). The benefits associated with Protection and Access are deemed to be equal, since

use of the property cannot be fully enjoyed without either one.

Malibu Road is currently a one-way road conveying traffic to the west. However, in the event the road was blocked by a landslide event, the traffic pattern could be changed to allow access from the east, to properties located west of the slide area. Therefore, there is no general benefit to the public and the Access benefit is specific to the properties within the slide area. Clearly, stabilization of the slide confers a special benefit enjoyed only by the properties which may be impacted by slope failure or movements. The April 1998 analysis prepared by City's Geotechnical Consultant, indicates the impacted properties are all located either within or on the slide boundary, or are located within the ancient slide boundary and would become unstable in the event of a landslide.

Method of Assessment

After the boundary of the District has been established and the determination of specific benefits has been made, the assessment to individual properties must be determined. As previously discussed, there are two types of direct and special benefit conferred upon property within the District, Protection and Access. Since not all properties receive both benefits, two zones have been established to distinguish those properties which only receive Access benefits from those which are within or on the ancient slide boundary and receive Protection benefits and Access benefits. Zone A encompasses those properties which receive both Protection and Access benefits, whereas Zone B encompasses those properties which receive Protection benefits only.

Protection benefits are allocated based on land use designation. The reason for this allocation is twofold. First, the proposed system of improvements has been sized to provide adequate dewatering capacity at full buildout. Second, the Protection benefit conferred upon each parcel of property is a function of each parcel's land use designation and number of dwelling units. Each dwelling unit is deemed to be equally protected, therefore, no differentiation is made between single family or condominium/apartment units. For purposes of assigning Protection Benefits to each parcel, one dwelling unit equals one Benefit Assessment Unit (BAU).

Access benefits are allocated to each parcel of land based on the estimated number of trips for that parcel's land use designation. Trip factor source data are from the Institute of Transportation Engineers Trip Generation study (5th Edition). The trip generation factors are shown below:

Table 1: Trip Generation Factors and Benefit Assessment Units

Land Use	Average Weekday Trips/Units	Benefit Assessment Units (BAUs)
Single-Family	9.55	1.00
Condominium/Apartment	6.23	0.65

Examples of Assignment of Benefit Assessment Units

Examples of the assignment of benefit assessment units are provided below for four different parcels: (1) a single family residential parcel in Zone A, (2) a single family residential parcel in Zone B, (3) a parcel with a single condominium unit in Zone A, and (4) a parcel with four apartment units in Zone A.

- 1) Single Family Residential Parcel in Zone A

BAU for Protection Benefit	1.00
BAU for Access Benefit	<u>1.00</u>
Total BAUs	2.00

- 2) Single Family Residential Parcel in Zone B

BAU for Protection Benefit	1.00
BAU for Access Benefit	<u>0.00</u>
Total BAUs	1.00

- 3) Parcel with Single Condominium Unit in Zone A

BAU for Protection Benefit	1.00
BAU for Access Benefit	<u>0.65</u>
Total BAUs	1.65

- 4) Parcel with Four Apartment Units in Zone A

BAU for Protection Benefit	4.00 (4 units X 1 BAU/unit)
BAU for Access Benefit	<u>2.60</u> (4 units X 0.65 BAU/unit)
Total BAUs	6.60

Exemption from Annual Assessment

Any property within the District that is restricted in use as open space or against which a deed restriction preventing development is recorded may be deemed exempt from the levy of annual maintenance assessments by the City Council of the City of Malibu.
