## Delta Revision Worksheet - Building Plan Review

Plan Check Submittals for structural and/or architectural revisions are required to have all areas of the revisions clearly identified by clouding the specific area on your plans. Each submittal must also be identified by the revision number identified as a Delta Number. The Delta Number must be adjacent to the clouded area of the structural revision and must be noted on the title block of the page with the specific date of the revision. All revisions noted with a Delta Number must be sequential. It is acceptable to submit multiple sequential Delta revisions on a single revision application. Failure to clearly identify the areas of revision by appropriate clouding and indication of Delta revision numbers will result in rejection of the resubmittal. Submit architectural revisions to the Planner of record prior to submitting for building plan review.
